FILE MAINTENANCE (COMPUTERS)
DOS basics
[DE94-018434] p 1455 N95-21632
FILLETS
Effect of juncture fillets on double-delta wings undergoing sideslip at high angles of attack
[AD-A286165] p 1207 N95-22039
FILM THICKNESS
Enhanced ionic conduction at the film/substrate interface in LiI thin films grown on sapphire(0001)
[DE94-017884] p 1565 N95-20371

FILTERS

Using local optimality criteria for efficient information retrieval with redundant information filters [AD-A279603] p 1587 N95-20302

FILTRATION

Ceramem filters for removal of particles from hot gas streams [DE95-001976] p 1275 N95-21354

Development and applications of flat ceramic membranes [PB95-110219] p 1276 N95-21650

FINANCE

Patterns of financial change in the OECD area [PB95-110979] p 1594 N95-19939

FINANCIAL MANAGEMENT

Planning and scheduling for success p 1584 N95-20747

A strategy of cost control for Mariner Venus/Mercury 1973 p 1585 N95-20751

FINE STRUCTURE

A new family of anion receptors and their effects on ion pair dissociation and conductivity of lithium salts in non-aqueous solutions [DE94-016822] p 1512 N95-20477

Semantics for a fine lambda-calculus with de Bruijn indices [PB95-127577] p 1492 N95-21372

FINITE DIFFERENCE THEORY

A S2-like acceleration method for the Nonlinear Characteristic transport scheme [DE94-016285] p 1509 N95-20235

A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas [DE94-016447] p 1551 N95-20315

A theoretical study on the performance of the FDTD code on a massively parallel computer [AD-A285346] p 1475 N95-20499

Xwake 1.0 user's manual [DE95-002528] p 1463 N95-20901

A computer code (SKINTEMP) for predicting transient missile and aircraft heat transfer characteristics [AD-A286044] p 1341 N95-21001

VLUGr3: A vectorizable adaptive grid solver for PDEs in 3D. 2: Code description [PB95-135737] p 1465 N95-21033

Vortex ring instability and its sound p 1344 N95-21048

Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063

Simulation of separated flows p 1347 N95-21068

Analysis of subgrid models using direct and large-eddy simulations of isotropic turbulence p 1348 N95-21071

Computation of transonic flow on composite overlapping grids in 2 D [PB95-131348] p 1353 N95-21132

Computational modeling of diffusion-controlled transformations in ternary systems [DE95-001358] p 1256 N95-21298

VLUGR3: A vectorizable adaptive grid solver for PDEs in 3D. 1: Algorithmic aspects and applications [PB95-135729] p 1467 N95-21435

Numerical investigations of low-density nozzle flow by solving the Boltzmann equation [NASA-TM-110492] p 1354 N95-21675

On the wavelet optimized finite difference method [NASA-CR-191601] p 1495 N95-22157

Local dynamic subgrid-scale models in channel flow p 1360 N95-22447

FINITE ELEMENT METHOD

Inelastic bending and torsion of steel I-beams [PB94-208378] p 1384 N95-19975

Finite dimensional approximation of a class of constrained nonlinear optimal control problems [NASA-CR-194891] p 1479 N95-20010

A-posteriori estimation and adaptive control of the pollution-error in the h-version of the finite element method [AD-A285670] p 1480 N95-20083

Nonlinear dynamic fluid-structure interaction calculations with coupled finite element and finite volume programs [DE94-016204] p 1339 N95-20166

The method of auxiliary mapping for the finite element solutions of elasticity problems containing singularities [AD-A285689] p 1489 N95-20274

Simulation of large systems with neural networks [DE94-018898] p 1428 N95-20319

An overview of the HSST Full-Thickness Shallow-Crack Clad Beam Testing Program [DE94-018940] p 1385 N95-20322

RALPAR-RAL mesh partitioning program version 1.1 [PB95-129847] p 1475 N95-20435

Eta%-Superconvergence of Finite Element Approximations in the Interior of General Meshes of Triangles [AD-A279903] p 1490 N95-20565

Study of superconvergence by a computer-based approach: Superconvergence of the gradient of the displacement, the strain and stress in finite element solutions for plane elasticity [AD-A279885] p 1490 N95-20588

The numerical integration and 3-D finite element formulation of a viscoelastic model of glass [DE95-002588] p 1271 N95-20788

An augmented Young-Laplace model of an evaporating meniscus in a micro-channel with high heat flux [NASA-CR-197622] p 1340 N95-20796

Geometric moire method of strain analysis with displacement discontinuities [DE95-001114] p 1386 N95-20833

COYOTE II: A finite element computer program for nonlinear heat conduction problems. Part 1: Theoretical background [DE95-002587] p 1463 N95-20887

A convergence analysis of an h-version finite element method with high order elements for two dimensional elasto-plasticity problems [AD-A279975] p 1491 N95-20920

Mixed hp finite element methods for problems in elasticity and stokes flow [PB95-104444] p 1341 N95-20981

Simulation of separated flows p 1347 N95-21068

Vibration analysis of the AN/SPS-67(V)3 surface search radar [AD-A286050] p 1302 N95-21324

Finite element modelling of creep crack growth in 316 stainless and 9Cr-1Mo steels [DE94-018977] p 1258 N95-21560

DIFFPACK: Software for partial differential equations [PB95-110268] p 1468 N95-21654

The role of microcracking on the crack growth resistance of brittle solids and composites [DE95-001678] p 1231 N95-21736

Right inverse for the divergence operator in spaces of continuous piecewise polynomials [PB95-127080] p 1496 N95-22369

Locking of the finite element method in thermoelasticity [PB95-127098] p 1496 N95-22370

Multi signal-domain modeling of solid-state transducers: A theoretical framework based on irreversible thermodynamics mixed finite elements and multigrid [PB95-134995] p 1336 N95-22382

Pollution error in the H-version of the finite element method and the local quality of A-posteriori error estimators [AD-A279868] p 1497 N95-22388

Unstructured-grid large-eddy simulation of flow over an airfoil p 1202 N95-22448

FINNISH SPACE PROGRAM

Preliminary study of HUTSAT microsatellite [PB95-127619] p 1220 N95-21026

FIR FILTERS

Digital filtering for data compression in telemetry systems [DE94-016611] p 1219 N95-20567

FIRE CONTROL

Annual Conference on Fire Research: Book of abstracts [PB95-104964] p 1286 N95-20717

FIRE EXTINGUISHERS

A review of water mist technology for fire suppression [AD-A285738] p 1202 N95-20071

The development and evaluation of water-mist fire extinguishing systems [DE94-019019] p 1286 N95-20356

Training simulant for Halon 1211 portable extinguishers [AD-A285403] p 1286 N95-20611

Evaluation of state-of-the-art high speed deluge systems presently in service at various US Army ammunition plants [AD-A279102] p 1287 N95-21598

FIRE FIGHTING

A review of water mist technology for fire suppression [AD-A285738] p 1202 N95-20071

Global equivalence ratio concept and the prediction of carbon monoxide formation in enclosure fires [PB94-207511] p 1234 N95-20100

Training simulant for Halon 1211 portable extinguishers [AD-A285403] p 1286 N95-20611

Evaluation of state-of-the-art high speed deluge systems presently in service at various US Army ammunition plants [AD-A279102] p 1287 N95-21598

Analysis of test criteria for specifying foam firefighting agents for aircraft rescue and firefighting [AD-A286381] p 1203 N95-22352

FIRE PREVENTION

The development and evaluation of water-mist fire extinguishing systems [DE94-019019] p 1286 N95-20356

Annual Conference on Fire Research: Book of abstracts [PB95-104964] p 1286 N95-20717

FIREDOC users manual, 3rd edition [PB95-128674] p 1286 N95-21129

FIRES

Investigation of flight data recorder fire test requirements [AD-A285832] p 1208 N95-20032

Global equivalence ratio concept and the prediction of carbon monoxide formation in enclosure fires [PB94-207511] p 1234 N95-20100

The effect of regional-scale soil-moisture deficits on mesoscale atmospheric dynamics that influence fire severity [DE95-002682] p 1413 N95-20455

Summaries of BFRL fire research in-house projects and grants, 1994 [PB95-130845] p 1286 N95-21130

Fire experiments in a two dimensional rack storage: BRANDFORSK-project 701-917 [PB95-131538] p 1241 N95-21179

Ignition of submarine materials at various oxygen concentrations [PB95-131371] p 1243 N95-21428

Fire smoke ventilation through shafts: Experiments [PB95-132247] p 1288 N95-21978

Fuselage burnthrough from large exterior fuel fires [AD-A286295] p 1203 N95-22318

FIRING (IGNITING)

Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards [DE95-002486] p 1283 N95-21513

FISCHER-TROPSCH PROCESS

Technology development for cobalt F-T catalysts [DE94-017363] p 1241 N95-21172

FISHERIES

Aquatic plant control research program. Ecological assessment of Kirk Pond [AD-A279090] p 1409 N95-21914

FISHES

Long term changes on the continental shelf of the North Sea: Invertebrate trends, 1931-1990 [PB95-135224] p 1435 N95-21717

FISSION

Reactor pumped laser research at the Sandia National Laboratories pulsed reactor facilities [DE95-002181] p 1371 N95-20867

FIXTURES

Vacuum holding fixture and method for fabricating piezoelectric polymer acoustic sensors [NASA-CASE-LAR-14240-1] p 1268 N95-20410

Test fixture for determination of energy absorbing capabilities of composite materials [NASA-CASE-LAR-15212-1-CU] p 1229 N95-21008

FLAME PROPAGATION

Proceedings of the Zel'Dovich Memorial International Conference on Combustion, Detonation, Shock Waves, volume 2 [AD-A286626] p 1239 N95-20769

Passive turbulent flamelet propagation p 1249 N95-21043

Summaries of BFRL fire research in-house projects and grants, 1994 [PB95-130845] p 1286 N95-21130

Studies in nonlinear problems of energy [DE95-001387] p 1356 N95-22148

Fuselage burnthrough from large exterior fuel fires [AD-A286295] p 1203 N95-22318

Lewis number and Damkohler number effects in vortex-flame interactions p 1249 N95-22439

Fundamental mechanisms in premixed flame propagation via vortex-flame interactions: Numerical simulations p 1249 N95-22440

Triple flames and flame stabilization p 1249 N95-22441

Flame propagation under partially-premixed conditions p 1250 N95-22442

FLAME STABILITY

Triple flame structure and diffusion flame stabilization p 1249 N95-21039

Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames [DE95-002481] p 1243 N95-21512

Triple flames and flame stabilization p 1249 N95-22441

Flame propagation under partially-premixed conditions p 1250 N95-22442

FLAMES

Global equivalence ratio concept and the prediction of carbon monoxide formation in enclosure fires [PB94-207511] p 1234 N95-20100

Fire experiments in a two dimensional rack storage: BRANDFORSK-project 701-917
[PB95-131538] p 1241 N95-21179
Aromatics oxidation and soot formation in flames
[DE95-001803] p 1241 N95-21280
Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames
[DE95-002481] p 1243 N95-21512
Analysis of cost: Combustion flame CVD diamond deposition
[AD-A279153] p 1278 N95-21973

FLAMMABILITY
Round-robin comparison of heat release apparatus
[AD-A285831] p 1363 N95-20031
Investigation of flight data recorder fire test requirements
[AD-A285832] p 1208 N95-20032
Summaries of BFRL fire research in-house projects and grants, 1994
[PB95-130845] p 1286 N95-21130
Ignition of submarine materials at various oxygen concentrations
[PB95-131371] p 1243 N95-21428
Fuselage burnthrough from large exterior fuel fires
[AD-A286295] p 1203 N95-22318

FLAT PLATES
Comparison of DNS and LES of transitional and turbulent compressible flow: Flat plate and mixing layer
p 1347 N95-21066
Numerical simulation of supersonic boundary layer transition p 1348 N95-21074
Navier-Stokes simulations of the effects of suction holes on a flat plate boundary layer p 1352 N95-21094
Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble
p 1352 N95-21095
The Photovoltaic Higher Education National Exemplar Facility (PHENEF)
[DE94-015641] p 1395 N95-21409

FLAVOR (PARTICLE PHYSICS)
Neutrino-neutrino scattering and matter-enhanced neutrino flavor transformation in supernovae
[DE94-017577] p 1604 N95-20383
Universal parametrization for quark and lepton substructure
[DE94-770604] p 1514 N95-20738
Theoretical particle physics
[DE95-002447] p 1515 N95-20893
Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section
[DE95-002524] p 1515 N95-20897
Calculation of Z plus four jet production at the Tevatron
[PB95-130472] p 1580 N95-21230
There might be two kinds of dibaryon
[DE94-014417] p 1526 N95-22058
Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064
The solar flux of thermal neutrinos and antineutrinos of all flavors
[DE95-003204] p 1604 N95-22085

FLEXIBILITY
The ANL X6B beamline at NSLS: A versatile facility
[DE94-018379] p 1540 N95-19968
Planning and scheduling for success
p 1584 N95-20747

FLEXIBLE BODIES
Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 1: Main lectures
[AD-A286062] p 1380 N95-21171
Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 2: Contributed papers
[AD-A286063] p 1381 N95-21488

FLEXIBLE SPACECRAFT
Mathematical modeling of a class of multibody flexible spacecraft structures
[NASA-TM-109166] p 1219 N95-20800

FLEXING
Effect of fiber fabric orientation on the monotonic and fatigue behavior of a continuous fiber ceramic composite
[DE94-018121] p 1271 N95-20700
Fabrication of ceramic composites: Forced CVI
[DE95-001076] p 1271 N95-20821

FLICKER
Space constancy on video display terminals
[AD-A280015] p 1449 N95-20314

FLIGHT CHARACTERISTICS
T-45A High Angle of Attack Testing: US Naval Test Pilot School 46th Annual Reunion and Symposium
[AD-A284000] p 1207 N95-20466

FLIGHT CONDITIONS
Derived gust spectra for the Macchi MB326H
[ARL-TN-3] p 1202 N95-21892

FLIGHT CONTROL
Summary of a joint program of research into aircraft flight control concepts
[AD-A280012] p 1214 N95-20004
A neural expert approach to self designing flight control systems
[AD-A279965] p 1215 N95-21122
Launch vehicle flight control augmentation using smart materials and advanced composites (CDDF Project 93-05)
[NASA-TP-3535] p 1218 N95-21346

FLIGHT CREWS
Behavioral effects of tyrosine during sustained wakefulness
[AD-A279789] p 1441 N95-20307
Occupant reach and mobility apparatus
[AD-D016253] p 1454 N95-22099

FLIGHT MANAGEMENT SYSTEMS
Crew aiding and automation: A system concept for terminal area operations, and guidelines for automation design
[NASA-CR-4631] p 1204 N95-19950

FLIGHT OPERATIONS
Behavioral effects of tyrosine during sustained wakefulness
[AD-A279789] p 1441 N95-20307

FLIGHT PATHS
Comparison of meteorological data with fitted values extracted from projectile trajectory
[AD-A285921] p 1428 N95-19989

FLIGHT RECORDERS
Investigation of flight data recorder fire test requirements
[AD-A285832] p 1208 N95-20032

FLIGHT SAFETY
Commuter/air taxi ditchings and water-related impacts that occurred from 1979 to 1989
[AD-A285691] p 1202 N95-20275
Helicopter crewseat cushion program
[AD-A286654] p 1452 N95-20973
Age 60 study. Part 2: Airline pilot age and performance. A review of the scientific literature
[AD-A286246] p 1447 N95-22040
Forecasting aircraft mishaps using monthly maintenance reports
[AD-A286049] p 1203 N95-22417

FLIGHT SIMULATION
Summary of a joint program of research into aircraft flight control concepts
[AD-A280012] p 1214 N95-20004
Collected papers of the Soar/IFOR project, Spring 1994
[AD-A280063] p 1216 N95-20624
Minima reduction simulation test results
[AD-A285626] p 1204 N95-21148
A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659

FLIGHT SIMULATORS
Using the backward transfer paradigm to validate the AH-64 Simulator Training Research Advanced Testbed for Aviation
[AD-A285758] p 1215 N95-19931
Summary of a joint program of research into aircraft flight control concepts
[AD-A280012] p 1214 N95-20004
Crew-Centered Cockpit Design (CCCD) field demonstration program, volume 1
[AD-A286426] p 1453 N95-21566

FLIGHT STRESS (BIOLOGY)
Command history, 1993
[AD-A279775] p 1446 N95-21989

FLIGHT TESTS
Open Skies project computational fluid dynamic analysis
[AD-A285928] p 1200 N95-19991
F-15 resource tape
[NASA-TM-110502] p 1206 N95-19994
Acoustic climb to cruise test
[NASA-TM-110504] p 1206 N95-20155
SAR image registration in absolute coordinates using GPS carrier phase position and velocity information
[DE94-018738] p 1204 N95-20195
Assessment of a non-dedicated GPS receiver system for precise airborne attitude determination
[DE94-019309] p 1205 N95-21520

FLIGHT TRAINING
Public-sector aviation issues: Graduate research award papers, 1992-1993
[PB94-217478] p 1199 N95-19967
T-45A High Angle of Attack Testing: US Naval Test Pilot School 46th Annual Reunion and Symposium
[AD-A284000] p 1207 N95-20466
A computer-based multimedia prototype for night vision goggles
[AD-A286208] p 1546 N95-21882

FLOATING
Absorbing boundary condition for floating two-dimensional objects in current and waves
[PB95-132882] p 1356 N95-22063

FLOATING POINT ARITHMETIC
A divide-and-conquer method for tridiagonalizing symmetric matrices with repeated eigenvalues
[DE95-002918] p 1476 N95-21257
A framework for symmetric band reduction and tridiagonalization
[DE95-002919] p 1476 N95-21341

FLOCCULATING
Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725

FLOODS
Monsoons: AMIP simulations of the 1987 and 1988 drought and flood regimes
[DE94-014789] p 1428 N95-20140

FLOQUET THEOREM
Instability of streamwise vortices in plane channel flows p 1344 N95-21049

FLOW CHARACTERISTICS
Simulation of pipe flow p 1349 N95-21078
Direct numerical determination of the minimum bypass Reynolds number in boundary layers
p 1349 N95-21080
Simulated rarefied entry of the Galileo probe into the atmosphere of Jupiter
[NASA-TM-110507] p 1601 N95-21621
Mantle devolatilization and rheology in the framework of planetary evolution p 1418 N95-21788

FLOW CHARTS
Algebraic semantics of message sequence charts
[PB95-110581] p 1288 N95-19890
Generalised approach to software structure metrics
[PB95-107561] p 1467 N95-21411

FLOW COEFFICIENTS
Flow coefficient behavior for boundary layer bleed holes and slots
[NASA-TM-106846] p 1338 N95-19953

FLOW DEFLECTION
Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle
[NASA-TM-4574] p 1199 N95-19913

FLOW DISTRIBUTION
Radiation from advanced solid rocket motor plumes
[NASA-CR-196554] p 1221 N95-20124
Structure and dynamics of turbulent wall layers
[AD-A285360] p 1340 N95-20547
Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10
[NASA-TP-3476] p 1340 N95-20619
16-foot transonic tunnel test section flowfield survey
[NASA-TM-109157] p 1216 N95-20669
Software for flow distribution in electronic rack structures
[AD-A285994] p 1325 N95-20715
HIVEL2D: A two-dimensional flow model for high-velocity channels
[AD-A286556] p 1341 N95-20843
Laser anemometry and viscous computation of the flow through an annular turbine cascade
[AD-A280070] p 1341 N95-20968
Wake measurements in a strong adverse pressure gradient
[NASA-CR-197272] p 1201 N95-21031
Effects of non-unity Lewis numbers in diffusion flames
p 1249 N95-21036
Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037
Direct numerical simulations of turbulent non-premixed methane-air flames modeled with reduced kinetics
p 1249 N95-21038
Triple flame structure and diffusion flame stabilization
p 1249 N95-21039
Simulation of a turbulent flame in a channel
p 1249 N95-21044
The decay of axisymmetric homogeneous turbulence
p 1343 N95-21047
Large-eddy simulation of separated flow in a ribbed duct p 1347 N95-21070
Numerical simulation of spatially-developing planar jets p 1351 N95-21087
Rib vortices in round jets: Direct and large eddy simulation p 1351 N95-21088
Nonlinear acoustic processes in a solid rocket engine
[AD-A285606] p 1222 N95-21193
The structure of turbulence and other motions beneath an air-water interface
[AD-A279838] p 1434 N95-21293

Application of Navier-Stokes code PAB3D with kappa-epsilon turbulence model to attached and separated flows [NASA-TP-3480] p 1201 N95-21338
Experiments on the flow field physics of confluent boundary layers for high-lift systems [NASA-CR-197318] p 1201 N95-21343
Triple flames and flame stabilization p 1249 N95-22441
Flame propagation under partially-premixed conditions p 1250 N95-22442
A method for obtaining a statistically stationary turbulent free shear flow p 1363 N95-22463

FLOW EQUATIONS
A control volume method on an icosahedral grid for numerical integration of the shallow-water equations on the sphere [DE94-016345] p 1489 N95-20170
On the transition towards slow manifold in shallow-water and 3D Euler equations in a rotating frame p 1345 N95-21057
Application of Roe's flux-difference splitting for kappa-epsilon turbulence model [PB95-127718] p 1352 N95-21106
Application of Navier-Stokes code PAB3D with kappa-epsilon turbulence model to attached and separated flows [NASA-TP-3480] p 1201 N95-21338
Preconditioning via asymptotically-defined domain decomposition [DE94-019046] p 1493 N95-21564

FLOW MEASUREMENT
Transverse vorticity measurements in the NASA Ames 80 x 120 wind tunnel boundary layer p 1362 N95-22457

FLOW STABILITY
Numerical study of realistic perturbations in three-dimensional boundary layers p 1351 N95-21091
Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble p 1352 N95-21095
Instabilities in natural-convection flows in cavities [PB95-107975] p 1354 N95-21578
Fourth International Symposium on Stratified Flows, volume 1 [AD-A286450] p 1354 N95-21583
Stability effects on the profiles of vertical velocity and its variance in katabatic flow [DE95-001126] p 1426 N95-21836
Nonlinear interaction between a pair of oblique modes in a supersonic mixing layer: Long-wave limit [NASA-CR-197380] p 1357 N95-22173

FLOW THEORY
Robust fixed-structure control [AD-A286515] p 1485 N95-22216

FLOW VELOCITY
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas [DE94-016447] p 1551 N95-20315
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames [AD-A279945] p 1238 N95-20581
Simulation of pipe flow p 1349 N95-21078
Entrainment in a shear-free turbulent mixing layer p 1350 N95-21083
The effect of initial conditions on the development of temporally evolving planar three dimensional incompressible wakes p 1350 N95-21085
Direct simulation of tridimensional wake of NACA 0012 profile p 1350 N95-21086
Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble p 1352 N95-21095
New theory of critical flow velocities in superfluid helium [PB95-130365] p 1571 N95-21228
Mixing and dynamics of the Mediterranean outflow [AD-A279803] p 1434 N95-21306
Resolving velocity profiles with the multi-scale profiler [AD-A286446] p 1434 N95-21461
Stability of pressure and velocity computations for heterogeneous reservoirs [PB95-110284] p 1354 N95-21656

FLOW VISUALIZATION
Visualizing 3D velocity fields near contour surfaces [DE95-000841] p 1353 N95-21182
Effect of juncture fillets on double-delta wings undergoing sideslip at high angles of attack [AD-A286165] p 1207 N95-22039
DOD science and engineering apprenticeship program for high school students [AD-A280371] p 1583 N95-22100
On the dynamics of a shock-bubble interaction [NASA-CR-194978] p 1495 N95-22325
Experimental investigations of on-demand vortex generators p 1361 N95-22451

FLUE GASES
Experimental investigation of PIC formation during the incineration of recovered CFC-11 [PB94-214772] p 1401 N95-20192

FLUENCE
The use of displacement damage dose to correlate degradation in solar cells exposed to different radiations p 1320 N95-20523
Influence of oxidation on radiation hardness of silicon detectors [DE95-002466] p 1272 N95-20894

FLUES
Fire experiments in a two dimensional rack storage: BRANDFORSK-project 701-917 [PB95-131538] p 1241 N95-21179

FLUID BOUNDARIES
Absorbing boundary condition for floating two-dimensional objects in current and waves [PB95-132882] p 1356 N95-22063

FLUID DYNAMICS
Nonlinear dynamic fluid-structure interaction calculations with coupled finite element and finite volume programs [DE94-016204] p 1339 N95-20166
Description and flow characterization of hypersonic facilities [AD-A284291] p 1200 N95-20248
Cascade orificial resistive device [AD-D016529] p 1504 N95-20724
Fluid dynamics of the freeboard in a fluidized bed reactor [PB95-134029] p 1357 N95-22160
Turbine design and application [NASA-SP-290] p 1214 N95-22341
On the dynamics of small-scale vorticity in isotropic turbulence p 1362 N95-22459

FLUID FILMS
An augmented Young-Laplace model of an evaporating meniscus in a micro-channel with high heat flux [NASA-CR-197622] p 1340 N95-20796

FLUID FLOW
Solidification modeling of a spiral casting to determine material fluidity [DE94-018930] p 1285 N95-20050
Proceedings of the 4th International Conference on Electrorheological Fluids [AD-A286341] p 1266 N95-20227
Low flow fluid separator [AD-D016575] p 1339 N95-20297
Cascade orificial resistive device [AD-D016529] p 1504 N95-20724
Application of Direct and Large Eddy Simulation to Transition and Turbulence [AGARD-CP-551] p 1346 N95-21061
Large-eddy simulation of rotating channel flows using a localized dynamic model p 1346 N95-21064
The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers p 1347 N95-21065
Weld pool phenomena [DE94-018965] p 1381 N95-21550
Subduction and volatile recycling in Earth's mantle p 1421 N95-21802
Vortex atoms and vortons [PB95-134599] p 1356 N95-21963
Elastic micro-fabricated surface layer for reducing turbulence and drag on an object while it moves through a fluid medium [AD-D016516] p 1356 N95-22060
Optimal active control for Burgers equations p 1361 N95-22454

FLUID MECHANICS
Oceanographic analysis of the acoustic mid-ocean dynamics experiment [AD-A285907] p 1432 N95-19988
Transactions of the Eleventh Army Conference on Applied Mathematics and Computing [AD-A279884] p 1497 N95-22389

FLUID PRESSURE
Stability of pressure and velocity computations for heterogeneous reservoirs [PB95-110284] p 1354 N95-21656

FLUID-SOLID INTERACTIONS
A mixed time integration method for large scale acoustic fluid-structure interaction [DE94-018327] p 1354 N95-21387

FLUIDICS
Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle [NASA-TM-4574] p 1199 N95-19913

FLUIDS
Quartz resonator fluid monitors for vehicle applications [DE94-018910] p 1367 N95-21546

FLUORESCENCE
Cavity-QED enhancement of fluorescence yields in microdroplets [DE94-018662] p 1506 N95-20030
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames [AD-A279945] p 1238 N95-20581
Visible fluorescence of weathered lead [DE95-002454] p 1244 N95-21523

FLUORIDES
The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers [DE94-015742] p 1268 N95-20396
T1F ((1) sigma (+)): Some preliminary electronic structure calculations [PB95-130316] p 1518 N95-21223

FLUORINE
Experimental investigation of PIC formation during the incineration of recovered CFC-11 [PB94-214772] p 1401 N95-20192
Calculated heats of formation of some predicted stable C, N, O, F molecules [AD-A285957] p 1517 N95-21127
Novel fluorine oxidizers [AD-A279480] p 1284 N95-21678

FLUORO COMPOUNDS
Vibrational overtone spectroscopy of pyridine and related compounds [AD-A280105] p 1224 N95-21911

FLUOROCARBONS
New concepts for refrigerant leak detection and mixture measurement [DE94-018967] p 1287 N95-21559

FLUOROHYDROCARBONS
Materials compatibility and lubricants research on CFC-refrigerant substitutes [DE94-018414] p 1287 N95-21631
Thermophysical properties of HFC-143a and HFC-152a [DE95-002199] p 1582 N95-22153

FLUX DENSITY
Transport and dynamics in toroidal fusion systems [DE94-018653] p 1548 N95-20029
Coaxial hybrid wiggler [AD-D016501] p 1331 N95-21671
N = 1 Superconformal minimal model correlation functions on the torus [PB95-134615] p 1500 N95-21964
The solar flux of thermal neutrinos and antineutrinos of all flavors [DE95-003204] p 1604 N95-22085

FLUX PINNING
How to improve J(c(T)) in Ag/(BiPb)2Sr2Ca2Cu3O10 tapes [PB95-110326] p 1575 N95-21949

FLUX VECTOR SPLITTING
Hybrid Upwind Splitting (HUS) by a field-by-field decomposition [NASA-TM-106843] p 1355 N95-21957

FLYING PERSONNEL
Factors that determine visual acuity through night vision goggles for emmetropes [AD-A279339] p 1450 N95-21927

FLYING PLATFORMS
CALIOPE and TAISIR airborne experiment platform [DE94-018328] p 1310 N95-22299

FOAMS
Low density gas and foam targets for ICF long scale length plasma experiments: Fabrication and characterization [DE95-000935] p 1558 N95-21368
Investigation on research for degradable plastics [DE94-796550] p 1277 N95-21714
Analysis of test criteria for specifying foam firefighting agents for aircraft rescue and firefighting [AD-A286381] p 1203 N95-22352

FOCAL PLANE DEVICES
A method using focal plane analysis to determine the performance of reflector antennas p 1304 N95-21538
InTISb for long-wavelength infrared photodetectors and arrays [AD-A280109] p 1331 N95-21660

FOCUSING
An update on the development of a line-focus refractive concentrator array p 1322 N95-20534
Testing of the SAIC facets on the stretched-membrane dish [DE95-001831] p 1393 N95-20864
Target alignment in the National Ignition Facility [DE94-015559] p 1540 N95-22469

FOILS (MATERIALS)
Atom wave interferometer [AD-A279532] p 1524 N95-21688

FOKKER-PLANCK EQUATION
Modeling the dynamics of charged-particle beams using a Fokker-Planck approach
[DE95-001458] p 1531 N95-19983
Quantum diffusion
[DE95-001015] p 1580 N95-21264
FOLDING STRUCTURES
High-performance, flexible, deployable array development for space applications
p 1322 N95-20532
Static stability of a three-dimensional space truss
p 1220 N95-20533
An introduction to the Astro Edge solar array
p 1322 N95-20535
FOOTPRINTS
High resolution descriptions of IRAS 12 and 25 microns confused regions
[AD-A285847] p 1545 N95-21832
FORCE
The doping effect on spin-Peierls instability
[DE94-629046] p 1577 N95-22178
FORCED CONVECTION
A computer code (SKINTEMP) for predicting transient missile and aircraft heat transfer characteristics
[AD-A286044] p 1341 N95-21001
Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials
[AD-A286418] p 1357 N95-22206
FORECASTING
Radar studies of aviation hazards
[AD-A285845] p 1203 N95-21831
FORESTS
Large bistatic angle clutter depolarization study
p 1296 N95-20941
Investigation on the backscattering properties of Finnish boreal forests at C- and X-band: A semi-empirical modeling approach
[PB95-127692] p 1389 N95-21105
ICE BABY: Measurements of concentration fluctuations in a forest area in winter conditions
[PB95-133468] p 1405 N95-21274
FORGING
Manufacturing Technology Bulletin, July 1994
[DE94-017775] p 1605 N95-22262
FORM FACTORS
Semi-leptonic form-factors from lattice QCD
[DE95-000871] p 1510 N95-20367
Ultra-Reliable Digital Avionics (URDA) processor
p 1209 N95-20638
Universal parametrization for quark and lepton substructure
[DE94-770604] p 1514 N95-20738
FORMALISM
Ups and downs of type theory
[PB95-110664] p 1487 N95-19903
Physical Si(1-x)Ge(x)/Si heterojunction bipolar transistor model for device and circuit simulation
[PB95-110896] p 1312 N95-19934
TBell: A mathematical tool for analyzing decision tables
[NASA-CR-195027] p 1462 N95-20691
Symmetry, Wigner functions and particle reactions
[DE94-629887] p 1514 N95-20735
Construction of non-critical string field theory by transfer matrix formalism in dynamical triangulation
[DE94-770607] p 1516 N95-20986
Monadic maps and folds for arbitrary datatypes
[PB95-134045] p 1492 N95-21032
Performance analysis and true concurrency semantics
[PB95-134086] p 1478 N95-21869
N=1 Superconformal minimal model correlation functions on the torus
[PB95-134615] p 1500 N95-21964
Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064
FORMAT
FASTPACK: Optimized solutions for modular avionics derived from a parametric study. Part 2: Avionics
p 1209 N95-20635
An evaluation of Automatic Terminal Information Service (ATIS) flight deck display presentation options
[AD-A280100] p 1204 N95-21020
Standard data formats for simulation
[PB95-110367] p 1470 N95-22016
FORMING TECHNIQUES
Sheet metal formability
[PB95-110250] p 1258 N95-21653
FORSTERITE
Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG
[AD-A285857] p 1369 N95-20378
FORTRAN
Task parallel programming in Fx
[AD-A285136] p 1475 N95-20500
Software for flow distribution in electronic rack structures
[AD-A285994] p 1325 N95-20715
PRSCAL manual
[PB95-130480] p 1465 N95-21231
SEEK: A FORTRAN optimization program using a feasible directions gradient search
[NASA-CR-4641] p 1380 N95-21359
FORTRAN subroutine for column reduction of polynomial matrices
[PB95-134987] p 1497 N95-22379
FORWARD SCATTERING
Neutrino-neutrino scattering and matter-enhanced neutrino flavor transformation in supernovae
[DE94-017577] p 1604 N95-20383
FOSSILS
HIRAS images of fossil dust shells around AGB stars
p 1593 N95-21768
FOULING
Heat transfer, fouling, and combustion of supercritical fuels
[AD-A279906] p 1281 N95-19884
FOUNDATIONS
Operating manual for hybrid thermosyphons at the Gakona Power Plant, Alaska
[AD-A279068] p 1287 N95-21626
FOUNDRIES
Relationship between dendrite coherency and castability of some commercial foundry alloys
[PB95-110243] p 1258 N95-21652
FOUR-WAVE MIXING
The preparation of all para-polyphenyls with increased solubility and enhanced third order NLO activity
[AD-A284301] p 1266 N95-20251
Instantaneous frequency dynamics of coherent emission from magnetoexcitons in gallium arsenide
[DE94-018182] p 1569 N95-20677
Temporal and spectral investigation of multi-Landau level quantum beats in GaAs
[DE94-018189] p 1569 N95-20678
Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679
Laser-Induced Thermal Acoustics (LITA): Four-wave mixing measurement of sound speed, thermal diffusivity, and viscosity
[AD-A286524] p 1372 N95-21009
Advanced diagnostics for plasma chemistry
[DE94-018936] p 1561 N95-22116
FOURIER ANALYSIS
Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495
Analysis of subgrid models using direct and large-eddy simulations of isotropic turbulence p 1348 N95-21071
The sharper image: Implementing a Fast Fourier Transform (FFT) to enhance a video-captured image
[AD-A279790] p 1445 N95-21180
FOURIER SERIES
Transport and dynamics in toroidal fusion systems
[DE94-018653] p 1548 N95-20029
FOURIER TRANSFORMATION
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric study of singly and doubly charged organometallic complexes
[AD-A279899] p 1238 N95-20563
Detection of environmental deterioration in fiber reinforced composites by FT-Raman spectroscopy, phase 1
[AD-A279763] p 1228 N95-20805
The PROSAIC Laplace and Fourier Transform
[DE95-002225] p 1492 N95-21266
Synthetic aperture radar processing with polar formatted subapertures
[DE95-001830] p 1302 N95-21305
Surface inspection using Fourier Transform Infrared Spectroscopy
[DE95-001699] p 1244 N95-21571
FRACTALS
Statistical properties of geologic fractals
[DE94-019272] p 1414 N95-20908
Highly survivable communications: Complementary media packet switched networks p 1292 N95-20922
Temporal and spatial comportment of multiple paths in ionospheric propagation in oblique incidence: Fractal measures of perturbations p 1298 N95-20954
Fractal nature and scaling of normal faults, Rio Grande rift, NM: Implications for growth and strain
[DE94-018261] p 1414 N95-20990
Perimeter-yardstick technique for fracture surface fractal analysis
[AD-A286240] p 1387 N95-22025
FRACTIONATION
Primitive Xe in the atmospheres of Earth and mars
p 1419 N95-21795
Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796
Solar wind composition
[NASA-TM-197364] p 1604 N95-22384
FRACTOGRAPHY
Perimeter-yardstick technique for fracture surface fractal analysis
[AD-A286240] p 1387 N95-22025
FRACTURE MECHANICS
Analyses of some benchmark cases in fracture mechanics using boundary element method
[PB95-110888] p 1384 N95-19930
Analysis of the progressive failure of brittle matrix composites
[NASA-CR-195415] p 1225 N95-19951
Tritium and decay helium effects on the fracture toughness properties of types 316L, 304L and 21Cr-6Ni-9Mn stainless steels
[DE95-001248] p 1252 N95-20216
An overview of the HSST Full-Thickness Shallow-Crack Clad Beam Testing Program
[DE94-018940] p 1385 N95-20322
Fracture analysis of an all-ceramic bearing system
[AD-A285056] p 1269 N95-20486
The 29th MIL-HDBK-17 Polymer Matrix Composites Coordination Group Meeting
[AD-A279917] p 1269 N95-20578
The processing and mechanical properties of high temperature/high performance composites. Book 5: Interface effects
[AD-A279815] p 1228 N95-20584
Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596
The processing and mechanical properties of high temperature/high performance composites. Processing/property correlations, book 4
[AD-A279739] p 1228 N95-20802
Experimental investigation of wave and fracture phenomena in impacted ceramics
[AD-A286589] p 1272 N95-20856
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
The mechanical behavior of surface-modified ceramics
[DE95-001704] p 1276 N95-21572
The role of microcracking on the crack growth resistance of brittle solids and composites
[DE95-001678] p 1231 N95-21736
Influence of fatigue crack closure on the growth rate of surface flaws
[AD-A279130] p 1387 N95-21967
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126
Fracture behavior of laminated discontinuously reinforced aluminum material
[DE94-017307] p 1263 N95-22408
FRACTURE STRENGTH
Cr2Nb development
[DE94-018697] p 1250 N95-20043
Fracture toughness properties of welded stainless steels for tritium service
[DE95-000755] p 1251 N95-20079
Tritium and decay helium effects on the fracture toughness properties of types 316L, 304L and 21Cr-6Ni-9Mn stainless steels
[DE95-001248] p 1252 N95-20216
An overview of the HSST Full-Thickness Shallow-Crack Clad Beam Testing Program
[DE94-018940] p 1385 N95-20322
Microstructural contributions to the fracture resistance of silicon nitride ceramics
[DE94-018955] p 1267 N95-20323
Approaches to the design of structural ceramics incorporating whiskers and particulate phases
[DE94-018126] p 1271 N95-20704
Reliability analysis of uniaxially ground brittle materials
[NASA-TM-106852] p 1386 N95-20790
Processing and mechanical properties of laminar Al2O3-Ni3Al composites
[DE94-019332] p 1230 N95-21481
Fracture behavior of the Fe-8Al alloy FAP-Y
[DE95-000956] p 1258 N95-21676
The role of microcracking on the crack growth resistance of brittle solids and composites
[DE95-001678] p 1231 N95-21736
Incology alloy 908 data handbook
[DE95-001818] p 1260 N95-22013
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126

Low temperature tensile and fracture mechanical strength in mode 1 and mode 2 of fiber reinforced plastics following various irradiation conditions
[DE94-019269] p 1232 N95-22130
Fracture behavior of laminated discontinuously reinforced aluminum material
[DE94-017307] p 1263 N95-22408
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 3: Sintered reaction bonded silicon nitride ceramic
[AD-A285773] p 1388 N95-22411

FRACTURES (MATERIALS)
The 29th MIL-HDBK-17 Polymer Matrix Composites Coordination Group Meeting
[AD-A279917] p 1269 N95-20578
Perimeter-yardstick technique for fracture surface fractal analysis
[AD-A286240] p 1387 N95-22025

FRACTURING
Ductile-brittle transition behavior of tungsten under shock loading
[DE94-009913] p 1251 N95-20122
The in-situ fracture and Auger analysis of Nicalon fibers
[DE94-017771] p 1226 N95-20357
Effect of heat treatment temperature on creep-rupture properties of Fe3Al-based alloys
[DE94-017904] p 1253 N95-20375
Effect of fiber fabric orientation on the monotonic and fatigue behavior of a continuous fiber ceramic composite
[DE94-018121] p 1271 N95-20700
The processing and mechanical properties of high temperature/high performance composites. Processing/property correlations, book 4
[AD-A279739] p 1228 N95-20802
Experimental investigation of wave and fracture phenomena in impacted ceramics
[AD-A286589] p 1272 N95-20856
The mechanical behavior of surface-modified ceramics
[DE95-001704] p 1276 N95-21572
VTT test borehole for bedrock investigations
[PB95-132965] p 1427 N95-22095

FRAGMENTATION
Aluminium oxide targets after ballistic impact; fragmentation of the ceramic and the projectile
[PB95-133625] p 1388 N95-22097
Cryogenic pellet laser plasma source targets
[DE95-002488] p 1376 N95-22169

FRAMES
Frame and edge seal technology: A state of the art survey
[PB95-110334] p 1288 N95-22014

FRAMES (DATA PROCESSING)
Tracking a dynamic set of feature points
[AD-A285124] p 1313 N95-20257

FREE CONVECTION
Instabilities in natural-convection flows in cavities
[PB95-107975] p 1354 N95-21578

FREE ELECTRON LASERS
Free electron laser program
[AD-A285906] p 1368 N95-19987
Compact free electron lasers for medical applications
[AD-A285739] p 1369 N95-20072
Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538
A URI program for Ultraviolet/extreme ultraviolet research
[AD-A279159] p 1370 N95-20600
MTX final report
[DE95-002960] p 1559 N95-21451
Time-resolved study of sideband generation and transition to chaos on an infrared FEL
[DE95-002336] p 1374 N95-21528
Performance of cesium telluride photocathodes as an electron source for the Los Alamos FEL
[DE94-018302] p 1375 N95-21919
Recent progress of the compact AFEL at Los Alamos
[DE95-002728] p 1376 N95-22154
Photocathodes for free electron lasers
[DE94-018305] p 1376 N95-22242
Fabrication and characterization of cesium telluride photocathodes: A promising electron source for the Los Alamos Advanced FEL
[DE94-018303] p 1377 N95-22348
Low-level RF control for the AFEL
[DE94-018295] p 1540 N95-22410

FREE ELECTRONS
Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679
On FEL integral equation and electron energy loss in intermediate gain regime
[DE94-770631] p 1371 N95-20757
Competition between electromagnetic modes in a free-electron maser
[AD-A279546] p 1374 N95-21694

FREE ENERGY
Quantum simulation of heterogeneous electron transfer free energies at the water-metal interface
[AD-A279279] p 1522 N95-21492
Biaxiality of chiral liquid crystals
[DE94-629032] p 1578 N95-22277

FREE FALL
Microgravity: Teacher's guide with activities for physical science
[NASA-EG-103] p 1285 N95-21322

FREE FLOW
Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble
p 1352 N95-21095
A method for obtaining a statistically stationary turbulent free shear flow p 1363 N95-22463
Direct numerical simulation of incompressible axisymmetric flows p 1363 N95-22464

FREE JETS
Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170

FREE RADICALS
The energetics and dynamics of free radicals, ions, and clusters
[DE94-018101] p 1244 N95-21701
Restricted mass transport effects on free radical reactions
[DE94-018136] p 1217 N95-21706

FREEZE DRYING
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A286078] p 1443 N95-20850

FREEZING
Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952

FREON
Experimental investigation of PIC formation during the incineration of recovered CFC-11
[PB94-214772] p 1401 N95-20192

FREQUENCIES
Higher order crossings
[AD-A279597] p 1504 N95-20300
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495
Instantaneous frequency dynamics of coherent emission from magnetoexcitons in gallium arsenide
[DE94-018182] p 1569 N95-20677
Passive monitoring for automated MMPP communication systems p 1293 N95-20927
Line-of-sight multipath propagation measurements at 15 GHz over 500 MHz bandwidth p 1296 N95-20944
Experimental study of the helicopter-mobile radioelectrical channel and possible extension to the satellite-mobile channel p 1296 N95-20945
The effects of multihop HF propagation on the performance of OTH backscatter radars
p 1298 N95-20953
Glossary of frequency and timing terms and a pictorial representation of terms used in the behavior and analyses of frequency standards
[AD-A286172] p 1310 N95-22247
Inverse and control problems in electromagnetics
[AD-A286438] p 1310 N95-22250
Determination of the complex elastic moduli of materials using a free-free bar technique
[AD-A279861] p 1281 N95-22387

FREQUENCY ANALYZERS
Measurement of sound intensity and sound power
[AD-A279246] p 1505 N95-21984

FREQUENCY CONTROL
Materials processing using a variable frequency microwave furnace
[DE95-001420] p 1271 N95-20761

FREQUENCY CONVERTERS
Solid state frequency conversion technology for remote sensing
[DE94-019102] p 1389 N95-21433
Nonlinear frequency conversion optical filter
[AD-D016523] p 1544 N95-21465

FREQUENCY DISTRIBUTION
1/f noise in two-dimensional fluids
[DE95-002617] p 1358 N95-22307

FREQUENCY DIVISION MULTIPLEXING
A simple analytical model for asynchronous dense WDM/OOK systems
[AD-A283725] p 1289 N95-19973

FREQUENCY HOPPING
A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934

FREQUENCY MEASUREMENT
Field-emitter arrays for RF vacuum microelectronics
[AD-A279959] p 1325 N95-20661

FREQUENCY MODULATION
Development of an annular electron beam HPM amplifier
[AD-A286646] p 1327 N95-20905
Linear and nonlinear spectroscopy with the tunable AC scanning tunneling microscope
[AD-A285751] p 1241 N95-21217
Millimeter wave front-end figure of merit, part 1
[AD-A279093] p 1307 N95-21915

FREQUENCY RANGES
A MMPP communications system for the frequency range 2-200MHz p 1293 N95-20924
Modelling and simulation of HF/VHF MMPPs
p 1293 N95-20925

FREQUENCY RESPONSE
Frequency response measurements of integrated-optic electrodes
[DE94-016690] p 1542 N95-20403
Dynamic response of pressure measuring systems
[ARL-TR-32] p 1365 N95-20759
Time behavior and frequency response of the microwave propagation channel during multipath propagation
p 1296 N95-20942
Atom wave interferometer
[AD-A279532] p 1524 N95-21688
High frequency current sensors using the Faraday effect in optical fibers
[DE95-001859] p 1545 N95-21728
Multiwire thermocouples: Frequency response
[NASA-TM-110510] p 1367 N95-21889

FREQUENCY SHIFT KEYING
Error probabilities of FFH/BFSK with noise normalization and soft decision viterbi decoding in a fading channel with partial-band jamming
[AD-A280041] p 1498 N95-20620
Cochannel and adjacent-channel interference in nonlinear minimum-shift-keyed satellite system
[NASA-TM-106834] p 1307 N95-21890

FREQUENCY STABILITY
Radio-science performance analysis software
p 1305 N95-21540

FREQUENCY STANDARDS
Glossary of frequency and timing terms and a pictorial representation of terms used in the behavior and analyses of frequency standards
[AD-A286172] p 1310 N95-22247

FRESNEL LENSES
An update on the development of a line-focus refractive concentrator array p 1322 N95-20534

FRICTION FACTOR
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912

FRICTION MEASUREMENT
Wear resistant composite structure of vitreous carbon containing convoluted fibers
[DE95-002254] p 1228 N95-20787

FRICTION REDUCTION
Modeling the effect of shroud contact and friction dampers on the mistuned response of turbopumps
[NASA-CR-197285] p 1379 N95-20795

FRONTS (METEOROLOGY)
Front-boundary layer models from STORM-FEST observations
[AD-A279907] p 1428 N95-20186

FUEL CELL POWER PLANTS
A fuel cell overview
[DE95-001455] p 1393 N95-20839

FUEL CELLS
Exploratory Technology Research Program for electrochemical energy storage
[DE95-002651] p 1392 N95-20439
Multiply manifolded molten carbonate fuel cells
[DE94-017074] p 1392 N95-20480
Molten carbonate fuel cell product development test
[DE95-000005] p 1324 N95-20574
A fuel cell overview
[DE95-001455] p 1393 N95-20839
Performance and cost analysis of monolithic solid oxide fuel cells
[DE95-002511] p 1394 N95-20896
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361
Electric and Hybrid Vehicles Program
[DE95-001711] p 1332 N95-21738
Economic feasibility analysis of distributed electric power generation based upon the natural gas-fired fuel cell
[DE94-012277] p 1396 N95-22033

Development and demonstration of advanced technologies for direct electrochemical oxidation of hydrocarbons (methanol, methane, propane)
[AD-A285094] p 1224 N95-22474

FUEL COMBUSTION
Heat transfer, fouling, and combustion of supercritical fuels
[AD-A279906] p 1281 N95-19884
LIEKKI combustion technology
[DE95-700233] p 1242 N95-21282
Multiple burn fuel-optimal orbit transfers: Numerical trajectory computation and neighboring optimal feedback guidance
[NASA-CR-197317] p 1222 N95-21616
EAGLES 1.1: A microcomputer software package for analyzing fuel efficiency of electric and gasoline vehicles
[DE95-001119] p 1469 N95-21829
Fuselage burnthrough from large exterior fuel fires
[AD-A286295] p 1203 N95-22318

FUEL INJECTION
Heat transfer, fouling, and combustion of supercritical fuels
[AD-A279906] p 1281 N95-19884
Nonlinear acoustic processes in a solid rocket engine
[AD-A285606] p 1222 N95-21193

FUEL OILS
Producing liquid fuels from biomass
[DE95-717458] p 1398 N95-22425

FUEL PRODUCTION
Assessment of liquefaction and pyrolysis systems
[PB95-129797] p 1236 N95-20290

FUEL SPRAYS
Heat transfer, fouling, and combustion of supercritical fuels
[AD-A279906] p 1281 N95-19884

FUEL SYSTEMS
Effect of propane-air on NGVs and vehicle fueling stations
[PB94-210085] p 1282 N95-20253
Performance and cost analysis of monolithic solid oxide fuel cells
[DE95-002511] p 1394 N95-20896
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361
Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702

FUEL TESTS
Reducing exhaust gas emissions from Citydiesel busses
[DE95-700245] p 1380 N95-21295

FUEL-AIR RATIO
Effect of propane-air on NGVs and vehicle fueling stations
[PB94-210085] p 1282 N95-20253

FULLERENES
Pairing on small clusters in the Peierls-Hubbard model: Implications for C60
[DE94-016284] p 1565 N95-20330
Novel catalysts for methane activation
[DE95-002639] p 1237 N95-20438
Superconducting thin film with fullerenes and method of making
[AD-D016580] p 1567 N95-20461
Photoinduced charge transfer between fullerenes and TiO2 semiconductor colloids
[DE95-001447] p 1570 N95-20838
Aromatics oxidation and soot formation in flames
[DE95-001803] p 1241 N95-21280

FUNCTION SPACE
Linear invariance of Lindeloef numbers
[PB95-134540] p 1494 N95-21956

FUNCTIONAL ANALYSIS
An empirical approach to logical clustering of software failure regions
[AD-A279863] p 1462 N95-20776

FUNCTIONAL DESIGN SPECIFICATIONS
SPACE-R thermionic space nuclear power system: Design and technology demonstration
[DE95-000713] p 1221 N95-20076
Performance specifications for technology development: Application for characterization of volatile organic compounds in the environment
[DE94-016627] p 1401 N95-20234
Goddard Space Flight Center solar array missions, requirements and directions p 1316 N95-20503
Low noise 22 GHz receiver for the radioastron satellite. Part 1: Requirements, design and reliability analysis
[PB95-104410] p 1300 N95-20972
Design principles for real-time process control systems
[PB95-132890] p 1585 N95-21414
Underwater Acoustic Generator Phase 2: Sea trial, March 1992
[MRL-TN-640] p 1434 N95-21657
Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702
Issues in the flight qualification of a space power reactor
[DE95-001606] p 1223 N95-21840
Performance analysis and true concurrency semantics
[PB95-134086] p 1478 N95-21869
Structuring design requirements using YMIR
[PB95-132742] p 1471 N95-22081
Formal specification and compositional verification of an atomic broadcast protocol
[PB95-110508] p 1472 N95-22351

FUNCTIONAL INTEGRATION
Functional and para-functional parallel processing
[DE95-002805] p 1475 N95-20888

FUNCTIONALS
Set functionals in stochastic geometry
[PB95-135372] p 1491 N95-21005

FUNCTIONS (MATHEMATICS)
Symmetry, Wigner functions and particle reactions
[DE94-629887] p 1514 N95-20735
Recent results from E665
[DE95-002523] p 1516 N95-20914
Structure functions and structure function ratio F2(n)/F2(p) at low X(Bj) and Q2 in inelastic muon scattering
[DE94-018979] p 1573 N95-21561
Dyads: A generalisation of monads
[PB95-134052] p 1494 N95-21867
The dynamic structure function of Bose liquids in the deep inelastic regime
[DE94-629077] p 1527 N95-22182
An exact enumeration of self-avoiding loops on a square lattice
[DE94-628999] p 1578 N95-22276

FUNGI
Microbial degradation of polymers used in electronics
[AD-A286526] p 1273 N95-21011

FURANS
Experimental investigation of PIC formation during the incineration of recovered CFC-11
[PB94-214772] p 1401 N95-20192

FURNACES
Preliminary control system design and analysis for the Space Station Furnace Facility thermal control system
[NASA-TM-108476] p 1365 N95-20560
Impact behavior of FeAl alloy FA-350
[DE94-018128] p 1254 N95-20705
Materials processing using a variable frequency microwave furnace
[DE95-001420] p 1271 N95-20761
Flow and heat transfer simulation in a flash smelting furnace
[PB95-108197] p 1354 N95-21649
Materials support for the development of High Temperature Advanced Furnaces (HITAF): A comparison of selected mechanical properties for three SiC-based ceramics
[DE94-017752] p 1280 N95-22258

FUSELAGES
Damage tolerant repair techniques for pressurized aircraft fuselages
[AD-A286298] p 1199 N95-22046
Fuselage burnthrough from large exterior fuel fires
[AD-A286295] p 1203 N95-22318

FUSION REACTORS
Recent DIII-D results
[DE94-017519] p 1549 N95-20038
Radiation-driven targets for heavy-ion fusion
[DE95-002264] p 1533 N95-20784
Target Area design basis and system performance for the National Ignition Facility
[DE94-016697] p 1557 N95-21207
Laser design basis for the National Ignition Facility
[DE94-016700] p 1534 N95-21209
Review of recent D-T experiments from TFTR
[DE95-002755] p 1557 N95-21239
Fusion power production in TFTR
[DE95-002756] p 1557 N95-21240
Heating and transport in TFTR D-T plasmas
[DE95-002812] p 1558 N95-21242
Irradiation creep in structural materials at ITER operating conditions
[DE94-018946] p 1261 N95-22123

FUSION WELDING
Fusion welding of advanced borated stainless steels
[DE94-019037] p 1378 N95-20053

FUZZY SETS
The use of fuzzy set classification for pattern recognition of the polygraph
[AD-A279148] p 1470 N95-21971

FUZZY SYSTEMS
Automatic generation of fuzzy rules for the sensor-based navigation of a mobile robot
[DE95-001428] p 1481 N95-20837
Fuzzy clustering of facial form for prototyping environmental protection equipment
[DE94-014657] p 1454 N95-22466

G

GALACTIC COSMIC RAYS
Solar wind composition
[NASA-TM-197364] p 1604 N95-22384

GALACTIC EVOLUTION
Connection with dynamics: General introduction
[NASA-CR-197617] p 1579 N95-19947

GALACTIC STRUCTURE
Connection with dynamics: General introduction
[NASA-CR-197617] p 1579 N95-19947
A high resolution atlas of the galactic plane at 12 microns and 25 microns p 1593 N95-21755

GALAXIES
Universal features of multiplicity distributions
[DE94-012854] p 1498 N95-20779
Twentysixth YERAC
[PB95-127437] p 1599 N95-21347
Beyond maximum entropy: Fractal Pixon-based image reconstruction p 1593 N95-21757

GALERKIN METHOD
DNS of turbulent flow in a driven cavity and their analysis using proper orthogonal decomposition
p 1352 N95-21097
Locking of the finite element method in thermoelasticity
[PB95-127098] p 1496 N95-22370

GALILEO PROBE
Simulated rarefied entry of the Galileo probe into the atmosphere of Jupiter
[NASA-TM-110507] p 1601 N95-21621

GALLIUM ARSENIDE LASERS
Analog processing of optical wavefront using integrated guided-wave optics
[AD-A279596] p 1543 N95-20601

GALLIUM ARSENIDES
Optimization of InAsSb/InGaAs strained-layer superlattice growth by metal-organic chemical vapor deposition for use in infrared emitters
[DE94-016557] p 1563 N95-19954
Low temperature synthesis of semiconductor materials
[AD-A285120] p 1226 N95-20081
Proton irradiation effects on advanced digital and microwave III-V components
[DE94-018742] p 1314 N95-20338
GaAs optical circuits
[AD-A285859] p 1369 N95-20389
Development of a lightweight, light-trapped, thin GaAs solar cell for spacecraft applications
p 1318 N95-20513
Design of high-efficiency, radiation-hard, GaInP/GaAs solar cells p 1319 N95-20521
Final results of the advanced photovoltaic experiment
p 1321 N95-20528
Photovoltaic electric power applied to Unmanned Aerial Vehicles (UAV) p 1321 N95-20530
Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs
p 1323 N95-20542
Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543
Analog processing of optical wavefront using integrated guided-wave optics
[AD-A279596] p 1543 N95-20601
Applied physics research for innovation in pulsed power
[AD-A285392] p 1324 N95-20610
Instantaneous frequency dynamics of coherent emission from magnetoexcitons in gallium arsenide
[DE94-018182] p 1569 N95-20677
Temporal and spectral investigation of multi-Landau level quantum beats in GaAs
[DE94-018189] p 1569 N95-20678
Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679
Ultrafast magnetoexciton dynamics in GaAs
[DE94-018175] p 1514 N95-20732
Complementary GaAs junction-gated heterostructure field effect transistor fabrication for integrated circuits
[DE95-001522] p 1327 N95-20882
IR materials producibility
[AD-A280094] p 1328 N95-21017
Fiber-optic control of current filaments in high gain photoconductive semiconductor switches
[DE94-015804] p 1328 N95-21139
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A285621] p 1571 N95-21145

Complementary GaAs junction-gated heterostructure field effect transistor technology
[DE94-018901] p 1329 N95-21390

Spectroscopic, morphological, and electrical characterization of PdGe ohmic contacts to n-GaAs
[DE95-000738] p 1329 N95-21394

A versatile masking process for plasma etched backside via holes in GaAs
[DE94-019176] p 1572 N95-21419

Self-starting femtosecond pulse generation from a Ti:sapphire laser synchronously pumped by a pointing-stabilized mode-locked Nd:YAG laser
[DE94-019319] p 1374 N95-21480

Resonant generation of nonequilibrium phonons in GaAs/AlAs quantum wells via intersubband scattering
[DE95-002338] p 1581 N95-21604

InTISb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774

Plasma-induced-damage of GaAs during etching of refractory metal contacts
[DE95-001525] p 1259 N95-21838

Transient photoluminescence measurements on GaAs and AlGaAs double heterostructures
[AD-A279408] p 1575 N95-21916

Heterostructure quantum confined Stark effect electrooptic modulators operating at 938 nm
[AD-A279342] p 1581 N95-21928

Performance of Ga(0.47)In(0.53)As cells over a range of proton energies
[NASA-TM-106819] p 1334 N95-22112

Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177

Temperature dependence of magnetopolarons in a parabolic quantum dot in arbitrary magnetic fields
[DE94-629033] p 1528 N95-22218

Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

GALLIUM COMPOUNDS

P/N In(Al) GaAs multijunction laser power converters
p 1323 N95-20539

GALLIUM PHOSPHIDES

Low temperature synthesis of semiconductor materials
[AD-A285120] p 1226 N95-20081

Observation of excitonic and band-to-band behavior in ordered InGaP2 alloys
[DE94-018891] p 1314 N95-20341

Design of high-efficiency, radiation-hard, GaInP/GaAs solar cells p 1319 N95-20521

High efficiency GaP power conversion for Betavoltaic applications p 1323 N95-20540

GALLIUM SELENIDES

Polycrystalline CuInSe2 and CdTe solar cells
[DE94-011875] p 1392 N95-20333

Novel thin-film CuInSe2 fabrication
[DE94-011874] p 1268 N95-20472

GAME THEORY

Asymptotic analysis of Nash equilibria in nonzero-sum linear-quadratic differential games. The two-player case
[PB95-111027] p 1499 N95-19941

Note on the characterizations of the compromise value
[PB95-135117] p 1499 N95-21709

Thousand golden ten orbits
[PB95-135109] p 1592 N95-22334

GAMMA RAY BURSTS

Imaging design of the wide field x-ray monitor onboard the HETE satellite
[DE95-002750] p 1221 N95-22436

GAMMA RAY SPECTRA

SYNTH: A spectrum synthesizer
[DE94-015943] p 1458 N95-20153

Unified GUI for the Los Alamos Radiation Transport Code System
[DE94-016088] p 1458 N95-20154

Choice of computer software for analysis of spectra from the Multi-Spectral Logging System
[DE94-019013] p 1460 N95-20351

GAMMA RAY SPECTROMETERS

SYNTH: A spectrum synthesizer
[DE94-015943] p 1458 N95-20153

Choice of computer software for analysis of spectra from the Multi-Spectral Logging System
[DE94-019013] p 1460 N95-20351

GAMMA RAYS

Target area acquisition and control system survivability for the National Ignition Facility
[DE94-016549] p 1550 N95-20190

Advanced concepts for gamma ray isotopic analysis and instrumentation
[DE94-016610] p 1517 N95-21174

Constraints on SUSy-GUT unification from b yields s-gamma decay
[PB95-130373] p 1580 N95-21229

GARNETS

Phase E in a water-saturated peridotite system at 9.3 GPa p 1420 N95-21799

GAS ANALYSIS

Aging tests of ethylene contaminated argon/ethane
[DE95-002526] p 1282 N95-20899

GAS BEARINGS

Wave journal bearing. Part 1: Analysis
[NASA-CR-195431-PT-1] p 1382 N95-22404

GAS CHROMATOGRAPHY

Effect of a solid insulator on the spark yield of S2F10 in SF6(*)
[DE95-001422] p 1326 N95-20791

GAS COMPOSITION

The primary carbon and the formation of carbon species in terrestrial magmas p 1420 N95-21797

GAS DETECTORS

Improved die castings through plasma surface modification, improved sensors and die soldering prevention
[DE95-002238] p 1253 N95-20417

New concepts for refrigerant leak detection and mixture measurement
[DE94-018967] p 1287 N95-21559

GAS DISCHARGES

Effect of a solid insulator on the spark yield of S2F10 in SF6(*)
[DE95-001422] p 1326 N95-20791

Study on the reaction kinetics in pulsed RF discharges under RIE conditions
[PB95-107868] p 1300 N95-21029

Thoriated-tungsten, split-ring, hollow-cathode electrode for discharge devices
[AD-D016508] p 1333 N95-21906

GAS DYNAMICS

Plasma chemistry of vibrationally nonequilibrium molecules
[AD-A279630] p 1553 N95-20411

State-to-state collisional dynamics of atmospheric species
[AD-A285053] p 1370 N95-20484

Numerical wave speed for one-dimensional scalar hyperbolic conservation laws with source terms
[PB95-127536] p 1492 N95-21371

One-dimensional reactive Euler equations
[PB95-135430] p 1244 N95-21573

Gas-dynamic trap diagnostic complex for study on plasma heating and power atomic beam injection
[DE94-633377] p 1529 N95-22283

GAS EXCHANGE

Balloon tracking for the ASTEX/MAGE Lagrangian experiment
[AD-A280078] p 1430 N95-20969

Intramyocardial blood volume and oxygen exchange
[PB95-108015] p 1445 N95-21580

GAS FLOW

Multiply manifolded molten carbonate fuel cells
[DE94-017074] p 1392 N95-20480

One-dimensional reactive Euler equations
[PB95-135430] p 1244 N95-21573

Flow and heat transfer simulation in a flash smelting furnace
[PB95-108197] p 1354 N95-21649

Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790

Fluid dynamics of the freeboard in a fluidized bed reactor
[PB95-134029] p 1357 N95-22160

GAS GENERATORS

Integral rocket ramjets
[AD-A285135] p 1222 N95-20906

GAS GIANT PLANETS

Hydrogen and related materials at high density: Physics, chemistry and planetary implications
p 1418 N95-21791

Dynamics of volatile delivery from outer to inner solar system p 1420 N95-21798

Solar system formation and the distribution of volatile species p 1421 N95-21806

Comets, impacts, and atmospheres
p 1422 N95-21810

Surface ices in the outer solar system
p 1423 N95-21815

GAS INJECTION

Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702

GAS IONIZATION

Emittance dilution by ions in the SLC arcs
[DE95-002871] p 1536 N95-21332

The two-electron problem and prospects for atomic collision theory on a numerical lattice
[DE94-017856] p 1528 N95-22265

Very high-power electron-beam transport in long gas cells from 10(exp -3) to 10(exp 3) Torr N2
[DE95-002611] p 1539 N95-22306

GAS LASERS

The effect of reusing laser gas on the fission-fragment pumped 1.73 micron atomic xenon laser output
[DE94-018512] p 1369 N95-20225

Liquid xenon as a potential laser host medium
[AD-A285365] p 1370 N95-20550

Applications for reactor-pumped lasers
[DE95-000536] p 1373 N95-21393

GAS MIXTURES

Effect of propane-air on NGVs and vehicle fueling stations
[PB94-210085] p 1282 N95-20253

Inert gas purification and measuring oxygen partial pressure in gas mixtures with EMF method based on solid electrolyte cell
[PB95-127767] p 1240 N95-21110

Nitrogen isotopic components in the early solar system p 1420 N95-21800

GAS PRESSURE

Forming of superplastic ceramics
[DE94-017306] p 1276 N95-21662

Hydrogen and related materials at high density: Physics, chemistry and planetary implications
p 1418 N95-21791

High temperature corrosion and crack growth of SiC/SiC at variable oxygen partial pressures
[DE94-018715] p 1232 N95-22115

GAS RECOVERY

Development of active-transport membrane devices
[DE94-015947] p 1246 N95-21921

GAS STREAMS

Ceramem filters for removal of particles from hot gas streams
[DE95-001976] p 1275 N95-21354

GAS TEMPERATURE

Fire smoke ventilation through shafts: Experiments
[PB95-132247] p 1288 N95-21978

GAS TUNGSTEN ARC WELDING

Joining dissimilar stainless steels for pressure vessel components
[PB95-133005] p 1380 N95-21446

GAS TURBINE ENGINES

Experimental study of vane heat transfer and aerodynamics at elevated levels of turbulence
[NASA-CR-4633] p 1337 N95-19912

Toughened Silcomp composites for gas turbine engine applications
[DE95-002851] p 1214 N95-21243

GAS TURBINES

Materials/manufacturing element of the Advanced Turbine System Program
[DE94-017299] p 1378 N95-20085

Toughened Silcomp composites for gas turbine engine applications
[DE95-002851] p 1214 N95-21243

GAS-GAS INTERACTIONS

Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621

GAS-ION INTERACTIONS

Recombination, ion-molecule collisions and (laser assisted) electron-excited atom collisions
[AD-A285604] p 1517 N95-21216

GASEOUS DIFFUSION

Development of active-transport membrane devices
[DE94-015947] p 1246 N95-21921

GASES

The final status of a metal surface after multipulse laser irradiation in an ambient gas
[DE94-629000] p 1562 N95-22377

GASOLINE

Assessment of liquefaction and pyrolysis systems
[PB95-129797] p 1236 N95-20290

GATES (CIRCUITS)

Gate oxide shorts in nMOS transistors: Electrical properties and lifetime prediction method
[DE94-018904] p 1330 N95-21545

Optical processing and control
[AD-A279157] p 1546 N95-21975

GAUGE INVARIANCE

Chiral symmetry and lattice gauge theory
[DE94-018676] p 1564 N95-20130

GAUGE THEORY

Chiral symmetry and lattice gauge theory
[DE94-018676] p 1564 N95-20130

Theoretical particle physics
[DE95-002447] p 1515 N95-20893

Topics in gauge theories and the unification of elementary particle interactions
[DE94-013485] p 1529 N95-22279

GAUSS EQUATION
Atomic orbital basis sets for molecular interactions
[AD-A279609] p 1506 N95-19959
GEARS
Bevel gear driver and method having torque limit selection
[NASA-CASE-MSC-22384-1] p 1378 N95-20151
Displaceable spur gear torque controlled driver and method
[NASA-CASE-MSC-22381-1] p 1378 N95-20409
GELS
High pressure windowed chamber burned rate determination of liquid propellant XM46
[AD-A283770] p 1282 N95-19920
Technical Summary for 1993 fall MRS Symposium O, Complex Fluids
[AD-A283722] p 1264 N95-19972
Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047
Novel electrochemical materials prepared by sol-gel chemistry
[AD-A286310] p 1226 N95-20092
Control of continuous phase PH using visible light to activate PH-dependent fibers and gels in a controlled and reversible manner
[AD-D016532] p 1543 N95-20728
Gradient index lenses from sol-gel layering
[AD-A285649] p 1242 N95-21402
Phase E in a water-saturated peridotite system at 9.3 GPa p 1420 N95-21799
Tailoring suspension flow for the gelcasting of oxide and nonoxide ceramics
[DE95-001351] p 1277 N95-21861
GENERAL AVIATION AIRCRAFT
Census US civil aircraft calendar year 1993
[AD-A286309] p 1199 N95-20091
The personal aircraft: Status and issues
[NASA-TM-109174] p 1200 N95-20686
GENERAL OVERVIEWS
Passive millimetre wave imaging: A review
[AD-A279275] p 1303 N95-21491
GENETIC ALGORITHMS
Heuristic genetic algorithms for constrained problems. Part 1: Principles
[PB95-132031] p 1467 N95-21374
GENETIC CODE
Life Sciences Division and Center for Human Genome Studies
[DE94-017796] p 1440 N95-22065
Discovering related DNA sequences via mutual information
[DE95-001101] p 1440 N95-22067
Urban air carcinogens and their effects on health
[DE95-002259] p 1447 N95-22285
GENETICS
Life Sciences Division and Center for Human Genome Studies
[DE94-017796] p 1440 N95-22065
The Use of Cyanobacteria to Explore Basic Biological Processes
[DE94-019238] p 1440 N95-22066
Cellular responses to environmental DNA damage
[DE94-015606] p 1441 N95-22397
GEOCHEMISTRY
Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784
Alkali element depletion by core formation and vaporization on the early Earth p 1421 N95-21804
Solubilities of nitrogen and noble gases in basalt melt p 1422 N95-21807
The isotope geochemistry of abyssal peridotites and related rocks
[AD-A279435] p 1435 N95-21918
GEOCHRONOLOGY
Surface exposure geochronology using cosmogenic nuclides: Applications in Antarctic glacial geology
[AD-A279392] p 1426 N95-21944
GEODESY
Marussi hypothesis in differential geodesy
[AD-A285853] p 1413 N95-20377
Common mapping system media study
[AD-A279086] p 1390 N95-21912
GEODETIC COORDINATES
Marussi hypothesis in differential geodesy
[AD-A285853] p 1413 N95-20377
GEODETIC SURVEYS
Multipath impact on ground-based global positioning system range measurements: Aspects of measurement, modeling, and mitigation p 1297 N95-20949
GEODYNAMICS
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477
GEOGRAPHIC INFORMATION SYSTEMS
Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0
[DE94-019214] p 1458 N95-20073
Selective polygon map display method
[AD-D016518] p 1590 N95-21463
Review of GIS applications in hydrologic modeling
[AD-A279076] p 1390 N95-21628
GEOGRAPHY
Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0. Volume 2. Appendices
[DE94-019215] p 1591 N95-22129
Using geographical data browsers in a networked environment
[DE94-017809] p 1592 N95-22263
GEOIDS
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801
GEOLOGICAL FAULTS
Fractal nature and scaling of normal faults, Rio Grande rift, NM: Implications for growth and strain
[DE94-018261] p 1414 N95-20990
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477
Source contributions at far-regional distances
[AD-A279405] p 1426 N95-21932
GEOLOGICAL SURVEYS
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477
Descriptions of WHOI sediment cores, volume 8
[AD-A279444] p 1436 N95-22073
A multispectral scanner survey of the Idaho National Engineering Laboratory and the Hanford Reservation
[DE95-003922] p 1391 N95-22398
GEOLOGY
Statistical properties of geologic fractals
[DE94-019272] p 1414 N95-20908
GEOMAGNETISM
Ion heating perpendicular to the magnetic field
[AD-A286635] p 1501 N95-20773
A simulation of plasma motion in the polar ionosphere
[AD-A286166] p 1426 N95-22019
Substorm theories: United they stand, divided they fall
[NASA-CR-197672] p 1427 N95-22326
GEOMETRICAL OPTICS
Diffraction computation by means of the method of equivalent currents
[AD-A285347] p 1291 N95-20692
GEOMETRY
Set functionals in stochastic geometry
[PB95-135372] p 1491 N95-21005
GEOMORPHOLOGY
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477
GEOPHYSICS
Overview of the Institute of Geophysics and Planetary Physics and Lawrence Livermore National Laboratory collaborative efforts
[DE94-017300] p 1599 N95-20145
Investigating the resolution of resistivity arrays using inverse theory
[DE94-017760] p 1412 N95-20287
Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713
Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722
Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919
Computer programs for analysis of geophysical data
[DE95-002472] p 1415 N95-21511
VTT test borehole for bedrock investigations
[PB95-132965] p 1427 N95-22095
DOD science and engineering apprenticeship program for high school students
[AD-A280371] p 1583 N95-22100
GEOSYNCHRONOUS ORBITS
Observations of cold magnetospheric ions at geosynchronous orbit during times of high activity
[DE95-000936] p 1600 N95-21935
Magnetospheric Plasma Analyzer (MPA): Plasma observations from geosynchronous orbit
[DE95-002739] p 1427 N95-22477
GEOTECHNICAL ENGINEERING
Geomaterial models and numerical analysis of softening
[PB95-135380] p 1386 N95-21006
GEOTHERMAL ENERGY EXTRACTION
Bridging worlds/charting new courses
[DE95-003808] p 1397 N95-22335
GEOTHERMAL ENERGY UTILIZATION
Geothermal direct-heat utilization assistance
[DE94-011546] p 1391 N95-20104
GEOTHERMAL RESOURCES
Geothermal direct-heat utilization assistance
[DE94-011546] p 1391 N95-20104
GEOTHERMAL TECHNOLOGY
Geothermal direct-heat utilization assistance
[DE94-011546] p 1391 N95-20104
Bridging worlds/charting new courses
[DE95-003808] p 1397 N95-22335
GERMANATES
Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407
GERMANIDES
Spectroscopic, morphological, and electrical characterization of PdGe ohmic contacts to n-GaAs
[DE95-000738] p 1329 N95-21394
GERMANIUM
Simulations of the dislocation array at Ge/Si interfaces
[DE94-017680] p 1565 N95-20244
P/N InP solar cells on Ge wafers
p 1317 N95-20511
Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964
GERMANIUM ALLOYS
Surface stress, morphological development, and dislocation nucleation during strained-layer epitaxy
[DE94-017682] p 1565 N95-20245
Microscopy of stress-induced morphological development and dislocation nucleation during semiconductor epitaxy
[DE94-017869] p 1568 N95-20674
GERMANIUM COMPOUNDS
Physical Si(1-x)Ge(x)/Si heterojunction bipolar transistor model for device and circuit simulation
[PB95-110896] p 1312 N95-19934
Certain physical properties of lanthanum digermanide
[AD-A286592] p 1229 N95-20859
GLACIAL DRIFT
Surface exposure geochronology using cosmogenic nuclides: Applications in Antarctic glacial geology
[AD-A279392] p 1426 N95-21944
GLACIERS
Surface exposure geochronology using cosmogenic nuclides: Applications in Antarctic glacial geology
[AD-A279392] p 1426 N95-21944
GLASS
Spectroscopic studies of glass structure
[DE94-016551] p 1268 N95-20468
Amorphous silicon thin films: The ultimate lightweight space solar cell p 1318 N95-20515
The numerical integration and 3-D finite element formulation of a viscoelastic model of glass
[DE95-002588] p 1271 N95-20788
Experimental investigation of wave and fracture phenomena in impacted ceramics
[AD-A286589] p 1272 N95-20856
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A285621] p 1571 N95-21145
Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407
Lead-indium phosphate glasses for optical applications
[DE94-019333] p 1275 N95-21482
GLASS TRANSITION TEMPERATURE
Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy
[DE94-629992] p 1239 N95-20736
Lead-indium phosphate glasses for optical applications
[DE94-019333] p 1275 N95-21482
GLINT
Radiance of the ocean horizon
[AD-A285613] p 1431 N95-19896
GLOBAL POSITIONING SYSTEM
GPS-Squitter capacity analysis
[AD-A280037] p 1291 N95-20599
Multipath impact on ground-based global positioning system range measurements: Aspects of measurement, modeling, and mitigation p 1297 N95-20949
Impact of propagation mechanisms on global navigation satellite system performance p 1298 N95-20950

Assessment of a non-dedicated GPS receiver system for precise airborne attitude determination
[DE94-019309] p 1205 N95-21520
The determination of static and time varying dipole source. Sensor geometry during sea trials using differential global positioning system
[MRL-TN-631] p 1205 N95-21642
Variability of total electron content in the high-altitude ionosphere following solar maximum
[AD-A285849] p 1425 N95-21833
Radiation characterization report for the GPS Receiver microcontroller chip
[DE94-019169] p 1335 N95-22165
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A286173] p 1427 N95-22423

GLOBAL WARMING
Dust Bowl migration as an analog for possible global warming-induced migration from Mexico
[DE94-017472] p 1401 N95-20089
Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353
Radiative forcing calculations for CH3Cl
[DE94-019018] p 1402 N95-20355
Global change integrating factors: Tropical tropopause trends
[DE95-001121] p 1404 N95-20835
Modeling the response of the California Current system to Global Greenhouse Warming
[DE94-018253] p 1408 N95-21708
Assessment of the atmospheric hazards and risks of new chemicals: Procedures to estimate hazard potentials
[PB95-107488] p 1410 N95-22186

GLONASS
Impact of propagation mechanisms on global navigation satellite system performance p 1298 N95-20950

GLOW DISCHARGES
High magnetic field glow discharge ionization source
[AD-A279972] p 1241 N95-21123

GLUCOSE
Mechanism of the amperometric response of a proposed glucose sensor based on a polypyrrole-tubule-impregnated membrane
[AD-A279836] p 1365 N95-20431

GLUONS
Antishadowing contribution to the pomeron structure function
[PB95-127478] p 1518 N95-21221
Signals for top quark anomalous chromomagnetic moments at colliders
[DE95-002896] p 1535 N95-21254
Nonperturbative aspects of the quark-photon vertex
[DE94-012846] p 1520 N95-21315
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Search for new particles decaying to dijets in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-018994] p 1523 N95-21563
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704
Search for squarks and gluinos in D0
[DE95-000730] p 1528 N95-22197

GLYCOLS
New chiral pyrimidino-crown ether ligands
[AD-A279892] p 1223 N95-20590

GOERTLER INSTABILITY
Computational studies of laminar to turbulence transition
[AD-A285622] p 1353 N95-21146

GOGGLES
A computer-based multimedia prototype for night vision goggles
[AD-A286208] p 1546 N95-21882
Factors that determine visual acuity through night vision goggles for emmetropes
[AD-A279339] p 1450 N95-21927

GOLD
Materials research for GHz multi-chip modules
[AD-A279661] p 1227 N95-20412
Scanning tunneling microscopy studies of self-assembled monolayers of alkanethiols on gold
[AD-A279910] p 1253 N95-20577
Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704

GOLD COATINGS
Surface x-ray scattering and scanning tunneling microscopy studies at the Au(111) electrode
[DE95-002409] p 1573 N95-21516

GOLD ISOTOPES
Angular and charge state distributions of highly charged ions scattered during low energy surface-channeling interactions with Au(110)
[DE95-001348] p 1525 N95-21857
Proton and produced particle distributions from Au+Au collisions at 11.6 A GeV/c
[DE94-018634] p 1530 N95-22392

GONIOMETERS
In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236

GOVERNMENT PROCUREMENT
Technology transfer: Improving the use of cooperative R/D agreement at DOE's contractor-operated laboratories. Report to Congressional requesters
[GAO/RCED-94-91] p 1586 N95-22403

GOVERNMENT/INDUSTRY RELATIONS
Environmental Compliance Assessment and Management Program
[AD-A279605] p 1402 N95-20441
The mechanical property data base from an Air Force/Industry cooperative test program on advanced aluminum alloys
[AD-A280038] p 1386 N95-20615
Policies concerning military and civilian research and technology applications
[PB95-131355] p 1585 N95-21427
ITER EDA Newsletter. Volume 3, no. 2
[DE94-628980] p 1561 N95-21852
Technology transfer: Improving the use of cooperative R/D agreement at DOE's contractor-operated laboratories. Report to Congressional requesters
[GAO/RCED-94-91] p 1586 N95-22403

GRADIENTS
Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289
Fully developed turbulent flows
[AD-A286496] p 1358 N95-22294

GRAFTING
Neutron reflectivity study of adsorbed diblock copolymers
[DE95-002740] p 1281 N95-22434

GRAIN BOUNDARIES
Overview on superplasticity research on small-grained materials
[DE94-016550] p 1266 N95-20316
Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167
Creep behavior in SiC whisker-reinforced alumina composite
[DE95-001071] p 1231 N95-21776
The role of grain boundary sliding on creep deformation characteristics of discontinuous reinforced composites
[DE95-001671] p 1231 N95-21924
The role of point defects and defect complexes in silicon device processing
[DE94-011876] p 1279 N95-22091
An improved Monte Carlo algorithm for simulating grain growth
[DE94-017903] p 1578 N95-22272

GRAIN SIZE
Overview on superplasticity research on small-grained materials
[DE94-016550] p 1266 N95-20316
Mean field analysis of orientation selective grain growth driven by interface-energy anisotropy
[DE94-015797] p 1566 N95-20399
Molecularly Designed Ultrafine/Nanostructured Materials, volume 351
[AD-A285370] p 1568 N95-20552
Oxidation behavior of aluminum nanopowders
[DE95-002721] p 1260 N95-21926
An improved Monte Carlo algorithm for simulating grain growth
[DE94-017903] p 1578 N95-22272

GRAMMARS
Top-down non-correcting error recovery in LLgen
[PB95-132718] p 1471 N95-22031
Connectionist models for intelligent computation
[AD-A286436] p 1484 N95-22210

GRAND UNIFIED THEORY
Constraints on SUSy-GUT unification from b yields s-gamma decay
[PB95-130373] p 1580 N95-21229

GRAPH THEORY
K(1,3)-free and W(4)-free graphs
[PB95-110573] p 1456 N95-19889
Dominoes
[PB95-110680] p 1456 N95-19905
Orthogonal representations over finite fields and the chromatic number of graphs
[PB95-110953] p 1487 N95-19937
Uniqueness of strongly regular graphs having minimal p-rank
[PB95-111043] p 1488 N95-19942
Graphs cospectral with distance-regular graphs
[PB95-111050] p 1488 N95-19943
Finding all minimal separators of a graph
[PB95-127585] p 1491 N95-21023
Regularity of BPa-systems is decidable
[PB95-135489] p 1468 N95-21619
Vertex ranking for permutation and other graphs
[PB95-127569] p 1496 N95-22327
A periodic scheduling heuristic for mapping iterative task graphs onto distributed memory multiprocessors
[AD-A286047] p 1311 N95-22415

GRAPHICAL USER INTERFACE
NOMADS graphical user interface version 2.0 user's manual
[AD-A286314] p 1458 N95-20095
Unified GUI for the Los Alamos Radiation Transport Code System
[DE94-016088] p 1458 N95-20154
Making structured graphics and constraints practical for large-scale applications
[AD-A280062] p 1461 N95-20623
Xwake 1.0 user's manual
[DE95-002528] p 1463 N95-20901
NODDS/WOSM interface user's manual
[AD-A279095] p 1471 N95-22068
ActorStudio reference manual. A user's guide to the ActorStudio user interface editor, version 1.0
[PB95-127023] p 1472 N95-22310

GRAPHITE
Refractive index change in dissociating shocked benzene
[DE94-019015] p 1541 N95-20352
Boron carbide-based coatings on graphite for plasma facing components
[DE94-017976] p 1269 N95-20570
B4C-SiC reaction-sintered coatings on graphite plasma facing components
[DE94-019105] p 1230 N95-21553

GRAPHITE-EPOXY COMPOSITES
Detection of environmental deterioration in fiber reinforced composites by FT-Raman spectroscopy, phase 1
[AD-A279763] p 1228 N95-20805

GRAPHS (CHARTS)
K(1,3)-free and W(4)-free graphs
[PB95-110573] p 1456 N95-19889
Dominoes
[PB95-110680] p 1456 N95-19905
Hierarchical diagrammatic representation of class structure
[PB95-110722] p 1456 N95-19908
The effects of three-dimensional graphs on decision making
[AD-A285034] p 1583 N95-20051
Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0
[DE94-019214] p 1458 N95-20073
Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713
Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722
Vertex ranking for permutation and other graphs
[PB95-127569] p 1496 N95-22327

GRATINGS (SPECTRA)
Development, fabrication, and metrology of the electro-optical breadboard model for the reflection grating array of the XMM grating spectrometer
[DE94-016605] p 1543 N95-20612
Detection optimization using linear systems analysis of a coded aperture laser sensor system
[DE95-001112] p 1371 N95-20832
Eigenmode method for electromagnetic synthesis of diffractive elements with three-dimensional profiles
[PB95-127726] p 1301 N95-21107
Fiber grating-based detection system for wavelength encoded fiber sensors
[AD-D016208] p 1545 N95-21825
Polycrystalline PLZT/ITO ceramic electro-optic phase gratings: Electro-optically reconfigurable difffractive devices for free-space and in-wafer interconnects
[AD-A285861] p 1547 N95-22076
Fabrication of PLZT/ITO grating for optical switching and reconfigurable optical interconnect applications
[AD-A286389] p 1548 N95-22248
Electro-optic effect in the PESO acousto-optic modulator
[AD-A286355] p 1548 N95-22255

GRAVITATION
Fast parallel tree codes for gravitational and fluid dynamical N-body problems
[AD-A286480] p 1358 N95-22290

GRAVITATION THEORY
Von Neumann algebra automorphisms and time-thermodynamics relation in general covariant quantum theories
[PB95-111084] p 1580 N95-20324

GRAVITATIONAL EFFECTS
Connection with dynamics: General introduction
[NASA-CR-197617] p 1579 N95-19947
Modeling platform dynamics and physiological response to short arm centrifugation
[AD-A279640] p 1442 N95-20457
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-197367] p 1437 N95-20559
Computer graphics tools for visualizing gravity gradient torques on a rigid spacecraft
[AD-A285971] p 1461 N95-20665
Microgravity: Teacher's guide with activities for physical science
[NASA-EG-103] p 1285 N95-21322
Tethered satellite: Forces and motion
[NASA-TM-110518] p 1220 N95-21858
Gravitational effects on the development of weld-pool and solidification microstructures
[DE94-017772] p 1285 N95-22261

GRAVITATIONAL FIELDS
Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064
Nonlinear dynamics of the planar pitch attitude motion for a gravity-gradient satellite
[AD-A286407] p 1220 N95-22204

GRAVITATIONAL PHYSIOLOGY
Modeling platform dynamics and physiological response to short arm centrifugation
[AD-A279640] p 1442 N95-20457
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-197367] p 1437 N95-20559

GRAVITATIONAL WAVES
Resonant photon-graviton conversion in EM fields: From earth to heaven
[DE95-002784] p 1301 N95-21241

GRAVITONS
Resonant photon-graviton conversion in EM fields: From earth to heaven
[DE95-002784] p 1301 N95-21241

GRAVITY GRADIENT SATELLITES
Nonlinear dynamics of the planar pitch attitude motion for a gravity-gradient satellite
[AD-A286407] p 1220 N95-22204

GRAVITY WAVES
Analysis of mesospheric winds and waves
[AD-A279956] p 1414 N95-20591

GRAZING INCIDENCE
High precision Woelter optic calibration facility
[DE94-016973] p 1542 N95-20364
Topography of neutron scattering from diblock copolymer film
[DE95-001457] p 1229 N95-20840
X-band microwave backscattering from ocean waves
[DE94-016719] p 1309 N95-22241

GREAT CIRCLES
The effects of multihop HF propagation on the performance of OTH backscatter radars
p 1298 N95-20953

GREEN'S FUNCTIONS
Energy gap structure of layered superconductors
[DE94-017885] p 1566 N95-20372
Low-frequency image theory for a current dipole in front of a permeable sphere
[PB95-127676] p 1300 N95-21104
An asymptotic solution of the (infinity)-d Hubbard model
[DE94-629042] p 1582 N95-21994
Absorbing boundary condition for floating two-dimensional objects in current and waves
[PB95-132882] p 1356 N95-22063
Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084
Theory of the excitonic lineshape in low-dimensional structures with rough interfaces
[DE95-003434] p 1582 N95-22237

GREENHOUSE EFFECT
Workshop on Uncertainty and Global Climate Change Research
[DE94-016728] p 1401 N95-20238
Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353
Global change integrating factors: Tropical tropopause trends
[DE95-001121] p 1404 N95-20835
Monitoring the response of the upper troposphere/lower stratosphere to a greenhouse gas scenario
[DE95-000982] p 1406 N95-21410
Modeling the response of the California Current system to Global Greenhouse Warming
[DE94-018253] p 1408 N95-21708
Proceedings: International Symposium on Global Change (IGBP)
[DE94-765351] p 1410 N95-22219

GRID GENERATION (MATHEMATICS)
Open Skies project computational fluid dynamic analysis
[AD-A285928] p 1200 N95-19991
Meshes: The next generation
[DE94-016702] p 1459 N95-20255
Mixed hp finite element methods for problems in elasticity and stokes flow
[PB95-104444] p 1341 N95-20981
Simulations of bypass transition for spatially evolving disturbances p 1349 N95-21079
Computations of unsteady viscous compressible flows using adaptive mesh refinement in curvilinear body-fitted grid systems
[NASA-TM-106704]. p 1356 N95-21959
State of the art in CFD pre- and postprocessing
[PB95-110391] p 1356 N95-22017
On the dynamics of a shock-bubble interaction
[NASA-CR-194978] p 1495 N95-22325
Unstructured-grid large-eddy simulation of flow over an airfoil p 1202 N95-22448

GRINDING (MATERIAL REMOVAL)
Numerical controlled polishing program, continued forced wear and part correction experiments
[DE94-018084] p 1285 N95-20288
Reliability analysis of uniaxially ground brittle materials
[NASA-TM-106852] p 1386 N95-20790

GROUND STATE
Calculation of electron scattering on the He(+) ion
[DE94-631343] p 1509 N95-20199
Crystalline beams: The horizontal zigzag
[DE95-002227] p 1533 N95-20766
Second order approximation for optical polaron in the strong coupling case
[DE94-628997] p 1525 N95-21856
Uniform upper bounds in the Froehlich polaron theory
[DE94-628998] p 1525 N95-21860
Effect of the electron-SO-phonon on the impurity state energies in a semiconductor quantum well
[DE94-628993] p 1581 N95-21887
Variational Monte Carlo study of He-4 in two dimensions
[DE94-629078] p 1576 N95-21998
There might be two kinds of dibaryon
[DE94-014417] p 1526 N95-22058
Electric-field effects on shallow donor impurity in a harmonic quantum dot
[DE94-629034] p 1577 N95-22176
Microscopic theory of normal liquid He-3
[DE94-629047] p 1527 N95-22179

GROUND STATIONS
GPS-Squitter capacity analysis
[AD-A280037] p 1291 N95-20599
Climatological data for clouds over the globe from surface observations, 1982-1991: The total cloud edition
[DE95-002537] p 1431 N95-22288

GROUND SUPPORT EQUIPMENT
GPHS-RTGs in support of the Cassini Mission
[DE95-001492] p 1222 N95-20853

GROUND TESTS
Description and flow characterization of hypersonic facilities
[AD-A284291] p 1200 N95-20248
Evolution of ground line of sight data field collection techniques
[AD-A285062] p 1204 N95-20497

GROUND TRUTH
Deriving earth science products from SSM/I
[NASA-CR-197299] p 1389 N95-20156
European Workshop on Optical Ground Truth Instrumentation for the Validation of Space-Borne Optical Remote Sensing Data of the Marine Environment
[PB95-134144] p 1390 N95-21872

GROUND WATER
Degradation of aromatic hydrocarbons in an aquifer during a field experiment demonstrating the feasibility of remediation by natural attenuation
[AD-A283809] p 1282 N95-19922
Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0
[DE94-019214] p 1458 N95-20073
Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456
Fiber-optic sensors for rapid, inexpensive characterization of soil and ground water contamination
[DE95-002471] p 1545 N95-21510
Spatial variation of primordial 3-He in crustal fluids along the East-African Rift system (the Ethiopian and the Kenya Rift section) p 1418 N95-21789

GROUP THEORY
New data for MCNP (trademark)
[DE94-016296] p 1509 N95-20236
Positive rockland operators
[PB95-127510] p 1493 N95-21423
A Davis-Putnam program and its application to finite-order model search: Quasigroup existence problems
[DE95-003014] p 1471 N95-22077
Quadratic optimal control of a delay equation I: The stable case
[PB95-127072] p 1486 N95-22367

GRUMMAN AIRCRAFT
Activities of the Institute for the Study of Human Capabilities
[AD-A286471] p 1454 N95-22275

GUIDANCE SENSORS
Assessment of a non-dedicated GPS receiver system for precise airborne attitude determination
[DE94-019309] p 1205 N95-21520

GULF STREAM
Tests of an improved oceanographic expert system
[AD-A280123] p 1431 N95-19888
Synthesizing the Gulf Stream thermal structure from XBT data
[AD-A279665] p 1433 N95-20458

GUN LAUNCHERS
Computational design of Hypervelocity Launchers
[DE95-000744] p 1218 N95-20785

GUST LOADS
Derived gust spectra for the Macchi MB326H
[ARL-TN-3] p 1202 N95-21892

GYRES
Exchanges between hemispheres and gyres: A direct approach to the mean circulation of the equatorial Pacific
[NASA-CR-196311] p 1436 N95-22072

GYROFREQUENCY
Quasi-linear equation for magnetoplasma oscillations in the weakly relativistic approximation
[DE94-628932] p 1560 N95-21593

GYROTROPISM
Dielectric mixtures with arbitrarily anisotropic components: Focus on special gyrotropic effects
[PB95-127015] p 1311 N95-22363

H

H I REGIONS
Arcmimute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771

H II REGIONS
Luminous radio-quiet sources in the W3(MAIN) cloud core p 1594 N95-21773

H WAVES
Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847

H-INFINITY CONTROL
Riccati equation theory for Pritchard-Salamon systems: A Popov function approach
[PB95-137089] p 1491 N95-20830
Design of robust optimal control systems and stability analysis of real structured uncertainties
[AD-A279089] p 1483 N95-21913

HABITATS
Compilation of 1993 annual reports of the Navy ELF Communications System Ecological Monitoring Program
[AD-A279575] p 1408 N95-21699
Compilation of 1993 annual reports of the Navy ELF Communications System Ecological Monitoring Program. Volume 2: Tabs C-F
[AD-A279770] p 1308 N95-21988

HADRONS
Complementarity of e(+)e(-) and pp colliders for the exploration of electroweak symmetry breaking
[DE94-017397] p 1507 N95-20034
Universal features of multiplicity distributions
[DE94-012854] p 1498 N95-20779
Universality of particle multiplicities
[DE95-000727] p 1515 N95-20879
Experiments at high energy hadron colliders and underground water Cerenkov detector experiment
[DE95-001804] p 1535 N95-21281
Hadron beams and accelerators
[DE95-002932] p 1536 N95-21342

Dilepton production from p-p to Ca-Ca at the Bevalac
[DE95-002341] p 1520 N95-21357
Polarization of charmonium in pion-nucleus collisions
[DE95-002783] p 1523 N95-21525
RF beam control for the AGS Booster
[DE95-001485] p 1538 N95-21720
A preliminary, precise measurement of the average B hadron lifetime
[DE95-001848] p 1525 N95-21727
The status of molecules
[DE95-000952] p 1526 N95-21939
Measurement of the average lifetime of B hadrons at SLD
[DE95-002121] p 1527 N95-22152

HALF PLANES
Image solution for poisson's equation in wedge geometry
[PB95-127171] p 1310 N95-22311

HALF SPACES
DC potential anomalies caused by a conducting body in an anisotropic conducting half-space
[PB95-127106] p 1291 N95-20775
Computer programs for analysis of geophysical data
[DE95-002472] p 1415 N95-21511

HALIDES
Translational-energy-resolved studies of photographed carrier-induced reactions on semiconductor surfaces
[DE95-002944] p 1573 N95-21444

HALL EFFECT
Visible light emitting materials and injection devices
[AD-A284796] p 1541 N95-20066
Correlated wavefunction Monte Carlo studies of excitations in the quantum Hall liquids
[DE95-002337] p 1501 N95-20874
Charge density of fractional charged quasiparticles in the composite fermion picture
[DE94-018122] p 1524 N95-21703
On the conductance sum rule for the hierarchical edge states of the Fractional Quantum Hall Effect
[DE94-629030] p 1582 N95-22198

HALOCARBONS
Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species
[AD-A285055] p 1442 N95-20485
Annual Conference on Fire Research: Book of abstracts
[PB95-104964] p 1286 N95-20717
Method for laser-assisted silicon etching using halocarbon ambients
[AD-D016494] p 1375 N95-21903

HALOGENATION
Use of quantum chemically derived descriptors for QSAR modeling of reductive dehalogenation of aromatic compounds
[PB95-132783] p 1224 N95-22333

HALOGENS
Novel fluorine oxidizers
[AD-A279480] p 1284 N95-21678
Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777
Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784
Method for laser-assisted silicon etching using halocarbon ambients
[AD-D016494] p 1375 N95-21903

HALOS
Simulation of beam-beam lifetime for LEP
[DE95-002888] p 1536 N95-21334
High performance computing for beam physics applications
[DE94-018312] p 1539 N95-22243
Recent results in analysis and simulation of beam halo
[DE94-018313] p 1539 N95-22298

HAMILTONIAN FUNCTIONS
Crystalline beams
[DE95-002656] p 1569 N95-20793
Top ten models constrained by b (yields) s(gamma)
[DE95-002870] p 1519 N95-21250
Simulation of beam-beam lifetime for LEP
[DE95-002888] p 1536 N95-21334
Second order approximation for optical polaron in the strong coupling case
[DE94-628997] p 1525 N95-21856
An asymptotic solution of the (infinity)-d Hubbard model
[DE94-629042] p 1582 N95-21994
Hamiltonian structure of the reversible nonsemisimple 1:1 resonance
[PB95-127528] p 1495 N95-22151
Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177

HANDBOOKS
The 29th MIL-HDBK-17 Polymer Matrix Composites Coordination Group Meeting
[AD-A279917] p 1269 N95-20578
Nuclear Terms Handbook, 1993
[DE94-016248] p 1589 N95-21131
Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285595] p 1229 N95-21215
Incology alloy 908 data handbook
[DE95-001818] p 1260 N95-22013
Implementation of the Military Handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285772] p 1233 N95-22395

HARDNESS
Influence of oxidation on radiation hardness of silicon detectors
[DE95-002466] p 1272 N95-20894

HARDWARE
High performance hardware and software for pattern recognition and image processing
[AD-A279776] p 1457 N95-19961
Hardware implementation of a desktop supercomputer for high performance image processing. Color image processing using cellular neural networks
[AD-A286455] p 1455 N95-21589

HARDWARE DESCRIPTION LANGUAGES
VHDL modeling of PRC-70 radio ASICs for reverse engineering
[AD-A285740] p 1457 N95-19929

HARMONIC ANALYSIS
Counting methods for the analysis of load time histories
[PB95-132916] p 1388 N95-22093

HARMONIC GENERATIONS
Physical-chemical studies on rodlike polymer compositions
[AD-A285361] p 1269 N95-20548
S-D hybridization and anisotropy of the optical second harmonic at low frequencies
[AD-A279449] p 1544 N95-20876
Surface second harmonic studies of Si(111)/electrolyte and Si(111)/SiO2/electrolyte interfaces
[AD-A279450] p 1245 N95-21826
Studies of the n-alkane/water interface by total internal reflection second harmonic generation
[AD-A279473] p 1245 N95-21827
Two-band model description of electroabsorption and third-harmonic generation in 1-D MX linear chains
[DE95-000932] p 1526 N95-21934
Application of optical second harmonic generation to surface analysis
[AD-A279445] p 1547 N95-22074
Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

HARMONIC MOTION
Modeling the effect of shroud contact and friction dampers on the mistuned response of turbopumps
[NASA-CR-197285] p 1379 N95-20795

HARMONIC OSCILLATORS
Self-starting femtosecond pulse generation from a Ti:sapphire laser synchronously pumped by a pointing-stabilized mode-locked Nd:YAG laser
[DE94-019319] p 1374 N95-21480
Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177

HARMONIC RADIATION
Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

HARMONICS
Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084

HARRIER AIRCRAFT
Forecasting aircraft mishaps using monthly maintenance reports
[AD-A286049] p 1203 N95-22417

HARTREE APPROXIMATION
Computational evaluation of the feasibility of nitrating precursors to C12N12O12
[AD-A285976] p 1239 N95-20668
Calculated heats of formation of some predicted stable C, N, O, F molecules
[AD-A285957] p 1517 N95-21127
T1F ((1) sigma (+)): Some preliminary electronic structure calculations
[PB95-130316] p 1518 N95-21223

HAZARDS
Global equivalence ratio concept and the prediction of carbon monoxide formation in enclosure fires
[PB94-207511] p 1234 N95-20100
Environmental cleanup technology transfer initiatives
[AD-A285059] p 1403 N95-20487
Assuring Known Good Die (KGD) for reliable, cost effective MCMs p 1210 N95-20644
Highly survivable communications: Complementary media packet switched networks p 1292 N95-20922
Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513
Environmental cleanup: Too many high priority sites impede DOD's program. Report to the Chairman, Committee on Governmental Affairs, US Senate
[AD-A279511] p 1407 N95-21683
Radar studies of aviation hazards
[AD-A285845] p 1203 N95-21831
Initial assessment of the hazards and risks of new chemicals to man and the environment, part 2
[PB95-106407] p 1410 N95-22124

HEALTH
Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016
Netherlands Institute for Brain Research progress report, 1993
[PB95-135398] p 1445 N95-21352
ANSTO: Program of research, 1993-1994
[DE94-631122] p 1605 N95-21828
Sustaining the health and performance of soldiers/warfighters deployed to harsh environments
[AD-A286270] p 1446 N95-22004

HEALTH PHYSICS
Environmental Hazards Assessment Program
[DE94-019075] p 1406 N95-21565
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
Optical radiation: Health based exposure limits for electromagnetic radiation in the wavelength range from 100 nanometer to 1 millimeter
[PB95-132767] p 1447 N95-22083
Urban air carcinogens and their effects on health
[DE95-002259] p 1447 N95-22285
Current concepts on airborne particles and health
[DE95-002260] p 1447 N95-22287

HEARING
Temporary threshold shifts produced by high intensity freefield impulse noise in humans wearing hearing protection
[AD-A286289] p 1454 N95-22045

HEART RATE
Microclimate cooling effect on perceived exertion in four heat/exercise scenarios
[AD-A285549] p 1444 N95-21160

HEAT AFFECTED ZONE
Welding tritium exposed stainless steel
[DE95-003208] p 1382 N95-22356

HEAT ENGINES
Cost-effective ceramics program in the United States
[DE95-001425] p 1278 N95-21909
Ceramic technology for advanced heat engines
[DE95-000950] p 1278 N95-21937

HEAT EXCHANGERS
Comparison of the dynamic fatigue behavior of two monolithic SiC and an Al2O3/SiC composite
[DE94-017751] p 1225 N95-20022
Malone-brayton cycle engine/heat pump
[AD-D016573] p 1378 N95-20295
Microchannel heat pipe cooling of modules
p 1211 N95-20649

HEAT FLUX
An augmented Young-Laplace model of an evaporating meniscus in a micro-channel with high heat flux
[NASA-CR-197622] p 1340 N95-20796
Simulation of a turbulent flame in a channel
p 1249 N95-21044
Mixing and dynamics of the Mediterranean outflow
[AD-A279803] p 1434 N95-21306
Dual active surface heat flux gage probe
[NASA-TM-106861] p 1366 N95-21391
Numerical investigation of one-dimensional heat-flux calculations
[AD-A286293] p 1582 N95-22054

HEAT ISLANDS
Meso-scale cooling effects of high albedo surfaces: Analysis of meteorological data from White Sands National Monument and White Sands Missile Range
[DE94-018535] p 1429 N95-20782

HEAT MEASUREMENT
Laser materials processing at Sandia National Laboratories
[DE95-002183] p 1374 N95-21594

HEAT OF FORMATION
Calculated heats of formation of some predicted stable C, N, O, F molecules
[AD-A285957] p 1517 N95-21127
Comparative computational analysis of some nitramine and difluoramine structures, dissociation energies and heats of formation
[AD-A286196] p 1525 N95-21878

Non-local density functional calculations of gas phase heats of formation
[AD-A286213] p 1246 N95-22000

HEAT PIPES
Continuum transient and frozen startup behavior of conventional and gas-loaded heat pipes
[AD-A284297] p 1339 N95-20250
Microchannel heat pipe cooling of modules
p 1211 N95-20649
Recent reflux receiver developments under the US DOE program
[DE95-001622] p 1393 N95-20861

HEAT PUMPS
Augmented thermal bus
[NASA-CASE-LEW-15595-1-C] p 1338 N95-19933
Malone-brayton cycle engine/heat pump
[AD-D016573] p 1378 N95-20295

HEAT RESISTANT ALLOYS
Application of an energy-based life prediction model to bithermal and thermomechanical fatigue
[NASA-TM-106684] p 1385 N95-20179
Methods of measuring adhesion for thermally grown oxide scales
[DE94-018177] p 1256 N95-21260
Plastic deformation of ordered intermetallic alloys: Fundamental aspects
[DE95-001070] p 1256 N95-21265
Weldability of iron aluminides
[DE94-019114] p 1257 N95-21555
Experience at the Los Alamos Meson Physics Facility with the use of alloy Inconel 718 as an enclosure for a beam degrader and as a proton beam entry window
[DE94-018289] p 1538 N95-22050

HEAT SHIELDING
Grid resolution and solution convergence for Mars Pathfinder forebody
[NASA-TM-109173] p 1494 N95-21622

HEAT SINKS
Augmented thermal bus
[NASA-CASE-LEW-15595-1-C] p 1338 N95-19933
The thermal conductivity of carbon-fiber reinforced metal matrix composites
[DE94-017767] p 1226 N95-20125
Module cooling system
[AD-D016584] p 1315 N95-20436

HEAT SOURCES
Weld pool phenomena
[DE94-018965] p 1381 N95-21550

HEAT STORAGE
Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952
Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953

HEAT TRANSFER
Heat transfer, fouling, and combustion of supercritical fuels
[AD-A279906] p 1281 N95-19884
Experimental study of vane heat transfer and aerodynamics at elevated levels of turbulence
[NASA-CR-4633] p 1337 N95-19912
Liquid-metal pin-fin pressure drop by correlation in cross flow
[DE94-017086] p 1338 N95-19923
Investigation of a thermal buoyancy effect on the drag of half models tested in the ARA Transonic Wind Tunnel
[ARA-MEMO-407] p 1199 N95-19946
Round-robin comparison of heat release apparatus
[AD-A285831] p 1363 N95-20031
Solidification modeling of a spiral casting to determine material fluidity
[DE94-018930] p 1285 N95-20050
Site Scientific Mission Plan for the Southern Great Plains CART site, July - December 1994
[DE94-017289] p 1401 N95-20193
Microchannel heat pipe cooling of modules
p 1211 N95-20649
Computational model of drilling with high radiance pulsed lasers
[DE94-018548] p 1371 N95-20783
Recent reflux receiver developments under the US DOE program
[DE95-001622] p 1393 N95-20861
Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037
Triple flame structure and diffusion flame stabilization
p 1249 N95-21039
Turbulent transport in premixed flames
p 1249 N95-21040
NESTLE: Few-group neutron diffusion equation solver utilizing the nodal expansion method for eigenvalue, adjoint, fixed-source steady-state and transient problems
[DE95-001903] p 1466 N95-21288
Theory and modelling of quench in cable-in-conduit superconducting magnets
[DE95-001819] p 1330 N95-21442
Stellarator transport optimization with self-consistent electric fields
[DE94-019151] p 1559 N95-21581
Flow and heat transfer simulation in a flash smelting furnace
[PB95-108197] p 1354 N95-21649
Seawater test results of Open-Cycle Ocean Thermal Energy Conversion (OC-OTEC) components
[DE94-019254] p 1396 N95-21897
Frame and edge seal technology: A state of the art survey
[PB95-110334] p 1288 N95-22014
Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212
Lewis number and Damkohler number effects in vortex-flame interactions p 1249 N95-22439
Fundamental mechanisms in premixed flame propagation via vortex-flame interactions: Numerical simulations p 1249 N95-22440
Flame propagation under partially-premixed conditions
p 1250 N95-22442

HEAT TRANSMISSION
The vertical distribution of heating in the tropical atmosphere
[AD-A285934] p 1429 N95-20391
Alkali element depletion by core formation and vaporization on the early Earth p 1421 N95-21804
Thermal resistance of the cheek in cold air
[AD-A286257] p 1446 N95-22001

HEAT TREATMENT
Fusion welding of advanced borated stainless steels
[DE94-019037] p 1378 N95-20053
Generation of micro-domains in AT-cut quartz by thermal processing and the effect on resonator modes
[DE94-017344] p 1564 N95-20087
Effect of heat treatment temperature on creep-rupture properties of Fe3Al-based alloys
[DE94-017904] p 1253 N95-20375
Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664
Impact behavior of FeAl alloy FA-350
[DE94-018128] p 1254 N95-20705
2nd International ADI seminar
[PB95-127734] p 1255 N95-21108

HEATING
Vapor generator wand
[NASA-CASE-LAR-15058-1] p 1215 N95-20080
ALT-2 armor tile design for upgraded TEXTOR operation
[DE94-015749] p 1549 N95-20143
Heating and transport in TFTR D-T plasmas
[DE95-002812] p 1558 N95-21242
Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792

HEAVY ELEMENTS
HASSP and HEAVY: Tools for automated heavy atom searches and refinement
[DE94-016071] p 1569 N95-20696

HEAVY IONS
Numerical modeling of a small recirculating induction accelerator for heavy-ion fusion
[DE94-018549] p 1552 N95-20318
An impedance model of the Relativistic Heavy Ion Collider (RHIC)
[DE94-016784] p 1532 N95-20406
Accelerators for energy production
[DE94-770764] p 1392 N95-20685
Radiation-driven targets for heavy-ion fusion
[DE95-002264] p 1533 N95-20784
Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891
Heavy ion track-structure calculations for radial dose in arbitrary materials
[NASA-TP-3497] p 1517 N95-21191
The theory of relativistic heavy ion collisions
[DE95-001805] p 1519 N95-21302
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380
Summary of heavy ion theory
[DE95-002177] p 1523 N95-21588
Dynamics of the chiral transition
[DE94-016813] p 1524 N95-21641
On the theory of strong electromagnetic waves propagation in an electron-positron-ion plasma
[DE94-628964] p 1561 N95-21850
Large amplitude localized structures in a relativistic electron-positron ion plasma
[DE94-628965] p 1561 N95-21851

HEAVY NUCLEI
Parity violation in the compound nucleus
[DE95-002742] p 1530 N95-22435

HEIGHT
Fire experiments in a two dimensional rack storage: BRANDFORSK-project 701-917
[PB95-131538] p 1241 N95-21179

HELICOPTER DESIGN
Helicopter crewseat cushion program
[AD-A286654] p 1452 N95-20973

HELICOPTERS
The personal aircraft: Status and issues
[NASA-TM-109174] p 1200 N95-20688
Experimental study of the helicopter-mobile radioelectrical channel and possible extension to the satellite-mobile channel p 1296 N95-20945
Wavelet transformations for helicopter identification via acoustic signatures
[AD-A279980] p 1504 N95-20963

HELIOSPHERE
Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377
Potential flow downstream of the heliospheric terminal shock: A non-spherical shock
[NASA-TM-110493] p 1426 N95-21874

HELIOSTATS
An overview: Component development for solar thermal systems
[DE95-001623] p 1393 N95-20862

HELIUM
The (e,2e) calculations with the final-state boundary condition
[DE94-631342] p 1509 N95-20198
Helium exhaust studies in the D3-D tokamak
[DE94-016682] p 1552 N95-20334
Analysis of welds on helium-containing restraint test plates
[DE95-001809] p 1257 N95-21303
Recent photoabsorption measurements in the rare gases and alkalis in the 3 to 15 keV photon energy region
[DE94-019278] p 1521 N95-21406
Experimental investigations of electron capture from atomic hydrogen and deuterium by alpha particles
[DE95-002138] p 1523 N95-21587
Muon transfer from muonic atoms of hydrogen isotopes to He nuclei
[DE94-628903] p 1523 N95-21591
Spatial variation of primordial 3-He in crustal fluids along the East-African Rift system (the Ethiopian and the Kenya Rift section) p 1418 N95-21789
Solar helium and neon in the Earth
p 1419 N95-21793
Degassing mechanisms of noble gases from carbonado diamonds p 1425 N95-21824
Solubilities of nitrogen and helium in water and blood at 37 C and pressures of up to 11 ATA
[AD-A286269] p 1446 N95-22003

HELIUM IONS
Calculation of electron scattering on the He(+) ion
[DE94-631343] p 1509 N95-20199
Experimental investigations of electron capture from atomic hydrogen and deuterium by alpha particles
[DE95-002138] p 1523 N95-21587

HELIUM ISOTOPES
Tritium and decay helium effects on the fracture toughness properties of types 316L, 304L and 21Cr-6Ni-9Mn stainless steels
[DE95-001248] p 1252 N95-20216
New theory of critical flow velocities in superfluid helium
[PB95-130365] p 1571 N95-21228
Recent photoabsorption measurements in the rare gases and alkalis in the 3 to 15 keV photon energy region
[DE94-019278] p 1521 N95-21406
Properties of aged metal tritides
[DE95-001787] p 1243 N95-21440
Muon transfer from muonic atoms of hydrogen isotopes to He nuclei
[DE94-628903] p 1523 N95-21591
Spatial variation of primordial 3-He in crustal fluids along the East-African Rift system (the Ethiopian and the Kenya Rift section) p 1418 N95-21789
The ratios of carbon and non-radiogenic helium and argon isotopes in the mantle and crustal rocks
p 1421 N95-21805
He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821
Variational Monte Carlo study of He-4 in two dimensions
[DE94-629078] p 1576 N95-21998
Microscopic theory of normal liquid He-3
[DE94-629047] p 1527 N95-22179

The dynamic structure function of Bose liquids in the deep inelastic regime
[DE94-629077] p 1527 N95-22182

Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280

HELIUM PLASMA

New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-018580] p 1552 N95-20345

HELIUM-NEON LASERS

Recognition of subsurface defects in machined ceramics by application of neural networks to laser scatter patterns
[DE94-018373] p 1264 N95-20018

HELMET MOUNTED DISPLAYS

Factors affecting the perception of luning in monocular regions of partial binocular overlap displays
[AD-A286287] p 1547 N95-22044

HEMOGLOBIN

In vivo distribution of liposome encapsulated hemoglobin studied with imaging radiotracers
[AD-A279774] p 1438 N95-20806

Calculation of atom-centered partial charges for heme
[DE94-014447] p 1520 N95-21375

HERMETIC SEALS

The demise of plastic encapsulated microcircuit myths
p 1209 N95-20640

HETEROCYCLIC COMPOUNDS

The organic chemistry of conducting polymers
[DE94-018216] p 1270 N95-20680

Selenophene transition metal complexes
[DE95-001675] p 1260 N95-21841

HETEROGENEITY

Task parallel programming in Fx
[AD-A285136] p 1475 N95-20500

QoS driven routing in packet switched networks of multiple transmission media p 1292 N95-20923

Cluster reactions: An approach to understanding the fundamentals of heterogeneous catalysis
[DE95-002947] p 1243 N95-21447

D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781

Scalable programming environment
[AD-A286390] p 1472 N95-22201

HETEROJUNCTION DEVICES

Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514

Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

HETEROJUNCTIONS

Physical Si(1-x)Ge(x)/Si heterojunction bipolar transistor model for device and circuit simulation
[PB95-110896] p 1312 N95-19934

Optimization of InAsSb/InGaAs strained-layer superlattice growth by metal-organic chemical vapor deposition for use in infrared emitters
[DE94-016557] p 1563 N95-19954

Semiconductor cold electron emission device
[AD-D016577] p 1314 N95-20298

Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892

Excitons in semiconducting superlattices, quantum wells, and ternary alloys
[DE95-001867] p 1572 N95-21287

Complementary GaAs junction-gated heterostructure field effect transistor technology
[DE94-018901] p 1329 N95-21390

Transient photoluminescence measurements on GaAs and AlGaAs double heterostructures
[AD-A279408] p 1575 N95-21916

Parallel nanometer scale fabrication
[DE95-002122] p 1336 N95-22284

HEURISTIC METHODS

A construct for describing software development risks
[AD-A284923] p 1457 N95-19999

Improving Multichip Module (MCM) design and reliability using the Intelligent MCM Analyzer
p 1209 N95-20637

Software Capability Evaluation (SCE), version 2.0 team members guide
[AD-A286082] p 1462 N95-20809

An automatic placement tool for rapid prototyping of printed circuit boards
[AD-A286029] p 1328 N95-20997

Heuristic genetic algorithms for constrained problems. Part 1: Principles
[PB95-132031] p 1467 N95-21374

Advanced computing systems: Usability of knowledge-based planning systems
[AD-A279573] p 1477 N95-21698

A periodic scheduling heuristic for mapping iterative task graphs onto distributed memory multiprocessors
[AD-A286047] p 1311 N95-22415

Experimental evaluation of dynamic data allocation strategies in a distributed database with changing workloads
[NASA-CR-195024] p 1456 N95-22431

HEXANITROSTILBENE

An initial assessment of the properties of 2,5-dipicryl-1,3,4-oxadiazole: A secondary explosive with high thermal stability
[MRL-TR-93-16] p 1284 N95-21624

HEXENES

Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
[DE94-018184] p 1259 N95-21707

HEXYL COMPOUNDS

Characterization and electrical properties of copper films grown via direct liquid coinjection of (hfac)Cu(TMVS) and TMVS
[DE95-002957] p 1272 N95-20889

HIERARCHIES

Hierarchical structures in biology as a guide for new materials technology
[AD-A286317] p 1265 N95-20176

Hierarchical structure in advanced polymers. Phase behaviour, orientation, properties
[AD-A285938] p 1268 N95-20392

Measuring software dependability by robustness benchmarking
[AD-A280053] p 1461 N95-20622

HIGGS BOSONS

Complementarity of e(+)e(-) and pp colliders for the exploration of electroweak symmetry breaking
[DE94-017397] p 1507 N95-20034

Higgs decay to bottom quarks at the Tevatron
[DE94-016715] p 1511 N95-20404

QCD corrections to Higgs boson production: An update
[DE95-000626] p 1522 N95-21506

HIGH ALTITUDE

Photovoltaic electric power applied to Unmanned Aerial Vehicles (UAV) p 1321 N95-20530

Highly survivable communications: Complementary media packet switched networks p 1292 N95-20922

Variability of total electron content in the high-altitude ionosphere following solar maximum
[AD-A285849] p 1425 N95-21833

HIGH CURRENT

The evolution of configuration from q greater than 1 to q less than 1
[DE94-631396] p 1556 N95-21162

HIGH ELECTRON MOBILITY TRANSISTORS

Proton irradiation effects on advanced digital and microwave III-V components
[DE94-018742] p 1314 N95-20338

On-wafer, cryogenic characterization of ultra-low noise HEMT devices p 1305 N95-21539

Sub-millimeterwave semiconductor signal sources
[AD-A279375] p 1335 N95-22144

HIGH ENERGY INTERACTIONS

Transition-energy crossing with a gamma(sub t)(-)jump
[DE94-017315] p 1531 N95-20021

High energy photon-photon collisions
[DE94-017494] p 1532 N95-20388

Research in theoretical elementary particle physics at the University of Florida, task A
[DE94-004373] p 1512 N95-20469

Universal features of multiplicity distributions
[DE94-012854] p 1498 N95-20779

Universality of particle multiplicities
[DE95-000727] p 1515 N95-20879

Theoretical particle physics
[DE95-002447] p 1515 N95-20893

Recent results from E665
[DE95-002523] p 1516 N95-20914

Where are we going with Bose-Einstein: A mini review
[PB95-130308] p 1518 N95-21222

Experiments at high energy hadron colliders and underground water Cerenkov detector experiment
[DE95-001804] p 1535 N95-21281

Heavy ion collisions
[DE95-002712] p 1520 N95-21321

Proceedings of the School for Young High Energy Physicists
[PB95-108114] p 1537 N95-21647

The development of science during this century
[DE94-632964] p 1582 N95-22185

HIGH ENERGY OXIDIZERS

Novel fluorine oxidizers
[AD-A279480] p 1284 N95-21678

HIGH FREQUENCIES

Materials research for GHz multi-chip modules
[AD-A279661] p 1227 N95-20412

Field-emitter arrays for RF vacuum microelectronics
[AD-A279959] p 1325 N95-20661

The relative importance of meteor burst and other distance polar cap propagation modes in the low VHF band p 1293 N95-20928

Propagation of high frequency waves in urban and road tunnel environments p 1294 N95-20933

DAMSON: A system to measure multipath dispersion, Doppler spread and Doppler shift on multi-mechanism communications channels p 1299 N95-20955

Identification of the propagation modes and paths on HF links using a goniopolarimeter p 1299 N95-20956

Geographical diversity combining to exploit multi-mechanism propagation p 1299 N95-20957

Measurements of angles of elevation of HF by a high resolution method using polarization diversity
p 1299 N95-20959

MTX final report
[DE95-002960] p 1559 N95-21451

HIGH LEVEL LANGUAGES

Split-C and active messages under SUNMOS on the Intel Paragon
[DE94-011418] p 1474 N95-20123

HIGH POLYMERS

Cross-linking reactions for the conversion of polyphosphazenes into useful materials
[AD-A279696] p 1271 N95-20709

HIGH POWER LASERS

Reactor pumped laser research at the Sandia National Laboratories pulsed reactor facilities
[DE95-002181] p 1371 N95-20867

Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226

High average power diode pumped solid state lasers for CALIOPE
[DE94-019248] p 1376 N95-22121

HIGH PRESSURE

High pressure windowed chamber burned rate determination of liquid propellant XM46
[AD-A283770] p 1282 N95-19920

Overview of the Institute of Geophysics and Planetary Physics and Lawrence Livermore National Laboratory collaborative efforts
[DE94-017300] p 1599 N95-20145

Properties of molecular solids and fluids at high pressure and temperature
[DE94-017594] p 1565 N95-20243

The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers
[DE94-015742] p 1268 N95-20396

Rare gases systematics and mantle structure
p 1416 N95-21778

Structure and stability of hydrous minerals at high pressure p 1417 N95-21786

Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790

Subduction and volatile recycling in Earth's mantle
p 1421 N95-21802

Volatiles in the deep Earth: An experimental study using the laser-heated diamond cell p 1421 N95-21803

Bridging the pressure gap: In situ atomic-level investigations of model platinum catalyst surfaces under reaction conditions by scanning tunneling microscopy
[DE95-002346] p 1246 N95-21990

HIGH RESOLUTION

Correlations between surface structure and catalytic activity/selectivity
[DE94-019023] p 1234 N95-20052

Second European Symposium on X-Ray Topography and High Resolution Diffraction: Programme and abstracts
[AD-A286328] p 1564 N95-20210

Investigation on the backscattering properties of Finnish boreal forests at C- and X-band: A semi-empirical modeling approach
[PB95-127692] p 1389 N95-21105

Neutron molelcular spectroscopy: Future prospects
[PB95-130357] p 1518 N95-21227

Progress in ultrafast scanning probe microscopy
[DE94-018179] p 1373 N95-21261

ICE BABY: Measurements of concentration fluctuations in a forest area in winter conditions
[PB95-133468] p 1405 N95-21274

Science with High Spatial Resolution Far-Infrared Data
[NASA-CR-197353] p 1595 N95-21749

Hires and beyond p 1592 N95-21750

In search of random noise p 1592 N95-21753

Two-dimensional maps of the infrared-to-radio ratio in spiral galaxies p 1583 N95-21765

HIRAS images of fossil dust shells around AGB stars
p 1593 N95-21768

Seismic evidence for volatiles at large depth in the Earth p 1422 N95-21808
Polar volatiles on Mercury and the Moon
p 1422 N95-21811
High resolution descriptions of IRAS 12 and 25 microns confused regions
[AD-A285847] p 1545 N95-21832
High resolution properties of the equatorial Pacific marine atmospheric boundary layer from lidar and radiosonde observations
[DE95-001028] p 1426 N95-21875
Fiber optic pressure sensing array
[AD-D016245] p 1506 N95-22088
Resolution requirements for velocity gradients in turbulence p 1363 N95-22462

HIGH REYNOLDS NUMBER
Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063
The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers
p 1347 N95-21065
Experimental and numerical study of the intermittency exponent mu p 1362 N95-22458

HIGH SPEED
Methods and components for optical contention resolution in high speed networks
[AD-A280016] p 1543 N95-20598
Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727
A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422
High speed optical storage technology
[AD-A285788] p 1456 N95-22400

HIGH SPEED PHOTOGRAPHY
The Combustive Sound Source
[ARL-TR-94-9] p 1503 N95-19911

HIGH STRENGTH
Nitrogen alloyed martensitic steels
[PB95-127791] p 1255 N95-21128
Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 3: Sintered reaction bonded silicon nitride ceramic
[AD-A285773] p 1388 N95-22411

HIGH STRENGTH ALLOYS
Hydrogen resistant alloy - NASA 23
[NASA-CASE-MFS-26200-1-SB] p 1251 N95-20068

HIGH STRENGTH STEELS
The effect of oxide inclusions on the kinetics of the austenite to ferrite transformation in low alloy steel weld metal
[DE94-018131] p 1253 N95-20676
Corrosion evaluation of fuel canister crusher rigging
[DE95-002962] p 1257 N95-21452
Perimeter-yardstick technique for fracture surface fractal analysis
[AD-A286240] p 1387 N95-22025
Demonstration of multifunctional DNBM corrosion inhibitors in protective coatings for Naval air/weapon systems
[AD-A285869] p 1279 N95-22136

HIGH TEMPERATURE
Cr2Nb development
[DE94-018697] p 1250 N95-20043
Properties of molecular solids and fluids at high pressure and temperature
[DE94-017594] p 1565 N95-20243
Overview on superplasticity research on small-grained materials
[DE94-016550] p 1266 N95-20316
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
Visible and near-IR spectroscopic studies of UC1(4) in a basic ambient temperature melt: The observation of a possible geometric distorted UC1(6)(exp 2-) species and the evidence for the hydrogen-bond in the melt
[DE94-017764] p 1237 N95-20493
Approaches to the design of structural ceramics incorporating whiskers and particulate phases
[DE94-018126] p 1271 N95-20704
The processing and mechanical properties of high temperature/high performance composites. Processing/property correlations, book 4
[AD-A279739] p 1228 N95-20802
Numerical investigation of supersonic turbulent boundary layers with high wall temperature
p 1344 N95-21050
Nitrogen alloyed martensitic steels
[PB95-127791] p 1255 N95-21128
Atmospheric stability and its influence on air quality in small communities in northern Sweden
[PB95-131652] p 1405 N95-21181
Toughened Silcomp composites for gas turbine engine applications
[DE95-002851] p 1214 N95-21243
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361
High temperature superconducting films and multilayers for electronics
[AD-A279545] p 1331 N95-21693
Corrosion resistance and behavioral characteristics of metals exposed to 70 percent by weight sulfuric acid at elevated temperatures
[DE95-001724] p 1259 N95-21740
Volatiles in the Earth: All shallow and all recycled
p 1416 N95-21779
Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790
Volatiles in the deep Earth: An experimental study using the laser-heated diamond cell p 1421 N95-21803
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813
The processing and mechanical properties of high temperature/high performance composites. Book 6: Delamination and compressive behavior
[AD-A279780] p 1231 N95-21999
Atom probe field ion microscopy of type 308 CRE stainless steel welds
[DE94-019162] p 1261 N95-22127
High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254
Materials support for the development of High Temperature Advanced Furnaces (HITAF): A comparison of selected mechanical properties for three SiC-based ceramics
[DE94-017752] p 1260 N95-22258
Research on the power generation system with thermoelectric conversion elements
[DE95-714804] p 1397 N95-22309

HIGH TEMPERATURE GASES
Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170
Toughened Silcomp composites for gas turbine engine applications
[DE95-002851] p 1214 N95-21243
Ceramem filters for removal of particles from hot gas streams
[DE95-001976] p 1275 N95-21354

HIGH TEMPERATURE PLASMAS
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-018580] p 1552 N95-20345
Characterization of nova plasmas using an x-ray spectrometer with temporal and spatial resolution
[DE94-016970] p 1553 N95-20363
Electromagnetic waves in an ultrarelativistically hot and strongly magnetized electron-positron plasma
[DE94-628963] p 1307 N95-21849
Submicrosecond, synchronizable x-ray source
[AD-D016497] p 1546 N95-21905

HIGH TEMPERATURE SUPERCONDUCTORS
Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A285611] p 1312 N95-19894
Carrier doping and interlayer coupling in HTSC single crystals
[DE94-018637] p 1564 N95-20127
Superconducting thin film with fullerenes and method of making
[AD-D016580] p 1567 N95-20461
A Monte Carlo study of the minus sign problem in the t-J model using an Intel iPSC/860 hypercube
[DE95-001072] p 1570 N95-20819
Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors
[DE95-001073] p 1570 N95-20820
Reactive nanophase oxide additions to melt-processed high-T(sub c) superconductors
[DE95-001470] p 1570 N95-20841
Flux creep with logarithmic U(j) dependence
[DE94-629058] p 1577 N95-22180
Magnetic interactions in the Emery model
[DE94-629059] p 1577 N95-22181
Local texture and strongly linked conduction in spray-pyrolyzed TlBa2Ca2Cu3O(8+x) deposits
[DE94-017887] p 1578 N95-22269
Development of practical high temperature superconducting wire for electric power applications
[DE94-017894] p 1336 N95-22271

HIGH TEMPERATURE TESTS
Investigation of flight data recorder fire test requirements
[AD-A285832] p 1208 N95-20032
Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4
[DE94-631462] p 1255 N95-20909
Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

HIGH VACUUM
Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792
Bridging the pressure gap: In situ atomic-level investigations of model platinum catalyst surfaces under reaction conditions by scanning tunneling microscopy
[DE95-002346] p 1246 N95-21990

HIGH VOLTAGES
A charge distribution analysis instrument for catalysis and material science applications
[DE94-016489] p 1364 N95-20233
A wideband EMP test system
[DE94-015283] p 1290 N95-20474
Development of a tester for evaluation of prototype thermal cells and batteries
[DE95-000540] p 1325 N95-20628
Method of fabricating a microelectronic photomultiplier device with integrated circuitry
[AD-D016530] p 1325 N95-20726
Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727

HIGHLANDS
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801

HISTOLOGY
Effect of increased venous backflow on the release of cardiac hormone. Fine structural, immunohistochemical, and biochemical study
[PB95-130399] p 1445 N95-21424

HISTORIES
Ups and downs of type theory
[PB95-110664] p 1487 N95-19903
Intelligent tutoring systems: Past, present, and future
[AD-A280011] p 1448 N95-19970
A Clementine collection: Moonglow
[AD-A286360] p 1217 N95-20228
Acoustic emission: The first half century
[DE94-017176] p 1503 N95-20267
Accelerators for energy production
[DE94-770764] p 1392 N95-20685
The personal aircraft: Status and issues
[NASA-TM-109174] p 1200 N95-20688
But what will it Cost? The history of NASA cost estimating p 1583 N95-20742
The problem of space travel: The rocket motor
[NASA-SP-4026] p 1217 N95-21894
The development of science during this century
[DE94-632964] p 1582 N95-22185

HMX
Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513

HOHLRAUMS
24th Annual Anomalous Absorption Conference
[DE94-016457] p 1551 N95-20283
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
[DE94-016447] p 1551 N95-20315
Radiation-driven targets for heavy-ion fusion
[DE95-002264] p 1533 N95-20784
Effects of plasma physics on capsule implosions in gas-filled hohlraums
[DE95-000923] p 1371 N95-20786
Shot-to-shot comparison of the first Li-beam driven Hohlraum experiments
[DE94-016558] p 1558 N95-21247
Low density gas and foam targets for ICF long scale length plasma experiments: Fabrication and characterization
[DE95-000935] p 1558 N95-21368
Progress in the Light Ion Driven Inertial Confinement Fusion Program
[DE94-019182] p 1537 N95-21603

HOLE BURNING
Free electron laser program
[AD-A285906] p 1368 N95-19987
Time domain spectral hole-burning storage
[AD-A279912] p 1587 N95-20309

HOLE DISTRIBUTION (ELECTRONICS)
Visible light emitting materials and injection devices
[AD-A284796] p 1541 N95-20066
Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679

HOLES (ELECTRON DEFICIENCIES)
Temporal and spectral investigation of multi-Landau level quantum beats in GaAs [DE94-018189] p 1569 N95-20678
Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells [DE94-018190] p 1569 N95-20679
A versatile masking process for plasma etched backside via holes in GaAs [DE94-019176] p 1572 N95-21419

HOLES (MECHANICS)
Navier-Stokes simulations of the effects of suction holes on a flat plate boundary layer p 1352 N95-21094
Magnetic interactions in the Emery model [DE94-629059] p 1577 N95-22181

HOLLOW CATHODES
Thoriated-tungsten, split-ring, hollow-cathode electrode for discharge devices [AD-D016508] p 1333 N95-21906

HOLMIUM
Rare earth garnet selective emitter p 1322 N95-20536

HOLOGRAPHY
Application of computer-generated holograms to optical transformations [AD-A286356] p 1368 N95-22256

HOMING DEVICES
Fracture analysis of an all-ceramic bearing system [AD-A285056] p 1269 N95-20486

HOMOGENEOUS TURBULENCE
A numerical investigation of energy transfer and subgrid-scale eddy viscosity in homogeneous, isotropic and shear turbulence [AD-A280005] p 1339 N95-20058
Pressure and higher-order spectra for homogeneous isotropic turbulence p 1343 N95-21045
Statistics of pressure and pressure gradient in homogeneous isotropic turbulence p 1343 N95-21046
The decay of axisymmetric homogeneous turbulence p 1343 N95-21047
Modeling the two-point correlation of the vector stream function p 1345 N95-21055
Homogeneous turbulence subjected to mean flow with elliptic streamlines p 1345 N95-21056
On the transition towards slow manifold in shallow-water and 3D Euler equations in a rotating frame p 1345 N95-21057
On the asymptotic similarity of rotating homogeneous turbulence p 1345 N95-21058
Anisotropic structure of homogeneous turbulence subjected to uniform rotation p 1346 N95-21059
The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers p 1347 N95-21065

HOMOGENIZING
Microstructures and tensile properties of as-cast iron-aluminide alloys [DE94-017868] p 1252 N95-20359

HOMOJUNCTIONS
Status of diffused junction p+n InP solar cells for space applications p 1317 N95-20509
Annealing of irradiated n+p InP buried homojunctions p 1320 N95-20524

HOMOLOGY
Elliptic genera for Z/K-manifolds I [PB95-109096] p 1496 N95-22355

HOMOTOPY THEORY
Layered path planning for an autonomous mobile robot [AD-A286138] p 1485 N95-22244

HORIZON
Radiance of the ocean horizon [AD-A285613] p 1431 N95-19896
Comparative study of C- and K-band propagation mechanisms beyond the horizon p 1297 N95-20946

HORMONES
Effect of increased venous backflow on the release of cardiac hormone. Fine structural, immunohistochemical, and biochemical study [PB95-130399] p 1445 N95-21424

HOT CORROSION
A transmission electron microscope characterization of sodium sulfate hot corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composite [AD-A286164] p 1231 N95-22038

HOT ELECTRONS
An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation [DE95-001078] p 1515 N95-20911

HOT-WIRE FLOWMETERS
Transverse vorticity measurements in the NASA Ames 80 x 120 wind tunnel boundary layer p 1362 N95-22457

HOUSINGS
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 1: Isostatically pressed alumina ceramic [AD-A279669] p 1270 N95-20603
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 3: Sintered reaction bonded silicon nitride ceramic [AD-A285773] p 1388 N95-22411

HUBBLE SPACE TELESCOPE
Post-flight investigation programmes of recently retrieved solar generators p 1321 N95-20531

HULLS (STRUCTURES)
Set functionals in stochastic geometry [PB95-135372] p 1491 N95-21005

HUMAN BEHAVIOR
13th European Annual Conference on Human Decision Making and Manual Control [PB95-132874] p 1450 N95-21284

HUMAN BEINGS
Carboxyhemoglobin formation due to transient exposure to high level carbon monoxide: Experimental results and an explanatory model [AD-A285476] p 1444 N95-20979

HUMAN FACTORS ENGINEERING
Crew aiding and automation: A system concept for terminal area operations, and guidelines for automation design [NASA-CR-4631] p 1204 N95-19950
A 3D stereo data visualization and representation [AD-A284788] p 1449 N95-20064
Behavioral effects of tyrosine during sustained wakefulness [AD-A279789] p 1441 N95-20307
Measuring presence in virtual environments [AD-A286183] p 1460 N95-20326
An evaluation of Automatic Terminal Information Service (ATIS) flight deck display presentation options [AD-A280100] p 1204 N95-21020
Microclimate cooling effect on perceived exertion in four heat/exercise scenarios [AD-A285549] p 1444 N95-21160
Perception and control of locomotion [AD-A285605] p 1450 N95-21192
Human force exertion in user-product interaction. Backgrounds for design [PB95-132858] p 1452 N95-21283
Visual displays and Neuro-Linguistic Programming [DE95-001454] p 1466 N95-21311
Quantitative evaluation of wrist posture and typing performance: A comparative study of 4 computer keyboards [DE95-002392] p 1452 N95-21358
Independent review of Aviation Technology and Research Information Analysis System (ATRIAS) database [AD-A284049] p 1203 N95-21518
Crew-Centered Cockpit Design (CCCD) field demonstration program, volume 1 [AD-A286426] p 1453 N95-21566
Ergonomic evaluation of the Apple Adjustable Keyboard [DE95-002393] p 1453 N95-21637
Effect of lags on human performance with head-coupled simulators [AD-A279577] p 1453 N95-21700
Adaptive capture of expert behavior [DE94-018285] p 1483 N95-21710
Top ten list of user-hostile interface design [DE95-001602] p 1453 N95-21721
Command history, 1993 [AD-A279775] p 1446 N95-21989
Systems engineering design and technical analyses for Strategic Avionics Crew-station Design Evaluation Facility (SACDEF) [AD-A286239] p 1213 N95-22024
Information clustering for better decision-making [AD-A286292] p 1590 N95-22053
Activities of the Institute for the Study of Human Capabilities [AD-A286471] p 1454 N95-22275
Fuzzy clustering of facial form for prototyping environmental protection equipment [DE94-014657] p 1454 N95-22466

HUMAN FACTORS LABORATORIES
Sustaining the health and performance of soldiers/warfighters deployed to harsh environments [AD-A286270] p 1446 N95-22004

HUMAN PERFORMANCE
The effects of three-dimensional graphs on decision making [AD-A285034] p 1583 N95-20051
Behavioral effects of tyrosine during sustained wakefulness [AD-A279789] p 1441 N95-20307
Development and enhancement of a model of performance and decision making under stress in a real life setting [AD-A285945] p 1449 N95-20393
Modeling platform dynamics and physiological response to short arm centrifugation [AD-A279640] p 1442 N95-20457
The MSFC Program Control Development Program p 1585 N95-20754
Effect of lags on human performance with head-coupled simulators [AD-A279577] p 1453 N95-21700
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 399) [NASA-SP-7011(399)] p 1446 N95-21947
Command history, 1993 [AD-A279775] p 1446 N95-21989
Sustaining the health and performance of soldiers/warfighters deployed to harsh environments [AD-A286270] p 1446 N95-22004
Activities of the Institute for the Study of Human Capabilities [AD-A286471] p 1454 N95-22275

HUMAN TOLERANCES
Evaluation of stress experienced by soldiers wearing chemical protective clothing during varying work loads in desert or tropical environments [AD-A280113] p 1452 N95-20625
Environmental Hazards Assessment Program [DE94-019075] p 1406 N95-21565
The influence of coronary artery disease on +Gz tolerance: A preliminary study [AD-A279305] p 1446 N95-21941

HUMAN-COMPUTER INTERFACE
PRSPLOT6 manual [PB95-110862] p 1456 N95-19928
NOMADS graphical user interface version 2.0 user's manual [AD-A286314] p 1458 N95-20095
Evaluation of Borland Turbo Vision [AD-A279873] p 1459 N95-20184
Measuring presence in virtual environments [AD-A286183] p 1460 N95-20326
Translation of the data flow query language for the multimodel, multibackend database system [AD-A285978] p 1588 N95-20617
ECSU-AASERT summer research project in parallel processing and computer visualization [AD-A285983] p 1475 N95-20618
Making structured graphics and constraints practical for large-scale applications [AD-A280062] p 1461 N95-20623
Model formality in human/computer collaboration [AD-A286001] p 1462 N95-20718
Generating examples for use in tutorial explanations: The use of a subsumption based classifier [AD-A286028] p 1464 N95-20996
DAVE: A plug and play model for distributed multimedia application development [DE94-016481] p 1465 N95-21153
Visual displays and Neuro-Linguistic Programming [DE95-001454] p 1466 N95-21311
CAiSE 1994 Doctoral Consortium [PB95-135182] p 1469 N95-21711
Top ten list of user-hostile interface design [DE95-001602] p 1453 N95-21721
State of the art in CFD pre- and postprocessing [PB95-110391] p 1356 N95-22017
Information clustering for better decision-making [AD-A286292] p 1590 N95-22053
Activities of the Institute for the Study of Human Capabilities [AD-A286471] p 1454 N95-22275
ActorStudio reference manual. A user's guide to the ActorStudio user interface editor, version 1.0 [PB95-127023] p 1472 N95-22310

HUMIDITY
Unified very low stratus cloud/subcloud microphysics model: User's guide [AD-A286454] p 1430 N95-21586

HYBRID STRUCTURES
Trimode Power Converter optimizes PV, diesel and battery energy sources [DE94-015014] p 1313 N95-20262
Forming of superplastic ceramics [DE94-017306] p 1276 N95-21662
Electric and Hybrid Vehicle Program Site Operator Program [DE95-002042] p 1333 N95-21960

HYDRATES
Storage and recycling of water and carbon dioxide in the earth p 1425 N95-21822

HYDRATION
Potential-of-mean-force description of ionic interactions and structural hydration in biomolecular systems [DE95-000859] p 1438 N95-21366

HYDRAULIC EQUIPMENT
Force based motion control of a walking machine
[PB95-129672] p 1451 N95-20276
Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695
HYDRAULICS
NESTLE: Few-group neutron diffusion equation solver utilizing the nodal expansion method for eigenvalue, adjoint, fixed-source steady-state and transient problems
[DE95-001903] p 1466 N95-21288
HYDRAZINES
Catalyzed reduction of nitrate in aqueous solutions
[DE94-017660] p 1247 N95-22049
HYDROBROMIC ACID
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
HYDROCARBON COMBUSTION
A flamelet model for turbulent unpremixed combustion
p 1249 N95-21081
HYDROCARBON FUEL PRODUCTION
Bioconversion of coal derived synthesis gas to liquid fuels
[DE94-017381] p 1282 N95-19927
Producing liquid fuels from biomass
[DE95-717458] p 1398 N95-22425
HYDROCARBON FUELS
Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596
Analysis of test criteria for specifying foam firefighting agents for aircraft rescue and firefighting
[AD-A286381] p 1203 N95-22352
HYDROCARBONS
Degradation of aromatic hydrocarbons in an aquifer during a field experiment demonstrating the feasibility of remediation by natural attenuation
[AD-A283809] p 1282 N95-19922
Refractive index change in dissociating shocked benzene
[DE94-019015] p 1541 N95-20352
Novel catalysts for methane activation
[DE95-002639] p 1237 N95-20438
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
A flamelet model for turbulent unpremixed combustion
p 1249 N95-21081
Computer programs for analysis of geophysical data
[DE95-002472] p 1415 N95-21511
New concepts for refrigerant leak detection and mixture measurement
[DE94-018967] p 1287 N95-21559
Development and demonstration of advanced technologies for direct electrochemical oxidation of hydrocarbons (methanol, methane, propane)
[AD-A285094] p 1224 N95-22474
HYDROCHLORIC ACID
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 1: Transition properties in HCl
[AD-A285988] p 1239 N95-20613
The energetics and dynamics of free radicals, ions, and clusters
[DE94-018101] p 1244 N95-21701
HYDROCYANIC ACID
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
HYDRODYNAMICS
Transport and dynamics in toroidal fusion systems
[DE94-018653] p 1548 N95-20029
Computational modeling of physical processes during laser ablation
[DE94-017699] p 1369 N95-20221
A computational study of projectile melt in impact with typical Whipple shields
[DE94-016454] p 1385 N95-20237
Hydrodynamic instabilities in inertial fusion
[DE94-018079] p 1554 N95-20675
Computational design of Hypervelocity Launchers
[DE95-000744] p 1218 N95-20785
Conservative smoothing versus artificial viscosity
[DE95-001108] p 1341 N95-20831
A flamelet model for turbulent unpremixed combustion
p 1249 N95-21081
Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479
Wave journal bearing. Part 1: Analysis
[NASA-CR-195431-PT-1] p 1382 N95-22404
Wave journal bearing. Part 2: Experimental pressure measurements and fractional frequency whirl threshold for wave and plain journal bearings
[NASA-TM-106848-PT-2] p 1382 N95-22405
HYDROGEN
Intrinsic barriers for H-atom transfer reactions
[DE94-018914] p 1507 N95-20049
Proceedings of the 1994 DOE/NREL Hydrogen Program Review
[DE94-011835] p 1234 N95-20117
Single-collision studies of energy transfer and chemical reaction
[DE95-002943] p 1244 N95-21517
Experimental investigations of electron capture from atomic hydrogen and deuterium by alpha particles
[DE95-002138] p 1523 N95-21587
D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781
Structure and stability of hydrous minerals at high pressure p 1417 N95-21786
Hydrogen and related materials at high density: Physics, chemistry and planetary implications
p 1418 N95-21791
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813
A crystallographic model for hydrous wadsleyite (Beta-Mg2SiO4) p 1424 N95-21817
Water abundance and accretion history of terrestrial planets p 1424 N95-21820
Ab initio potential energy surface for H + OCS reactions: Extended basis sets and correlation treatment
[AD-A286420] p 1247 N95-22207
The two-electron problem and prospects for atomic collision theory on a numerical lattice
[DE94-017856] p 1528 N95-22265
Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 2: The interaction of hydrogen chloride with the rare gas xenon
[AD-A286385] p 1248 N95-22321
HYDROGEN ATOMS
Calculation of the total and total ionization cross sections for positron scattering on atomic hydrogen
[DE94-631341] p 1508 N95-20197
An atomically-resolved STM study of the thermal decomposition of disilane on Si(001)
[AD-A279818] p 1567 N95-20544
Studies of the gas tori of Titan and Triton
[NASA-CR-197377] p 1601 N95-20797
Restricted mass transport effects on free radical reactions
[DE94-018136] p 1217 N95-21706
Atomic velocity distributions in a hydrogen beam effusing out of an RF discharge dissociator
[AD-A279253] p 1307 N95-21985
HYDROGEN BONDS
Visible and near-IR spectroscopic studies of UC1(4) in a basic ambient temperature melt: The observation of a possible geometric distorted UC1(6)(exp 2-) species and the evidence for the hydrogen-bond in the melt
[DE94-017764] p 1237 N95-20493
Siloxanes with strong hydrogen bond donating functionalities
[AD-D016499] p 1279 N95-22057
HYDROGEN COMPOUNDS
Origin and loss of the volatiles of the terrestrial planets p 1417 N95-21785
HYDROGEN EMBRITTLEMENT
Hydrogen resistant alloy - NASA 23
[NASA-CASE-MFS-26200-1-SB] p 1251 N95-20068
Tritium and decay helium effects on the fracture toughness properties of types 316L, 304L and 21Cr-6Ni-9Mn stainless steels
[DE95-001248] p 1252 N95-20216
HYDROGEN FUELS
Numerical study of contaminant effects on combustion of hydrogen, ethane, and methane in air
[NASA-TM-106844] p 1284 N95-22114
HYDROGEN IONS
Dynamics of collision processes
[DE94-017593] p 1509 N95-20242
Measurements of scattering processes in negative ion: Atom collisions
[DE95-000664] p 1519 N95-21276
HYDROGEN ISOTOPES
Muon transfer from muonic atoms of hydrogen isotopes to He nuclei
[DE94-628903] p 1523 N95-21591
HYDROGEN MASERS
Atomic velocity distributions in a hydrogen beam effusing out of an RF discharge dissociator
[AD-A279253] p 1307 N95-21985
HYDROGEN PRODUCTION
Proceedings of the 1994 DOE/NREL Hydrogen Program Review
[DE94-011835] p 1234 N95-20117
HYDROGEN-BASED ENERGY
Proceedings of the 1994 DOE/NREL Hydrogen Program Review
[DE94-011835] p 1234 N95-20117
HYDROGENATION
Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522
Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs
p 1323 N95-20542
Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
[DE94-018184] p 1259 N95-21707
HYDROGEOLOGY
Review of GIS applications in hydrologic modeling
[AD-A279076] p 1390 N95-21628
HYDROGRAPHY
Hydrographic data from equatorial Pacific waters near the Galapagos
[AD-A283741] p 1431 N95-19918
Mixing and dynamics of the Mediterranean outflow
[AD-A279803] p 1434 N95-21306
Exchanges between hemispheres and gyres: A direct approach to the mean circulation of the equatorial Pacific
[NASA-CR-196311] p 1436 N95-22072
HYDROLOGY
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
Sandia National Laboratories analysis code data base
[DE95-004188] p 1502 N95-22420
HYDROLOGY MODELS
Review of GIS applications in hydrologic modeling
[AD-A279076] p 1390 N95-21628
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
HYDROLYSIS
Safe conditions for contacting nitric acid or nitrates with Tri-n-Butyl Phosphate (TBP)
[DE95-001243] p 1235 N95-20215
Corrosion resistance and behavioral characteristics of metals exposed to 70 percent by weight sulfuric acid at elevated temperatures
[DE95-001724] p 1259 N95-21740
HYDROMETEOROLOGY
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
HYDROPHONES
Analysis of low frequency ocean noise. 1: From a long-term experiment across the US East Coast. 2: From the Wake Island Hydrophone Array during northwest Pacific typhoons
[AD-A284975] p 1432 N95-20040
A simple ocean bottom hydrophone with 200 megabyte data capacity
[AD-A279478] p 1434 N95-21677
HYDROSTATIC PRESSURE
The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers
[DE94-015742] p 1268 N95-20396
Attachment methodology for composite cylinder assembly
[AD-D016578] p 1227 N95-20459
Photoluminescence under pressure and annealing of nitrogen-doped ZnSe
[DE95-002355] p 1568 N95-20630
HYDROSTATICS
Hydrostatic force sensor
[DE94-018923] p 1364 N95-20321
HYDROTHERMAL SYSTEMS
Hydrothermal conversion of carbohydrates and related compounds
[PB95-134011] p 1396 N95-22175
HYDROXIDES
Nickel hydroxide electrodes in reduced-alkalinity electrolytes
[DE95-002333] p 1326 N95-20814
Correlations for the OH A(sup 2)(Sigma)(sup +)(v(prime)=0) electronic quenching cross-section
[DE95-002591] p 1244 N95-21524
Acid-site characterization of water-oxidized alumina films by near-edge x-ray absorption and soft x-ray photoemission
[DE95-003355] p 1247 N95-22234
HYDROXYL EMISSION
Two-dimensional imaging of OH in a lean burning high pressure combustor
[NASA-TM-106854] p 1214 N95-21383

HYDROXYL RADICALS

Two-dimensional imaging of OH in a lean burning high pressure combustor
[NASA-TM-106854] p 1214 N95-21383

HYGIENE

Personal hygiene body wipe
[AD-A286092] p 1454 N95-22274

HYGROSCOPICITY

Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials
[AD-A286418] p 1357 N95-22206

HYPERCUBE MULTIPROCESSORS

A Monte Carlo study of the minus sign problem in the t-J model using an Intel iPSC/860 hypercube
[DE95-001072] p 1570 N95-20819

HYPERGEOMETRIC FUNCTIONS

Exponents in lifetime and power spectral density forms in self-organized critical systems
[AD-A286242] p 1495 N95-22026

HYPERNUCLEI

Strange hadronic matter
[DE94-019345] p 1521 N95-21484

HYPERONS

Strange hadronic matter
[DE94-019345] p 1521 N95-21484

HYPERSONIC FLOW

Application of pressure sensitive paint in hypersonic flows
[NASA-TM-106824] p 1201 N95-20794

Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212

HYPERSONIC HEAT TRANSFER

Numerical investigation of one-dimensional heat-flux calculations
[AD-A286293] p 1582 N95-22054

HYPERSONIC INLETS

Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10
[NASA-TP-3476] p 1340 N95-20619

HYPERSONIC SPEED

Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10
[NASA-TP-3476] p 1340 N95-20619

HYPERSONIC VEHICLES

Description and flow characterization of hypersonic facilities
[AD-A284291] p 1200 N95-20248

HYPERSONICS

Description and flow characterization of hypersonic facilities
[AD-A284291] p 1200 N95-20248

HYPERTHERMIA

Radiofrequency hyperthermia systems: Experimental and clinical assessment of the feasibility of radiofrequency hyperthermia systems for loco-regional deep heating
[PB94-206885] p 1444 N95-21016

HYPERVELOCITY

A Hypervelocity Experimental Research Database (HERD): Support for the Wright Laboratory Armament Directorate Code Validation Program (COVAL)
[DE95-001628] p 1387 N95-21396

HYPERVELOCITY FLOW

Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212

HYPERVELOCITY IMPACT

Experimental hypervelocity impact effects on simulated planetesimal materials
[DE94-017290] p 1599 N95-20144

A Hypervelocity Experimental Research Database (HERD): Support for the Wright Laboratory Armament Directorate Code Validation Program (COVAL)
[DE95-001628] p 1387 N95-21396

HYPERVELOCITY LAUNCHERS

Chunk projectile launch using the Sandia Hypervelocity Launcher Facility
[DE94-018494] p 1215 N95-20223

Computational design of Hypervelocity Launchers
[DE95-000744] p 1218 N95-20785

HYPERVELOCITY PROJECTILES

Chunk projectile launch using the Sandia Hypervelocity Launcher Facility
[DE94-018494] p 1215 N95-20223

A Hypervelocity Experimental Research Database (HERD): Support for the Wright Laboratory Armament Directorate Code Validation Program (COVAL)
[DE95-001628] p 1387 N95-21396

HYPERVOLEMIA

Hypervolemia in men from drinking hyperhydration fluids at rest and during exercise
[NASA-TM-4657] p 1439 N95-21544

HYPOTHALAMUS

Netherlands Institute for Brain Research progress report, 1993
[PB95-135398] p 1445 N95-21352

HYSTERESIS

Application of an energy-based life prediction model to bithermal and thermomechanical fatigue
[NASA-TM-106684] p 1385 N95-20179

I

I BEAMS

Inelastic bending and torsion of steel I-beams
[PB94-208378] p 1384 N95-19975

Inelastic torsion of steel I-beams
[PB94-208360] p 1384 N95-20101

IBM PERSONAL COMPUTERS

An IBM based ARINC interface
[ARL-TR-21] p 1471 N95-22104

Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320

ICE

ICE BABY: Measurements of concentration fluctuations in a forest area in winter conditions
[PB95-133468] p 1405 N95-21274

Dynamics of volatile delivery from outer to inner solar system p 1420 N95-21798

Surface ices in the outer solar system
p 1423 N95-21815

ICE FORMATION

The initiation of lightning and the growth of electric fields in thunderstorms
[AD-A280033] p 1428 N95-20008

Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea
[AD-A280095] p 1433 N95-21018

Development of a portable ice-thickness measuring instrument
[AD-A279472] p 1433 N95-21291

ICE MAPPING

Atlas of SSM/I satellite ice concentration interpolated to operational ice model domains of the Arctic for 1993
[AD-A280183] p 1432 N95-20012

IDEAL GAS

Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212

IDENTIFYING

Wavelet-based acoustic recognition of aircraft
[DE94-017701] p 1503 N95-20019

Angle resolved Auger electron spectroscopy: An alternate tool for identifying electronic excitation processes in solids
[AD-A285375] p 1238 N95-20555

Guidelines for qualifying cleaning and verification materials
[NASA-TM-108474] p 1270 N95-20694

Mantle rare gas relative abundances in a steady-state mass transport model p 1423 N95-21812

IGNEOUS ROCKS

Spatial variation of primordial 3-He in crustal fluids along the East-African Rift system (the Ethiopian and the Kenya Rift section) p 1418 N95-21789

Solar helium and neon in the Earth
p 1419 N95-21793

IGNITERS

Investigation of rocket motors 3 inch number 1 Mk 4
[AD-A284278] p 1221 N95-19962

IGNITION

The hot fragment conductive ignition test for screening LOVA propellants
[AD-A284259] p 1282 N95-20187

National Ignition Facility: Experimental plan
[DE94-016542] p 1550 N95-20189

Proceedings of the Zel'Dovich Memorial International Conference on Combustion, Detonation, Shock Waves, volume 2
[AD-A286626] p 1239 N95-20769

Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21208

Numerical wave speed for one-dimensional scalar hyperbolic conservation laws with source terms
[PB95-127536] p 1492 N95-21371

Ignition of submarine materials at various oxygen concentrations
[PB95-131371] p 1243 N95-21428

Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames
[DE95-002481] p 1243 N95-21512

IGNITION LIMITS

Triple flames and flame stabilization
p 1249 N95-22441

IGNITION SYSTEMS

Use of the National Ignition Facility for the development of inertial fusion energy
[DE94-016696] p 1557 N95-21206

IGNITION TEMPERATURE

Ignition of submarine materials at various oxygen concentrations
[PB95-131371] p 1243 N95-21428

ILL-CONDITIONED PROBLEMS (MATHEMATICS)

Applied mathematical problems in modern electromagnetics
[AD-A286448] p 1303 N95-21462

ILLUMINATING

X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015

ILLUMINATION

Annealing of irradiated n+p InP buried homojunctions
p 1320 N95-20524

Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183

IMAGE ANALYSIS

Atlas of SSM/I satellite ice concentration interpolated to operational ice model domains of the Arctic for 1993
[AD-A280183] p 1432 N95-20012

Energy and Technology Review
[DE94-017686] p 1219 N95-20148

View-based models of 3D object recognition and class-specific invariance
[AD-A279858] p 1459 N95-20157

A Hyperspectral Image Data Exploration Workbench for environmental science applications
[DE94-016373] p 1412 N95-20171

Perception and control of locomotion
[AD-A285605] p 1450 N95-21192

Object recognition by alignment using invariant projections of planar surfaces
[AD-A279841] p 1468 N95-21495

Arcmimute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771

Interpretation of HRTEM images by image simulation: An introduction to theory and practice
[DE95-003422] p 1591 N95-22235

Users guide to NCEMSS, version 2.0
[DE95-003443] p 1548 N95-22238

Saddle-node dynamics for edge detection
[DE94-017415] p 1473 N95-22426

IMAGE CLASSIFICATION

Experimental proof-of-concept of phase derivative based range profile enhancement ATR
[AD-A284921] p 1289 N95-19997

IMAGE CONTRAST

Microscopy of stress-induced morphological development and dislocation nucleation during semiconductor epitaxy
[DE94-017869] p 1568 N95-20674

IMAGE CONVERTERS

An image cancellation approach to depth-from-focus
[DE94-019312] p 1544 N95-21392

IMAGE CORRELATORS

Application of MCM image construction to IRAS comet observations p 1594 N95-21772

IMAGE ENHANCEMENT

The sharper image: Implementing a Fast Fourier Transform (FFT) to enhance a video-captured image
[AD-A279790] p 1445 N95-21180

Synthetic aperture radar processing with polar formatted subapertures
[DE95-001830] p 1302 N95-21305

Combining image-processing and image compression schemes p 1304 N95-21537

Constraints as a destriping tool for Hires images
p 1593 N95-21756

Spatio-temporal masking in human vision and its application to image coding
[AD-A284949] p 1451 N95-22473

IMAGE FILTERS

A framework for segmentation using physical models of image formation
[AD-A279900] p 1543 N95-20564

The sharper image: Implementing a Fast Fourier Transform (FFT) to enhance a video-captured image
[AD-A279790] p 1445 N95-21180

IMAGE INTENSIFIERS

The sharper image: Implementing a Fast Fourier Transform (FFT) to enhance a video-captured image
[AD-A279790] p 1445 N95-21180

Unique microchannel plate process doubles MCPI resolution
[DE94-017507] p 1337 N95-22427

IMAGE PROCESSING

High performance hardware and software for pattern recognition and image processing
[AD-A279776] p 1457 N95-19961

Simulation of stellar speckle imaging
[DE94-016606] p 1412 N95-19985
Ice Processing System software support documentation
[AD-A280030] p 1388 N95-20006
X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015
A 3D stereo data visualization and representation
[AD-A284788] p 1449 N95-20064
Program of the 1993 9th Interdisciplinary Laser Science Conference (ILS-9)
[AD-A285131] p 1369 N95-20082
Energy and Technology Review
[DE94-017686] p 1219 N95-20148
View-based models of 3D object recognition and class-specific invariance
[AD-A279858] p 1459 N95-20157
SAR image registration in absolute coordinates using GPS carrier phase position and velocity information
[DE94-018738] p 1204 N95-20195
Characterization of an expanded-field Schwarzschild objective for extreme ultraviolet lithography
[DE94-016780] p 1541 N95-20239
Tracking a dynamic set of feature points
[AD-A285124] p 1313 N95-20257
Low electron beam energy CIVA analysis of passivated ICs
[DE94-017421] p 1314 N95-20286
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545
Deconvolution and singular value decomposition
[AD-A286582] p 1491 N95-20875
Integration of segmentation and stereo matching
[PB95-107819] p 1444 N95-21028
Synthetic aperture radar processing with polar formatted subapertures
[DE95-001830] p 1302 N95-21305
An image cancellation approach to depth-from-focus
[DE94-019312] p 1544 N95-21392
Object recognition by alignment using invariant projections of planar surfaces
[AD-A279841] p 1468 N95-21495
Combining image-processing and image compression schemes p 1304 N95-21537
Subsampling methods for image sequence coding
[PB95-107991] p 1305 N95-21579
Hardware implementation of a desktop supercomputer for high performance image processing. Color image processing using cellular neural networks
[AD-A286455] p 1455 N95-21589
Surface micromachined capacitive tactile image sensor
[PB95-108031] p 1288 N95-21633
Hires and beyond p 1592 N95-21750
MEM application to IRAS CPC images
p 1592 N95-21751
An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752
Constraints as a destriping tool for Hires images
p 1593 N95-21756
Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769
A HIRES analysis of the FIR emission of supernova remnants p 1594 N95-21770
Application of MCM image construction to IRAS comet observations p 1594 N95-21772
Thermal imaging systems
[AD-A279146] p 1307 N95-21970
Image and video coding using a wavelet decomposition
[PB95-135067] p 1311 N95-22358
Feature extraction without edge detection
[AD-A279842] p 1473 N95-22386
Imaging design of the wide field x-ray monitor onboard the HETE satellite
[DE95-002750] p 1221 N95-22436
Spatio-temporal masking in human vision and its application to image coding
[AD-A284949] p 1451 N95-22473

IMAGE RECONSTRUCTION
Deconvolution and singular value decomposition
[AD-A286582] p 1491 N95-20875
Three-dimensional ground penetrating radar imaging using multi-frequency diffraction tomography
[DE94-016687] p 1301 N95-21205
Hires and beyond p 1592 N95-21750
MEM application to IRAS CPC images
p 1592 N95-21751
An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752
In search of random noise p 1592 N95-21753
Beyond maximum entropy: Fractal Pixon-based image reconstruction p 1593 N95-21757
HIRAS: High-resolution IRAS images
p 1593 N95-21758

IMAGE RESOLUTION
A framework for segmentation using physical models of image formation
[AD-A279900] p 1543 N95-20564
Combining image-processing and image compression schemes p 1304 N95-21537
A high resolution atlas of the galactic plane at 12 microns and 25 microns p 1593 N95-21755
Constraints as a destriping tool for Hires images
p 1593 N95-21756
Beyond maximum entropy: Fractal Pixon-based image reconstruction p 1593 N95-21757
HIRAS: High-resolution IRAS images
p 1593 N95-21758
Unique microchannel plate process doubles MCPI resolution
[DE94-017507] p 1337 N95-22427
Spatio-temporal masking in human vision and its application to image coding
[AD-A284949] p 1451 N95-22473

IMAGE VELOCITY SENSORS
The determination of static and time varying dipole source. Sensor geometry during sea trials using differential global positioning system
[MRL-TN-631] p 1205 N95-21642

IMAGERY
A Hyperspectral Image Data Exploration Workbench for environmental science applications
[DE94-016373] p 1412 N95-20171
Airborne Multisensor Pod System (AMPS) data access concept
[DE95-002586] p 1389 N95-20903
Color control in a multichannel simulator display: The display for advanced research and training
[AD-A279717] p 1216 N95-20992
Common mapping system media study
[AD-A279086] p 1390 N95-21912
Design and modelling of a link monitoring mechanism for the Common Data Link (CDL)
[AD-A286167] p 1309 N95-22245

IMAGES
Propulsion research on the variable tandem mirror plasma rocket
[NASA-CR-196310] p 1221 N95-20059
Low electron beam energy CIVA analysis of passivated ICs
[DE94-017421] p 1314 N95-20286
Interpretation of HRTEM images by image simulation: An introduction to theory and practice
[DE95-003422] p 1591 N95-22235
Users guide to NCEMSS, version 2.0
[DE95-003443] p 1548 N95-22238
Image theory for the unidirectionally conducting screen
[PB95-127031] p 1311 N95-22365
Spatio-temporal masking in human vision and its application to image coding
[AD-A284949] p 1451 N95-22473

IMAGING RADAR
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545

IMAGING SPECTROMETERS
Non-destructive inspection by infrared imaging spectroscopy, phase 1
[AD-A286158] p 1383 N95-22037

IMAGING TECHNIQUES
Characterization of an expanded-field Schwarzschild objective for extreme ultraviolet lithography
[DE94-016780] p 1541 N95-20239
Physics Division research and development
[DE94-017685] p 1501 N95-20246
Corrosion of aircraft materials: Correlation between nanometer scale and macroscopic structural damage parameters
[AD-A285930] p 1252 N95-20299
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-018580] p 1552 N95-20345
Molecular snapshots: Product imaging of dynamics important to fundamental combustion processes
[DE94-018595] p 1510 N95-20346
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Atomic-resolution characterization of interface structure and chemistry in the STEM
[DE94-017753] p 1567 N95-20492
An atomically-resolved STM study of the thermal decomposition of disilane on Si(001)
[AD-A279818] p 1567 N95-20544
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545
A framework for segmentation using physical models of image formation
[AD-A279900] p 1543 N95-20564
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A279945] p 1238 N95-20581
X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798
In vivo distribution of liposome encapsulated hemoglobin studied with imaging radiotracers
[AD-A279774] p 1438 N95-20806
Geometric moire method of strain analysis with displacement discontinuities
[DE95-001114] p 1386 N95-20833
Seminar on Biomedical Engineering 1993
[PB95-104402] p 1443 N95-20971
Integration of segmentation and stereo matching
[PB95-107819] p 1444 N95-21028
The sharper image: Implementing a Fast Fourier Transform (FFT) to enhance a video-captured image
[AD-A279790] p 1445 N95-21180
Three-dimensional ground penetrating radar imaging using multi-frequency diffraction tomography
[DE94-016687] p 1301 N95-21205
Characterization of poly(tetrafluoroethylene) surfaces by atomic force microscopy: Results and artifacts
[DE95-000742] p 1242 N95-21309
Two-dimensional imaging of OH in a lean burning high pressure combustor
[NASA-TM-106854] p 1214 N95-21383
An image cancellation approach to depth-from-focus
[DE94-019312] p 1544 N95-21392
Passive millimetre wave imaging: A review
[AD-A279275] p 1303 N95-21491
MEM application to IRAS CPC images
p 1592 N95-21751
Thermal imaging systems
[AD-A279146] p 1307 N95-21970
Remote-sensing based technique to account for sub-grid scale variability of land surface properties
[NASA-TM-110501] p 1390 N95-22110
Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128
Evaluation of scanners for C-scan imaging for nondestructive inspection of aircraft
[AD-A286398] p 1383 N95-22202
Application of IRIS to semiconductor plasma processing
[DE95-003591] p 1562 N95-22225
Image solution for poisson's equation in wedge geometry
[PB95-127171] p 1310 N95-22311
Imaging design of the wide field x-ray monitor onboard the HETE satellite
[DE95-002750] p 1221 N95-22436
Magnetic source imaging of visually evoked and oscillatory electrical activity of the human brain
[PB95-127205] p 1448 N95-22476

IMINES
Conducting thermoset polymers
[AD-A286541] p 1273 N95-21014

IMMUNITY
Enhancement of cell mediated immunity through non-specific immunostimulation with liposome encapsulated gamma-interferon
[AD-A279667] p 1442 N95-20602

IMMUNOASSAY
Enhancement of cell mediated immunity through non-specific immunostimulation with liposome encapsulated gamma-interferon
[AD-A279667] p 1442 N95-20602

IMMUNOLOGY
Effect of increased venous backflow on the release of cardiac hormone. Fine structural, immunohistochemical, and biochemical study
[PB95-130399] p 1445 N95-21424

IMPACT
Analysis of experimentally shocked minerals by NMR spectroscopy
[DE95-002955] p 1573 N95-21449
Aluminium oxide targets after ballistic impact; fragmentation of the ceramic and the projectile
[PB95-133625] p 1388 N95-22097

IMPACT DAMAGE
Experimental investigation of wave and fracture phenomena in impacted ceramics
[AD-A286589] p 1272 N95-20856
A Hypervelocity Experimental Research Database (HERD): Support for the Wright Laboratory Armament Directorate Code Validation Program (COVAL)
[DE95-001628] p 1387 N95-21396

Significance of impact velocity for the extent of damage in carbon/epoxy laminates
[PB95-133484] p 1230 N95-21417
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422
Damage tolerance of carbon fibre polyetheretherketone laminates
[PB95-131611] p 1230 N95-21432

IMPACT LOADS
Super-heavy aircraft study
[AD-A279602] p 1215 N95-19955
Experimental hypervelocity impact effects on simulated planetesimal materials
[DE94-017290] p 1599 N95-20144

IMPACT MELTS
A computational study of projectile melt in impact with typical Whipple shields
[DE94-016454] p 1385 N95-20237

IMPACT PREDICTION
Erice International Seminars on Planetary Emergencies. 17th Workshop: The Collision of an Asteroid or Comet with the Earth
[AD-A280122] p 1600 N95-21577

IMPACT STRENGTH
Computational design of Hypervelocity Launchers
[DE95-000744] p 1218 N95-20785
Experimental investigation of wave and fracture phenomena in impacted ceramics
[AD-A286589] p 1272 N95-20856
Effect of neutron irradiation on the impact properties of A533B steel
[DE95-001834] p 1256 N95-21286
Fracture behavior of the Fe-8Al alloy FAP-Y
[DE95-000956] p 1258 N95-21676
Tensile and impact properties of iron-aluminum alloys
[DE94-017750] p 1263 N95-22346

IMPACT TESTING MACHINES
The production of calibration specimens for impact testing of subsize Charpy specimens
[DE94-018125] p 1386 N95-20703

IMPACT TESTS
A computational study of projectile shape dependence on phase change phenomena with comparisons to experimental data
[DE95-000740] p 1384 N95-20077
Experimental hypervelocity impact effects on simulated planetesimal materials
[DE94-017290] p 1599 N95-20144
A computational study of projectile melt in impact with typical Whipple shields
[DE94-016454] p 1385 N95-20237
Dynamic measurement of the hoop modulus of a composite cylinder
[DE94-018958] p 1385 N95-20416
The production of calibration specimens for impact testing of subsize Charpy specimens
[DE94-018125] p 1386 N95-20703
Impact behavior of FeAl alloy FA-350
[DE94-018128] p 1254 N95-20705
Experimental investigation of wave and fracture phenomena in impacted ceramics
[AD-A286589] p 1272 N95-20856
Significance of impact velocity for the extent of damage in carbon/epoxy laminates
[PB95-133484] p 1230 N95-21417

IMPACT TOLERANCES
Damage tolerance of carbon fibre polyetheretherketone laminates
[PB95-131611] p 1230 N95-21432

IMPEDANCE
Evaluating impedances in a Sacherer integral equation
[DE94-016823] p 1489 N95-20266
Effect of space charge tune shift on transverse instabilities
[DE94-016790] p 1531 N95-20282
Impedance characteristics of multistage ion diodes
[DE94-018887] p 1565 N95-20340
An impedance model of the Relativistic Heavy Ion Collider (RHIC)
[DE94-016784] p 1532 N95-20406
Electrochemical impedance pattern recognition for detection of hidden chemical corrosion on aircraft components
[AD-A284998] p 1253 N95-20481
Electrochemical impedance spectroscopy of trivalent chromium pre-treated aluminum alloy
[AD-A280093] p 1240 N95-20970
Equivalent source current formulation in impedance tomography
[PB95-127627] p 1329 N95-21326

IMPEDANCE MEASUREMENT
Enhanced ionic conduction at the film/substrate interface in LiI thin films grown on sapphire(0001)
[DE94-017884] p 1565 N95-20371
Fault detection techniques for complex cable shield topologies
[AD-A286632] p 1291 N95-20771
TIM-SCT cable testing protocol
[AD-A286633] p 1207 N95-20772
Electrical impedance studies of acid-form NAFION membranes
[AD-A279271] p 1330 N95-21490

IMPINGEMENT
Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212

IMPLANTATION
Amorphization of sapphire during ion beam mixing
[DE94-018713] p 1510 N95-20337
Positron implantation profiles in elemental and multilayer systems
[DE94-014876] p 1566 N95-20382

IMPLOSIONS
Soft X-Ray Innovative Source Development Program
[AD-A286380] p 1551 N95-20232
Ion temperature measurement of indirectly-driven implosions using a geometry-compensated neutron time-of-flight detector
[DE94-016967] p 1552 N95-20362
Hydrodynamic instabilities in inertial fusion
[DE94-018079] p 1554 N95-20675
Effects of plasma physics on capsule implosions in gas-filled hohlraums
[DE95-000923] p 1371 N95-20786

IMPULSES
Development of a fast sampling system for estimation of impulse responses of mobile radio channels
p 1296 N95-20943
NEO-LISP: Deflecting near-Earth objects using high average power, repetitively pulsed lasers
[DE95-000863] p 1599 N95-21367
Temporary threshold shifts produced by high intensity freefield impulse noise in humans wearing hearing protection
[AD-A286289] p 1454 N95-22045

IMPURITIES
Analysis methods for fast impurity ion dynamics data
[DE95-000589] p 1549 N95-20112
Experimental measurements and modeling of impurity transport in the divertor and boundary plasma of D3-D
[DE94-016519] p 1556 N95-21159
Properties of aged metal tritides
[DE95-001787] p 1243 N95-21440
Effect of the electron-SO-phonon on the impurity state energies in a semiconductor quantum well
[DE94-628993] p 1581 N95-21887
The role of point defects and defect complexes in silicon device processing
[DE94-011876] p 1279 N95-22091
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126
Electric-field effects on shallow donor impurity in a harmonic quantum dot
[DE94-629034] p 1577 N95-22176
The doping effect on spin-Peierls instability
[DE94-629046] p 1577 N95-22178

IN SITU MEASUREMENT
Resonance Raman spectroscopy of volatile organics: Carbon tetrachloride
[DE95-000627] p 1233 N95-19980
In situ viscometer instrument acceptance test report
[DE94-018507] p 1364 N95-20224
Boundary layer cloud studies in support of ASTEX
[AD-A285947] p 1429 N95-20395
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A279811] p 1569 N95-20807
Bridging the pressure gap: In situ atomic-level investigations of model platinum catalyst surfaces under reaction conditions by scanning tunneling microscopy
[DE95-002346] p 1246 N95-21990

INCINERATORS
Ceramem filters for removal of particles from hot gas streams
[DE95-001976] p 1275 N95-21354
Removal of CO2 in closed loop off-gas treatment systems
[DE94-019259] p 1407 N95-21617

INCLUSIONS
The origin of acicular ferrite in gas metal arc and submerged arc welds
[AD-A286129] p 1377 N95-19984
The effect of oxide inclusions on the kinetics of the austenite to ferrite transformation in low alloy steel weld metal
[DE94-018131] p 1253 N95-20676
Solar helium and neon in the Earth
p 1419 N95-21793
Dielectric mixtures with arbitrarily anisotropic components: Focus on special gyrotropic effects
[PB95-127015] p 1311 N95-22363

INCOMPRESSIBLE BOUNDARY LAYER
On subcritical instability of the attachment line boundary layer p 1351 N95-21092

INCOMPRESSIBLE FLOW
Free shear layers, base pressure and bluff-body drag
[AD-A286316] p 1200 N95-20175
Hydrodynamic instabilities in inertial fusion
[DE94-018079] p 1554 N95-20675
Mixed hp finite element methods for problems in elasticity and stokes flow
[PB95-104444] p 1341 N95-20981
Modeling the two-point correlation of the vector stream function p 1345 N95-21055
On the asymptotic similarity of rotating homogeneous turbulence p 1345 N95-21058
Large-eddy simulation of rotating channel flows using a localized dynamic model p 1346 N95-21064
The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers
p 1347 N95-21065
Simulation of separated flows p 1347 N95-21068
Simulation of pipe flow p 1349 N95-21078
Spatial direct numerical simulation of boundary layer transition under strong adverse pressure gradient
p 1351 N95-21093
Accurate solution algorithms for incompressible multiphase flows
[DE95-002727] p 1353 N95-21317
Stability of pressure and velocity computations for heterogeneous reservoirs
[PB95-110284] p 1354 N95-21656
Fast parallel tree codes for gravitational and fluid dynamical N-body problems
[AD-A286480] p 1358 N95-22290
Turbulence modeling for separated flow
p 1359 N95-22443
Direct numerical simulations of on-demand vortex generators: Mathematical formulation
p 1361 N95-22452
Direct numerical simulation of incompressible axisymmetric flows p 1363 N95-22464

INCOMPRESSIBLE FLUIDS
Nonlinear dynamic fluid-structure interaction calculations with coupled finite element and finite volume programs
[DE94-016204] p 1339 N95-20166
Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063
The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers
p 1347 N95-21065
1/f noise in two-dimensional fluids
[DE95-002617] p 1358 N95-22307

INCONEL (TRADEMARK)
Experience at the Los Alamos Meson Physics Facility with the use of alloy Inconel 718 as an enclosure for a beam degrader and as a proton beam entry window
[DE94-018289] p 1538 N95-22050

INDEPENDENT VARIABLES
Graded dual of the non-commutative universal Leibniz Hopf algebra zeta
[PB95-134532] p 1494 N95-21955

INDEXES
NASA Langley scientific and technical information output: 1994, volume 1
[NASA-TM-109170-VOL-1] p 1589 N95-21189

INDEXES (DOCUMENTATION)
Bibliography of Lewis Research Center technical publications announced in 1993
[NASA-TM-106666] p 1589 N95-21187
Aeronautical engineering: A continuing bibliography with indexes (supplement 315)
[NASA-SP-7037(315)] p 1199 N95-21640

INDIUM ALUMINUM ARSENIDES
P/N In(Al) GaAs multijunction laser power converters
p 1323 N95-20539

INDIUM ANTIMONIDES
Optimization of InAsSb/InGaAs strained-layer superlattice growth by metal-organic chemical vapor deposition for use in infrared emitters
[DE94-016557] p 1563 N95-19954
InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774

INDIUM ARSENIDES
Optimization of InAsSb/InGaAs strained-layer superlattice growth by metal-organic chemical vapor deposition for use in infrared emitters
[DE94-016557] p 1563 N95-19954
Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543

An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478
InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774
Performance of Ga(0.47)In(0.53)As cells over a range of proton energies
[NASA-TM-106819] p 1334 N95-22112

INDIUM COMPOUNDS
Polycrystalline CuInSe2 and CdTe solar cells
[DE94-011875] p 1392 N95-20333
Novel thin-film CuInSe2 fabrication
[DE94-011874] p 1268 N95-20472
Processing and modeling issues for thin-film solar cell devices
[DE94-011895] p 1394 N95-21294
InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A280109] p 1331 N95-21660
Non-H2Se, ultra-thin CuInSe2 devices
[DE94-011894] p 1395 N95-21844
Heterostructure quantum confined Stark effect electrooptic modulators operating at 938 nm
[AD-A279342] p 1581 N95-21928

INDIUM GALLIUM ARSENIDES
Optimization of InAsSb/InGaAs strained-layer superlattice growth by metal-organic chemical vapor deposition for use in infrared emitters
[DE94-016557] p 1563 N95-19954
InGaAs PV device development for TPV power systems p 1322 N95-20537
Optical, electronic and optoelectronic material and device research
[AD-A280111] p 1374 N95-21630
Carrier dynamics in InGaAs: Quantum wells versus bulk
[DE94-018205] p 1577 N95-22168

INDIUM ISOTOPES
In vivo distribution of liposome encapsulated hemoglobin studied with imaging radiotracers
[AD-A279774] p 1438 N95-20806

INDIUM PHOSPHATES
Lead-indium phosphate glasses for optical applications
[DE94-019333] p 1275 N95-21482

INDIUM PHOSPHIDES
Observation of excitonic and band-to-band behavior in ordered InGaP2 alloys
[DE94-018891] p 1314 N95-20341
High-efficiency, deep-junction, epitaxial InP solar cells on (100) and (111)B InP substrates
p 1316 N95-20507
High quality InP-on-Si for solar cell applications
p 1317 N95-20510
P/N InP solar cells on Ge wafers
p 1317 N95-20511
Radiation effects on p+n InP junctions grown by MOCVD p 1319 N95-20520
Design of high-efficiency, radiation-hard, GaInP/GaAs solar cells p 1319 N95-20521
Annealing of irradiated n+p InP buried homojunctions
p 1320 N95-20524
Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs
p 1323 N95-20542
Sub-millimeterwave semiconductor signal sources
[AD-A279375] p 1335 N95-22144
Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

INDUCTANCE
Passive surface deployed variable inductance wire antenna statement of government interest
[AD-D016210] p 1307 N95-21910

INDUSTRIAL PLANTS
Summaries of BFRL fire research in-house projects and grants, 1994
[PB95-130845] p 1286 N95-21130
Evaluation of state-of-the-art high speed deluge systems presently in service at various US Army ammunition plants
[AD-A279102] p 1287 N95-21598

INDUSTRIAL SAFETY
Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422

INDUSTRIAL WASTES
Anaerobic Treatment of Municipal Solid Waste and Sludge for Energy Production and Recycling of Nutrients
[DE95-700217] p 1315 N95-20369
Energy and environmental issues and international operation in Asia
[DE94-796596] p 1404 N95-21143
Possible global environmental impacts of solid waste practices
[DE95-000830] p 1406 N95-21487

INDUSTRIES
The Photovolatic Manufacturing Technology project (PVMaT) after three years
[DE94-011877] p 1392 N95-20473
Standard Hardware Acquisition and Reliability Program (SHARP) advanced SEM-E packaging
p 1208 N95-20633
Recent reflux receiver developments under the US DOE program
[DE95-001622] p 1393 N95-20861
Recent National Solar Thermal Test Facility activities, in partnership with industry
[DE95-001828] p 1394 N95-21353
Ceramem filters for removal of particles from hot gas streams
[DE95-001976] p 1275 N95-21354
HPCC technology awareness program: Improved economic competitiveness through technology awareness, transfer and application
[DE95-002134] p 1476 N95-21355
Space systems technology working group: Executive report
[AD-A285778] p 1217 N95-22413

INELASTIC COLLISIONS
Molecular snapshots: Product imaging of dynamics important to fundamental combustion processes
[DE94-018595] p 1510 N95-20346
An analytical electron distribution function for inelastic collisions in a uniform gas with time varying electric field
[DE95-003476] p 1528 N95-22222
An analytical, inelastic, space and time dependent electron distribution for electrically excited gases
[DE95-003478] p 1528 N95-22223

INELASTIC SCATTERING
Magnetic excitations in modulated PrNi2Si2
[DE95-001077] p 1254 N95-20822
Recent results from E665
[DE95-002523] p 1516 N95-20914
PRISMA operating program manual
[PB95-130498] p 1466 N95-21232
Measurements of scattering processes in negative ion: Atom collisions
[DE95-000664] p 1519 N95-21276
Structure functions and structure function ratio F2(n)/F2(p) at low X(Bj) and Q2 in inelastic muon scattering
[DE94-018979] p 1573 N95-21561
Atomic processes in processing plasmas
[DE94-019177] p 1560 N95-21609
Interference of fluorescence x rays and coherent excitation of core levels
[DE94-016809] p 1527 N95-22188
Neutron Compton scattering
[PB95-130290] p 1530 N95-22332

INELASTIC STRESS
Inelastic bending and torsion of steel I-beams
[PB94-208378] p 1384 N95-19975

INEQUALITIES
Discrete algebraic Riccati equation and linear matrix inequality
[PB95-133575] p 1484 N95-22139

INERTIAL CONFINEMENT FUSION
X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015
Particle beam fusion
[DE95-000711] p 1549 N95-20075
National Ignition Facility: Experimental plan
[DE94-016542] p 1550 N95-20189
Target Area Structural Support systems design to achieve the micron-level stability requirement of the National Ignition Facility (NIF)
[DE94-017696] p 1551 N95-20219
Physics Division research and development
[DE94-017685] p 1501 N95-20246
Studies of longitudinal instability with an electron beam
[DE94-018646] p 1532 N95-20347
Hydrodynamic instabilities in inertial fusion
[DE94-018079] p 1554 N95-20675
Accelerators for energy production
[DE94-770764] p 1392 N95-20685
Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817
Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891
Cryogenic targets for inertial confinement fusion
[DE94-016200] p 1555 N95-21115
Use of the National Ignition Facility for the development of inertial fusion energy
[DE94-016696] p 1557 N95-21206
Target Area design basis and system performance for the National Ignition Facility
[DE94-016697] p 1557 N95-21207
Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21208
Laser design basis for the National Ignition Facility
[DE94-016700] p 1534 N95-21209
Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226
Nonperturbative aspects of the quark-photon vertex
[DE94-012846] p 1520 N95-21315
Low density gas and foam targets for ICF long scale length plasma experiments: Fabrication and characterization
[DE95-000935] p 1558 N95-21368
Progress in the Light Ion Driven Inertial Confinement Fusion Program
[DE94-019182] p 1537 N95-21603
The ITER in-vessel system
[DE94-018053] p 1560 N95-21665

INERTIAL FUSION (REACTOR)
Radiation-driven targets for heavy-ion fusion
[DE95-002264] p 1533 N95-20784

INERTIAL NAVIGATION
Assessment of a non-dedicated GPS receiver system for precise airborne attitude determination
[DE94-019309] p 1205 N95-21520
A real-time algorithm for integrating differential satellite and inertial navigation information during helicopter approach
[NASA-CR-197409] p 1205 N95-21891

INFECTIOUS DISEASES
Enhancement of cell mediated immunity through non-specific immunostimulation with liposome encapsulated gamma-interferon
[AD-A279667] p 1442 N95-20602

INFERENCE
Connectionist models for intelligent computation
[AD-A286436] p 1484 N95-22210

INFILTRATION
Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

INFINITY
Asymptotic analysis of Nash equilibria in nonzero-sum linear-quadratic differential games. The two-player case
[PB95-111027] p 1499 N95-19941

INFORMATION DISSEMINATION
Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016
Mariners Weather Log, volume 38, number 3, summer 1994
[PB94-209541] p 1428 N95-20099
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 28: The technical communication practices of aerospace engineering and science students: Results of the phase 4 cross-national surveys
[NASA-TM-109123] p 1587 N95-20162
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 31: The technical communications practices of US aerospace engineers and scientists: Results of the phase 1 SME mail survey
[NASA-TM-109169] p 1587 N95-20163
The 37th Military Librarians Workshop on Global Information: The Sun Never Sets
[AD-A286636] p 1588 N95-20774
Solar Radiation Resource Assessment Project
[DE94-000286] p 1392 N95-20778
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 27: The technical communication practices of engineering and science students: Results of the phase 3 academic surveys
[NASA-TM-109122] p 1589 N95-21015
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-018414] p 1287 N95-21631
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 48: Valuing information in an interactive environment
[NASA-TM-110448] p 1590 N95-21977
University library document circulation system specified in LCM
[PB95-127957] p 1592 N95-22331

INFORMATION FLOW
Translation of the data flow query language for the multimodel, multibackend database system
[AD-A285978] p 1588 N95-20617
The IEEE scalable coherent interface: An approach for a unified avionics network p 1212 N95-20650

TDX: A high-bandwidth crossbar-switched communication paradigm
[DE94-017187] p 1311 N95-22407

INFORMATION MANAGEMENT

Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016

Collected papers of the Soar/IFOR project, Spring 1994
[AD-A280063] p 1216 N95-20624

The 37th Military Librarians Workshop on Global Information: The Sun Never Sets
[AD-A286636] p 1588 N95-20774

Determining information management needs for enhanced international safeguards
[DE94-015787] p 1588 N95-20789

Environmental Compliance Assessment System (ECAS): Oregon supplement
[AD-A279565] p 1408 N95-21696

Information Management Architecture for an Integrated Computing Environment for the Environmental Restoration Program. Volume 1: Introduction
[DE95-001384] p 1590 N95-21862

Information Management Architecture for an Integrated Computing Environment for the Environmental Restoration Program. Volume 2: Interim business systems guidance
[DE95-001385] p 1591 N95-22061

Conference proceedings. Defense Modeling and Simulation Office Information/Data Base (I/DB) Task Group Meetings, and notes from the previous two I/DB meetings
[AD-A279097] p 1591 N95-22069

Taking AIM: The management of scientific and technical information at Argonne National Laboratory
[DE94-019279] p 1591 N95-22092

Abbreviations, acronyms, and initialisms frequently used by Martin Marietta Energy Systems, Inc.
[DE95-001069] p 1591 N95-22107

A conceptual approach to object-oriented data modeling
[AD-A286048] p 1592 N95-22416

Experimental evaluation of dynamic data allocation strategies in a distributed database with changing workloads
[NASA-CR-195024] p 1456 N95-22431

INFORMATION PROCESSING (BIOLOGY)

Intermediate levels of visual processing
[AD-A284922] p 1448 N95-19998

Signal- and listener- based factors in complex auditory pattern perception
[AD-A285636] p 1450 N95-21101

MAC/FAC: A model of similarity-based retrieval
[AD-A286291] p 1450 N95-22052

Magnetic source imaging of visually evoked and oscillatory electrical activity of the human brain
[PB95-127205] p 1448 N95-22476

INFORMATION RETRIEVAL

Efficient caption-based retrieval of multimedia information
[AD-A279604] p 1586 N95-19956

Role of working memory limitations of retrieval
[AD-A280032] p 1448 N95-20007

Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016

Using local optimality criteria for efficient information retrieval with redundant information filters
[AD-A279603] p 1587 N95-20302

FEDIX: User's guide, version 5.0/release 3.0
[DE95-002274] p 1588 N95-20762

Airborne Multisensor Pod System (AMPS) data access concept
[DE95-002586] p 1389 N95-20903

FIREDOC users manual, 3rd edition
[PB95-128674] p 1286 N95-21129

MAC/FAC: A model of similarity-based retrieval
[AD-A286291] p 1450 N95-22052

Using geographical data browsers in a networked environment
[DE94-017809] p 1592 N95-22263

Feature extraction without edge detection
[AD-A279842] p 1473 N95-22386

INFORMATION SYSTEMS

Downsizing information systems: Framing the issues for the Office of Naval Intelligence (ONI)
[AD-A279888] p 1588 N95-20589

Model formality in human/computer collaboration
[AD-A286001] p 1462 N95-20718

FEDIX: User's guide, version 5.0/release 3.0
[DE95-002274] p 1588 N95-20762

Shaping the library of the future: Digital library developments at Los Alamos National Laboratory's Research Library
[DE95-001008] p 1588 N95-20777

Determining information management needs for enhanced international safeguards
[DE94-015787] p 1588 N95-20789

Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982

GOLD: A Graph Oriented Language for Databases
[PB95-127544] p 1465 N95-21021

FIREDOC users manual, 3rd edition
[PB95-128674] p 1286 N95-21129

Independent review of Aviation Technology and Research Information Analysis System (ATRIAS) database
[AD-A284049] p 1203 N95-21518

Aeronautical engineering: A continuing bibliography with indexes (supplement 315)
[NASA-SP-7037(315)] p 1199 N95-21640

CAiSE 1994 Doctoral Consortium
[PB95-135182] p 1469 N95-21711

Proceedings of the 5th Workshop on the Next Generation of CASE Tools
[PB95-135208] p 1469 N95-21716

Information Management Architecture for an Integrated Computing Environment for the Environmental Restoration Program. Volume 1: Introduction
[DE95-001384] p 1590 N95-21862

Directives for the participation in MiTS forum. V3.0
[PB95-110342] p 1484 N95-22015

Conference proceedings. Defense Modeling and Simulation Office Information/Data Base (I/DB) Task Group Meetings, and notes from the previous two I/DB meetings
[AD-A279097] p 1591 N95-22069

A graded approach to ISO 9000 implementation for records managers
[DE94-017409] p 1591 N95-22167

Information security for unmanned systems
[AD-A286511] p 1485 N95-22214

Using geographical data browsers in a networked environment
[DE94-017809] p 1592 N95-22263

INFORMATION THEORY

Using local optimality criteria for efficient information retrieval with redundant information filters
[AD-A279603] p 1587 N95-20302

INFORMATION TRANSFER

The 37th Military Librarians Workshop on Global Information: The Sun Never Sets
[AD-A286636] p 1588 N95-20774

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 27: The technical communication practices of engineering and science students: Results of the phase 3 academic surveys
[NASA-TM-109122] p 1589 N95-21015

NODDS/WOSM interface user's manual
[AD-A279095] p 1471 N95-22068

INFRARED ABSORPTION

Theoretical prediction of vibrational circular dichroism spectra of R-glyceraldehyde, R-erythrose, and R-threose. Part 2: Development of a procedure to scale the force constant matrix expressed in terms of internal coordinates
[AD-A284305] p 1437 N95-20252

INFRARED ASTRONOMY

Hires and beyond p 1592 N95-21750

MEM application to IRAS CPC images
p 1592 N95-21751

An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752

In search of random noise p 1592 N95-21753

Pushing the limits of spatial resolution with the Kuiper Airborne observatory p 1593 N95-21754

A high resolution atlas of the galactic plane at 12 microns and 25 microns p 1593 N95-21755

Interacting galaxies resolved by IRAS
p 1593 N95-21759

Far-Infrared sources and diffuse emission in M31
p 1593 N95-21761

Correlation of far-infrared emission and radio continuum emission along the major axis of edge-on spiral galaxies
p 1593 N95-21762

Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769

A HIRES analysis of the FIR emission of supernova remnants p 1594 N95-21770

Arcmimute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771

Application of MCM image construction to IRAS comet observations p 1594 N95-21772

INFRARED ASTRONOMY SATELLITE

Science with High Spatial Resolution Far-Infrared Data
[NASA-CR-197353] p 1595 N95-21749

MEM application to IRAS CPC images
p 1592 N95-21751

In search of random noise p 1592 N95-21753

A high resolution atlas of the galactic plane at 12 microns and 25 microns p 1593 N95-21755

Beyond maximum entropy: Fractal Pixon-based image reconstruction p 1593 N95-21757

HIRAS: High-resolution IRAS images
p 1593 N95-21758

Interacting galaxies resolved by IRAS
p 1593 N95-21759

Far-Infrared sources and diffuse emission in M31
p 1593 N95-21761

Extended far-infrared emission and star formation in Seyfert galaxies p 1593 N95-21764

Two-dimensional maps of the infrared-to-radio ratio in spiral galaxies p 1593 N95-21765

An IRAS Hires study of low mass star formation in the Taurus molecular ring p 1593 N95-21767

Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769

Arcmimute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771

Application of MCM image construction to IRAS comet observations p 1594 N95-21772

High resolution descriptions of IRAS 12 and 25 microns confused regions
[AD-A285847] p 1545 N95-21832

INFRARED CIRRUS (ASTRONOMY)

Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769

INFRARED DETECTORS

Enhanced vehicle and event typing software, phase 1
[AD-A284862] p 1458 N95-20070

State-to-state collisional dynamics of atmospheric species
[AD-A285053] p 1370 N95-20484

Fracture analysis of an all-ceramic bearing system
[AD-A285056] p 1269 N95-20486

InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774

Electromagnetic radiation detector utilizing an electromagnetic radiation absorbing element in a mach-zehnder interferometer arrangement
[AD-D016507] p 1306 N95-21835

INFRARED IMAGERY

Correlation of far-infrared emission and radio continuum emission along the major axis of edge-on spiral galaxies
p 1593 N95-21762

Two-dimensional maps of the infrared-to-radio ratio in spiral galaxies p 1593 N95-21765

Non-destructive inspection by infrared imaging spectroscopy, phase 1
[AD-A286158] p 1383 N95-22037

INFRARED INSTRUMENTS

An at-sea evaluation of an infrared/resistance temperature device for air/sea-surface temperature measurements
[AD-A279672] p 1365 N95-20604

InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A280109] p 1331 N95-21660

INFRARED INTERFEROMETERS

Noise model of the MSX SPIRIT 3 interferometer
[AD-A285837] p 1364 N95-20036

INFRARED LASERS

Fiber laser amplifiers and oscillators
[AD-A285835] p 1368 N95-20035

The effect of reusing laser gas on the fission-fragment pumped 1.73 micron atomic xenon laser output
[DE94-018512] p 1369 N95-20225

Semiconductor laser joint study program with Rome Laboratory
[AD-A285858] p 1369 N95-20379

State-to-state collisional dynamics of atmospheric species
[AD-A285053] p 1370 N95-20484

INFRARED RADIATION

Free electron laser program
[AD-A285906] p 1368 N95-19987

Radiative forcing calculations for CH3Cl
[DE94-019018] p 1402 N95-20355

Liquid xenon as a potential laser host medium
[AD-A285365] p 1370 N95-20550

Chemical lasers emitting in the visible spectrum: Metastable oxygen reactions and YOSHIDA laser
[PB95-104485] p 1372 N95-20983

Constraints on SUSy-GUT unification from b yields s-gamma decay
[PB95-130373] p 1580 N95-21229

Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418

An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478

Time-resolved study of sideband generation and transition to chaos on an infrared FEL
[DE95-002336] p 1374 N95-21528
Ultraviolet emission from rocket motor plumes
[DSTO-TR-0002] p 1222 N95-21661
Two-dimensional maps of the infrared-to-radio ratio in spiral galaxies p 1593 N95-21765
Technique for intracavity sum frequency generation
[AD-D016478] p 1546 N95-21898
Optical radiation: Health based exposure limits for electromagnetic radiation in the wavelength range from 100 nanometer to 1 millimeter
[PB95-132767] p 1447 N95-22083
Recent progress of the compact AFEL at Los Alamos
[DE95-002728] p 1376 N95-22154

INFRARED RADIOMETERS
Non-destructive inspection by infrared imaging spectroscopy, phase 1
[AD-A286158] p 1383 N95-22037

INFRARED SOURCES (ASTRONOMY)
Pushing the limits of spatial resolution with the Kuiper Airborne observatory p 1593 N95-21754
Far-Infrared sources and diffuse emission in M31
p 1593 N95-21761

INFRARED SPECTRA
Chemical lasers emitting in the visible spectrum: Metastable oxygen reactions and YOSHIDA laser
[PB95-104485] p 1372 N95-20983
Hires and beyond p 1592 N95-21750

INFRARED SPECTROMETERS
Fabrication and testing of a silicon immersion grating for infrared spectroscopy
[DE94-017173] p 1237 N95-20386
An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478

INFRARED SPECTROSCOPY
FTIR spectroscopy for the determination of water in corrosive gases
[DE94-014658] p 1235 N95-20139
Orientation studies of polyolefins by IR-dichroism
[PB95-104386] p 1236 N95-20256
Fabrication and testing of a silicon immersion grating for infrared spectroscopy
[DE94-017173] p 1237 N95-20386
Surface inspection using Fourier Transform Infrared Spectroscopy
[DE95-001699] p 1244 N95-21571
Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596
Non-destructive inspection by infrared imaging spectroscopy, phase 1
[AD-A286158] p 1383 N95-22037
Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385

INFRASONIC FREQUENCIES
Infrasonic observations of the Northridge, California, earthquake
[DE94-018095] p 1413 N95-20289

INHIBITORS
An update of corrosion inhibitors for mild steel exposed to 32-0-0 UAN solution
[DE95-001715] p 1263 N95-22396

INHOMOGENEITY
Nitrogen isotopic components in the early solar system p 1420 N95-21800

INITIATION
Towards tailored interphase formation utilizing surface-bound benzylsulfonium salts as cationic initiators
[AD-A286461] p 1280 N95-22259

INJECTION
Review of recent D-T experiments from TFTR
[DE95-002755] p 1557 N95-21239

INJECTION MOLDING
Simulation of the injection moulding process
[PB94-215555] p 1286 N95-21027

INJURIES
Mechanisms and diagnostics of ultrashort pulse laser ocular effects
[AD-A285610] p 1373 N95-21195

INLET FLOW
Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10
[NASA-TP-3476] p 1340 N95-20619

INORGANIC COMPOUNDS
Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy
[DE94-009757] p 1237 N95-20470

INORGANIC MATERIALS
Inorganic-organic polymers and their role in materials science
[AD-A279715] p 1270 N95-20671

INPUT/OUTPUT ROUTINES
DONIO: Distributed object network I/O library
[DE94-019163] p 1477 N95-21602

INSERTS
Proposed emittance upgrade for the SLC damping rings
[DE95-002887] p 1538 N95-22155

INSPECTION
Analysis of invalid emission testing in the California smog check program
[PB95-128922] p 1406 N95-21373
Reentry vehicle on-site inspection technology study
[AD-A285960] p 1220 N95-21634
Evaluation of scanners for C-scan imaging for nondestructive inspection of aircraft
[AD-A286398] p 1383 N95-22202

INSTALLING
Proceedings of the International Wire and Cable Symposium
[AD-A279242] p 1403 N95-20465

INSTRUCTORS
Rate monotonic analysis for real-time systems: Instructors guide
[AD-A286083] p 1463 N95-20810

INSULATION
MHD pressure drop in ducts with imperfectly insulating coatings
[DE95-002852] p 1558 N95-21244

INSULATORS
Kondo insulators
[DE95-001156] p 1237 N95-20368
Effect of a solid insulator on the spark yield of S2F10 in SF6(*)
[DE95-001422] p 1326 N95-20791

INTEGERS
Data analysis and visualization in MCNP (trademark)
[DE94-016164] p 1508 N95-20159
N=1 Superconformal minimal model correlation functions on the torus
[PB95-134615] p 1500 N95-21964
Singular symmetric matrices
[PB95-109088] p 1496 N95-22354
Elliptic genera for Z/K-manifolds I
[PB95-109096] p 1496 N95-22355

INTEGRAL EQUATIONS
Evaluating impedances in a Sacherer integral equation
[DE94-016823] p 1489 N95-20266
On FEL integral equation and electron energy loss in intermediate gain regime
[DE94-770631] p 1371 N95-20757
Molecular-based study of solutions in supercritical solvents
[DE94-019326] p 1580 N95-21420
A new FHNC scheme for Gutzwiller correlated wave functions
[DE94-629037] p 1581 N95-21993

INTEGRAL ROCKET RAMJETS
Integral rocket ramjets
[AD-A285135] p 1222 N95-20906

INTEGRALS
Quadratic forms in design theory
[PB95-111019] p 1487 N95-19940

INTEGRATED CIRCUITS
Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A285611] p 1312 N95-19894
Design and packaging aspects of microwave bandwidth lithium niobate modulators
[DE94-016602] p 1313 N95-20119
Low electron beam energy CIVA analysis of passivated ICs
[DE94-017421] p 1314 N95-20286
Proton irradiation effects on advanced digital and microwave III-V components
[DE94-018742] p 1314 N95-20338
Ultra-Reliable Digital Avionics (URDA) processor
p 1209 N95-20638
Assuring Known Good Die (KGD) for reliable, cost effective MCMs p 1210 N95-20644
Liquid flow-through cooling of electronic modules
p 1211 N95-20647
Method of fabricating a microelectronic photomultiplier device with integrated circuitry
[AD-D016530] p 1325 N95-20726
Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727
High isolation electronic switch
[AD-D016533] p 1326 N95-20729
Complementary GaAs junction-gated heterostructure field effect transistor fabrication for integrated circuits
[DE95-001522] p 1327 N95-20882
Technologies for highly parallel optoelectronic integrated circuits
[DE95-001607] p 1327 N95-20883
Prototype rule-based reliability analysis for VLSI circuit design
[AD-A280065] p 1327 N95-20967
Unlimited-bandwidth distributed optical phase modulators and detectors: Design and fabrication issues
[DE94-017418] p 1545 N95-21509
Monolithic circuits for lead-glass calorimetry
[DE94-019112] p 1330 N95-21554
Non-linear A/D converters for integrated silicon smart sensors
[PB94-208402] p 1330 N95-21590
Monolithic low noise preamplifier for piezoelectric sensors
[AD-D016524] p 1333 N95-21865
Integration of thin film decoupling capacitors
[DE95-001609] p 1333 N95-21881
Thermal fixture for testing an integrated circuit
[AD-D016483] p 1333 N95-21900
Defect classes: An overdue paradigm for CMOS IC testing
[DE94-018905] p 1334 N95-22118
Sub-millimeterwave semiconductor signal sources
[AD-A279375] p 1335 N95-22144
Plasma processing for integrated circuits
[DE95-001419] p 1335 N95-22149
Radiation tests on service electronics for future multi TeV detectors
[DE94-632822] p 1335 N95-22184
Design of the readout IC for the CDF SVX-2 silicon strip detector
[DE95-000562] p 1539 N95-22193

INTEGRATED LIBRARY SYSTEMS
Introduction to the FIRE engine: A C++ toolkit for Finite automata and Regular Expressions
[PB95-110599] p 1456 N95-19891
Towards better quality and reliability in the software reuse library environment
[AD-A280013] p 1460 N95-20313

INTEGRATED OPTICS
Design and packaging aspects of microwave bandwidth lithium niobate modulators
[DE94-016602] p 1313 N95-20119
GaAs optical circuits
[AD-A285859] p 1369 N95-20389
Analog processing of optical wavefront using integrated guided-wave optics
[AD-A279596] p 1543 N95-20601
Broadband thermal optical limiter for the protection of eyes and sensors
[AD-D016493] p 1377 N95-22304

INTELLIGENCE
Information security for unmanned systems
[AD-A286511] p 1485 N95-22214
Design and modelling of a link monitoring mechanism for the Common Data Link (CDL)
[AD-A286167] p 1309 N95-22245

INTELSAT SATELLITES
UV testing of INTELSAT-7, 7A, and 8 solar cells
p 1320 N95-20526

INTERACTING GALAXIES
Interacting galaxies resolved by IRAS
p 1593 N95-21759

INTERACTIONAL AERODYNAMICS
Nonlinear interaction between a pair of oblique modes in a supersonic mixing layer: Long-wave limit
[NASA-CR-197380] p 1357 N95-22173

INTERACTIVE CONTROL
Intelligent interactive project management system
[PB95-132684] p 1586 N95-21982

INTERCEPTION
Enhanced vehicle and event typing software, phase 1
[AD-A284862] p 1458 N95-20070

INTERFACES
Simulations of the dislocation array at Ge/Si interfaces
[DE94-017680] p 1565 N95-20244
Advanced Command and Control (C2) applications interfaces to the Advanced Communications Technology Satellite (ACTS)
[AD-A279676] p 1291 N95-20605
Time code interface
[AD-D016535] p 1501 N95-20731
Circuit means for providing compatibility between two separate digital data interfaces
[AD-D016225] p 1455 N95-21116
Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE95-001548] p 1574 N95-21839
Magnetic properties of the three-dimensional Ising model with an interface amorphization
[DE94-628992] p 1278 N95-21885
NODDS/WOSM interface user's manual
[AD-A279095] p 1471 N95-22068
Application of optical second harmonic generation to surface analysis
[AD-A279445] p 1547 N95-22074

Theory of the excitonic lineshape in low-dimensional structures with rough interfaces
[DE95-003434] p 1582 N95-22237

INTERFACIAL ENERGY

Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964

The Modified Embedded Atom Method
[DE94-017958] p 1248 N95-22273

INTERFERENCE IMMUNITY

Cochannel and adjacent-channel interference in nonlinear minimum-shift-keyed satellite system
[NASA-TM-106834] p 1307 N95-21890

INTERFEROMETERS

An intensity interferometer for soft x-rays
[DE94-016370] p 1541 N95-20103

Monitoring the response of the upper troposphere/lower stratosphere to a greenhouse gas scenario
[DE95-000982] p 1406 N95-21410

Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418

Atom wave interferometer
[AD-A279532] p 1524 N95-21688

INTERFEROMETRY

Elastic anisotropy in hot-pressed Si3N4 composites: Role of in situ (beta)-Si3N4 grains and added (beta)-Si3N4 whiskers
[DE94-018387] p 1226 N95-20027

Mandrel based embedded planar fiber-optic interferometric acoustic sensor
[AD-D016229] p 1504 N95-21119

Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418

On the Aharonov-Bohm effect with neutrons
[DE95-002985] p 1521 N95-21454

Method for characterization of optical waveguide devices using partial coherence interferometry
[AD-D016525] p 1544 N95-21466

Single particle measurements and two particle interferometry results from CERN experiment NA44
[DE95-003041] p 1527 N95-22078

INTERFERON

Enhancement of cell mediated immunity through non-specific immunostimulation with liposome encapsulated gamma-interferon
[AD-A279667] p 1442 N95-20602

INTERIOR BALLISTICS

Chunk projectile launch using the Sandia Hypervelocity Launcher Facility
[DE94-018494] p 1215 N95-20223

Computational design of Hypervelocity Launchers
[DE95-000744] p 1218 N95-20785

INTERLAMINAR STRESS

The influence of ply waviness with nonlinear shear on the stiffness and strength reduction of composite laminates
[AD-A285736] p 1224 N95-19899

INTERLAYERS

Energy gap structure of layered superconductors
[DE94-017885] p 1566 N95-20372

Growth, characterization and device development in monocrystalline diamond films
[AD-A285991] p 1568 N95-20614

Interlayer magnetic coupling in epitaxial Fe/Cr(211) and (100) superlattices
[DE95-002906] p 1571 N95-21256

INTERMETALLICS

Third Intermetallic Matrix Composites Symposium, volume 350
[NASA-TM-110059] p 1225 N95-20001

Fabrication and properties of alumina matrix composites containing nickel aluminide reinforcements
[DE94-018703] p 1250 N95-20044

Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365

The processing and mechanical properties of high temperature/high performance composites. Fatigue and creep, book 3
[AD-A279738] p 1227 N95-20430

Novel reagents for chemical vapor deposition of intermetallic alloys
[AD-A286562] p 1271 N95-20815

ALCHEMI of Fe-doped B2-ordered NiAl alloys with different doping levels
[DE94-017748] p 1255 N95-20907

Plastic deformation of ordered intermetallic alloys: Fundamental aspects
[DE95-001070] p 1256 N95-21265

Processing and mechanical properties of laminar Al2O3-Ni3Al composites
[DE94-019332] p 1230 N95-21481

Bulk and defect properties of ordered intermetallics
[DE94-017706] p 1262 N95-22344

Processing of intermetallic materials by reaction synthesis
[DE94-017710] p 1263 N95-22345

New thermodynamic description of the Cu-Zr system
[PB95-127189] p 1263 N95-22374

INTERMOLECULAR FORCES

Photochemistry of intermolecular C-H bond activation reactions
[DE94-018417] p 1239 N95-20682

Chemical interactions between protein molecules and polymer membrane materials
[DE95-001808] p 1224 N95-21746

Hydrogen and related materials at high density: Physics, chemistry and planetary implications
p 1418 N95-21791

INTERNAL ENERGY

Electron attachment to excited molecules
[DE94-019124] p 1522 N95-21519

INTERNAL FLOW

Experimental study of vane heat transfer and aerodynamics at elevated levels of turbulence
[NASA-CR-4633] p 1337 N95-19912

Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10
[NASA-TP-3476] p 1340 N95-20619

INTERNAL PRESSURE

Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320

INTERNAL WAVES

Fourth International Symposium on Stratified Flows, volume 3
[AD-A286452] p 1354 N95-21584

Seismic anisothropy and large-scale porosity inthe ocean floor
[AD-A286580] p 1436 N95-22187

INTERNATIONAL COOPERATION

Patterns of financial change in the OECD area
[PB95-110979] p 1594 N95-19939

INTERPOLATION

Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495

Seminar on Biomedical Engineering 1993
[PB95-104402] p 1443 N95-20971

Subsampling methods for image sequence coding
[PB95-107991] p 1305 N95-21579

INTERPROCESSOR COMMUNICATION

Non interleaving process algebra
[PB95-110607] p 1486 N95-19892

Design of a parallel object oriented programming language
[AD-A284924] p 1457 N95-20000

A group communication approach for mobile computing mobile channel: An ISIS tool for mobile services
[AD-A279785] p 1290 N95-20306

The IEEE scalable coherent interface: An approach for a unified avionics network p 1212 N95-20650

Programmable modular network interface
[AD-D016505] p 1477 N95-21674

Method of sensing target status in a local area network
[AD-D016248] p 1478 N95-22090

A new parallel method for molecular dynamics simulation of macromolecular systems
[DE94-018621] p 1529 N95-22315

INTERSTELLAR GAS

A HIRES analysis of the FIR emission of supernova remnants p 1594 N95-21770

Arcminute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771

INTERSTELLAR RADIATION

Azimuthally averaged radial S(sub 100 microns)/S(sub 60 microns) dust color temperatures in spiral galaxies
p 1593 N95-21760

INVARIANCE

View-based models of 3D object recognition and class-specific invariance
[AD-A279658] p 1459 N95-20157

Classification of diagonal coset modular invariants
[PB95-111118] p 1489 N95-20259

GAJET experiment at the LHC: The GAJET collaboration
[PB95-129813] p 1512 N95-20454

Computation of invariant manifolds
[PB95-135687] p 1492 N95-21318

Object recognition by alignment using invariant projections of planar surfaces
[AD-A279841] p 1468 N95-21495

Constraints on T-odd and P-even hadronic interactions from nucleon, nuclear, and atomic electric dipole moments
[DE94-012845] p 1526 N95-21920

Linear invariance of Lindeloef numbers
[PB95-134540] p 1494 N95-21956

INVENTIONS

Cascade orificial resistive device
[AD-D016529] p 1504 N95-20724

Hybrid high power amplifier
[AD-D016534] p 1326 N95-20730

INVENTORIES

Calculation methods for criteria air pollutant emission inventories
[AD-A284675] p 1400 N95-19964

Origin and loss of the volatiles of the terrestrial planets p 1417 N95-21785

INVERSE SCATTERING

Deconvolution and singular value decomposition
[AD-A286582] p 1491 N95-20875

Inverse and control problems in electromagnetics
[AD-A286438] p 1310 N95-22250

INVERSIONS

Investigating the resolution of resistivity arrays using inverse theory
[DE94-017760] p 1412 N95-20287

Right inverse for the divergence operator in spaces of continuous piecewise polynomials
[PB95-127080] p 1496 N95-22369

INVERTEBRATES

Long term changes on the continental shelf of the North Sea: Invertebrate trends, 1931-1990
[PB95-135224] p 1435 N95-21717

INVERTERS

Design of power electronics for TVC and EMA systems
[NASA-CR-196540] p 1312 N95-19909

INVISCID FLOW

Front-boundary layer models from STORM-FEST observations
[AD-A279907] p 1428 N95-20186

Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106

Nonlinear acoustic processes in a solid rocket engine
[AD-A285606] p 1222 N95-21193

IODIDES

The dynamics of formation and evaporation of mixed alkali halide nanocrystals: A case of comparable lattice energies
[AD-A285052] p 1567 N95-20483

Modeling of nonlinear optic and ESR response of CDW MX materials
[DE94-018301] p 1578 N95-22297

IODINE

Excess energy and structural dependence of the rate of energy redistribution during the photodissociation of iodotoluenes
[AD-A279997] p 1241 N95-21124

ION ACCELERATORS

A new tool for accelerator system modeling and analysis
[DE94-018292] p 1531 N95-20203

An impedance model of the Relativistic Heavy Ion Collider (RHIC)
[DE94-016784] p 1532 N95-20406

Accelerators for energy production
[DE94-770764] p 1392 N95-20685

Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891

ION ATOM INTERACTIONS

Experimental study of interactions of highly charged ions with atoms at keV energies
[DE95-001807] p 1521 N95-21441

Classical-quantum correspondence for ionization in fast ion-atom collisions
[DE95-000953] p 1526 N95-21940

Experimental study of interactions of highly charged ions with atoms at keV energies
[DE94-018648] p 1529 N95-22316

ION BEAMS

Matrix formulation of the particle motion in crystalline beams
[DE94-017301] p 1563 N95-19925

Modeling the dynamics of charged-particle beams using a Fokker-Planck approach
[DE95-001458] p 1531 N95-19983

Transition-energy crossing with a gamma(sub t)(-)jump
[DE94-017315] p 1531 N95-20021

Relational databases for RHIC design and control
[DE94-016785] p 1532 N95-20336

Ion scattering and deposition: The role of energetic particles in thin film growth
[AD-A285975] p 1514 N95-20667

Accelerators for energy production
[DE94-770764] p 1392 N95-20685

Radiation-driven targets for heavy-ion fusion
[DE95-002264] p 1533 N95-20784

Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881

Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891
An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation
[DE95-001078] p 1515 N95-20911
Behaviour of space-charge dominated ion beams in storage rings
[DE94-015845] p 1517 N95-21140
In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236
Shot-to-shot comparison of the first Li-beam driven Hohlraum experiments
[DE94-016558] p 1558 N95-21247
Plasma model for charging damage
[DE95-000788] p 1558 N95-21310
LIF standoff research
[DE94-018744] p 1535 N95-21328
Hadron beams and accelerators
[DE95-002932] p 1536 N95-21342
Progress in the Light Ion Driven Inertial Confinement Fusion Program
[DE94-019182] p 1537 N95-21603
Selection of RIB targets using ion implantation
[DE95-000951] p 1538 N95-21938
Design, fabrication, and characterization of reflective diffractive optical elements in Si for free-space optical interconnects
[AD-A286416] p 1547 N95-22205
Experimental study of interactions of highly charged ions with atoms at keV energies
[DE94-018648] p 1529 N95-22316
Characterization and performance of DLC films synthesized by plasma and ion beam techniques
[DE94-018287] p 1281 N95-22428

ION CONCENTRATION
Advanced detector development, laboratory simulations, diagnostic development, and data analysis on wake physics
[AD-A284798] p 1364 N95-20069

ION CURRENTS
Enhanced ionic conduction at the film/substrate interface in LiI thin films grown on sapphire(0001)
[DE94-017884] p 1565 N95-20371
A new family of anion receptors and their effects on ion pair dissociation and conductivity of lithium salts in non-aqueous solutions
[DE94-016822] p 1512 N95-20477
The development of a new plasticizer for poly(ethylene oxide) based polymer electrolyte and the investigation of their ion-pair dissociation effect
[DE94-016821] p 1276 N95-21644

ION CYCLOTRON RADIATION
Experimental measurements of ICRF and edge plasma interactions on Tore Supra
[DE94-019154] p 1551 N95-20205
Ion heating perpendicular to the magnetic field
[AD-A286635] p 1501 N95-20773
High magnetic field glow discharge ionization source
[AD-A279972] p 1241 N95-21123

ION DENSITY (CONCENTRATION)
Charged particle dynamics in the acceleration gap of the PBFA 2 ion diode
[DE94-017347] p 1506 N95-20026
Behaviour of space-charge dominated ion beams in storage rings
[DE94-015845] p 1517 N95-21140

ION DISTRIBUTION
A new alpha particle diagnostic using knock-on ion tails
[DE94-015856] p 1553 N95-20402
Ion charge-state production and photoionization near the K edge in argon and potassium
[DE95-001443] p 1522 N95-21502

ION EMISSION
Impedance characteristics of multistage ion diodes
[DE94-018887] p 1565 N95-20340

ION ENGINES
SPACE-R thermionic space nuclear power system: Design and technology demonstration
[DE95-000713] p 1221 N95-20076
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530

ION EXCHANGE MEMBRANE ELECTROLYTES
Electrical impedance studies of acid-form NAFION membranes
[AD-A279271] p 1330 N95-21490

ION EXCHANGE RESINS
An investigation of the applicability of the new ion exchange resin, Reillex(TM)-HPQ, in ATW separations
[DE94-016576] p 1274 N95-21234

ION EXCHANGING
Tests of dielectric model descriptions of chemical charge displacements in water
[DE94-007530] p 1236 N95-20277
An investigation of the applicability of the new ion exchange resin, Reillex(TM)-HPQ, in ATW separations
[DE94-016576] p 1274 N95-21234

ION IMPLANTATION
Physics Division research and development
[DE94-017685] p 1501 N95-20246
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
Plasma model for charging damage
[DE95-000788] p 1558 N95-21310
Selection of RIB targets using ion implantation
[DE95-000951] p 1538 N95-21938
Growing and releasing diamonds
[AD-D016489] p 1577 N95-22103
Theses of the Proceedings of the 23d International Meeting on the Physics of Charged Particle Interaction with Crystals
[DE94-631501] p 1529 N95-22281

ION IRRADIATION
Post-irradiation deformation characteristics of heavy-ion irradiated 304L SS
[DE94-017462] p 1251 N95-20088
A mechanistic model for radiation-induced crystallization and amorphization in U3Si
[DE94-015028] p 1566 N95-20419
Ion scattering and deposition: The role of energetic particles in thin film growth
[AD-A285975] p 1514 N95-20667
Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707
Heavy ion track-structure calculations for radial dose in arbitrary materials
[NASA-TP-3497] p 1517 N95-21191
In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236
Defect production and recombination during low-energy ion processing
[DE95-001827] p 1572 N95-21304
Vortex dynamics in a ring-like irradiated Bi2Sr2CaCu2O8 crystal
[DE95-001682] p 1573 N95-21569

ION PROBES
Time-resolved diagnostics of excimer laser-generated ablation plasmas used for pulsed laser deposition
[DE94-018950] p 1559 N95-21547

ION SCATTERING
Ion scattering and deposition: The role of energetic particles in thin film growth
[AD-A285975] p 1514 N95-20667
Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881
Theses of the Proceedings of the 23d International Meeting on the Physics of Charged Particle Interaction with Crystals
[DE94-631501] p 1529 N95-22281
A multisite interaction expansion of the total energy in metals
[DE94-017175] p 1262 N95-22313
Experimental study of interactions of highly charged ions with atoms at keV energies
[DE94-018648] p 1529 N95-22316
Resonant charge transfer in hyperthermal atomic and molecular ion-surface collisions
[AD-A284937] p 1530 N95-22471

ION SOURCES
An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation
[DE95-001078] p 1515 N95-20911
High magnetic field glow discharge ionization source
[AD-A279972] p 1241 N95-21123
LIF standoff research
[DE94-018744] p 1535 N95-21328

ION TEMPERATURE
Analysis methods for fast impurity ion dynamics data
[DE95-000589] p 1549 N95-20112
Ion temperature measurement of indirectly-driven implosions using a geometry-compensated neutron time-of-flight detector
[DE94-016967] p 1552 N95-20362

ION TRAPS (INSTRUMENTATION)
On conception of a compact neutron source and the possibility of its simulation on the Amba-M end trap
[DE94-633373] p 1562 N95-22282
Gas-dynamic trap diagnostic complex for study on plasma heating and power atomic beam injection
[DE94-633377] p 1529 N95-22283

IONIC COLLISIONS
Convergent Close-Coupling method for calculation of electron scattering on hydrogen-like targets
[DE94-631340] p 1508 N95-20196
Dynamics of collision processes
[DE94-017593] p 1509 N95-20242
On the sputtering of metals and insulators: A nonlinear evolution problem with nonlinear boundary condition
[DE95-001456] p 1254 N95-20792
Recombination, ion-molecule collisions and (laser assisted) electron-excited atom collisions
[AD-A285604] p 1517 N95-21216
Measurements of scattering processes in negative ion: Atom collisions
[DE95-000664] p 1519 N95-21276
The theory of relativistic heavy ion collisions
[DE95-001805] p 1519 N95-21302
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380
Experimental study of interactions of highly charged ions with atoms at keV energies
[DE95-001807] p 1521 N95-21441
Summary of heavy ion theory
[DE95-002177] p 1523 N95-21588
Theoretical atomic physics for fusion
[DE94-019196] p 1524 N95-21605
Dynamics of the chiral transition
[DE94-016813] p 1524 N95-21641
Collisional redistribution effects on x ray laser saturation behavior
[DE94-017308] p 1374 N95-21663
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704
Angular and charge state distributions of highly charged ions scattered during low energy surface-channeling interactions with Au(110)
[DE95-001348] p 1525 N95-21857
Very high-power electron-beam transport in long gas cells from 10(exp -3) to 10(exp 3) Torr N2
[DE95-002611] p 1539 N95-22306
Resonant charge transfer in hyperthermal atomic and molecular ion-surface collisions
[AD-A284937] p 1530 N95-22471

IONIC CRYSTALS
Structure of ionic interfaces from an absolutely convergent solution of the Madelung problem
[DE94-019268] p 1573 N95-21474

IONIC REACTIONS
Ion-molecule chemistry related to plasma deposition and etching of silicon
[AD-A279749] p 1514 N95-20804
Ion heat pulse after sawtooth crash in the JFT-2M tokamak
[DE94-770685] p 1555 N95-20988
Potential-of-mean-force description of ionic interactions and structural hydration in biomolecular systems
[DE95-000859] p 1438 N95-21366

IONIZATION
Electron-impact ionization of multicharged ions at ORNL: 1985-1992
[DE94-017318] p 1507 N95-20086
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-018580] p 1552 N95-20345
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric study of singly and doubly charged organometallic complexes
[AD-A279899] p 1238 N95-20563
High magnetic field glow discharge ionization source
[AD-A279972] p 1241 N95-21123
Experimental investigations of electron capture from atomic hydrogen and deuterium by alpha particles
[DE95-002138] p 1523 N95-21587
Selection of RIB targets using ion implantation
[DE95-000951] p 1538 N95-21938
Classical-quantum correspondence for ionization in fast ion-atom collisions
[DE95-000953] p 1526 N95-21940
Solar wind composition
[NASA-TM-197364] p 1604 N95-22384

IONIZATION CROSS SECTIONS
Electron-impact ionization of multicharged ions at ORNL: 1985-1992
[DE94-017318] p 1507 N95-20086
Calculation of the total and total ionization cross sections for positron scattering on atomic hydrogen
[DE94-631341] p 1508 N95-20197
The (e,2e) calculations with the final-state boundary condition
[DE94-631342] p 1509 N95-20198

Calculation of electron scattering on the He(+) ion
[DE94-631343] p 1509 N95-20199
Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
[DE94-018092] p 1560 N95-21668

IONIZED GASES
An analytical electron distribution function for inelastic collisions in a uniform gas with time varying electric field
[DE95-003476] p 1528 N95-22222
An analytical, inelastic, space and time dependent electron distribution for electrically excited gases
[DE95-003478] p 1528 N95-22223

IONOGRAMS
The effects of multihop HF propagation on the performance of OTH backscatter radars
p 1298 N95-20953

IONOSPHERIC CURRENTS
Substorm theories: United they stand, divided they fall
[NASA-CR-197672] p 1427 N95-22326

IONOSPHERIC DISTURBANCES
Source mechanisms and radio effects of ionospheric plasma disturbances
[AD-A286529] p 1555 N95-21013

IONOSPHERIC HEATING
Ion heating perpendicular to the magnetic field
[AD-A286635] p 1501 N95-20773

IONOSPHERIC PROPAGATION
Temporal and spatial comportment of multiple paths in ionospheric propagation in oblique incidence: Fractal measures of perturbations p 1298 N95-20954
Measurements of angles of elevation of HF by a high resolution method using polarization diversity
p 1299 N95-20959
Source mechanisms and radio effects of ionospheric plasma disturbances
[AD-A286529] p 1555 N95-21013

IONOSPHERIC SOUNDING
The applicability of neural networks to ionospheric modeling in support of relocatable Over-the-Horizon radar
[AD-A286114] p 1309 N95-22230

IONOSPHERIC STORMS
Substorm theories: United they stand, divided they fall
[NASA-CR-197672] p 1427 N95-22326

IONS
Electron-impact ionization of multicharged ions at ORNL: 1985-1992
[DE94-017318] p 1507 N95-20086
Enhanced output of soft x-ray lasers using double slab targets
[DE94-016689] p 1369 N95-20335
Ion heating perpendicular to the magnetic field
[AD-A286635] p 1501 N95-20773
High magnetic field glow discharge ionization source
[AD-A279972] p 1241 N95-21123
Ion-molecular spiraling collisions and termolecular recombination
[AD-A285633] p 1517 N95-21151
Emittance dilution by ions in the SLC arcs
[DE95-002871] p 1536 N95-21332
Dilepton production from p-p to Ca-Ca at the Bevalac
[DE95-002341] p 1520 N95-21357
Potential-of-mean-force description of ionic interactions and structural hydration in biomolecular systems
[DE95-000859] p 1438 N95-21366
Ion charge-state production and photoionization near the K edge in argon and potassium
[DE95-001443] p 1522 N95-21502
The energetics and dynamics of free radicals, ions, and clusters
[DE94-018101] p 1244 N95-21701
Observations of cold magnetospheric ions at geosynchronous orbit during times of high activity
[DE95-000936] p 1600 N95-21935
Experimental study of interactions of highly charged ions with atoms at keV energies
[DE94-018648] p 1529 N95-22316

IRAS-ARAKI-ALCOCK COMET
Application of MCM image construction to IRAS comet observations p 1594 N95-21772

IRIDIUM
Water abundance and accretion history of terrestrial planets p 1424 N95-21820

IRON
MCNP (trademark) ENDF/B-VI iron benchmark calculations
[DE94-016165] p 1508 N95-20160
Magnetic x ray circular dichroism in Fe Co Pt multilayers
[DE94-017522] p 1253 N95-20447
Spin-specific photoelectron diffraction using magnetic x ray circular dichroism
[DE94-017527] p 1567 N95-20448
Processing and applications of iron aluminides
[DE94-017855] p 1253 N95-20673
Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790

IRON ALLOYS
Processing and characterization of Ni-Al-Fe-B shape-memory alloy wires produced by rapid solidification
[DE94-017702] p 1250 N95-20020
Hydrogen resistant alloy - NASA 23
[NASA-CASE-MFS-26200-1-SB] p 1251 N95-20068
Processing and applications of iron aluminides
[DE94-017855] p 1253 N95-20673
Changes in the behavior of magnetic materials undergoing processing in electrical rotating machines
[PB95-104493] p 1325 N95-20702
Impact behavior of FeAl alloy FA-350
[DE94-018128] p 1254 N95-20705
ALCHEMI of Fe-doped B2-ordered NiAl alloys with different doping levels
[DE94-017748] p 1255 N95-20907
2nd International ADI seminar
[PB95-127734] p 1255 N95-21108
Computational modeling of diffusion-controlled transformations in ternary systems
[DE95-001358] p 1256 N95-21298
Weldability of iron aluminides
[DE94-019114] p 1257 N95-21555
Fracture behavior of the Fe-8Al alloy FAP-Y
[DE95-000956] p 1258 N95-21676
Incology alloy 908 data handbook
[DE95-001818] p 1260 N95-22013
Tensile and impact properties of iron-aluminum alloys
[DE94-017750] p 1263 N95-22346

IRON COMPOUNDS
Calculation of atom-centered partial charges for heme
[DE94-014447] p 1520 N95-21375
Structure and stability of hydrous minerals at high pressure p 1417 N95-21786

IRON ISOTOPES
Properties of strange-matter stars
[DE95-002329] p 1599 N95-20873
Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280

IRON OXIDES
Superior catalysts for selective catalytic reduction of nitric oxide
[DE94-018845] p 1234 N95-20046
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4
[DE94-631462] p 1255 N95-20909
Water abundance and accretion history of terrestrial planets p 1424 N95-21820

IRRADIANCE
Detection optimization using linear systems analysis of a coded aperture laser sensor system
[DE95-001112] p 1371 N95-20832
Effects of increased UV-B radiation on phytoplankton: A preliminary study and research programme
[PB95-133732] p 1439 N95-21884

IRRADIATION
Amorphization of sapphire during ion beam mixing
[DE94-018713] p 1510 N95-20337
The in-situ fracture and Auger analysis of Nicalon fibers
[DE94-017771] p 1226 N95-20357
Performance, defect behavior and carrier enhancement in low energy, proton irradiated p+nn+ InP solar cells
p 1319 N95-20518
Annealing of irradiated n+p InP buried homojunctions
p 1320 N95-20524
UV testing of INTELSAT-7, 7A, and 8 solar cells
p 1320 N95-20526
X-ray spectroscopy of xenon
[DE95-002132] p 1240 N95-20865
Irradiation creep in structural materials at ITER operating conditions
[DE94-018946] p 1261 N95-22123
Low temperature tensile and fracture mechanical strength in mode 1 and mode 2 of fiber reinforced plastics following various irradiation conditions
[DE94-019269] p 1232 N95-22130
Radiation tests on service electronics for future multi TeV detectors
[DE94-632822] p 1335 N95-22184
Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280
The final status of a metal surface after multipulse laser irradiation in an ambient gas
[DE94-629000] p 1562 N95-22377

IRREGULARITIES
Mitigation of the effects of F layer regularities by using multiple paths p 1298 N95-20951
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A286173] p 1427 N95-22423

ISCHEMIA
Skeletal muscle ischemia and heat shock proteins
[AD-A285364] p 1442 N95-20549

ISING MODEL
Rigorous spin-spin correlation function of Ising model on a special kind of Sierpinski Carpets
[DE94-628995] p 1575 N95-21854
Magnetic properties of the three-dimensional Ising model with an interface amorphization
[DE94-628992] p 1278 N95-21885
N=1 Superconformal minimal model correlation functions on the torus
[PB95-134615] p 1500 N95-21964

ISLAND ARCS
Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787

ISOCYANATES
Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621

ISOLATION
High isolation electronic switch
[AD-D016533] p 1326 N95-20729

ISOMERS
Process strategies in the enzymatic resolution of enantiomers
[PB95-107850] p 1437 N95-20208
Excess energy and structural dependence of the rate of energy redistribution during the photodissociation of iodotoluenes
[AD-A279997] p 1241 N95-21124

ISOTHERMAL PROCESSES
Augmented thermal bus
[NASA-CASE-LEW-15595-1-C] p 1338 N95-19933

ISOTHERMS
An investigation of the applicability of the new ion exchange resin, Reillex(TM)-HPQ, in ATW separations
[DE94-016576] p 1274 N95-21234

ISOTONICITY
Exponential deconvolution: Two asymptotically equivalent estimators
[PB95-132122] p 1499 N95-21469

ISOTOPE RATIOS
Spatial variation of primordial 3-He in crustal fluids along the East-African Rift system (the Ethiopian and the Kenya Rift section) p 1418 N95-21789

ISOTOPE SEPARATION
System design document U-AVLIS control system. architecture
[DE94-017297] p 1460 N95-20387
Mars power system concept definition study. Volume 1: Study results
[NASA-CR-195420-VOL-1] p 1396 N95-21952

ISOTOPES
Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777
D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781
Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784
Origin and loss of the volatiles of the terrestrial planets p 1417 N95-21785
Primitive Xe in the atmospheres of Earth and mars
p 1419 N95-21795
Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796
Nitrogen isotopic components in the early solar system p 1420 N95-21800
Is xenon eldest? p 1425 N95-21823
Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128

ISOTOPIC LABELING
In vivo distribution of liposome encapsulated hemoglobin studied with imaging radiotracers
[AD-A279774] p 1438 N95-20806
Solar helium and neon in the Earth
p 1419 N95-21793
The isotope geochemistry of abyssal peridotites and related rocks
[AD-A279435] p 1435 N95-21918

ISOTROPIC MEDIA
Velocity analysis for transversely isotropic media
[DE95-000643] p 1411 N95-19981

P-wave signatures and parameterization of transversely isotropic media: An overview
[DE95-000644] p 1411 N95-19982

ISOTROPIC TURBULENCE

A numerical investigation of energy transfer and subgrid-scale eddy viscosity in homogeneous, isotropic and shear turbulence
[AD-A280005] p 1339 N95-20058

Mapping closures for turbulent combustion
[AD-A279995] p 1238 N95-20597

Pressure and higher-order spectra for homogeneous isotropic turbulence p 1343 N95-21045

Statistics of pressure and pressure gradient in homogeneous isotropic turbulence p 1343 N95-21046

A Lagrangian dynamic subgrid-scale model turbulence
p 1344 N95-21051

Application of Direct and Large Eddy Simulation to Transition and Turbulence
[AGARD-CP-551] p 1346 N95-21061

Developments and applications of dynamic models for large eddy simulation of complex flows
p 1346 N95-21062

The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers
p 1347 N95-21065

Analysis of subgrid models using direct and large-eddy simulations of isotropic turbulence p 1348 N95-21071

Entrainment in a shear-free turbulent mixing layer
p 1350 N95-21083

Small-scale behavior in distorted turbulent boundary layers at low Reynolds number p 1362 N95-22456

Experimental and numerical study of the intermittency exponent mu p 1362 N95-22458

On the dynamics of small-scale vorticity in isotropic turbulence p 1362 N95-22459

Resolution requirements for velocity gradients in turbulence p 1363 N95-22462

ISOTROPY

Physical-chemical studies on rodlike polymer compositions
[AD-A285361] p 1269 N95-20548

On the Taylor test. Part 3: A continuum mechanics code analysis of steady plastic wave propagation
[DE95-002252] p 1501 N95-20869

The decay of axisymmetric homogeneous turbulence
p 1343 N95-21047

Fast algorithms for transport models
[DE95-001702] p 1470 N95-21992

ITERATION

A S2-like acceleration method for the Nonlinear Characteristic transport scheme
[DE94-016285] p 1509 N95-20235

Error committed by stopping the Newton iteration in Runge-Kutta methods and linear multistep methods
[PB95-106324] p 1492 N95-21421

Iterated-subspace minimization methods for nonlinear optimization
[PB95-108171] p 1495 N95-22317

ITERATIVE SOLUTION

Iterated-bootstrap confidence intervals for the mean
[AD-A279802] p 1498 N95-20102

A domain decomposition scheme for Eulerian shock physics codes
[DE94-015739] p 1488 N95-20141

VLUGR3: A vectorizable adaptive grid solver for PDEs in 3D. 1: Algorithmic aspects and applications
[PB95-135729] p 1467 N95-21435

Distribution-independent hierarchical N-body methods
[DE95-001686] p 1493 N95-21439

Object-oriented design of preconditioned iterative methods
[PB95-110276] p 1469 N95-21655

A new Krylov-subspace method for symmetric indefinite linear systems
[DE95-001826] p 1355 N95-21726

J

JAMMING

General purpose sidelobe canceller system
[AD-D016560] p 1289 N95-20270

Highly survivable communications: Complementary media packet switched networks p 1292 N95-20922

A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934

Directive optimization of coherent sidelobe canceller systems
[AD-D016513] p 1307 N95-21908

JAPAN

Environmental Compliance Assessment System (ECAS): Japan settlement
[AD-A279328] p 1410 N95-22142

JET AIRCRAFT NOISE

Active control of fan noise-feasibility study. Volume 1: Flyover system noise studies
[NASA-CR-195392-VOL-1] p 1505 N95-21888

JET ENGINE FUELS

Investigation of flight data recorder fire test requirements
[AD-A285832] p 1208 N95-20032

Two-dimensional imaging of OH in a lean burning high pressure combustor
[NASA-TM-106854] p 1214 N95-21383

JET ENGINES

Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170

JET FLOW

Heat transfer, fouling, and combustion of supercritical fuels
[AD-A279906] p 1281 N95-19884

Numerical simulation of spatially-developing planar jets p 1351 N95-21087

Rib vortices in round jets: Direct and large eddy simulation p 1351 N95-21088

Superconducting electromagnetic thruster
[AD-D016485] p 1355 N95-21902

JET IMPINGEMENT

Numerical simulation of spatially-developing planar jets p 1351 N95-21087

JET MIXING FLOW

Experimental investigations of on-demand vortex generators p 1361 N95-22451

JET THRUST

Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle
[NASA-TM-4574] p 1199 N95-19913

JFET

Complementary GaAs junction-gated heterostructure field effect transistor fabrication for integrated circuits
[DE95-001522] p 1327 N95-20882

JOINTS (JUNCTIONS)

Intrinsic barriers for H-atom transfer reactions
[DE94-018914] p 1507 N95-20049

The reliability of laser reflowed Sn-Ag solder joints
[AD-A279787] p 1315 N95-20443

Reliability assessment of Multichip Module technologies via the Triservice/NASA RELTECH program
p 1210 N95-20643

Analysis of a disk-on-rod surface wave element inside a corrugated horn using the mode-matching technique
p 1305 N95-21543

Fiber-optic rotary joint with bundle collimator assemblies
[AD-D016504] p 1545 N95-21673

Attachment methodology for composite cylinder assembly
[AD-D016256] p 1381 N95-22034

Evaluation of scanners for C-scan imaging for nondestructive inspection of aircraft
[AD-A286398] p 1383 N95-22202

JOSEPHSON JUNCTIONS

Josephson acoustic radiation in superfluid helium
[AD-A279809] p 1503 N95-20098

HTS Josephson technology on silicon with application to high speed digital microelectronics
[AD-A285964] p 1328 N95-21178

Critical dynamics and plastic flow in disordered Josephson junction arrays
[DE94-629074] p 1576 N95-21995

Breakdown of the law of large numbers in Josephson junction series arrays
[DE94-629075] p 1576 N95-21996

Order and turbulence in RF-driven Josephson junction series arrays
[DE94-629076] p 1576 N95-21997

JOURNAL BEARINGS

Wave journal bearing. Part 1: Analysis
[NASA-CR-195431-PT-1] p 1382 N95-22404

Wave journal bearing. Part 2: Experimental pressure measurements and fractional frequency whirl threshold for wave and plain journal bearings
[NASA-TM-106848-PT-2] p 1382 N95-22405

JP-8 JET FUEL

Development of an advanced JP-8 fuel
[AD-A285583] p 1283 N95-21161

JUPITER ATMOSPHERE

Simulated rarefied entry of the Galileo probe into the atmosphere of Jupiter
[NASA-TM-110507] p 1601 N95-21621

K

K-EPSILON TURBULENCE MODEL

Effects of turbulence compressibility and unsteadiness in compression corner flow p 1344 N95-21052

Single point modeling of rotating turbulent flows
p 1346 N95-21060

Developments and applications of dynamic models for large eddy simulation of complex flows
p 1346 N95-21062

Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106

Application of Navier-Stokes code PAB3D with kappa-epsilon turbulence model to attached and separated flows
[NASA-TP-3480] p 1201 N95-21338

KALMAN FILTERS

Emitter location via Kalman filtering of signal time difference of arrival
[AD-A285972] p 1291 N95-20666

Brief tutorial on the Kalman filter
[AD-A286571] p 1326 N95-20827

A real-time algorithm for integrating differential satellite and inertial navigation information during helicopter approach
[NASA-CR-197409] p 1205 N95-21891

KAONS

GAJET experiment at the LHC: The GAJET collaboration
[PB95-129813] p 1512 N95-20454

Search for right-handed currents in the decay chain of K(+) yields muon(+)nu(sub muon), muon(+) yields e(+)nu(sub e)nu(bar)(sub muon)
[DE94-770606] p 1514 N95-20756

Single particle measurements and two particle interferometry results from CERN experiment NA44
[DE95-003041] p 1527 N95-22078

KARMAN VORTEX STREET

Forced free-shear layer measurements
p 1362 N95-22460

KELVIN WAVES

A study of westerly wind bursts preceding the 1991-1992 El Nino
[AD-A286570] p 1429 N95-20826

KERNEL FUNCTIONS

Weighted strongly elliptic operators on lie groups
[PB95-110847] p 1487 N95-19917

Kernel mucking in top
[DE94-017077] p 1460 N95-20385

Positive rockland operators
[PB95-127510] p 1493 N95-21423

On Markov Chain Monte Carlo acceleration
[AD-A279393] p 1499 N95-21945

KERR EFFECTS

Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE95-001548] p 1574 N95-21839

KERR ELECTROOPTICAL EFFECT

Light-scattering fluctuations and noise in nonlinear optical processing
[AD-A279748] p 1544 N95-20803

KERR MAGNETOOPTICAL EFFECT

Changes in the behavior of magnetic materials undergoing processing in electrical rotating machines
[PB95-104493] p 1325 N95-20702

KEVLAR (TRADEMARK)

Detection of environmental deterioration in fiber reinforced composites by FT-Raman spectroscopy, phase 1
[AD-A279763] p 1228 N95-20805

KINEMATIC EQUATIONS

Mathematical modeling of a class of multibody flexible spacecraft structures
[NASA-TM-109166] p 1219 N95-20800

KINEMATICS

Search for D(+) yields (pi)(+)(mu)(+)(mu)(-)
[DE94-015538] p 1512 N95-20475

Symmetry, Wigner functions and particle reactions
[DE94-629887] p 1514 N95-20735

Kinematical evidence for top pairs at the Tevatron
[DE95-000729] p 1515 N95-20880

Modeling the effect of water on mantle rheology
p 1417 N95-21783

KINETIC ENERGY

Evaluation of Reynolds stress turbulence closures in compressible homogeneous shear flow
[NASA-CR-194892] p 1338 N95-20009

Study of small carbon and semiconductor clusters using negative ion threshold photodetachment spectroscopy
[DE95-002327] p 1515 N95-20872

Correlated wavefunction Monte Carlo studies of excitations in the quantum Hall liquids
[DE95-002337] p 1501 N95-20874

Numerical investigation of supersonic turbulent boundary layers with high wall temperature
p 1344 N95-21050

Effects of turbulence compressibility and unsteadiness in compression corner flow p 1344 N95-21052

The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers
p 1347 N95-21065
Large-eddy simulation of separated flow in a ribbed duct p 1347 N95-21070
Analysis of subgrid models using direct and large-eddy simulations of isotropic turbulence p 1348 N95-21071
A cheap DNS tool for turbulence models testing
p 1348 N95-21072
Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106

KINETIC EQUATIONS
Hybrid model in general geometry
[DE95-002614] p 1553 N95-20437

KINETIC THEORY
Magnetic fluctuation induced transport and edge dynamo measurements in the MST reversed-field pinch
[DE95-000591] p 1549 N95-20114

KINETICS
Chemical Structure and Dynamics program
[DE95-001117] p 1403 N95-20834
Cluster reactions: An approach to understanding the fundamentals of heterogeneous catalysis
[DE95-002947] p 1243 N95-21447

KLEIN-GORDON EQUATION
Quantization in curvilinear coordinates
[DE94-770603] p 1514 N95-20737
Understanding the mechanisms of length scale competition: The sine-Gordan soliton case
[DE94-016201] p 1500 N95-21136

KLYSTRONS
Development of an annular electron beam HPM amplifier
[AD-A286646] p 1327 N95-20905
Development status of an intense beam klystron
[DE95-000745] p 1329 N95-21395
A 500 MW annular beam relativistic klystron
[DE95-000867] p 1334 N95-22011

KNOWLEDGE
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 28: The technical communication practices of aerospace engineering and science students: Results of the phase 4 cross-national surveys
[NASA-TM-109123] p 1587 N95-20162

KNOWLEDGE BASED SYSTEMS
Generating examples for use in tutorial explanations: The use of a subsumption based classifier
[AD-A286028] p 1464 N95-20996
Knowledge refinement in a reflective architecture
[AD-A286027] p 1589 N95-21002
GRONICs-1994. Proceedings of the 1994 Groningen Student Conference on Computer Science
[PB95-135620] p 1468 N95-21455
Incremental rederivation of software artifacts: FY 1993
[AD-A285790] p 1473 N95-22402

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Generating examples for use in tutorial explanations: The use of a subsumption based classifier
[AD-A286028] p 1464 N95-20996
Knowledge refinement in a reflective architecture
[AD-A286027] p 1589 N95-21002
Formal model for the dynamics of compositional reasoning systems
[PB95-132056] p 1482 N95-21267
EXPERT system expert: Program description
[PB95-131561] p 1482 N95-21429
EXPERT system expert: Users manual
[PB95-131579] p 1482 N95-21430
Generic architecture for knowledge-based control of processes in dynamic environments
[PB95-132676] p 1483 N95-21981
Intelligent interactive project management system
[PB95-132684] p 1586 N95-21982
Verification of knowledge-based reasoning modules
[PB95-132692] p 1470 N95-21983
Structuring design requirements using YMIR
[PB95-132742] p 1471 N95-22081

KNOWLEDGE REPRESENTATION
Knowledge refinement in a reflective architecture
[AD-A286027] p 1589 N95-21002
Logic programming and negation: A survey
[PB95-110730] p 1472 N95-22302

KOLMOGOROV THEORY
Simulation of stellar speckle imaging
[DE94-016606] p 1412 N95-19985
Small-scale behavior in distorted turbulent boundary layers at low Reynolds number p 1362 N95-22456
Experimental and numerical study of the intermittency exponent mu p 1362 N95-22458

KONDO EFFECT
Kondo insulators
[DE95-001156] p 1237 N95-20368
An asymptotic solution of the (infinity)-d Hubbard model
[DE94-629042] p 1582 N95-21994

KRYPTON
Is xenon eldest? p 1425 N95-21823

KUIPER AIRBORNE OBSERVATORY
Pushing the limits of spatial resolution with the Kuiper Airborne observatory p 1593 N95-21754

L

LABORATORIES
Parallel solid mechanics codes at Sandia National Laboratories
[DE94-015770] p 1474 N95-20152
The Materials Corrosion and Environmental Effects Laboratory (MCEL)
[DE94-018268] p 1254 N95-20816
Recent reflux receiver developments under the US DOE program
[DE95-001622] p 1393 N95-20861
Reactor pumped laser research at the Sandia National Laboratories pulsed reactor facilities
[DE95-002181] p 1371 N95-20867
Advanced robotic technologies for transfer at Sandia National Laboratories
[DE95-001617] p 1481 N95-20884
Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982
Recent National Solar Thermal Test Facility activities, in partnership with industry
[DE95-001828] p 1394 N95-21353
HPCC technology awareness program: Improved economic competitiveness through technology awareness, transfer and application
[DE95-002134] p 1476 N95-21355
Total quality management program planning
[DE94-016862] p 1586 N95-21645

LAGOONS
A modal analysis of currents in a Pacific Atoll lagoon
[AD-A283721] p 1431 N95-19971

LAGRANGE MULTIPLIERS
A neural expert approach to self designing flight control systems
[AD-A279965] p 1215 N95-21122

LAGRANGIAN FUNCTION
Nonlinear dynamic fluid-structure interaction calculations with coupled finite element and finite volume programs
[DE94-016204] p 1339 N95-20166
On the Taylor test. Part 3: A continuum mechanics code analysis of steady plastic wave propagation
[DE95-002252] p 1501 N95-20869
Balloon tracking for the ASTEX/MAGE Lagrangian experiment
[AD-A280078] p 1430 N95-20969
A Lagrangian dynamic subgrid-scale model turbulence
p 1344 N95-21051

LAKE ERIE
AN/APS-137 Forward Looking Airborne Radar (FLAR) evaluation, Fall 1992 experiment
[AD-A279526] p 1306 N95-21686

LAKE SUPERIOR
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477

LAKES
Fourth International Symposium on Stratified Flows, volume 3
[AD-A286452] p 1354 N95-21584

LAMINAR BOUNDARY LAYER
Navier-Stokes simulations of the effects of suction holes on a flat plate boundary layer p 1352 N95-21094
Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble
p 1352 N95-21095
Acoustic receptivity due to weak surface inhomogeneities in adverse pressure gradient boundary layers
[NASA-TM-4577] p 1353 N95-21258
Supersonic laminar flow control research
[NASA-CR-196049] p 1353 N95-21340
Development of quiet-flow supersonic wind tunnels for laminar-turbulent transition research
[NASA-CR-197286] p 1216 N95-21436
Acoustics of laminar boundary layers breakdown
p 1361 N95-22455

LAMINAR FLOW
Low flow fluid separator
[AD-D016575] p 1339 N95-20297
Software for flow distribution in electronic rack structures
[AD-A285994] p 1325 N95-20715
Homogeneous turbulence subjected to mean flow with elliptic streamlines p 1345 N95-21056
Simulations of bypass transition for spatially evolving disturbances p 1349 N95-21079
Direct numerical determination of the minimum bypass Reynolds number in boundary layers
p 1349 N95-21080
Transient behaviour and stability points of the Poiseuille flow of a KBKZ-fluid
[PB95-132064] p 1353 N95-21268

LAMINATES
The influence of ply waviness with nonlinear shear on the stiffness and strength reduction of composite laminates
[AD-A285736] p 1224 N95-19899
Analysis of the progressive failure of brittle matrix composites
[NASA-CR-195415] p 1225 N95-19951
Superior catalysts for selective catalytic reduction of nitric oxide
[DE94-018845] p 1234 N95-20046
Thermo-mechanical fatigue of polymer matrix composites
[AD-A285931] p 1267 N95-20390
Reliability assessment of Multichip Module technologies via the Triservice/NASA RELTECH program
p 1210 N95-20643
The processing and mechanical properties of high temperature/high performance composites. Mechanism-based constitutive laws and design, book 1
[AD-A279736] p 1228 N95-20801
Significance of impact velocity for the extent of damage in carbon/epoxy laminates
[PB95-133484] p 1230 N95-21417
Damage tolerance of carbon fibre polyetheretherketone laminates
[PB95-131611] p 1230 N95-21432
Processing and mechanical properties of laminar Al2O3-Ni3Al composites
[DE94-019332] p 1230 N95-21481
Damage tolerant repair techniques for pressurized aircraft fuselages
[AD-A286298] p 1199 N95-22046
Fracture behavior of laminated discontinuously reinforced aluminum material
[DE94-017307] p 1263 N95-22408

LAND SURFACE TEMPERATURE
Operating manual for hybrid thermosyphons at the Gakona Power Plant, Alaska
[AD-A279068] p 1287 N95-21626

LANDAU DAMPING
Effect of space charge tune shift on transverse instabilities
[DE94-016790] p 1531 N95-20282
Bunched beam instability with frequency spread
[DE94-018632] p 1539 N95-22357

LANDAU FACTOR
Correlated wavefunction Monte Carlo studies of excitations in the quantum Hall liquids
[DE95-002337] p 1501 N95-20874

LANDAU-GINZBURG EQUATIONS
Biaxiality of chiral liquid crystals
[DE94-629032] p 1578 N95-22277
The interaction of localized solutions in a surface reaction
[DE95-002736] p 1248 N95-22433

LANDING GEAR
Corrosion behavior of landing gear steels
[AD-A285862] p 1261 N95-22132

LANDING LOADS
Super-heavy aircraft study
[AD-A279602] p 1215 N95-19955

LANGMUIR TURBULENCE
A portable and independent edge fluctuation diagnostic
[DE94-018254] p 1554 N95-20681

LANGMUIR-BLODGETT FILMS
Chemical interactions between protein molecules and polymer membrane materials
[DE95-001808] p 1224 N95-21746

LANGUAGE PROGRAMMING
TBell: A mathematical tool for analyzing decision tables
[NASA-CR-195027] p 1462 N95-20691
Visual displays and Neuro-Linguistic Programming
[DE95-001454] p 1466 N95-21311

LANTHANUM
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361
High performance YBCO films
[AD-A279560] p 1276 N95-21695

LANTHANUM COMPOUNDS
Certain physical properties of lanthanum digermanide
[AD-A286592] p 1229 N95-20859
Fabrication of PLZT/ITO grating for optical switching and reconfigurable optical interconnect applications
[AD-A286389] p 1548 N95-22248

LANTHANUM OXIDES
Carrier doping and interlayer coupling in HTSC single crystals
[DE94-018637] p 1564 N95-20127
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Transient studies of low temperature catalysts for methane conversion
[DE95-003560] p 1247 N95-22224

LAPLACE TRANSFORMATION
The PROSAIC Laplace and Fourier Transform
[DE95-002225] p 1492 N95-21266
Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769

LARGE SPACE STRUCTURES
Static stability of a three-dimensional space truss
p 1220 N95-20533

LASER ABLATION
Computational modeling of physical processes during laser ablation
[DE94-017699] p 1369 N95-20221
Optical properties of silicon clusters deposited on the basal plane of graphite
[DE94-017529] p 1542 N95-20450
Time-resolved diagnostics of excimer laser-generated ablation plasmas used for pulsed laser deposition
[DE94-018950] p 1559 N95-21547

LASER ANEMOMETERS
Laser anemometry and viscous computation of the flow through an annular turbine cascade
[AD-A280070] p 1341 N95-20968

LASER ANNEALING
International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

LASER APPLICATIONS
Compact free electron lasers for medical applications
[AD-A285739] p 1369 N95-20072
Program of the 1993 9th Interdisciplinary Laser Science Conference (ILS-9)
[AD-A285131] p 1369 N95-20082
System design document U-AVLIS control system architecture
[DE94-017297] p 1460 N95-20387
Application of diode lasers to the isotopically selective determination of uranium in oxides by optogalvanic spectroscopy
[DE94-018045] p 1370 N95-20698
Computational model of drilling with high radiance pulsed lasers
[DE94-018548] p 1371 N95-20783
Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817
Laser-Induced Thermal Acoustics (LITA): Four-wave mixing measurement of sound speed, thermal diffusivity, and viscosity
[AD-A286524] p 1372 N95-21009
Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21208
Laser design basis for the National Ignition Facility
[DE94-016700] p 1534 N95-21209
Recombination, ion-molecule collisions and (laser assisted) electron-excited atom collisions
[AD-A285604] p 1517 N95-21216
Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-000862] p 1373 N95-21312
Simulation of laser bathymetry for irregular bottoms
[PB95-133518] p 1434 N95-21320
Applications for reactor-pumped lasers
[DE95-000536] p 1373 N95-21393
Overview of remote sensing laser development and semiconductor laser technology
[DE94-019103] p 1389 N95-21552
Laser materials processing at Sandia National Laboratories
[DE95-002183] p 1374 N95-21594
Molecular design concept for multi-kilovolt x-ray amplification
[DE95-001763] p 1374 N95-21743
Directed light fabrication
[DE94-018293] p 1375 N95-21837
Method for laser-assisted silicon etching using halocarbon ambients
[AD-D016494] p 1375 N95-21903
International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

LASER ARRAYS
Technologies for highly parallel optoelectronic integrated circuits
[DE95-001607] p 1327 N95-20883
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A280098] p 1372 N95-21019

LASER BEAMS
High power spectral and spatial beam control using self-phase modulation and a multisegment monochromator
[DE94-016604] p 1531 N95-20120
Enhanced output of soft x-ray lasers using double slab targets
[DE94-016689] p 1369 N95-20335
High energy photon-photon collisions
[DE94-017494] p 1532 N95-20388
Inverse Cerenkov laser acceleration experiment at ATF
[DE94-017990] p 1370 N95-20572
Laser trapping of Na-21 atoms
[DE95-002354] p 1513 N95-20629
Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817
Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226
Novel absorption detection techniques for capillary electrophoresis
[DE95-001673] p 1242 N95-21400
Directed light fabrication
[DE94-018293] p 1375 N95-21837
Technique for intracavity sum frequency generation
[AD-D016478] p 1546 N95-21898
Submicrosecond, synchronizable x-ray source
[AD-D016497] p 1546 N95-21905
Effect of laser radiation on carbon fibre/epoxy composites
[PB95-133526] p 1232 N95-22096
LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134
3-D TECATE/BREW: Thermal, stress, and birefringent ray-tracing codes for solid-state laser design
[DE95-000330] p 1376 N95-22301
Broadband thermal optical limiter for the protection of eyes and sensors
[AD-D016493] p 1377 N95-22304
Defect geometries and laser-induced damage in multilayer coatings
[DE94-017695] p 1377 N95-22343
Study of pulsed laser effects on living tissues
[PB95-131330] p 1447 N95-22361
Target alignment in the National Ignition Facility
[DE94-015559] p 1540 N95-22469

LASER CAVITIES
Technologies for highly parallel optoelectronic integrated circuits
[DE95-001607] p 1327 N95-20883
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A280098] p 1372 N95-21019
Technique for intracavity sum frequency generation
[AD-D016478] p 1546 N95-21898

LASER COOLING
Three-dimensional laser cooling
[DE94-017963] p 1370 N95-20569

LASER DAMAGE
Broadband thermal optical limiter for the protection of eyes and sensors
[AD-D016493] p 1377 N95-22304

LASER DOPPLER VELOCIMETERS
Laser anemometry and viscous computation of the flow through an annular turbine cascade
[AD-A280070] p 1341 N95-20968
A three-dimensional orthogonal laser velocimeter for the NASA Ames 7- by 10-foot wind tunnel
[NASA-TM-108864] p 1366 N95-21323

LASER DRILLING
Computational model of drilling with high radiance pulsed lasers
[DE94-018548] p 1371 N95-20783

LASER FUSION
National Ignition Facility: Experimental plan
[DE94-016542] p 1550 N95-20189
Laser design basis for the National Ignition Facility
[DE94-016700] p 1534 N95-21209
Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226

LASER GYROSCOPES
Optical processing and control
[AD-A279157] p 1546 N95-21975

LASER INDUCED FLUORESCENCE
Observation of strong emission from NeIX and NeX transitions in a laser-driven plasma
[DE95-002265] p 1555 N95-20813
Two-dimensional imaging of OH in a lean burning high pressure combustor
[NASA-TM-106854] p 1214 N95-21383
Advanced diagnostics for plasma chemistry
[DE94-018936] p 1561 N95-22116

LASER INTERFEROMETRY
LLNL/Lion Precision LVDT amplifier
[DE95-001504] p 1327 N95-20854

LASER MATERIALS
Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG
[AD-A285857] p 1369 N95-20378
Reactor pumped laser research at the Sandia National Laboratories pulsed reactor facilities
[DE95-002181] p 1371 N95-20867
Ultraviolet laser emission properties of Ce(3+)-doped LiSrAlF6
[DE94-016364] p 1372 N95-21135
Applications for reactor-pumped lasers
[DE95-000536] p 1373 N95-21393
Lead-indium phosphate glasses for optical applications
[DE94-019333] p 1275 N95-21482
Laser materials processing at Sandia National Laboratories
[DE95-002183] p 1374 N95-21594

LASER MODE LOCKING
Fiber laser amplifiers and oscillators
[AD-A285835] p 1368 N95-20035
Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG
[AD-A285857] p 1369 N95-20378
Self-starting femtosecond pulse generation from a Ti:sapphire laser synchronously pumped by a pointing-stabilized mode-locked Nd:YAG laser
[DE94-019319] p 1374 N95-21480

LASER OUTPUTS
The effect of reusing laser gas on the fission-fragment pumped 1.73 micron atomic xenon laser output
[DE94-018512] p 1369 N95-20225
Enhanced output of soft x-ray lasers using double slab targets
[DE94-016689] p 1369 N95-20335
The reliability of laser reflowed Sn-Ag solder joints
[AD-A279787] p 1315 N95-20443
Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538
P/N In(Al) GaAs multijunction laser power converters
p 1323 N95-20539
Investigation of laser-induced retinal damage: Wavelength and pulsewidth dependent mechanisms
[AD-A286066] p 1443 N95-20848
Chemical lasers emitting in the visible spectrum: Metastable oxygen reactions and YOSHIDA laser
[PB95-104485] p 1372 N95-20983
Ultraviolet laser emission properties of Ce(3+)-doped LiSrAlF6
[DE94-016364] p 1372 N95-21135
Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21208
EBIT x ray spectroscopy studies for applications to photo-pumped x ray lasers
[DE94-016701] p 1373 N95-21210
NEO-LISP: Deflecting near-Earth objects using high average power, repetitively pulsed lasers
[DE95-000863] p 1599 N95-21367
Self-starting femtosecond pulse generation from a Ti:sapphire laser synchronously pumped by a pointing-stabilized mode-locked Nd:YAG laser
[DE94-019319] p 1374 N95-21480
Collisional redistribution effects on x ray laser saturation behavior
[DE94-017308] p 1374 N95-21663
Technique for intracavity sum frequency generation
[AD-D016478] p 1546 N95-21898
Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

LASER PLASMA INTERACTIONS
Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226

LASER PLASMAS
X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015
Characterization of an expanded-field Schwarzschild objective for extreme ultraviolet lithography
[DE94-016780] p 1541 N95-20239
24th Annual Anomalous Absorption Conference
[DE94-016457] p 1551 N95-20283
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
[DE94-016447] p 1551 N95-20315

Observation of strong emission from NeIX and NeX transitions in a laser-driven plasma
[DE95-002265] p 1555 N95-20813
Time-resolved diagnostics of excimer laser-generated ablation plasmas used for pulsed laser deposition
[DE94-018950] p 1559 N95-21547
Cryogenic pellet laser plasma source targets
[DE95-002488] p 1376 N95-22169
The final status of a metal surface after multipulse laser irradiation in an ambient gas
[DE94-629000] p 1562 N95-22377

LASER POWER BEAMING
Scaling of solid state lasers for satellite power beaming applications
[DE94-016366] p 1368 N95-19986
Modeling of high efficiency solar cells under laser pulse for power beaming applications p 1318 N95-20516

LASER PUMPING
EBIT x ray spectroscopy studies for applications to photo-pumped x ray lasers
[DE94-016701] p 1373 N95-21210
Self-starting femtosecond pulse generation from a Ti:sapphire laser synchronously pumped by a pointing-stabilized mode-locked Nd:YAG laser
[DE94-019319] p 1374 N95-21480
Tunable CW blue, green, orange and red upconversion fiber lasers at room temperature
[DE95-000851] p 1375 N95-22007
High average power diode pumped solid state lasers for CALIOPE
[DE94-019248] p 1376 N95-22121

LASER SPECTROMETERS
Visible fluorescence of weathered lead
[DE95-002454] p 1244 N95-21523

LASER TARGETS
Target Area Structural Support systems design to achieve the micron-level stability requirement of the National Ignition Facility (NIF)
[DE94-017696] p 1551 N95-20219
Enhanced output of soft x-ray lasers using double slab targets
[DE94-016689] p 1369 N95-20335
High precision Woelter optic calibration facility
[DE94-016973] p 1542 N95-20364
Cryogenic targets for inertial confinement fusion
[DE94-016200] p 1555 N95-21115
Target Area design basis and system performance for the National Ignition Facility
[DE94-016697] p 1557 N95-21207
Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21208
Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226
Low density gas and foam targets for ICF long scale length plasma experiments: Fabrication and characterization
[DE95-000935] p 1558 N95-21368
Submicrosecond, synchronizable x-ray source
[AD-D016497] p 1546 N95-21905
Cryogenic pellet laser plasma source targets
[DE95-002488] p 1376 N95-22169
Target alignment in the National Ignition Facility
[DE94-015559] p 1540 N95-22469

LASER WELDING
Application of a dimensionless parameter model for Laser Beam Welding
[DE94-018902] p 1378 N95-20048
Laser materials processing at Sandia National Laboratories
[DE95-002183] p 1374 N95-21594
International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

LASERS
Photodegradation and photophysics of laser dyes
[AD-A285105] p 1368 N95-20063
Program of the 1993 9th Interdisciplinary Laser Science Conference (ILS-9)
[AD-A285131] p 1369 N95-20082
International collaboration program on innovative chemical processing of superior electronic and optical materials
[AD-A285122] p 1226 N95-20105
Time domain spectral hole-burning storage
[AD-A279912] p 1587 N95-20309
Three-dimensional laser cooling
[DE94-017963] p 1370 N95-20569
Inverse Cerenkov laser acceleration experiment at ATF
[DE94-017990] p 1370 N95-20572
Effects of plasma physics on capsule implosions in gas-filled hohlraums
[DE95-000923] p 1371 N95-20786
Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817
Detection optimization using linear systems analysis of a coded aperture laser sensor system
[DE95-001112] p 1371 N95-20832
X-ray spectroscopy of xenon
[DE95-002132] p 1240 N95-20865
Plasma Electrode Pockels Cells for the Beamlet and NIF lasers
[DE94-016541] p 1557 N95-21166
Threshold detection in the presence of atmospheric turbulence
[AD-A286175] p 1427 N95-22249
Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 2: The interaction of hydrogen chloride with the rare gas xenon
[AD-A286385] p 1248 N95-22321

LASING
Recent progress of the compact AFEL at Los Alamos
[DE95-002728] p 1376 N95-22154

LATCH-UP
SEU and SEL response of the Westinghouse 64K E-2PROM, analog devices AD7876 12-bit ADC, and the Intel 82527 Serial Communications Controller
[DE95-003349] p 1334 N95-22086
Radiation characterization report for the GPS Receiver microcontroller chip
[DE94-019169] p 1335 N95-22165

LATITUDE
Radiative forcing for changes in tropospheric O3
[DE94-019017] p 1413 N95-20354

LATTICE PARAMETERS
Simulations of the dislocation array at Ge/Si interfaces
[DE94-017680] p 1565 N95-20244
Semi-leptonic form-factors from lattice QCD
[DE95-000871] p 1510 N95-20367
Behaviour of space-charge dominated ion beams in storage rings
[DE94-015845] p 1517 N95-21140

LATTICES (MATHEMATICS)
Coupled analytic maps
[PB95-111076] p 1498 N95-19945
Duality beyond sober spaces: Topological spaces and observation frames
[PB95-134565] p 1494 N95-21962
Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084
Singular symmetric matrices
[PB95-109088] p 1496 N95-22354

LAUNCH VEHICLES
Space fundamentals for the war fighter
[AD-A279703] p 1217 N95-20690
Military standard: Test requirements for launch, upper-stage, and space vehicles
[AD-A286627] p 1218 N95-20770
Launch vehicle flight control augmentation using smart materials and advanced composites (CDDF Project 93-05)
[NASA-TP-3535] p 1218 N95-21346

LAUNCHING
Challenger's night flight
[NASA-TM-110503] p 1217 N95-19995
Chunk projectile launch using the Sandia Hypervelocity Launcher Facility
[DE94-018494] p 1215 N95-20223
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Computational design of Hypervelocity Launchers
[DE95-000744] p 1218 N95-20785
GPHS-RTGs in support of the Cassini Mission
[DE95-001492] p 1222 N95-20853
Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames
[DE95-002481] p 1243 N95-21512
Launch safety, toxicity, and environmental effects of the high performance oxidizer ClF(5)
[AD-A286095] p 1284 N95-22227

LAW (JURISPRUDENCE)
Environmental Compliance Assessment and Management Program
[AD-A279605] p 1402 N95-20441
Environmental Compliance Assessment Protocol - Centers for Disease Control and Prevention (ECAP-CDC), West Virginia supplement
[AD-A286009] p 1403 N95-20720
Environmental Compliance Assessment and Management Program (ECAMP), South Carolina supplement
[AD-A279533] p 1408 N95-21689
Environmental Compliance Assessment System (ECAS): Oregon supplement
[AD-A279565] p 1408 N95-21696

LAWS
A convergence analysis of an h-version finite element method with high order elements for two dimensional elasto-plasticity problems
[AD-A279975] p 1491 N95-20920

LEAD ACID BATTERIES
Progress in the development of recycling processes for electric vehicle batteries
[DE94-015894] p 1324 N95-20626

LEAD COMPOUNDS
Lead-indium phosphate glasses for optical applications
[DE94-019333] p 1275 N95-21482

LEAD OXIDES
Anodic oxygen-transfer electrocatalysis at iron-doped lead dioxide electrodes
[DE95-001653] p 1242 N95-21397
Effects of neutron irradiation on the London penetration depth for polycrystalline Bi(1.8)Pb(0.3)Sr2Ca2Cu3O10 superconductor
[DE94-019335] p 1573 N95-21483
Integration of thin film decoupling capacitors
[DE95-001609] p 1333 N95-21881

LEAD SELENIDES
Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892

LEAD TELLURIDES
Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892

LEAD TITANATES
Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films
[DE94-018964] p 1244 N95-21549

LEAD TUNGSTATES
Light output and radiation damage in a lead tungstate crystal
[DE94-016814] p 1565 N95-20265

LEAD ZIRCONATE TITANATES
Fabrication of PLZT/ITO grating for optical switching and reconfigurable optical interconnect applications
[AD-A286389] p 1548 N95-22248

LEADERSHIP
Estimating the costs of human space exploration
p 1584 N95-20744

LEADING EDGES
Direct numerical simulations of leading-edge receptivity for freestream sound p 1351 N95-21090
Seismic evidence for volatiles at large depth in the Earth p 1422 N95-21808

LEAF AREA INDEX
Remote-sensing based technique to account for sub-grid scale variability of land surface properties
[NASA-TM-110501] p 1390 N95-22110

LEAKAGE
Corrosion evaluation of fuel canister crusher rigging
[DE95-002962] p 1257 N95-21452
The permeation of bis(2-fluoro-2,2-dinitroethyl) formal (FEFO), ethyl 4,4-dinitropentanoate (EDNP), ethyl 4-nitropentanoate (ENP), and 1,2,4-trichlorobenzene (TCB) through barrier membranes
[DE95-002492] p 1283 N95-21514
New concepts for refrigerant leak detection and mixture measurement
[DE94-018967] p 1287 N95-21559

LEARNING
Learning algorithms for feedforward networks based on finite samples
[DE95-001739] p 1483 N95-21741

LEASING
Research on the promotion measures to introduce new energy and energy-saving technologies with a leasing system
[DE95-714801] p 1375 N95-22079

LEAST SQUARES METHOD
Comparison of meteorological data with fitted values extracted from projectile trajectory
[AD-A285921] p 1428 N95-19989
Uncertainty estimates for derivatives and intercepts
[DE94-018492] p 1489 N95-20222
Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495
Brief tutorial on the Kalman filter
[AD-A286571] p 1326 N95-20827
New thermodynamic description of the Cu-Zr system
[PB95-127189] p 1263 N95-22374

LEGENDRE FUNCTIONS
Atomic orbital basis sets for molecular interactions
[AD-A279609] p 1506 N95-19959

LEGIBILITY
Evaluation of the Haworth-Newman avionics Display Readability Scale
[AD-A286127] p 1214 N95-22232
LENNARD-JONES POTENTIAL
New methods for large scale local and global optimization
[AD-A285635] p 1517 N95-21126
A massively parallel algorithm for grand canonical Monte Carlo computer simulation with the short-ranged Lennard-Jones potential
[DE94-010396] p 1477 N95-21843
LENS ANTENNAS
Measurements of the Auburn ECE optical system parameters for temperature fluctuation measurements on TEXT-U
[DE94-019217] p 1562 N95-22120
LENSES
Effects of bifocal and progressive-addition corrective lenses on aviator target-detection performance
[AD-A279698] p 1442 N95-20710
Gradient index lenses from sol-gel layering
[AD-A285649] p 1242 N95-21402
Application of computer-generated holograms to optical transformations
[AD-A286356] p 1368 N95-22256
LEPTONS
J/psi,psi(prime) yields mu(+)mu(-) and B yields J/psi,psi(prime) cross sections
[DE94-017184] p 1507 N95-20108
CDF top results in the lepton + jets channel
[DE95-000641] p 1507 N95-20131
Search for W pair production with dilepton decay modes at D0
[DE95-000724] p 1508 N95-20134
CDF top results in the dilepton channel
[DE95-000837] p 1510 N95-20343
Semi-leptonic form-factors from lattice QCD
[DE95-000871] p 1510 N95-20367
Universal parametrization for quark and lepton substructure
[DE94-770604] p 1514 N95-20738
Kinematical evidence for top pairs at the Tevatron
[DE95-000729] p 1515 N95-20880
Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section
[DE95-002524] p 1515 N95-20897
Anomalous vector-boson couplings in Majorana neutrino models
[PB95-127460] p 1518 N95-21220
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Dilepton production from p-p to Ca-Ca at the Bevalac
[DE95-002341] p 1520 N95-21357
Measurement of W and Z production cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV
[DE95-002250] p 1523 N95-21521
Measurement of the B cross section at CDF via B semileptonic decays
[DE95-002217] p 1524 N95-21597
Status of the DO top search
[DE95-002214] p 1525 N95-21715
Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064
Tests of structure functions using lepton pairs: W-charge asymmetry at CDF
[DE95-000560] p 1527 N95-22122
LEVITATION MELTING
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292
LEWIS NUMBERS
Effects of non-unity Lewis numbers in diffusion flames
p 1249 N95-21036
Direct numerical simulations of turbulent non-premixed methane-air flames modeled with reduced kinetics
p 1249 N95-21038
Lewis number and Damkohler number effects in vortex-flame interactions p 1249 N95-22439
LIBRARIES
Design considerations for parallel graphics libraries
[NASA-CR-194935] p 1473 N95-20013
New data for MCNP (trademark)
[DE94-016296] p 1509 N95-20236
The design of a parallel, dense linear algebra software library: Reduction to Hessenberg, tridiagonal, and bidiagonal form
[DE94-018123] p 1491 N95-20701
The 37th Military Librarians Workshop on Global Information: The Sun Never Sets
[AD-A286636] p 1588 N95-20774
Shaping the library of the future: Digital library developments at Los Alamos National Laboratory's Research Library
[DE95-001008] p 1588 N95-20777
The Energy Science and Technology Database on a local library system: A case study at the Los Alamos National Research Library
[DE95-001009] p 1589 N95-20818
University library document circulation system specified in LCM
[PB95-127957] p 1592 N95-22331
LIE GROUPS
Weighted strongly elliptic operators on lie groups
[PB95-110847] p 1487 N95-19917
On the differential representations of quantum Lie superalgebras
[DE94-629874] p 1491 N95-20734
Positive rockland operators
[PB95-127510] p 1493 N95-21423
LIFE (DURABILITY)
Residual stresses in material processing
[DE94-017888] p 1385 N95-20374
Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522
Exponents in lifetime and power spectral density forms in self-organized critical systems
[AD-A286242] p 1495 N95-22026
LIFE CYCLE COSTS
Exploratory Technology Research Program for electrochemical energy storage
[DE95-002652] p 1394 N95-20915
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530
Power systems for future missions
[NASA-CR-195320] p 1222 N95-21531
High speed optical storage technology
[AD-A285788] p 1456 N95-22400
LIFE RAFTS
AN/APS-137 Forward Looking Airborne Radar (FLAR) evaluation, Fall 1992 experiment
[AD-A279526] p 1306 N95-21686
LIFE SCIENCES
Annual program analysis of the NASA Space Life Sciences Research and Education Support Program
[NASA-CR-197298] p 1439 N95-21529
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 399)
[NASA-SP-7011(399)] p 1446 N95-21947
Life Sciences Division and Center for Human Genome Studies
[DE94-017796] p 1440 N95-22065
LIFE SPAN
Optimizing the length of the stores and related effects
[DE95-002531] p 1533 N95-20885
LIFE SUPPORT SYSTEMS
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 399)
[NASA-SP-7011(399)] p 1446 N95-21947
LIFT
Lift enhancement device
[AD-D016522] p 1201 N95-21864
LIFT AUGMENTATION
Experiments on the flow field physics of confluent boundary layers for high-lift systems
[NASA-CR-197318] p 1201 N95-21343
LIFT DEVICES
Wake measurements in a strong adverse pressure gradient
[NASA-CR-197272] p 1201 N95-21031
Experiments on the flow field physics of confluent boundary layers for high-lift systems
[NASA-CR-197318] p 1201 N95-21343
Lift enhancement device
[AD-D016522] p 1201 N95-21864
Experimental investigations of on-demand vortex generators p 1361 N95-22451
LIFTOFF (LAUNCHING)
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295
LIGANDS
New chiral pyrimidino-crown ether ligands
[AD-A279892] p 1223 N95-20590
Thermodynamic and NMR studies of solvent effect on enantiomeric recognition for a chiral organiz ammonium cation by chiral diketopyridino-18-Crown-6 type ligands at 25.0 C
[AD-A279893] p 1223 N95-20592
Time-resolved analytical methods for liquid/solid interfaces
[DE95-002255] p 1240 N95-20780
Introduction to the structures determination methods using X-ray diffraction in monocrystals: Application to some lanthanides and transition metals complexes with organic ligands
[DE94-629002] p 1579 N95-22380
Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385
LIGHT (VISIBLE RADIATION)
Free electron laser program
[AD-A285906] p 1368 N95-19987
LIGHT AMPLIFIERS
Fiber laser amplifiers and oscillators
[AD-A285835] p 1368 N95-20035
Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG
[AD-A285857] p 1369 N95-20378
GaAs optical circuits
[AD-A285859] p 1369 N95-20389
Analysis of direct detection lightwave systems with optical amplifiers
[AD-A284077] p 1542 N95-20467
LIGHT BEAMS
Computational model of drilling with high radiance pulsed lasers
[DE94-018548] p 1371 N95-20783
Investigation of laser-induced retinal damage: Wavelength and pulsewidth dependent mechanisms
[AD-A286066] p 1443 N95-20848
Electro-optic effect in the PESO acousto-optic modulator
[AD-A286355] p 1548 N95-22255
LIGHT ELEMENTS
Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128
LIGHT EMITTING DIODES
Visible light emitting materials and injection devices
[AD-A284796] p 1541 N95-20066
International Conference on Optical Computing: Technical digest
[AD-A284293] p 1541 N95-20249
Design, fabrication, and characterization of reflective diffractive optical elements in Si for free-space optical interconnects
[AD-A286416] p 1547 N95-22205
LIGHT GAS GUNS
Computational design of Hypervelocity Launchers
[DE95-000744] p 1218 N95-20785
LIGHT IONS
LIF standoff research
[DE94-018744] p 1535 N95-21328
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380
Progress in the Light Ion Driven Inertial Confinement Fusion Program
[DE94-019182] p 1537 N95-21603
LIGHT MODULATION
High contrast organic crystal optical modulator for phased array antenna and optical signal processing
[AD-A286557] p 1544 N95-20844
Optical, electronic and optoelectronic material and device research
[AD-A280111] p 1374 N95-21630
Application of computer-generated holograms to optical transformations
[AD-A286356] p 1368 N95-22256
LIGHT SCATTERING
Simulation of stellar speckle imaging
[DE94-016606] p 1412 N95-19985
Light-scattering fluctuations and noise in nonlinear optical processing
[AD-A279748] p 1544 N95-20803
Nonlinear frequency conversion optical filter
[AD-D016523] p 1544 N95-21465
The optical properties of particles deposited on a surface
[AD-A286258] p 1546 N95-22002
Electro-optic effect in the PESO acousto-optic modulator
[AD-A286355] p 1548 N95-22255
LIGHT SOURCES
Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495
Testing of the SAIC facets on the stretched-membrane dish
[DE95-001831] p 1393 N95-20864
Novel absorption detection techniques for capillary electrophoresis
[DE95-001673] p 1242 N95-21400
Diffraction applications using the energy dispersive beamline, X6A, at NSLS
[DE94-019287] p 1572 N95-21408

LIGHT TRANSMISSION

Light output and radiation damage in a lead tungstate crystal
[DE94-016814] p 1565 N95-20265

Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725

Unlimited-bandwidth distributed optical phase modulators and detectors: Design and fabrication issues
[DE94-017418] p 1545 N95-21509

Light output and radiation damage in a YAIO3:Ce crystal
[DE94-016815] p 1545 N95-21643

LIGHTHILL GAS MODEL

Acoustics of laminar boundary layers breakdown
p 1361 N95-22455

LIGHTNING

The initiation of lightning and the growth of electric fields in thunderstorms
[AD-A280033] p 1428 N95-20008

Estimation of lightning stroke peak current as a function of peak electric field and the normalized amplitude of signal strength: Corrections and improvements
[DE94-016900] p 1335 N95-22189

LIMITS (MATHEMATICS)

Set functionals in stochastic geometry
[PB95-135372] p 1491 N95-21005

LINE CURRENT

High isolation electronic switch
[AD-D016533] p 1326 N95-20729

Low-frequency image theory for a current dipole in front of a permeable sphere
[PB95-127676] p 1300 N95-21104

LINE OF SIGHT

Evolution of ground line of sight data field collection techniques
[AD-A285062] p 1204 N95-20497

Line-of-sight multipath propagation measurements at 15 GHz over 500 MHz bandwidth p 1296 N95-20944

LINE OF SIGHT COMMUNICATION

Simulation of the impact of atmospheric turbulences on millimeter-wave communications systems
p 1295 N95-20939

LINE SHAPE

Solid-state NMR characterization of C- and N-labelled phthalimides: Model compounds for studying polyimides
[AD-A286479] p 1578 N95-22286

LINE SPECTRA

Identification of resonant, two-electron, and inter-atomic features in K and L23 NEXAFS spectra
[AD-A285374] p 1513 N95-20554

Ultraviolet emission from rocket motor plumes
[DSTO-TR-0002] p 1222 N95-21661

LINEAR ACCELERATORS

Free electron laser program
[AD-A285906] p 1368 N95-19987

Studies of longitudinal instability with an electron beam
[DE94-018646] p 1532 N95-20347

Inverse Cerenkov laser acceleration experiment at ATF
[DE94-017990] p 1370 N95-20572

A URI program for Ultraviolet/extreme ultraviolet research
[AD-A279159] p 1370 N95-20600

Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891

Issues in multi-bunch emittance preservation in the NLC
[DE95-002894] p 1534 N95-21253

First results from the final focus test beam
[DE95-002897] p 1535 N95-21255

Exclusive processes: Tests of coherent QCD phenomena and nucleon substructure at CEBAF
[DE95-002892] p 1520 N95-21336

An 8-meter-long coupled cavity RFQ linac
[DE94-018077] p 1331 N95-21667

High performance computing for beam physics applications
[DE94-018312] p 1539 N95-22243

Recent results in analysis and simulation of beam halo
[DE94-018313] p 1539 N95-22298

Fabrication and characterization of cesium telluride photocathodes: A promising electron source for the Los Alamos Advanced FEL
[DE94-018303] p 1377 N95-22348

LINEAR AMPLIFIERS

Hybrid high power amplifier
[AD-D016534] p 1326 N95-20730

LINEAR ARRAYS

Design and implementation of a dual-beam printed antenna for a reception in angular diversity on a Hertzien cluster (or bundle)
[PB95-131603] p 1302 N95-21431

LINEAR ENERGY TRANSFER (LET)

Radiation characterization report for the GPS Receiver microcontroller chip
[DE94-019169] p 1335 N95-22165

LINEAR EQUATIONS

Uniqueness of strongly regular graphs having minimal p-rank
[PB95-111043] p 1488 N95-19942

Regularity of BPa-systems is decidable
[PB95-135489] p 1468 N95-21619

Report of the Numerical Analysis Group
[PB95-108163] p 1494 N95-21648

LINEAR QUADRATIC GAUSSIAN CONTROL

Riccati equation theory for Pritchard-Salamon systems: A Popov function approach
[PB95-137089] p 1491 N95-20830

LINEAR SYSTEMS

O(log2 n) time efficient parallel factorization of dense, sparse separable, and banded matrices
[NASA-CR-197356] p 1473 N95-19885

Asymptotic analysis of Nash equilibria in nonzero-sum linear-quadratic differential games. The two-player case
[PB95-111027] p 1499 N95-19941

Detection optimization using linear systems analysis of a coded aperture laser sensor system
[DE95-001112] p 1371 N95-20832

Linear and nonlinear spectroscopy with the tunable AC scanning tunneling microscope
[AD-A285751] p 1241 N95-21217

Semi-global stabilization of linear discrete-time systems subject to input saturation via linear feedback: An ARE-based approach
[PB95-135463] p 1483 N95-21618

Adaptive capture of expert behavior
[DE94-018285] p 1483 N95-21710

A new Krylov-subspace method for symmetric indefinite linear systems
[DE95-001826] p 1355 N95-21726

QMRPACK user's guide
[DE95-001770] p 1469 N95-21744

LINEAR TRANSFORMATIONS

View-based models of 3D object recognition and class-specific invariance
[AD-A279858] p 1459 N95-20157

Object recognition by alignment using invariant projections of planar surfaces
[AD-A279841] p 1468 N95-21495

LINING PROCESSES

Epoxy lining for shipboard piping systems
[AD-A286228] p 1279 N95-22022

LININGS

Epoxy lining for shipboard piping systems
[AD-A286228] p 1279 N95-22022

LIOUVILLE EQUATIONS

Quantum diffusion
[DE95-001015] p 1580 N95-21264

LIPIDS

Enhancement of cell mediated immunity through non-specific immunostimulation with liposome encapsulated gamma-interferon
[AD-A279667] p 1442 N95-20602

LIQUEFACTION

Assessment of liquefaction and pyrolysis systems
[PB95-129797] p 1236 N95-20290

LIQUEFIED GASES

Liquid xenon as a potential laser host medium
[AD-A285365] p 1370 N95-20550

LIQUID ALLOYS

Thermodynamic analysis of stable and metastable equilibrium diagrams of the Cu-Cr system
[PB95-127775] p 1255 N95-21111

LIQUID COOLING

Liquid flow-through cooling of electronic modules
p 1211 N95-20647

Microchannel heat pipe cooling of modules
p 1211 N95-20649

LIQUID CRYSTALS

The synthesis and characterization of new mesogenic diacetylene monomers and their polymers
[AD-A286188] p 1267 N95-20328

Hierarchical structure in advanced polymers. Phase behaviour, orientation, properties
[AD-A285938] p 1268 N95-20392

Optical power limiting liquid crystal composites
[AD-A286605] p 1569 N95-20767

Development of ferroelectric liquid crystals with enhanced nonlinear optical properties
[AD-A279988] p 1571 N95-20965

NMR relaxation behavior of the head group of SHBS in lamellar liquid crystals
[AD-A279124] p 1574 N95-21599

Biaxiality of chiral liquid crystals
[DE94-629032] p 1578 N95-22277

LIQUID FUELS

Bioconversion of coal derived synthesis gas to liquid fuels
[DE94-017381] p 1282 N95-19927

Bioconversion of coal derived synthesis gas to liquid fuels
[DE94-018849] p 1314 N95-20339

Cryogenic targets for inertial confinement fusion
[DE94-016200] p 1555 N95-21115

Producing liquid fuels from biomass
[DE95-717458] p 1398 N95-22425

LIQUID HELIUM

Josephson acoustic radiation in superfluid helium
[AD-A279809] p 1503 N95-20098

New theory of critical flow velocities in superfluid helium
[PB95-130365] p 1571 N95-21228

Microscopic theory of normal liquid He-3
[DE94-629047] p 1527 N95-22179

The dynamic structure function of Bose liquids in the deep inelastic regime
[DE94-629077] p 1527 N95-22182

LIQUID HYDROGEN

Structure functions and structure function ratio F(sup n)2/F(sup p)2 at small x(sub Bj) and Q2 in muon-nucleon scattering
[DE94-017981] p 1530 N95-22340

LIQUID INJECTION

Characterization and electrical properties of copper films grown via direct liquid coinjection of (hfac)Cu(TMVS) and TMVS
[DE95-002957] p 1272 N95-20889

LIQUID LEVELS

Optical fiber pressure sensor for liquid level monitoring
[AD-D016246] p 1547 N95-22089

LIQUID METAL FAST BREEDER REACTORS

Irradiation creep in structural materials at ITER operating conditions
[DE94-018946] p 1261 N95-22123

LIQUID METALS

Liquid-metal pin-fin pressure drop by correlation in cross flow
[DE94-017086] p 1338 N95-19923

Recent reflux receiver developments under the US DOE program
[DE95-001622] p 1393 N95-20861

MHD pressure drop in ducts with imperfectly insulating coatings
[DE95-002852] p 1558 N95-21244

MHD-flow in slotted channels with conducting walls
[DE94-018370] p 1559 N95-21388

LIQUID NITROGEN

Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
[DE94-016879] p 1500 N95-20106

LIQUID PHASE EPITAXY

High quality InP-on-Si for solar cell applications
p 1317 N95-20510

LIQUID PHASES

Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513

Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
[DE94-018184] p 1259 N95-21707

Solar system formation and the distribution of volatile species p 1421 N95-21806

Biaxiality of chiral liquid crystals
[DE94-629032] p 1578 N95-22277

LIQUID ROCKET PROPELLANTS

High pressure windowed chamber burned rate determination of liquid propellant XM46
[AD-A283770] p 1282 N95-19920

LIQUID-LIQUID INTERFACES

Studies of the n-alkane/water interface by total internal reflection second harmonic generation
[AD-A279473] p 1245 N95-21827

LIQUID-SOLID INTERFACES

Time-resolved analytical methods for liquid/solid interfaces
[DE95-002255] p 1240 N95-20780

Nonlinear optical studies of polymer interfaces
[DE94-018199] p 1274 N95-21263

Quantum simulation of heterogeneous electron transfer free energies at the water-metal interface
[AD-A279279] p 1522 N95-21492

LIQUID-VAPOR INTERFACES

Transport phenomena in the micropores of plug-type phase separators
[NASA-TM-108479] p 1340 N95-20561

LIQUIDS

The primary carbon and the formation of carbon species in terrestrial magmas p 1420 N95-21797

Variational Monte Carlo study of He-4 in two dimensions
[DE94-629078] p 1576 N95-21998

LITHIUM

A new family of anion receptors and their effects on ion pair dissociation and conductivity of lithium salts in non-aqueous solutions
[DE94-016822] p 1512 N95-20477
Review of recent D-T experiments from TFTR
[DE95-002755] p 1557 N95-21239
Fusion power production in TFTR
[DE95-002756] p 1557 N95-21240
Shot-to-shot comparison of the first Li-beam driven Hohlraum experiments
[DE94-016558] p 1558 N95-21247
Progress in the Light Ion Driven Inertial Confinement Fusion Program
[DE94-019182] p 1537 N95-21603
Transient studies of low temperature catalysts for methane conversion
[DE95-003560] p 1247 N95-22224

LITHIUM ALLOYS

The mechanical property data base from an Air Force/Industry cooperative test program on advanced aluminum alloys
[AD-A280038] p 1386 N95-20615

LITHIUM CHLORIDES

A new family of anion receptors and their effects on ion pair dissociation and conductivity of lithium salts in non-aqueous solutions
[DE94-016822] p 1512 N95-20477

LITHIUM COMPOUNDS

A transmission electron microscope characterization of sodium sulfate hot corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composite
[AD-A286164] p 1231 N95-22038

LITHIUM FLUORIDES

Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952

LITHIUM NIOBATES

Design and packaging aspects of microwave bandwidth lithium niobate modulators
[DE94-016602] p 1313 N95-20119
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A285621] p 1571 N95-21145

LITHOGRAPHY

Characterization of an expanded-field Schwarzschild objective for extreme ultraviolet lithography
[DE94-016780] p 1541 N95-20239
Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A279694] p 1268 N95-20428
Beryllium based multilayers for normal incidence extreme ultraviolet reflectivity
[DE94-015560] p 1274 N95-21175
Design, fabrication, and characterization of reflective diffractive optical elements in Si for free-space optical interconnects
[AD-A286416] p 1547 N95-22205
Reflective masks for extreme ultraviolet lithography
[DE95-003427] p 1336 N95-22236
Parallel nanometer scale fabrication
[DE95-002122] p 1336 N95-22284

LITHOLOGY

VTT test borehole for bedrock investigations
[PB95-132965] p 1427 N95-22095

LITHOSPHERE

Subduction of hydrated basalt of the oceanic crust: Implications for recycling of water into the upper mantle and continental growth p 1423 N95-21814
Storage and recycling of water and carbon dioxide in the earth p 1425 N95-21822

LOAD DISTRIBUTION (FORCES)

A method to determine the kinematics of the lower limbs of a subject pedaling a bicycle using encoders and accelerometers
[NASA-CR-197401] p 1453 N95-21866

LOAD TESTS

Finite element modelling of creep crack growth in 316 stainless and 9Cr-1Mo steels
[DE94-018977] p 1258 N95-21560

LOADS (FORCES)

Turbulence descriptors for scaling fatigue loading spectra of wind turbine structural components
[DE94-011833] p 1384 N95-20109
Force based motion control of a walking machine
[PB95-129672] p 1451 N95-20276
Hydrostatic force sensor
[DE94-018923] p 1364 N95-20321
Utilizing artificial neural networks in network flow analysis: An annotated bibiliography
[DE95-002453] p 1482 N95-21522
A user's guide to LUGSAN 1.1: A computer program to calculate and archive lug and sway brace loads for aircraft-carried stores
[DE95-001919] p 1207 N95-21730
Breakdown of the law of large numbers in Josephson junction series arrays
[DE94-629075] p 1576 N95-21996
Counting methods for the analysis of load time histories
[PB95-132916] p 1388 N95-22093
Embedded optical fibres as strain sensors in polymer matrix fibre composites: The influence of adhesion in strain transfer
[PB95-133617] p 1547 N95-22140
Wave journal bearing. Part 1: Analysis
[NASA-CR-195431-PT-1] p 1382 N95-22404

LOCAL AREA NETWORKS

An abstract model of rogue code insertion into radio frequency wireless networks. The effects of computer viruses on the Program Management Office
[AD-A285759] p 1288 N95-19932
Non-intrusive SCSI status sensing system
[AD-D016242] p 1476 N95-21307
SCSI controller with target status retrieval
[AD-D016249] p 1476 N95-21504
A simulation study of TCP performance in ATM networks
[DE94-016622] p 1477 N95-21505
Programmable modular network interface
[AD-D016505] p 1477 N95-21674
Method of sensing target status in a local area network
[AD-D016248] p 1478 N95-22090
Method of non-intrusively sensing status in a computer peripheral
[AD-D016241] p 1478 N95-22146
Design and modelling of a link monitoring mechanism for the Common Data Link (CDL)
[AD-A286167] p 1309 N95-22245

LOCOMOTION

Perception and control of locomotion
[AD-A285605] p 1450 N95-21192

LOGARITHMS

O(log2 n) time efficient parallel factorization of dense, sparse separable, and banded matrices
[NASA-CR-197356] p 1473 N95-19885
Flux creep with logarithmic U(j) dependence
[DE94-629058] p 1577 N95-22180

LOGIC CIRCUITS

GaAs optical circuits
[AD-A285859] p 1369 N95-20389
Methods and components for optical contention resolution in high speed networks
[AD-A280016] p 1543 N95-20598
Complementary GaAs junction-gated heterostructure field effect transistor technology
[DE94-018901] p 1329 N95-21390
Radiation tests on service electronics for future multi TeV detectors
[DE94-632822] p 1335 N95-22184
Data sampling for a burst mode communications system
[AD-A286098] p 1309 N95-22229
Design of a massively parallel computer using bit serial processing elements
[NASA-CR-197365] p 1479 N95-22406

LOGIC PROGRAMMING

Proceedings of the Fourth International Workshop on Inductive Logic Programming (ILP-94)
[PB95-135273] p 1464 N95-21003
Use of operations research techniques in deductive databases
[PB95-135349] p 1589 N95-21004
An IBM based ARINC interface
[ARL-TR-21] p 1471 N95-22104
Method of non-intrusively sensing status in a computer peripheral
[AD-D016241] p 1478 N95-22146
Logic programming and negation: A survey
[PB95-110730] p 1472 N95-22302

LOOP ANTENNAS

A colocated magnetic loop, electric dipole array antenna (preliminary results)
[AD-A285381] p 1290 N95-20556

LOOPS

Effect of lags on human performance with head-coupled simulators
[AD-A279577] p 1453 N95-21700
An exact enumeration of self-avoiding loops on a square lattice
[DE94-628999] p 1578 N95-22276

LORENTZ FORCE

Superconducting electromagnetic thruster
[AD-D016485] p 1355 N95-21902

LOSSES

The Lorentz reciprocity theorem as a consistency test for propagation models p 1295 N95-20937
Cell loss analysis of two-class priority generalized knockout switch
[PB95-127742] p 1301 N95-21109
Origin and loss of the volatiles of the terrestrial planets p 1417 N95-21785
Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792
Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796

LOVE WAVES

Source contributions at far-regional distances
[AD-A279405] p 1426 N95-21932

LOW ALTITUDE

Modelling of microwave propagation and clutter in a maritime environment p 1295 N95-20938
Atmospheric stability and its influence on air quality in small communities in northern Sweden
[PB95-131652] p 1405 N95-21181

LOW CONCENTRATIONS

Gas-phase photocatalytic oxidation: Cost comparison with other air pollution control technologies
[DE95-000241] p 1410 N95-22278

LOW CONDUCTIVITY

Protective organic coatings on steel: Accelerated corrosion test method for paint/coatings exposed to water with low conductivity. Nordtest project no. 1010-92. Degradation of organic coatings in fresh water
[PB95-134185] p 1277 N95-21873

LOW COST

Wavelet-based acoustic recognition of aircraft
[DE94-017701] p 1503 N95-20019
Si concentrator solar cell development
[DE95-002314] p 1393 N95-20870
Fiber-optic sensors for rapid, inexpensive characterization of soil and ground water contamination
[DE95-002471] p 1545 N95-21510
European Workshop on Optical Ground Truth Instrumentation for the Validation of Space-Borne Optical Remote Sensing Data of the Marine Environment
[PB95-134144] p 1390 N95-21872
High speed optical storage technology
[AD-A285788] p 1456 N95-22400

LOW DENSITY FLOW

Numerical investigations of low-density nozzle flow by solving the Boltzmann equation
[NASA-TM-110492] p 1354 N95-21675

LOW FREQUENCIES

The calculation and measurement of Helmholtz coil fields
[AD-A286081] p 1228 N95-20808
S-D hybridization and anisotropy of the optical second harmonic at low frequencies
[AD-A279449] p 1544 N95-20876
Low-frequency image theory for a current dipole in front of a permeable sphere
[PB95-127676] p 1300 N95-21104
Vibration analysis of the AN/SPS-67(V)3 surface search radar
[AD-A286050] p 1302 N95-21324
Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418

LOW NOISE

Evaluation of superconducting quantum interference devices interfaced with digital signal processing electronics for biomagnetic applications
[DE94-016186] p 1289 N95-20164
LLNL/Lion Precision LVDT amplifier
[DE95-001504] p 1327 N95-20854
Low noise 22 GHz receiver for the radioastron satellite. Part 1: Requirements, design and reliability analysis
[PB95-104410] p 1300 N95-20972
Monolithic low noise preamplifier for piezoelectric sensors
[AD-D016524] p 1333 N95-21865
Low noise 22 GHz receiver for the radioastron satellite, part 2: Space qualification tests
[PB95-127197] p 1598 N95-22376

LOW REYNOLDS NUMBER

Direct numerical simulation of turbulent flow in a sudden pipe expansion p 1347 N95-21067
Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106
Small-scale behavior in distorted turbulent boundary layers at low Reynolds number p 1362 N95-22456

LOW SPEED
Damage tolerance of carbon fibre polyetheretherketone laminates
[PB95-131611] p 1230 N95-21432
LOW SPEED WIND TUNNELS
Vapor generator wand
[NASA-CASE-LAR-15058-1] p 1215 N95-20080
LOW TEMPERATURE
Low temperature synthesis of semiconductor materials
[AD-A285120] p 1226 N95-20081
A low temperature, ultrahigh vacuum, microwave-frequency-compatible scanning tunneling microscope
[AD-A279869] p 1365 N95-20413
High density monolithic packaging technology for digital/microwave avionics p 1211 N95-20646
Feasibility study of power generation system with shape memory alloys
[DE95-714802] p 1254 N95-20890
Nitrogen alloyed martensitic steels
[PB95-127791] p 1255 N95-21128
Atmospheric stability and its influence on air quality in small communities in northern Sweden
[PB95-131652] p 1405 N95-21181
LOW TEMPERATURE ENVIRONMENTS
Small antennas for communication over sea ice
[AD-D016206] p 1301 N95-21156
Cold regions instrumentation considerations
[AD-A279492] p 1367 N95-21680
LOW TEMPERATURE TESTS
Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4
[DE94-631462] p 1255 N95-20909
LUBRICANT TESTS
Evaluation of PS 212 coatings under boundary lubrication conditions with an Ester-based oil to 300 C
[NASA-TM-106763] p 1223 N95-19901
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-018414] p 1287 N95-21631
LUBRICANTS
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparisons and verification of methods
[DE95-000743] p 1264 N95-20078
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
Lubricant evaluation and performance, 2
[AD-A279144] p 1278 N95-21969
LUBRICATING OILS
Abrasive wear by diesel engine coal-fuel and related particles
[PB95-104915] p 1379 N95-20984
Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383
LUBRICATION SYSTEMS
Quartz resonator fluid monitors for vehicle applications
[DE94-018910] p 1367 N95-21546
LUGS
A user's guide to LUGSAN 1.1: A computer program to calculate and archive lug and sway brace loads for aircraft-carried stores
[DE95-001919] p 1207 N95-21730
LUMINANCE
The spatiotemporal characteristics of visual motion priming
[AD-A284782] p 1449 N95-20062
Factors affecting the perception of luning in monocular regions of partial binocular overlap displays
[AD-A286287] p 1547 N95-22044
LUMINESCENCE
Optical properties of silicon clusters deposited on the basal plane of graphite
[DE94-017529] p 1542 N95-20450
Parallel nanometer scale fabrication
[DE95-002122] p 1336 N95-22284
LUMINOSITY
A tau-charm-factory at Argonne
[DE94-016913] p 1510 N95-20360
Optimizing the length of the stores and related effects
[DE95-002531] p 1533 N95-20885
Emittance dilution by ions in the SLC arcs
[DE95-002871] p 1536 N95-21332
Luminosity polarization correlation in the SLC
[DE95-002889] p 1536 N95-21335
Azimuthally averaged radial S(sub 100 microns)/S(sub 60 microns) dust color temperatures in spiral galaxies
p 1593 N95-21760
Correlation of far-infrared emission and radio continuum emission along the major axis of edge-on spiral galaxies
p 1593 N95-21762
Proposed emittance upgrade for the SLC damping rings
[DE95-002887] p 1538 N95-22155
LUMINOUS INTENSITY
Application of pressure sensitive paint in hypersonic flows
[NASA-TM-106824] p 1201 N95-20794
Correlation of far-infrared emission and radio continuum emission along the major axis of edge-on spiral galaxies
p 1593 N95-21762
LUNAR EXPLORATION
Moon: Old and new
[NASA-TM-110511] p 1601 N95-21196
LUNAR MAPS
The Double Eagle Space Experiment (DESE) beamline design
[DE94-018319] p 1601 N95-22419
LUNAR SPACECRAFT
A Clementine collection: Moonglow
[AD-A286360] p 1217 N95-20228
LUNAR SURFACE
The Double Eagle Space Experiment (DESE) beamline design
[DE94-018319] p 1601 N95-22419
LUNGS
Thorium-232 in human tissues: Metabolic parameters and radiation doses
[DE94-019275] p 1441 N95-20074
Urban air carcinogens and their effects on health
[DE95-002259] p 1447 N95-22285
LYMAN ALPHA RADIATION
Observation of strong emission from NeIX and NeX transitions in a laser-driven plasma
[DE95-002265] p 1555 N95-20813
LYSOZYME
Chemical interactions between protein molecules and polymer membrane materials
[DE95-001808] p 1224 N95-21746
Separation of proteins by convective electrophoresis through a porous membrane
[PB95-127130] p 1248 N95-22373

M

MACH NUMBER
Flow coefficient behavior for boundary layer bleed holes and slots
[NASA-TM-106846] p 1338 N95-19953
Advanced detector development, laboratory simulations, diagnostic development, and data analysis on wake physics
[AD-A284798] p 1364 N95-20069
MACH-ZEHNDER INTERFEROMETERS
Electromagnetic radiation detector utilizing an electromagnetic radiation absorbing element in a mach-zehnder interferometer arrangement
[AD-D016507] p 1306 N95-21835
MACHINE LEARNING
Fault tolerance of neural networks
[AD-A285098] p 1479 N95-20057
Adaptive path planning for flexible manufacturing
[DE94-016561] p 1459 N95-20284
Designing the architecture of hierachical neural networks model attention, learning and goal-oriented behavior
[AD-A279898] p 1452 N95-20562
Proceedings of the Fourth International Workshop on Inductive Logic Programming (ILP-94)
[PB95-135273] p 1464 N95-21003
A neural expert approach to self designing flight control systems
[AD-A279965] p 1215 N95-21122
Expressions that talk about themselves
[PB95-134060] p 1466 N95-21344
Elements of deliberative robot control
[PB95-107595] p 1482 N95-21412
Activities of the Research Institute for Advanced Computer Science
[NASA-CR-197291] p 1478 N95-22108
Learning maneuvers using neural network models
[AD-A286470] p 1486 N95-22267
MACHINE TRANSLATION
Software fault tree analysis of concurrent Ada processes
[AD-A284979] p 1457 N95-20042
Translation of the data flow query language for the multimodel, multibackend database system
[AD-A285978] p 1588 N95-20617
TBell: A mathematical tool for analyzing decision tables
[NASA-CR-195027] p 1462 N95-20691
MACHINING
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422
A study of mechanical processing damage in brittle materials
[DE95-002126] p 1276 N95-21585
MACROMOLECULES
Synthesis and characterization of poly(organophosphazene) interpenetrating polymer networks
[AD-A279872] p 1265 N95-20183
Potential-of-mean-force description of ionic interactions and structural hydration in biomolecular systems
[DE95-000859] p 1438 N95-21366
MACROSCOPIC EQUATIONS
Geographical diversity combining to exploit multi-mechanism propagation p 1299 N95-20957
MAGELLANIC CLOUDS
Twentysixth YERAC
[PB95-127437] p 1599 N95-21347
MAGMA
The primary carbon and the formation of carbon species in terrestrial magmas p 1420 N95-21797
MAGNESIUM
Photoelectrons beam measurement from a magnesium cathode in a RF electron gun
[DE94-017994] p 1533 N95-20573
Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777
Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813
The isotope geochemistry of abyssal peridotites and related rocks
[AD-A279435] p 1435 N95-21918
MAGNESIUM ALLOYS
First principles simulation of materials properties
[DE94-016781] p 1566 N95-20405
MAGNESIUM OXIDES
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Electronic structure and energies of alkaline earth oxides: MgO, CaO and SrO
[DE94-628990] p 1575 N95-21853
MAGNETIC BEARINGS
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292
MAGNETIC COILS
Superconducting electromagnetic thruster
[AD-D016485] p 1355 N95-21902
MAGNETIC DIPOLES
A colocated magnetic loop, electric dipole array antenna (preliminary results)
[AD-A285381] p 1290 N95-20556
Low-frequency image theory for a current dipole in front of a permeable sphere
[PB95-127676] p 1300 N95-21104
MAGNETIC DOMAINS
Changes in the behavior of magnetic materials undergoing processing in electrical rotating machines
[PB95-104493] p 1325 N95-20702
MAGNETIC EFFECTS
Neutrino magnetic moments and the solar neutrino problem
[DE94-017579] p 1602 N95-20147
Nonlinear Faraday effect in CdS semiconductor in an ultrahigh magnetic field
[DE94-016804] p 1564 N95-20240
Magnetic field dependence of the correlation gap in SmB6
[DE95-001684] p 1574 N95-21570
Overview of the field and temperature dependence of J(c) in Ag/BSCCO tapes
[PB95-110318] p 1574 N95-21636
How to improve J(c(T)) in Ag/(BiPb)2Sr2Ca2Cu3O10 tapes
[PB95-110326] p 1575 N95-21949
Magnetic interactions in the Emery model
[DE94-629059] p 1577 N95-22181
MAGNETIC EQUATOR
Mitigation of the effects of F layer regularities by using multiple paths p 1298 N95-20951
MAGNETIC FIELD CONFIGURATIONS
Spin-specific photoelectron diffraction using magnetic x ray circular dichroism
[DE94-017527] p 1567 N95-20448
Magnetic x-ray circular dichroism in spin-polarized photoelectron diffraction
[DE95-002394] p 1520 N95-21360
The superconducting magnet system for the Tokamak Physics Experiment
[DE94-018329] p 1562 N95-22300

MAGNETIC FIELD RECONNECTION
Solar flare MDH
[AD-A279894] p 1602 N95-20593
MAGNETIC FIELDS
Particle beam fusion
[DE95-000711] p 1549 N95-20075
Magnetic fluctuation induced transport and edge dynamo measurements in the MST reversed-field pinch
[DE95-000591] p 1549 N95-20114
Magnetically controlled deposition of metals using gas plasma
[DE94-018654] p 1251 N95-20128
Nonlinear Faraday effect in CdS semiconductor in an ultrahigh magnetic field
[DE94-016804] p 1564 N95-20240
Enhanced scrape-off layer plasma in D3-D double-null discharges
[DE94-017977] p 1554 N95-20571
Temporal and spectral investigation of multi-Landau level quantum beats in GaAs
[DE94-018189] p 1569 N95-20678
Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725
Ultrafast magnetoexciton dynamics in GaAs
[DE94-018175] p 1514 N95-20732
The calculation and measurement of Helmholtz coil fields
[AD-A286081] p 1228 N95-20808
An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation
[DE95-001078] p 1515 N95-20911
Electron tunneling magnetic field sensor
[AD-D016227] p 1365 N95-21117
High magnetic field glow discharge ionization source
[AD-A279972] p 1241 N95-21123
Resonant photon-graviton conversion in EM fields: From earth to heaven
[DE95-002784] p 1301 N95-21241
Sources of amplitude-dependent tune shift in the PEP-2 design and their compensation with octupoles
[DE94-018198] p 1519 N95-21262
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345
Source distribution of visual evoked neuromagnetic responses
[PB95-127643] p 1445 N95-21348
Monopoles and quark confinement: Introduction and overview
[DE94-019348] p 1522 N95-21485
Vortex dynamics in a ring-like irradiated Bi2Sr2CaCu2O8 crystal
[DE95-001682] p 1573 N95-21569
Magnetic field dependence of the correlation gap in SmB6
[DE95-001684] p 1574 N95-21570
Overview of the field and temperature dependence of J(c) in Ag/BSCCO tapes
[PB95-110318] p 1574 N95-21636
Current distribution in Cable-In-Conduit Conductors
[DE95-001820] p 1332 N95-21725
Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847
Electromagnetic waves in an ultrarelativistically hot and strongly magnetized electron-positron plasma
[DE94-628963] p 1307 N95-21849
Anisotropic transport properties of BSCCO single crystals and Ag-clad tapes in high magnetic fields
[DE95-000938] p 1575 N95-21936
How to improve J(c(T)) in Ag/(BiPb)2Sr2Ca2Cu3O10 tapes
[PB95-110326] p 1575 N95-21949
Electric-field effects on shallow donor impurity in a harmonic quantum dot
[DE94-629034] p 1577 N95-22176
Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177
Temperature dependence of magnetopolarons in a parabolic quantum dot in arbitrary magnetic fields
[DE94-629033] p 1528 N95-22218
Heat loss by helicity injection in spheromaks
[DE95-003473] p 1562 N95-22221
Large-scale fields and flows in the magnetosphere-ionosphere system
[PB95-134664] p 1427 N95-22368
MAGNETIC FLUX
Transport and dynamics in toroidal fusion systems
[DE94-018653] p 1548 N95-20029
DSP control of superconducting quantum interference devices
[DE94-016193] p 1313 N95-20168
Power-law resistivity, magnetic relaxation and ac susceptibility
[DE94-016893] p 1501 N95-20241
Flux-focusing eddy current probe and rotating probe method for flaw detection
[NASA-CASE-LAR-15231-1-SB] p 1383 N95-20764
Electron tunneling magnetic field sensor
[AD-D016227] p 1365 N95-21117
Coaxial hybrid wiggler
[AD-D016501] p 1331 N95-21671
Charge density of fractional charged quasiparticles in the composite fermion picture
[DE94-018122] p 1524 N95-21703
AC magnetic response of YBa2CuO7 with Y2BaCuO5 inclusions and of single-crystal YBa2Cu3O7: A comparative study
[PB94-207917] p 1577 N95-22166
Electric-field effects on shallow donor impurity in a harmonic quantum dot
[DE94-629034] p 1577 N95-22176
Flux creep with logarithmic U(j) dependence
[DE94-629058] p 1577 N95-22180
MAGNETIC MATERIALS
Journal of Applied Physics, volume 76, number 10, part 2. Proceedings of the 6th Joint Magnetism and Magnetic Materials-INTERMAG Conference
[AD-A286364] p 1500 N95-20229
Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725
MAGNETIC MEASUREMENT
DSP control of superconducting quantum interference devices
[DE94-016193] p 1313 N95-20168
Magnetic source imaging of visually evoked and oscillatory electrical activity of the human brain
[PB95-127205] p 1448 N95-22476
MAGNETIC MIRRORS
An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation
[DE95-001078] p 1515 N95-20911
Gas-dynamic trap diagnostic complex for study on plasma heating and power atomic beam injection
[DE94-633377] p 1529 N95-22283
MAGNETIC MOMENTS
Neutrino magnetic moments and the solar neutrino problem
[DE94-017579] p 1602 N95-20147
Signals for top quark anomalous chromomagnetic moments at colliders
[DE95-002896] p 1535 N95-21254
Neutron diffraction study of the magnetic ordering of BaCuO(2+x)
[DE95-001357] p 1572 N95-21297
MAGNETIC PERMEABILITY
Joining dissimilar stainless steels for pressure vessel components
[PB95-133005] p 1380 N95-21446
AC magnetic response of YBa2CuO7 with Y2BaCuO5 inclusions and of single-crystal YBa2Cu3O7: A comparative study
[PB94-207917] p 1577 N95-22166
MAGNETIC PROBES
A portable and independent edge fluctuation diagnostic
[DE94-018254] p 1554 N95-20681
MAGNETIC PROPERTIES
Energetics, bonding mechanism and electronic structure of ceramic/ceramic and metal/ceramic interfaces
[DE95-000601] p 1265 N95-20115
Journal of Applied Physics, volume 76, number 10, part 2. Proceedings of the 6th Joint Magnetism and Magnetic Materials-INTERMAG Conference
[AD-A286364] p 1500 N95-20229
Investigation of syngas interaction in alcohol synthesis catalysts
[DE94-018784] p 1236 N95-20349
Molecularly Designed Ultrafine/Nanostructured Materials, volume 351
[AD-A285370] p 1568 N95-20552
Magnetic excitations in modulated PrNi2Si2
[DE95-001077] p 1254 N95-20822
Photoemission and ferromagnetism
[DE95-002419] p 1520 N95-21362
Magnetic properties of the three-dimensional Ising model with an interface amorphization
[DE94-628992] p 1278 N95-21885
The low temperature properties of (Dy(1-x)Er(x))Ni2 alloys
[DE95-001657] p 1260 N95-21923
Incology alloy 908 data handbook
[DE95-001818] p 1260 N95-22013
MAGNETIC RELAXATION
Power-law resistivity, magnetic relaxation and ac susceptibility
[DE94-016893] p 1501 N95-20241
MAGNETIC RESONANCE
Seminar on Biomedical Engineering 1993
[PB95-104402] p 1443 N95-20971
Radio-frequency techniques at the ISIS pulsed muon source
[PB95-129854] p 1529 N95-22303
MAGNETIC SPECTROSCOPY
Applications of ICP magnetic sector multicollector mass spectrometry to basic energy research
[DE95-002600] p 1246 N95-21886
MAGNETIC STORAGE
Journal of Applied Physics, volume 76, number 10, part 2. Proceedings of the 6th Joint Magnetism and Magnetic Materials-INTERMAG Conference
[AD-A286364] p 1500 N95-20229
MAGNETIC STORMS
Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713
Substorm theories: United they stand, divided they fall
[NASA-CR-197672] p 1427 N95-22326
Large-scale fields and flows in the magnetosphere-ionosphere system
[PB95-134664] p 1427 N95-22368
The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes
[AD-A286173] p 1427 N95-22423
MAGNETIC VARIATIONS
Critical dynamics and plastic flow in disordered Josephson junction arrays
[DE94-629074] p 1576 N95-21995
MAGNETICALLY TRAPPED PARTICLES
1994 Nonneutral Plasma Workshop
[AD-A285656] p 1559 N95-21404
MAGNETITE
Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792
MAGNETIZATION
Flux creep with logarithmic U(j) dependence
[DE94-629058] p 1577 N95-22180
MAGNETO-OPTICS
Journal of Applied Physics, volume 76, number 10, part 2. Proceedings of the 6th Joint Magnetism and Magnetic Materials-INTERMAG Conference
[AD-A286364] p 1500 N95-20229
Nonlinear Faraday effect in CdS semiconductor in an ultrahigh magnetic field
[DE94-016804] p 1564 N95-20240
Laser trapping of Na-21 atoms
[DE95-002354] p 1513 N95-20629
Instantaneous frequency dynamics of coherent emission from magnetoexcitons in gallium arsenide
[DE94-018182] p 1569 N95-20677
High speed optical storage technology
[AD-A285788] p 1456 N95-22400
MAGNETOACOUSTIC WAVES
Recent results from Fast Wave Current Drive experiments on DIII-D
[DE94-016718] p 1551 N95-20285
MAGNETOACOUSTICS
Approximate Riemann solver for magnetohydrodynamics (that works in more than one dimension)
[PB95-135802] p 1553 N95-20425
MAGNETOCARDIOGRAPHY
Transformation of multichannel magnetocardiographic signals to standard grid form
[PB95-127114] p 1447 N95-22371
MAGNETOELECTRIC MEDIA
Classification of bianisotropic media
[PB95-127635] p 1502 N95-21102
Magnetoelectric properties of reciprocal bianisotropic materials with focus on the polarizability of chiro-omega spheres
[PB95-127650] p 1544 N95-21103
MAGNETOHYDRODYNAMIC FLOW
MHD-flow in slotted channels with conducting walls
[DE94-018370] p 1559 N95-21388
MAGNETOHYDRODYNAMIC STABILITY
Coupled tearing modes in plasmas with differential rotation
[DE94-631422] p 1548 N95-19977
Toward a design for the ITER plasma shape and stability control system
[DE94-017516] p 1548 N95-20037
Particle beam fusion
[DE95-000711] p 1549 N95-20075
Fluctuations and transport in the reversed field pinch: Characterization and reduction
[DE95-000590] p 1549 N95-20113
Fluctuations in high Beta(sub p) plasmas in D3-D
[DE94-017510] p 1550 N95-20146
Soft X-Ray Innovative Source Development Program
[AD-A286380] p 1551 N95-20232
24th Annual Anomalous Absorption Conference
[DE94-016457] p 1551 N95-20283

Plasma shape experiments for an optimized tokamak
[DE94-017508] p 1553 N95-20445
Wall stabilization effects in D3-D high beta discharges
[DE94-017509] p 1554 N95-20446
Solar flare MDH
[AD-A279894] p 1602 N95-20593
Current diffusive ballooning mode in second stability region of tokamaks
[DE94-770690] p 1554 N95-20683
Simulation of tearing mode stabilization by using ECH
[DE94-770700] p 1554 N95-20684
Chaotic phenomena in plasma 3
[DE94-770765] p 1554 N95-20686
Ideal Magnetohydrodynamic stabilities in JT-60 and D3-D tokamak plasmas
[DE94-770684] p 1555 N95-20987
Investigations of VH-mode in D3-D and JET
[DE94-015859] p 1556 N95-21142
Numerical analysis of energetic particle stabilization of ballooning modes in finite-aspect-ratio tokamaks
[DE94-631397] p 1556 N95-21164
Computer simulation of the diocotron instability
[AD-A285655] p 1559 N95-21403
1994 Nonneutral Plasma Workshop
[AD-A285656] p 1559 N95-21404
Quasi-linear equation for magnetoplasma oscillations in the weakly relativistic approximation
[DE94-628932] p 1560 N95-21593

MAGNETOHYDRODYNAMIC WAVES
Approximate Riemann solver for magnetohydrodynamics (that works in more than one dimension)
[PB95-135802] p 1553 N95-20425
Electromagnetic waves in an ultrarelativistically hot and strongly magnetized electron-positron plasma
[DE94-628963] p 1307 N95-21849

MAGNETOHYDRODYNAMICS
Transport and dynamics in toroidal fusion systems
[DE94-018653] p 1548 N95-20029
Magnetic fluctuation induced transport and edge dynamo measurements in the MST reversed-field pinch
[DE95-000591] p 1549 N95-20114
Approximate Riemann solver for magnetohydrodynamics (that works in more than one dimension)
[PB95-135802] p 1553 N95-20425
Solar flare MDH
[AD-A279894] p 1602 N95-20593
Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725
Ideal Magnetohydrodynamic stabilities in JT-60 and D3-D tokamak plasmas
[DE94-770684] p 1555 N95-20987
Investigations of VH-mode in D3-D and JET
[DE94-015859] p 1556 N95-21142
MHD pressure drop in ducts with imperfectly insulating coatings
[DE95-002852] p 1558 N95-21244
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345
MHD-flow in slotted channels with conducting walls
[DE94-018370] p 1559 N95-21388
PRS scoping study. 2: ZPIMP predictions for radiation yields on a JUPITER-class generator
[AD-A279823] p 1537 N95-21494
A simulation of plasma motion in the polar ionosphere
[AD-A286166] p 1426 N95-22019

MAGNETOMETERS
Evaluation of superconducting quantum interference devices interfaced with digital signal processing electronics for biomagnetic applications
[DE94-016186] p 1289 N95-20164
Source distribution of visual evoked neuromagnetic responses
[PB95-127643] p 1445 N95-21348
Transformation of multichannel magnetocardiographic signals to standard grid form
[PB95-127114] p 1447 N95-22371

MAGNETOPAUSE
Location and characteristics of the reconnection X-line deduced from low-altitude satellite and radar observations
[NASA-TM-110114] p 1413 N95-20453
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345
Observations of cold magnetospheric ions at geosynchronous orbit during times of high activity
[DE95-000936] p 1600 N95-21935
Large-scale fields and flows in the magnetosphere-ionosphere system
[PB95-134664] p 1427 N95-22368
Magnetospheric Plasma Analyzer (MPA): Plasma observations from geosynchronous orbit
[DE95-002739] p 1427 N95-22477

MAGNETORESISTIVITY
Giant magnetoresistance calculated from first principles
[DE94-018658] p 1500 N95-20129
Journal of Applied Physics, volume 76, number 10, part 2. Proceedings of the 6th Joint Magnetism and Magnetic Materials-INTERMAG Conference
[AD-A286364] p 1500 N95-20229
Magnetic field dependence of the correlation gap in SmB6
[DE95-001684] p 1574 N95-21570

MAGNETOSHEATH
Location and characteristics of the reconnection X-line deduced from low-altitude satellite and radar observations
[NASA-TM-110114] p 1413 N95-20453
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345

MAGNETOSPHERE-IONOSPHERE COUPLING
Substorm theories: United they stand, divided they fall
[NASA-CR-197672] p 1427 N95-22326
Large-scale fields and flows in the magnetosphere-ionosphere system
[PB95-134664] p 1427 N95-22368

MAGNETOSTATIC FIELDS
Variations of helicon wave induced radial plasma transport in different experimental conditions
[DE94-631410] p 1550 N95-20200

MAGNETOSTRICTION
Magnetostrictive motor system
[AD-D016484] p 1333 N95-21901

MAGNETRON SPUTTERING
Rate controlled synthesis of composition modulated, metal-oxide thin films
[DE94-016596] p 1267 N95-20317
Magnetic x ray circular dichroism in Fe Co Pt multilayers
[DE94-017522] p 1253 N95-20447
Thin-film cadmium telluride photovoltaic cells
[DE94-011886] p 1395 N95-21508

MAGNETRONS
Magnetron power supply at high stability and its application in plasma excitation for the production of ultraviolet radiation
[DE94-629656] p 1326 N95-20733
Development of an annular electron beam HPM amplifier
[AD-A286646] p 1327 N95-20905

MAINTENANCE
Public-sector aviation issues: Graduate research award papers, 1992-1993
[PB94-217478] p 1199 N95-19967
Analysis of welds on helium-containing restraint test plates
[DE95-001809] p 1257 N95-21303
Analysis of invalid emission testing in the California smog check program
[PB95-128922] p 1406 N95-21373

MAJORITY CARRIERS
Plasma-induced-damage of GaAs during etching of refractory metal contacts
[DE95-001525] p 1259 N95-21838

MAN MACHINE SYSTEMS
Crew aiding and automation: A system concept for terminal area operations, and guidelines for automation design
[NASA-CR-4631] p 1204 N95-19950
Collected papers of the Soar/IFOR project, Spring 1994
[AD-A280063] p 1216 N95-20624
13th European Annual Conference on Human Decision Making and Manual Control
[PB95-132874] p 1450 N95-21284
Crew-Centered Cockpit Design (CCCD) field demonstration program, volume 1
[AD-A286426] p 1453 N95-21566
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 399)
[NASA-SP-7011(399)] p 1446 N95-21947
Systems engineering design and technical analyses for Strategic Avionics Crew-station Design Evaluation Facility (SACDEF)
[AD-A286239] p 1213 N95-22024
Usable, real-time, interactive spoken language systems
[AD-A286349] p 1310 N95-22253
Fuzzy clustering of facial form for prototyping environmental protection equipment
[DE94-014657] p 1454 N95-22466

MANAGEMENT INFORMATION SYSTEMS
Information Management Architecture for an Integrated Computing Environment for the Environmental Restoration Program. Volume 2: Interim business systems guidance
[DE95-001385] p 1591 N95-22061
Taking AIM: The management of scientific and technical information at Argonne National Laboratory
[DE94-019279] p 1591 N95-22092

MANAGEMENT METHODS
Readings in program control
[NASA-SP-6103] p 1583 N95-20739
Program control in NASA: Needs and opportunities
p 1583 N95-20740
But what will it Cost? The history of NASA cost estimating p 1583 N95-20742
Scheduling: A guide for program managers
p 1584 N95-20748
A strategy of cost control for Mariner Venus/Mercury 1973 p 1585 N95-20751
Performance measurement: A tool for program control
p 1585 N95-20752
Program control for mission success
p 1585 N95-20753
Interim profile: Development and trial of a method to rapidly measure software engineering maturity status
[AD-A279074] p 1468 N95-21627
Total quality management program planning
[DE94-016862] p 1586 N95-21645
Implementation of electronic chain-of-custody, analysis requests, and data verification at Los Alamos National Laboratory
[DE94-018076] p 1407 N95-21666

MANAGEMENT PLANNING
Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016
Materials/manufacturing element of the Advanced Turbine System Program
[DE94-017299] p 1378 N95-20085
Improving cost efficiency in large programs
p 1584 N95-20743
A strategy of cost control for Mariner Venus/Mercury 1973 p 1585 N95-20751
Performance measurement: A tool for program control
p 1585 N95-20752
Program control for mission success
p 1585 N95-20753
A software process framework for the Software Engineering Institute's (SEI) capability maturity model
[AD-A286595] p 1462 N95-20765
Total quality management program planning
[DE94-016862] p 1586 N95-21645

MANAGEMENT SYSTEMS
Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016
Recognition of subsurface defects in machined ceramics by application of neural networks to laser scatter patterns
[DE94-018373] p 1264 N95-20018
Intelligent interactive project management system
[PB95-132684] p 1586 N95-21982

MANGANESE
Development of superplasticity in 5083 aluminum with additions of Mn and Zr
[DE94-017474] p 1251 N95-20090

MANGANESE ALLOYS
Consequences of oscillatory potentials and angular forces in transition metals and their aluminides
[DE94-019127] p 1258 N95-21600

MANGANESE OXIDES
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4
[DE94-631462] p 1255 N95-20909
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361

MANIFOLDS (MATHEMATICS)
Computation of invariant manifolds
[PB95-135687] p 1492 N95-21318
Iterated-subspace minimization methods for nonlinear optimization
[PB95-108171] p 1495 N95-22317
Elliptic genera for Z/K-manifolds I
[PB95-109096] p 1496 N95-22355

MANIPULATORS
Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695
Sensor based fine motion control
[PB95-108007] p 1483 N95-21669

MANUAL CONTROL
13th European Annual Conference on Human Decision Making and Manual Control
[PB95-132874] p 1450 N95-21284

MANUALS
Calculation methods for criteria air pollutant emission inventories
[AD-A284675] p 1400 N95-19964

Personal computer and workstation operating systems tutorial
[AD-A280132] p 1451 N95-20041
Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285595] p 1229 N95-21215
Operator's manual for the multistation offgas analysis system
[DE95-002060] p 1243 N95-21472

MANUFACTURING
Mercury usage and alternatives in the electrical and electronics industries
[PB94-165362] p 1312 N95-19966
Materials/manufacturing element of the Advanced Turbine System Program
[DE94-017299] p 1378 N95-20085
Residual stresses in material processing
[DE94-017888] p 1385 N95-20374
Proceedings of the International Wire and Cable Symposium
[AD-A279242] p 1403 N95-20465
The Photovolatic Manufacturing Technology project (PVMaT) after three years
[DE94-011877] p 1392 N95-20473
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285060] p 1315 N95-20488
The design and manufacturing development of an active silicon substrate MCM p 1211 N95-20645
High density monolithic packaging technology for digital/microwave avionics p 1211 N95-20646
Approaches to the design of structural ceramics incorporating whiskers and particulate phases
[DE94-018126] p 1271 N95-20704
Si concentrator solar cell development
[DE95-002314] p 1393 N95-20870
Plasma processing for integrated circuits
[DE95-001419] p 1335 N95-22149
Overview of rapid prototyping technologies in manufacturing
[PB95-127122] p 1472 N95-22372
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285775] p 1336 N95-22412
Solar collector manufacturing activity 1993
[DE94-017340] p 1398 N95-22429

MANY BODY PROBLEM
Truly distribution-independent algorithms for the N-body problem
[DE94-014238] p 1458 N95-20136
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A285946] p 1315 N95-20394
Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679
Distribution-independent hierarchical N-body methods
[DE95-001686] p 1493 N95-21439
Fast parallel tree codes for gravitational and fluid dynamical N-body problems
[AD-A286480] p 1358 N95-22290
A multisite interaction expansion of the total energy in metals
[DE94-017175] p 1262 N95-22313

MAPPING
The method of auxiliary mapping for the finite element solutions of elasticity problems containing singularities
[AD-A285689] p 1489 N95-20274
Evolution of ground line of sight data field collection techniques
[AD-A285062] p 1204 N95-20497
Common mapping system media study
[AD-A279086] p 1390 N95-21912
A periodic scheduling heuristic for mapping iterative task graphs onto distributed memory multiprocessors
[AD-A286047] p 1311 N95-22415

MAPS
Selective polygon map display method
[AD-D016518] p 1590 N95-21463
Digital mapping, charting, and geodesy analysis program technical review of Vector Smart Map (VMap) level 1
[AD-A286294] p 1390 N95-22055

MARINE BIOLOGY
Long term changes on the continental shelf of the North Sea: Invertebrate trends, 1931-1990
[PB95-135224] p 1435 N95-21717
Aquatic plant control research program. Ecological assessment of Kirk Pond
[AD-A279090] p 1409 N95-21914
Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381

MARINE ENVIRONMENTS
The vertical distribution of heating in the tropical atmosphere
[AD-A285934] p 1429 N95-20391
European Workshop on Optical Ground Truth Instrumentation for the Validation of Space-Borne Optical Remote Sensing Data of the Marine Environment
[PB95-134144] p 1390 N95-21872
Acoustic Thermometry of Ocean Climate (ATOC): Selection of California source site
[AD-A279295] p 1436 N95-21987

MARINE METEOROLOGY
Mariners Weather Log, volume 38, number 3, summer 1994
[PB94-209541] p 1428 N95-20099
Boundary layer cloud studies in support of ASTEX
[AD-A285947] p 1429 N95-20395
An at-sea evaluation of an infrared/resistance temperature device for air/sea-surface temperature measurements
[AD-A279672] p 1365 N95-20604
Acoustic Thermometry of Ocean Climate (ATOC): Selection of California source site
[AD-A279295] p 1436 N95-21987
SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL)
[AD-A286462] p 1431 N95-22393

MARINE PROPULSION
Superconducting electromagnetic thruster
[AD-D016485] p 1355 N95-21902

MARINE TECHNOLOGY
Directives for the participation in MiTS forum. V3.0
[PB95-110342] p 1484 N95-22015

MARINER VENUS-MERCURY 1973
A strategy of cost control for Mariner Venus/Mercury 1973 p 1585 N95-20751

MARINER 10 SPACE PROBE
Atmospheres of the Moon and Mercury
p 1419 N95-21794

MARKET RESEARCH
The demise of plastic encapsulated microcircuit myths
p 1209 N95-20640
An MCM concurrent engineering software tool market study
[AD-A279257] p 1468 N95-21489

MARKOV CHAINS
On Markov Chain Monte Carlo acceleration
[AD-A279393] p 1499 N95-21945
Almost kappa-wise independent random permutation of the cube
[PB95-108098] p 1495 N95-22147

MARKOV PROCESSES
Application of Markov decision processes to search problems
[PB95-110813] p 1497 N95-19914

MARS (PLANET)
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801
Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819
Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953

MARS ATMOSPHERE
Primitive Xe in the atmospheres of Earth and mars
p 1419 N95-21795
Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796
Comets, impacts, and atmospheres
p 1422 N95-21810
Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819

MARS SURFACE
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507
Mars power system concept definition study. Volume 1: Study results
[NASA-CR-195420-VOL-1] p 1396 N95-21952

MARTENSITE
Nitrogen alloyed martensitic steels
[PB95-127791] p 1255 N95-21128

MARTENSITIC STAINLESS STEELS
Joining dissimilar stainless steels for pressure vessel components
[PB95-133005] p 1380 N95-21446

MASERS
Competition between electromagnetic modes in a free-electron maser
[AD-A279546] p 1374 N95-21694

MASKING
A versatile masking process for plasma etched backside via holes in GaAs
[DE94-019176] p 1572 N95-21419
Spatio-temporal masking in human vision and its application to image coding
[AD-A284949] p 1451 N95-22473

MASKS
Method of making a semiconductor device by forming a nanochannel mask
[AD-D016515] p 1576 N95-22059
Reflective masks for extreme ultraviolet lithography
[DE95-003427] p 1336 N95-22236

MASS
An IRAS Hires study of low mass star formation in the Taurus molecular ring p 1593 N95-21767

MASS DISTRIBUTION
D(sup 0)-(anti-D)(sup 0) mixing and doubly Cabibbo-suppressed decays of the D(+)
[DE94-015540] p 1512 N95-20476

MASS FLOW
Mixing and dynamics of the Mediterranean outflow
[AD-A279803] p 1434 N95-21306

MASS FLOW RATE
Fire experiments in a two dimensional rack storage: BRANDFORSK-project 701-917
[PB95-131538] p 1241 N95-21179

MASS SPECTRA
Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section
[DE95-002524] p 1515 N95-20897
Emittance growth due to negative-mass instability above transition
[DE95-002527] p 1534 N95-20900

MASS SPECTROMETERS
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507
Applications of ICP magnetic sector multicollector mass spectrometry to basic energy research
[DE95-002600] p 1246 N95-21886

MASS SPECTROSCOPY
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-018580] p 1552 N95-20345
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric study of singly and doubly charged organometallic complexes
[AD-A279899] p 1238 N95-20563
Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707
Ion-molecule chemistry related to plasma deposition and etching of silicon
[AD-A279749] p 1514 N95-20804
High magnetic field glow discharge ionization source
[AD-A279972] p 1241 N95-21123
Monomer mapping: A PC-based software tool facilitating the determination of monomer compositions from mass spectrometric molecular weight data
[PB95-132155] p 1275 N95-21470
Operator's manual for the multistation offgas analysis system
[DE95-002060] p 1243 N95-21472
Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513
Studies of selenium and xenon in inductively coupled plasma mass spectrometry
[DE95-001676] p 1245 N95-21734
Time of flight spectroscopy with muonic hydrogen
[DE94-017056] p 1245 N95-21845
Applications of ICP magnetic sector multicollector mass spectrometry to basic energy research
[DE95-002600] p 1246 N95-21886

MASS TRANSFER
Restricted mass transport effects on free radical reactions
[DE94-018136] p 1217 N95-21706
Mantle rare gas relative abundances in a steady-state mass transport model p 1423 N95-21812
Subduction of hydrated basalt of the oceanic crust: Implications for recycling of water into the upper mantle and continental growth p 1423 N95-21814
He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821

MASSACHUSETTS
Large bistatic angle clutter depolarization study
p 1296 N95-20941

MASSIVE STARS
The variation of the dust temperature within late-type spiral galaxies p 1593 N95-21766

MASSIVELY PARALLEL PROCESSORS
Split-C and active messages under SUNMOS on the Intel Paragon
[DE94-011418] p 1474 N95-20123
A practical guide to using MCNP with PVM
[DE94-016162] p 1474 N95-20158
Parallelism across the steps in iterated Runge-Kutta methods for stiff initial value problems
[PB95-135760] p 1490 N95-20424
A theoretical study on the performance of the FDTD code on a massively parallel computer
[AD-A285346] p 1475 N95-20499
The message passing version of the parallel Community Climate Model
[DE94-019158] p 1407 N95-21608
Design of a massively parallel computer using bit serial processing elements
[NASA-CR-197365] p 1479 N95-22406

MATCHED FILTERS
Signal processing in the linear statistical model
[AD-A286255] p 1308 N95-22041
Feature extraction without edge detection
[AD-A279842] p 1473 N95-22386

MATERIAL ABSORPTION
Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

MATERIALS HANDLING
Advanced robotic technologies for transfer at Sandia National Laboratories
[DE95-001617] p 1481 N95-20884
Nuclear Terms Handbook, 1993
[DE94-016248] p 1589 N95-21131

MATERIALS SCIENCE
Materials research for GHz multi-chip modules
[AD-A279661] p 1227 N95-20412
Guidelines for qualifying cleaning and verification materials
[NASA-TM-108474] p 1270 N95-20694
Annual Conference on Fire Research: Book of abstracts
[PB95-104964] p 1286 N95-20717
The Materials Corrosion and Environmental Effects Laboratory (MCEL)
[DE94-018268] p 1254 N95-20816
Crack closure and sequential effects in fatigue: A literature survey
[PB95-131637] p 1387 N95-21557

MATERIALS TESTS
The Materials Corrosion and Environmental Effects Laboratory (MCEL)
[DE94-018268] p 1254 N95-20816
Aging tests of ethylene contaminated argon/ethane
[DE95-002526] p 1282 N95-20899
Ignition of submarine materials at various oxygen concentrations
[PB95-131371] p 1243 N95-21428
Surfaces and thin films studied by picosecond ultrasonics
[DE95-001866] p 1506 N95-22071
Welding tritium exposed stainless steel
[DE95-003208] p 1382 N95-22356
Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

MATHEMATICAL LOGIC
Ups and downs of type theory
[PB95-110664] p 1487 N95-19903
Balanced matrices
[AD-A280021] p 1490 N95-20662
TBell: A mathematical tool for analyzing decision tables
[NASA-CR-195027] p 1462 N95-20691
Abstract interpretation of reactive systems: Abstractions preserving Universal CTL(*), Existential CTL(*) and CTL(*)
[PB95-110557] p 1472 N95-22305

MATHEMATICAL MODELS
Non interleaving process algebra
[PB95-110607] p 1486 N95-19892
Radiance of the ocean horizon
[AD-A285613] p 1431 N95-19896
Dominoes
[PB95-110680] p 1456 N95-19905
Analyses of some benchmark cases in fracture mechanics using boundary element method
[PB95-110888] p 1384 N95-19930
Physical Si(1-x)Ge(x)/Si heterojunction bipolar transistor model for device and circuit simulation
[PB95-110896] p 1312 N95-19934
Qualification of the dependence in the generalized extreme value choice model
[PB95-110946] p 1497 N95-19936
Sharp determinants
[PB95-111068] p 1488 N95-19944
Coupled analytic maps
[PB95-111076] p 1498 N95-19945
A simple analytical model for asynchronous dense WDM/OOK systems
[AD-A283725] p 1289 N95-19973
Simulation of stellar speckle imaging
[DE94-016606] p 1412 N95-19985
Oceanographic analysis of the acoustic mid-ocean dynamics experiment
[AD-A285907] p 1432 N95-19988
Comparison of a back propagation artificial neural network model with a linear regression model for personnel selection
[AD-A280023] p 1479 N95-20005
Noise model of the MSX SPIRIT 3 interferometer
[AD-A285837] p 1364 N95-20036
Polycrystalline thin film cadmium telluride solar cells fabricated by electrodeposition
[DE94-011848] p 1391 N95-20118
Optimal distributed control system for a linear distributed parameter system
[AD-D016583] p 1480 N95-20202
Computational modeling of physical processes during laser ablation
[DE94-017699] p 1369 N95-20221
The paradigm of Pseudodual Chiral Models
[DE94-016386] p 1579 N95-20271
Investigating the resolution of resistivity arrays using inverse theory
[DE94-017760] p 1412 N95-20287
Software merge: Semantics of combining changes to programs
[AD-A279657] p 1459 N95-20304
Computer-Aided Structural Engineering (CASE) project. User's guide: Computer-Aided Structural Modeling (CASM). Version 5.00
[AD-A279913] p 1459 N95-20310
Numerical modeling of a small recirculating induction accelerator for heavy-ion fusion
[DE94-018549] p 1552 N95-20318
New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-018580] p 1552 N95-20345
High performance computing for materials process modeling
[DE94-017860] p 1460 N95-20358
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A285946] p 1315 N95-20394
A mechanistic model for radiation-induced crystallization and amorphization in U3Si
[DE94-015028] p 1566 N95-20419
Model-based inversion for a shallow ocean application
[DE94-016968] p 1433 N95-20420
Hybrid model in general geometry
[DE95-002614] p 1553 N95-20437
Implementation and performance of a three-dimensional numerical transport model
[PB95-135745] p 1402 N95-20440
Modeling platform dynamics and physiological response to short arm centrifugation
[AD-A279640] p 1442 N95-20457
Synthesizing the Gulf Stream thermal structure from XBT data
[AD-A279665] p 1433 N95-20458
Has a standard model solution to the solar neutrino problem been found?
[DE94-017580] p 1604 N95-20490
Metallic ions and atoms in the upper atmosphere
[AD-A285229] p 1414 N95-20498
A theoretical study on the performance of the FDTD code on a massively parallel computer
[AD-A285346] p 1475 N95-20499
Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522
Transport phenomena in the micropores of plug-type phase seperators
[NASA-TM-108479] p 1340 N95-20561
Designing the architecture of hierachical neural networks model attention, learning and goal-oriented behavior
[AD-A279898] p 1452 N95-20562
Emitter location via Kalman filtering of signal time difference of arrival
[AD-A285972] p 1291 N95-20666
Diffraction computation by means of the method of equivalent currents
[AD-A285347] p 1291 N95-20692
Computing methods for the approximate solution of time dependent problems
[AD-A286007] p 1491 N95-20719
Use of an integrated design tool for weld quality enhancement
[DE94-018135] p 1379 N95-20723
Cost estimating methods for advanced space systems
p 1583 N95-20741
Scale-up and modeling of forced chemical vapor infiltration
[DE94-017769] p 1340 N95-20761
Computational model of drilling with high radiance pulsed lasers
[DE94-018548] p 1371 N95-20783
The numerical integration and 3-D finite element formulation of a viscoelastic model of glass
[DE95-002588] p 1271 N95-20788
An augmented Young-Laplace model of an evaporating meniscus in a micro-channel with high heat flux
[NASA-CR-197622] p 1340 N95-20798
Mathematical modeling of a class of multibody flexible spacecraft structures
[NASA-TM-109166] p 1219 N95-20800
HIVEL2D: A two-dimensional flow model for high-velocity channels
[AD-A286556] p 1341 N95-20843
Optimizing the length of the stores and related effects
[DE95-002531] p 1533 N95-20885
Performance and cost analysis of monolithic solid oxide fuel cells
[DE95-002511] p 1394 N95-20896
Statistical properties of geologic fractals
[DE94-019272] p 1414 N95-20908
Real-time reconfiguration study
[AD-A286060] p 1464 N95-20910
Experimental and theoretical evaluation of elastic waves in curved layered media
[AD-A286578] p 1504 N95-20918
Stars or stripes: A comparative study of finite and transfinite techniques for surface modelling
[PB95-134979] p 1464 N95-20975
Mixed hp finite element methods for problems in elasticity and stokes flow
[PB95-104444] p 1341 N95-20981
Construction of non-critical string field theory by transfer matrix formalism in dynamical triangulation
[DE94-770607] p 1516 N95-20986
Geomaterial models and numerical analysis of softening
[PB95-135380] p 1386 N95-21006
Next generation solid modellers for electronic prototyping
[AD-A286525] p 1464 N95-21010
Explicit methods for stiff ODEs from atmospheric Chemistry
[PB95-135794] p 1404 N95-21034
Role of pressure diffusion in non-homogeneous shear flows p 1345 N95-21053
Modeling near wall effects in second moment closures by elliptic relaxation p 1345 N95-21054
Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106
Dielectric models in adhesion and extrapolations of molecular modeling
[AD-A279675] p 1516 N95-21121
New methods for large scale local and global optimization
[AD-A285635] p 1517 N95-21126
DAVE: A plug and play model for distributed multimedia application development
[DE94-016481] p 1465 N95-21153
Experimental measurements and modeling of impurity transport in the divertor and boundary plasma of D3-D
[DE94-016519] p 1556 N95-21159
Analytic models for beam propagation and far-field patterns in slab and bow-tie x ray lasers
[DE94-016607] p 1372 N95-21173
A model of an infinite length, axisymmetric, isotropic, forced thick shell
[AD-A285586] p 1386 N95-21212
Antishadowing contribution to the pomeron structure function
[PB95-127478] p 1518 N95-21221
Where are we going with Bose-Einstein: A mini review
[PB95-130308] p 1518 N95-21222
Spin dependence of diffractive processes and implications for the small x behaviour of g1 and the spin content of the nucleon
[PB95-130332] p 1518 N95-21225
LIEKKI combustion technology
[DE95-700233] p 1242 N95-21282
NESTLE: Few-group neutron diffusion equation solver utilizing the nodal expansion method for eigenvalue, adjoint, fixed-source steady-state and transient problems
[DE95-001903] p 1466 N95-21288
Computational modeling of diffusion-controlled transformations in ternary systems
[DE95-001358] p 1256 N95-21298
Computation of invariant manifolds
[PB95-135687] p 1492 N95-21318

Vibration analysis of the AN/SPS-67(V)3 surface search radar
[AD-A286050] p 1302 N95-21324

Time-dependent deformation of titanium metal matrix composites
[NASA-CR-195030] p 1230 N95-21363

A Hypervelocity Experimental Research Database (HERD): Support for the Wright Laboratory Armament Directorate Code Validation Program (COVAL)
[DE95-001628] p 1387 N95-21396

Error committed by stopping the Newton iteration in Runge-Kutta methods and linear multistep methods
[PB95-106324] p 1492 N95-21421

VLUGR3: A vectorizable adaptive grid solver for PDEs in 3D. 1: Algorithmic aspects and applications
[PB95-135729] p 1467 N95-21435

Theory and modelling of quench in cable-in-conduit superconducting magnets
[DE95-001819] p 1330 N95-21442

Deposition and properties of novel nitride superlattice coatings
[DE95-002945] p 1230 N95-21445

Structure of ionic interfaces from an absolutely convergent solution of the Madelung problem
[DE94-019268] p 1573 N95-21474

Simulations of metal dissolution and corrosion
[DE94-019295] p 1257 N95-21476

Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479

New improved derivative expansion for field theories with spontaneous symmetry breaking
[DE94-019349] p 1580 N95-21486

Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 2: Contributed papers
[AD-A286063] p 1381 N95-21488

Correlations for the OH A(sup 2)(Sigma)(sup +)(v(prime)=0) electronic quenching cross-section
[DE95-002591] p 1244 N95-21524

Finite element modelling of creep crack growth in 316 stainless and 9Cr-1Mo steels
[DE94-018977] p 1258 N95-21560

One-dimensional reactive Euler equations
[PB95-135430] p 1244 N95-21573

Analysis of a local defect correction approach on composite grids
[PB95-135455] p 1493 N95-21574

Regularity of BPa-systems is decidable
[PB95-135489] p 1468 N95-21619

The method of evaluating quantum partition function for the Hubbard model
[DE94-628991] p 1581 N95-21639

The application of a statistical analysis software package to explosive testing
[MRL-TR-93-42] p 1284 N95-21658

Domain processes in ferroelectric ceramics
[AD-A279567] p 1276 N95-21697

Charge density of fractional charged quasiparticles in the composite fermion picture
[DE94-018122] p 1524 N95-21703

Modeling the response of the California Current system to Global Greenhouse Warming
[DE94-018253] p 1408 N95-21708

Current distribution in Cable-In-Conduit Conductors
[DE95-001820] p 1332 N95-21725

High frequency current sensors using the Faraday effect in optical fibers
[DE95-001859] p 1545 N95-21728

In search of random noise p 1592 N95-21753

Modeling the effect of water on mantle rheology
p 1417 N95-21783

On the theory of strong electromagnetic waves propagation in an electron-positron-ion plasma
[DE94-628964] p 1561 N95-21850

Electronic structure and energies of alkaline earth oxides: MgO, CaO and SrO
[DE94-628990] p 1575 N95-21853

Rigorous spin-spin correlation function of Ising model on a special kind of Sierpinski Carpets
[DE94-628995] p 1575 N95-21854

Acoustoelectric effect in semiconductor superlattice
[DE94-628994] p 1575 N95-21859

Low frequency sound radiation from finite stiffened plates
[AD-A279395] p 1505 N95-21930

Bayesian analysis of semiparametric proportional hazards models
[AD-A279394] p 1499 N95-21946

A new FHNC scheme for Gutzwiller correlated wave functions
[DE94-629037] p 1581 N95-21993

An asymptotic solution of the (infinity)-d Hubbard model
[DE94-629042] p 1582 N95-21994

Critical dynamics and plastic flow in disordered Josephson junction arrays
[DE94-629074] p 1576 N95-21995

Breakdown of the law of large numbers in Josephson junction series arrays
[DE94-629075] p 1576 N95-21996

Economic feasibility analysis of distributed electric power generation based upon the natural gas-fired fuel cell
[DE94-012277] p 1396 N95-22033

Evaluation of simple spherical spreading model for near vertical acoustical propagation
[AD-A286284] p 1505 N95-22042

Effects of cyclic stress distribution models on fatigue life predictions
[DE95-001619] p 1388 N95-22070

A Davis-Putnam program and its application to finite-order model search: Quasigroup existence problems
[DE95-003014] p 1471 N95-22077

Effects of yaw and pitch motion on model attitude measurements
[NASA-TM-4641] p 1368 N95-22109

Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177

Flux creep with logarithmic U(j) dependence
[DE94-629058] p 1577 N95-22180

Magnetic interactions in the Emery model
[DE94-629059] p 1577 N95-22181

Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183

Heat loss by helicity injection in spheromaks
[DE95-003473] p 1562 N95-22221

Application of IRIS to semiconductor plasma processing
[DE95-003591] p 1562 N95-22225

Technical cost modeling applied to CVD diamond deposition
[AD-A286119] p 1578 N95-22231

Constraints on the left-right symmetric model from b yields s gamma
[DE95-003469] p 1528 N95-22239

Modeling of fundamental phenomena in welds
[DE94-017859] p 1381 N95-22268

An exact enumeration of self-avoiding loops on a square lattice
[DE94-628999] p 1578 N95-22276

Biaxiality of chiral liquid crystals
[DE94-629032] p 1578 N95-22277

Topics in gauge theories and the unification of elementary particle interactions
[DE94-013485] p 1529 N95-22279

Recent results in analysis and simulation of beam halo
[DE94-018313] p 1539 N95-22298

Image solution for poisson's equation in wedge geometry
[PB95-127171] p 1310 N95-22311

A multisite interaction expansion of the total energy in metals
[DE94-017175] p 1262 N95-22313

A new parallel method for molecular dynamics simulation of macromolecular systems
[DE94-018621] p 1529 N95-22315

Tunneling of self-trapped states and formation of a band
[DE94-629001] p 1582 N95-22378

Solar wind composition
[NASA-TM-197364] p 1604 N95-22384

Fundamental mechanisms in premixed flame propagation via vortex-flame interactions: Numerical simulations p 1249 N95-22440

Turbulence modeling for separated flow
p 1359 N95-22443

Local dynamic subgrid-scale models in channel flow
p 1360 N95-22447

Direct numerical simulations of on-demand vortex generators: Mathematical formulation
p 1361 N95-22452

Optimal active control for Burgers equations
p 1361 N95-22454

MATHEMATICAL PROGRAMMING

TBell: A mathematical tool for analyzing decision tables
[NASA-CR-195027] p 1462 N95-20691

Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982

Heuristic genetic algorithms for constrained problems. Part 1: Principles
[PB95-132031] p 1467 N95-21374

MATRICES (MATHEMATICS)

O(log2 n) time efficient parallel factorization of dense, sparse separable, and banded matrices
[NASA-CR-197356] p 1473 N95-19885

Multigrid with matrix-dependent transfer operators for convection-diffusion problems
[PB95-110821] p 1487 N95-19915

Orthogonal representations over finite fields and the chromatic number of graphs
[PB95-110953] p 1487 N95-19937

Quadratic forms in design theory
[PB95-111019] p 1487 N95-19940

Uniqueness of strongly regular graphs having minimal p-rank
[PB95-111043] p 1488 N95-19942

Graphs cospectral with distance-regular graphs
[PB95-111050] p 1488 N95-19943

ILIAS: A sequential language for parallel matrix computations
[PB95-110631] p 1473 N95-20056

Balanced matrices
[AD-A280021] p 1490 N95-20662

The design of a parallel, dense linear algebra software library: Reduction to Hessenberg, tridiagonal, and bidiagonal form
[DE94-018123] p 1491 N95-20701

Deconvolution and singular value decomposition
[AD-A286582] p 1491 N95-20875

Construction of non-critical string field theory by transfer matrix formalism in dynamical triangulation
[DE94-770607] p 1516 N95-20986

Magnetoelectric properties of reciprocal bianisotropic materials with focus on the polarizability of chiro-omega spheres
[PB95-127650] p 1544 N95-21103

T1F ((1) sigma (+)): Some preliminary electronic structure calculations
[PB95-130316] p 1518 N95-21223

A divide-and-conquer method for tridiagonalizing symmetric matrices with repeated eigenvalues
[DE95-002918] p 1476 N95-21257

A framework for symmetric band reduction and tridiagonalization
[DE95-002919] p 1476 N95-21341

Preconditioning via asymptotically-defined domain decomposition
[DE94-019046] p 1493 N95-21 64

Report of the Numerical Analysis Group
[PB95-108163] p 1494 N95-21648

Balanced 0, + or - matrices. Part 2: Recognition algorithm
[AD-A279156] p 1470 N95-21974

Latin hypercube sampling in sensitivity analysis
[AD-A285867] p 1499 N95-22135

Discrete algebraic Riccati equation and linear matrix inequality
[PB95-133575] p 1484 N95-22139

Singular symmetric matrices
[PB95-109088] p 1496 N95-22354

FORTRAN subroutine for column reduction of polynomial matrices
[PB95-134987] p 1497 N95-22379

MATRIX MATERIALS

The environmental durability of fiber reinforced ceramic matrix composites
[AD-A283750] p 1225 N95-19919

Third Intermetallic Matrix Composites Symposium, volume 350
[NASA-TM-110059] p 1225 N95-20001

Carbon fiber reinforced superconductor composites
[DE95-002504] p 1229 N95-20913

Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285629] p 1229 N95-21149

Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285595] p 1229 N95-21215

Directional solidification of the alumina-zirconia ceramic eutectic system
[DE95-001677] p 1277 N95-21735

The role of grain boundary sliding on creep deformation characteristics of discontinuous reinforced composites
[DE95-001671] p 1231 N95-21924

The thermal conductivity of silicon nitride with molybdenum disilicide additions
[DE94-017757] p 1247 N95-22260

The Modified Embedded Atom Method
[DE94-017958] p 1248 N95-22273

MATTER (PHYSICS)

Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380

Strange hadronic matter
[DE94-019345] p 1521 N95-21484

Monopoles and quark confinement: Introduction and overview
[DE94-019348] p 1522 N95-21485

Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704

Vortex atoms and vortons
[PB95-134599] p 1356 N95-21963
Theses of the Proceedings of the 23d International Meeting on the Physics of Charged Particle Interaction with Crystals
[DE94-631501] p 1529 N95-22281

MAXIMUM ENTROPY METHOD
Science with High Spatial Resolution Far-Infrared Data
[NASA-CR-197353] p 1595 N95-21749
MEM application to IRAS CPC images
p 1592 N95-21751
An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752
Beyond maximum entropy: Fractal Pixon-based image reconstruction p 1593 N95-21757
HIRAS: High-resolution IRAS images
p 1593 N95-21758
Robust fixed-structure control
[AD-A286515] p 1485 N95-22216

MAXIMUM LIKELIHOOD ESTIMATES
Unbinned maximum likelihood fit for the CP conserving couplings for W + photon production at CDF
[DE95-001471] p 1514 N95-20852
Geographical diversity combining to exploit multi-mechanism propagation p 1299 N95-20957
Superresolution direction finding algorithms for the characterisation of multi-moded HF signals
p 1299 N95-20958
Exponential deconvolution: Two asymptotically equivalent estimators
[PB95-132122] p 1499 N95-21469
Hires and beyond p 1592 N95-21750
An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752
Signal processing in the linear statistical model
[AD-A286255] p 1308 N95-22041

MAXWELL EQUATION
On FEL integral equation and electron energy loss in intermediate gain regime
[DE94-770631] p 1371 N95-20757
Massively-parallel computational fluid dynamics
[AD-A279389] p 1355 N95-21942

MEAN
Iterated-bootstrap confidence intervals for the mean
[AD-A279802] p 1498 N95-20102

MEAN FREE PATH
A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659

MEAN SQUARE VALUES
Structure and dynamics of turbulent wall layers
[AD-A285360] p 1340 N95-20547

MEASURING INSTRUMENTS
An evaluation of 915-MHz radar wind profiler/RASS by tower and sodar measurements
[DE94-018913] p 1364 N95-20320
Development of solid state moisture sensors for semiconductor fabrication applications
[DE94-015771] p 1364 N95-20398
Method and apparatus for non-invasive evaluation of diaphragmatic function
[NASA-CASE-LAR-13888-1] p 1441 N95-20408
LLNL/Lion Precision LVDT amplifier
[DE95-001504] p 1327 N95-20854
A convergence analysis of an h-version finite element method with high order elements for two dimensional elasto-plasticity problems
[AD-A279975] p 1491 N95-20920
Advanced concepts for gamma ray isotopic analysis and instrumentation
[DE94-016610] p 1517 N95-21174
Characterization equipment for electrooptics and actuators
[AD-A286285] p 1546 N95-22043

MECHANICAL DEVICES
Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 1: Main lectures
[AD-A286062] p 1380 N95-21171

MECHANICAL DRIVES
Bevel gear driver and method having torque limit selection
[NASA-CASE-MSC-22384-1] p 1378 N95-20151
Magnetostrictive motor system
[AD-D016484] p 1333 N95-21901

MECHANICAL ENGINEERING
Mechanical design of the DO silicon detector
[DE95-002532] p 1365 N95-20902
Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 1: Main lectures
[AD-A286062] p 1380 N95-21171
Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 2: Contributed papers
[AD-A286063] p 1381 N95-21488

MECHANICAL OSCILLATORS
Quartz resonator fluid monitors for vehicle applications
[DE94-018910] p 1367 N95-21546

MECHANICAL PROPERTIES
The influence of ply waviness with nonlinear shear on the stiffness and strength reduction of composite laminates
[AD-A285736] p 1224 N95-19899
Cr2Nb development
[DE94-018697] p 1250 N95-20043
Mechanical behavior of 97.2% W alloy in tension at high temperatures
[AD-A284797] p 1250 N95-20067
Dynamic measurement of the hoop modulus of a composite cylinder
[DE94-018958] p 1385 N95-20416
The processing and mechanical properties of high temperature/high performance composites. Book 7: In-situ measurements of stress and damage
[AD-A279814] p 1227 N95-20583
The processing and mechanical properties of high temperature/high performance composites. Book 5: Interface effects
[AD-A279815] p 1228 N95-20584
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 1: Isostatically pressed alumina ceramic
[AD-A279669] p 1270 N95-20603
The mechanical property data base from an Air Force/Industry cooperative test program on advanced aluminum alloys
[AD-A280038] p 1386 N95-20615
The processing and mechanical properties of high temperature/high performance composites. Mechanism-based constitutive laws and design, book 1
[AD-A279736] p 1228 N95-20801
The processing and mechanical properties of high temperature/high performance composites. Processing/property correlations, book 4
[AD-A279739] p 1228 N95-20802
Tribology and surface mechanical properties of excimer laser nitrided titanium
[DE95-002751] p 1255 N95-21238
Tungsten-uranium penetrator target interaction
[DE95-000847] p 1387 N95-21364
Ceramic technology for advanced heat engines
[DE95-000950] p 1278 N95-21937
Effect of laser radiation on carbon fibre/epoxy composites
[PB95-133526] p 1232 N95-22096
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126
Corrosion behavior of landing gear steels
[AD-A285862] p 1261 N95-22132
Materials support for the development of High Temperature Advanced Furnaces (HITAF): A comparison of selected mechanical properties for three SiC-based ceramics
[DE94-017752] p 1280 N95-22258
Strength testing of Ti-vapor-coated silicon nitride braze joints
[DE94-017858] p 1280 N95-22266
Bulk and defect properties of ordered intermetallics
[DE94-017706] p 1262 N95-22344

MECHANICS (PHYSICS)
Transactions of the Eleventh Army Conference on Applied Mathematics and Computing
[AD-A279884] p 1497 N95-22389

MECHANIZATION
An evaluation of Automatic Terminal Information Service (ATIS) flight deck display presentation options
[AD-A280100] p 1204 N95-21020

MEDICAL ELECTRONICS
Radiofrequency hyperthermia systems: Experimental and clinical assessment of the feasibility of radiofrequency hyperthermia systems for loco-regional deep heating
[PB94-206885] p 1444 N95-21016

MEDICAL EQUIPMENT
Method and apparatus for non-invasive evaluation of diaphragmatic function
[NASA-CASE-LAR-13888-1] p 1441 N95-20408
Seminar on Biomedical Engineering 1993
[PB95-104402] p 1443 N95-20971
Radiofrequency hyperthermia systems: Experimental and clinical assessment of the feasibility of radiofrequency hyperthermia systems for loco-regional deep heating
[PB94-206885] p 1444 N95-21016

MEDICAL SCIENCE
Development and enhancement of a model of performance and decision making under stress in a real life setting
[AD-A285945] p 1449 N95-20393
Water-soluble polyphosphazenes and their hydrogels
[AD-A279695] p 1269 N95-20580
ANSTO: Program of research, 1993-1994
[DE94-631122] p 1605 N95-21828
Command history, 1993
[AD-A279775] p 1446 N95-21989
Sustaining the health and performance of soldiers/warfighters deployed to harsh environments
[AD-A286270] p 1446 N95-22004

MEDICAL SERVICES
Compact free electron lasers for medical applications
[AD-A285739] p 1369 N95-20072
Command history, 1993
[AD-A279775] p 1446 N95-21989

MELTING
Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952
Theoretical-experimental study on the electroslag remelting technology of high quality steels
[DE94-629216] p 1256 N95-21270
Volatiles in the Earth: All shallow and all recycled
p 1416 N95-21779
Structure and stability of hydrous minerals at high pressure p 1417 N95-21786
The primary carbon and the formation of carbon species in terrestrial magmas p 1420 N95-21797
Gravitational effects on the development of weld-pool and solidification microstructures
[DE94-017772] p 1285 N95-22261
Modeling of fundamental phenomena in welds
[DE94-017859] p 1381 N95-22268

MELTS (CRYSTAL GROWTH)
Solubilities of nitrogen and noble gases in basalt melt
p 1422 N95-21807

MEMBRANES
A photophysical control mechanism for zeaxanthin-associated radiationless energy dissipation in photosynthesis
[DE94-018383] p 1437 N95-19969
Mechanism of the amperometric response of a proposed glucose sensor based on a polypyrrole-tubule-impregnated membrane
[AD-A279836] p 1365 N95-20431
Testing of the SAIC facets on the stretched-membrane dish
[DE95-001831] p 1393 N95-20864
The permeation of bis(2-fluoro-2,2-dinitroethyl) formal (FEFO), ethyl 4,4-dinitropentanoate (EDNP), ethyl 4-nitropentanoate (ENP), and 1,2,4-trichlorobenzene (TCB) through barrier membranes
[DE95-002492] p 1283 N95-21514
Development and applications of flat ceramic membranes
[PB95-110219] p 1276 N95-21650
Chemical interactions between protein molecules and polymer membrane materials
[DE95-001808] p 1224 N95-21746
Development of active-transport membrane devices
[DE94-015947] p 1246 N95-21921
Separation of proteins by convective electrophoresis through a porous membrane
[PB95-127130] p 1248 N95-22373

MEMORY
Biological and theoretical studies of adaptive networks: The conditioned response
[AD-A284781] p 1479 N95-20061
MAC/FAC: A model of similarity-based retrieval
[AD-A286291] p 1450 N95-22052

MEMORY (COMPUTERS)
Role of working memory limitations of retrieval
[AD-A280032] p 1448 N95-20007
Performance issues for engineering analysis on MIMD parallel computers
[DE94-015769] p 1474 N95-20150
Parallel solid mechanics codes at Sandia National Laboratories
[DE94-015770] p 1474 N95-20152
MPI workshop
[DE94-017883] p 1475 N95-20366
The design of a parallel, dense linear algebra software library: Reduction to Hessenberg, tridiagonal, and bidiagonal form
[DE94-018123] p 1491 N95-20701
Network distributed global memory for transparent message passing on distributed networks
[AD-A286096] p 1478 N95-22228
TDX: A high-bandwidth crossbar-switched communication paradigm
[DE94-017187] p 1311 N95-22407

A periodic scheduling heuristic for mapping iterative task graphs onto distributed memory multiprocessors [AD-A286047] p 1311 N95-22415

MENISCI

An augmented Young-Laplace model of an evaporating meniscus in a micro-channel with high heat flux [NASA-CR-197622] p 1340 N95-20796

MENTAL HEALTH

Psychosocial stress and mental health in a forward-deployed military community [AD-A285940] p 1451 N95-22323

MENTAL PERFORMANCE

Behavioral effects of tyrosine during sustained wakefulness [AD-A279789] p 1441 N95-20307

A comparison of decision making behaviour in a static and a dynamic task environment as a function of time pressure [AD-A285389] p 1449 N95-20609

MERCURY (METAL)

Mercury usage and alternatives in the electrical and electronics industries [PB94-165362] p 1312 N95-19966

Mercury capture in bench-scale absorbers [DE94-016910] p 1234 N95-20107

Micrometeorological methods for measurements of mercury emissions over contaminated soils [DE94-017679] p 1411 N95-22342

MERCURY (PLANET)

Polar volatiles on Mercury and the Moon p 1422 N95-21811

Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818

MERCURY ATMOSPHERE

Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818

MERCURY COMPOUNDS

Mercury usage and alternatives in the electrical and electronics industries [PB94-165362] p 1312 N95-19966

MERCURY ISOTOPES

Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors [DE95-001073] p 1570 N95-20820

MERCURY SURFACE

Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818

MERCURY TELLURIDES

IR materials producibility [AD-A280094] p 1328 N95-21017

MERGING ROUTINES

Software merge: Semantics of combining changes to programs [AD-A279657] p 1459 N95-20304

MESOMETEOROLOGY

Effects of microphysics and radiation on mesoscale processes of a midlatitude squall line [DE94-014732] p 1429 N95-20381

MESON-NUCLEON INTERACTIONS

Hard diffraction and rapidity gaps [DE95-000565] p 1507 N95-20111

Theories of the eta-meson-nucleus interaction [DE94-016055] p 1516 N95-21125

Polarization of charmonium in pion-nucleus collisions [DE95-002783] p 1523 N95-21525

Constraints on T-odd and P-even hadronic interactions from nucleon, nuclear, and atomic electric dipole moments [DE94-012845] p 1526 N95-21920

MESONS

J/psi,psi(prime) yields mu(+)mu(-) and B yields J/psi,psi(prime) cross sections [DE94-017184] p 1507 N95-20108

B meson lifetimes at CDF [DE95-000564] p 1507 N95-20110

Hard diffraction and rapidity gaps [DE95-000565] p 1507 N95-20111

A tau-charm-factory at Argonne [DE94-016913] p 1510 N95-20360

Semi-leptonic form-factors from lattice QCD [DE95-000871] p 1510 N95-20367

Mass and lifetime measurements with exclusive B reconstruction at CDF [DE94-015849] p 1511 N95-20401

D(sup 0)-(anti-D)(sup 0) mixing and doubly Cabibbo-suppressed decays of the D(+) [DE94-015540] p 1512 N95-20476

Charmonium production, b quark and B meson production and b(bar b) correlations at CDF [DE95-002525] p 1515 N95-20898

A measurement of the b(bar b) cross section at CDF [DE95-000642] p 1519 N95-21273

Measurement of the polarization in the decay B(sup 0) (yields) J/(psi)K*(sup 0) in (bar p)p collisions at (radical)s = 1.8 TeV [DE95-002521] p 1520 N95-21313

A high-rate fixed-target charm experiment [DE95-001767] p 1521 N95-21378

Lattice results for heavy light matrix elements [DE94-019101] p 1523 N95-21551

Measurement of the B meson differential cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV using the exclusive decays B(sup (+-)) (yields) J/(psi)K(sup (+-)) and B(sup 0) (yields) J/(psi)K*(sup 0) [DE94-018993] p 1523 N95-21562

Summary of heavy ion theory [DE95-002177] p 1523 N95-21588

Measurement of the B cross section at CDF via B semileptonic decays [DE95-002217] p 1524 N95-21597

The status of molecules [DE95-000952] p 1526 N95-21939

Experience at the Los Alamos Meson Physics Facility with the use of alloy Inconel 718 as an enclosure for a beam degrader and as a proton beam entry window [DE94-018289] p 1538 N95-22050

Constraints on the left-right symmetric model from b yields s gamma [DE95-003469] p 1528 N95-22239

Beam flavor dependence in the hadroproduction of D(+-) and D(sub s)(+-) mesons [DE94-015541] p 1530 N95-22339

Parity violation in the compound nucleus [DE95-002742] p 1530 N95-22435

MESOSCALE PHENOMENA

Mississippi State University Center for Air Sea Technology FY 1993 and FY 1994 research program in Navy ocean modeling and prediction [AD-A286322] p 1432 N95-20209

Effects of microphysics and radiation on mesoscale processes of a midlatitude squall line [DE94-014732] p 1429 N95-20381

The effect of regional-scale soil-moisture deficits on mesoscale atmospheric dynamics that influence fire severity [DE95-002682] p 1413 N95-20455

An integrated cloud observation and modeling investigation in support of the ARM Program [DE95-002798] p 1430 N95-21527

MESOSPHERE

Analysis of mesospheric winds and waves [AD-A279956] p 1414 N95-20591

MESSAGE PROCESSING

Algebraic semantics of message sequence charts [PB95-110581] p 1288 N95-19890

A group communication approach for mobile computing mobile channel: An ISIS tool for mobile services [AD-A279785] p 1290 N95-20306

Test and Evaluation Master Plan (TEMP) for the Weather Message Switching Center Replacement (WMSCR) [AD-A286590] p 1429 N95-20857

Programmable modular network interface [AD-D016505] p 1477 N95-21674

Initial experience with noncorrecting syntax error handling [PB95-132700] p 1471 N95-22029

Network distributed global memory for transparent message passing on distributed networks [AD-A286096] p 1478 N95-22228

MESSAGES

Split-C and active messages under SUNMOS on the Intel Paragon [DE94-011418] p 1474 N95-20123

The message passing version of the parallel Community Climate Model [DE94-019158] p 1407 N95-21608

Initial experience with noncorrecting syntax error handling [PB95-132700] p 1471 N95-22029

Modelling the reassembly buffer in a connectionless server [PB95-132908] p 1308 N95-22087

METABOLISM

Thorium-232 in human tissues: Metabolic parameters and radiation doses [DE94-019275] p 1441 N95-20074

The Use of Cyanobacteria to Explore Basic Biological Processes [DE94-019238] p 1440 N95-22066

METAL BONDING

Energetics, bonding mechanism and electronic structure of ceramic/ceramic and metal/ceramic interfaces [DE95-000601] p 1265 N95-20115

Joining of dissimilar materials. A review [PB95-132999] p 1380 N95-21416

Forming of superplastic ceramics [DE94-017306] p 1276 N95-21662

METAL CLUSTERS

Cluster reactions: An approach to understanding the fundamentals of heterogeneous catalysis [DE95-002947] p 1243 N95-21447

The enhancement of metallic silver monomer evaporation by the adhesion of polar molecules to silver nanocluster ions [AD-A284936] p 1281 N95-22470

METAL COATINGS

Polycrystalline thin film cadmium telluride solar cells fabricated by electrodeposition [DE94-011848] p 1391 N95-20118

Novel reagents for chemical vapor deposition of intermetallic alloys [AD-A286562] p 1271 N95-20815

METAL CRYSTALS

Gravitational effects on the development of weld-pool and solidification microstructures [DE94-017772] p 1285 N95-22261

METAL FATIGUE

Application of an energy-based life prediction model to bithermal and thermomechanical fatigue [NASA-TM-106684] p 1385 N95-20179

The reliability of laser reflowed Sn-Ag solder joints [AD-A279787] p 1315 N95-20443

The mechanical property data base from an Air Force/Industry cooperative test program on advanced aluminum alloys [AD-A280038] p 1386 N95-20615

Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4 [DE94-631462] p 1255 N95-20909

Time-dependent deformation of titanium metal matrix composites [NASA-CR-195030] p 1230 N95-21363

Processing and mechanical properties of laminar Al2O3-Ni3Al composites [DE94-019332] p 1230 N95-21481

Welding tritium exposed stainless steel [DE95-003208] p 1382 N95-22356

Fracture behavior of laminated discontinuously reinforced aluminum material [DE94-017307] p 1263 N95-22408

METAL FIBERS

Fibre-reinforced high-strength concrete [PB95-131942] p 1232 N95-22158

METAL FILMS

Mixed-sputter deposition of Ni-Ti-Cu shape memory films [DE94-017296] p 1250 N95-19900

A structural determination using magnetic x ray circular dichroism in spin-polarized photoelectron diffraction [DE94-017528] p 1567 N95-20449

Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43 [AD-A285937] p 1270 N95-20664

Aerosol-assisted chemical vapor deposition of copper: A liquid delivery approach to metal thin films [AD-A279702] p 1270 N95-20689

Copper metallization of stainless steels [DE95-001496] p 1256 N95-21300

Spectroscopic assessment of the reliability of metal/metal oxide interfaces [AD-A286131] p 1261 N95-22035

Surfaces and thin films studied by picosecond ultrasonics [DE95-001866] p 1506 N95-22071

METAL HALIDES

Modeling of nonlinear optic and ESR response of CDW MX materials [DE94-018301] p 1578 N95-22297

METAL HYDRIDES

Structure and stability of hydrous minerals at high pressure p 1417 N95-21786

METAL IONS

Tests of dielectric model descriptions of chemical charge displacements in water [DE94-007530] p 1236 N95-20277

Actinide(IV) and actinide(VI) carbonate speciation studies by PAS and NMR spectroscopies [DE94-016957] p 1236 N95-20361

Metallic ions and atoms in the upper atmosphere [AD-A285229] p 1414 N95-20498

Rare earth garnet selective emitter p 1322 N95-20536

On the sputtering of metals and insulators: A nonlinear evolution problem with nonlinear boundary condition [DE95-001456] p 1254 N95-20792

The application of electrodialysis to extend the lifetime of commercial electroplating baths [DE95-000868] p 1246 N95-22012

The enhancement of metallic silver monomer evaporation by the adhesion of polar molecules to silver nanocluster ions [AD-A284936] p 1281 N95-22470

METAL MATRIX COMPOSITES

Third Intermetallic Matrix Composites Symposium, volume 350 [NASA-TM-110059] p 1225 N95-20001

The thermal conductivity of carbon-fiber reinforced metal matrix composites
[DE94-017767] p 1226 N95-20125

The processing and mechanical properties of high temperature/high performance composites. Stress redistribution and notch properties, book 2
[AD-A279737] p 1227 N95-20429

The processing and mechanical properties of high temperature/high performance composites. Fatigue and creep, book 3
[AD-A279738] p 1227 N95-20430

The processing and mechanical properties of high temperature/high performance composites. Book 7: In-situ measurements of stress and damage
[AD-A279814] p 1227 N95-20583

Wear resistant composite structure of vitreous carbon containing convoluted fibers
[DE95-002254] p 1228 N95-20787

The processing and mechanical properties of high temperature/high performance composites. Mechanism-based constitutive laws and design, book 1
[AD-A279736] p 1228 N95-20801

The processing and mechanical properties of high temperature/high performance composites. Processing/property correlations, book 4
[AD-A279739] p 1228 N95-20802

Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285629] p 1229 N95-21149

Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285595] p 1229 N95-21215

Time-dependent deformation of titanium metal matrix composites
[NASA-CR-195030] p 1230 N95-21363

The processing and mechanical properties of high temperature/high performance composites. Book 6: Delamination and compressive behavior
[AD-A279780] p 1231 N95-21999

Surface technology programme
[PB95-132866] p 1262 N95-22174

Implementation of the Military Handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285772] p 1233 N95-22395

METAL OXIDE SEMICONDUCTORS

Characteristics of oxynitrides grown in N2O
[DE94-015798] p 1566 N95-20400

SPICE macro model of a spryton with MOSFET's in the avalanche mode
[DE94-015744] p 1555 N95-21134

METAL OXIDES

Novel electrochemical materials prepared by sol-gel chemistry
[AD-A286310] p 1226 N95-20092

Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268

Spectroscopic assessment of the reliability of metal/metal oxide interfaces
[AD-A286131] p 1261 N95-22035

METAL PLATES

Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289

METAL SHEETS

Sheet metal formability
[PB95-110250] p 1258 N95-21653

METAL SPRAYING

Magnetically controlled deposition of metals using gas plasma
[DE94-018654] p 1251 N95-20128

METAL SURFACES

Chemical and electrochemical interactions on corroding metal surfaces
[DE95-000624] p 1250 N95-19979

Numerical controlled polishing program, continued forced wear and part correction experiments
[DE94-018084] p 1285 N95-20288

S-D hybridization and anisotropy of the optical second harmonic at low frequencies
[AD-A279449] p 1544 N95-20876

Methods of measuring adhesion for thermally grown oxide scales
[DE94-018177] p 1256 N95-21260

Properties of aged metal tritides
[DE95-001787] p 1243 N95-21440

Quantum simulation of heterogeneous electron transfer free energies at the water-metal interface
[AD-A279279] p 1522 N95-21492

A new universal solution for the electrofinishing of metallic materials
[DE95-001681] p 1258 N95-21568

Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
[DE94-018184] p 1259 N95-21707

The optical properties of particles deposited on a surface
[AD-A286258] p 1546 N95-22002

The final status of a metal surface after multipulse laser irradiation in an ambient gas
[DE94-629000] p 1562 N95-22377

Resonant charge transfer in hyperthermal atomic and molecular ion-surface collisions
[AD-A284937] p 1530 N95-22471

METAL VAPORS

Thoriated-tungsten, split-ring, hollow-cathode electrode for discharge devices
[AD-D016508] p 1333 N95-21906

METAL WORKING

Weld pool phenomena
[DE94-018965] p 1381 N95-21550

Sheet metal formability
[PB95-110250] p 1258 N95-21653

Directed light fabrication
[DE94-018293] p 1375 N95-21837

METAL-METAL BONDING

The effect of oxide inclusions on the kinetics of the austenite to ferrite transformation in low alloy steel weld metal
[DE94-018131] p 1253 N95-20676

Joining of dissimilar materials. A review
[PB95-132999] p 1380 N95-21416

Joining dissimilar stainless steels for pressure vessel components
[PB95-133005] p 1380 N95-21446

METAL-WATER REACTIONS

Quantum simulation of heterogeneous electron transfer free energies at the water-metal interface
[AD-A279279] p 1522 N95-21492

METALLIZING

Magnetically controlled deposition of metals using gas plasma
[DE94-018654] p 1251 N95-20128

Copper metallization of stainless steels
[DE95-001496] p 1256 N95-21300

METALLOGRAPHY

Application of a dimensionless parameter model for Laser Beam Welding
[DE94-018902] p 1378 N95-20048

Microstructures and tensile properties of as-cast iron-aluminide alloys
[DE94-017868] p 1252 N95-20359

Effect of heat treatment temperature on creep-rupture properties of Fe3Al-based alloys
[DE94-017904] p 1253 N95-20375

A new metallographic procedure for edge retention of enclosed surfaces
[DE94-017549] p 1261 N95-22048

METALLURGY

Fusion welding of advanced borated stainless steels
[DE94-019037] p 1378 N95-20053

METALORGANIC CHEMICAL VAPOR DEPOSITION

High-efficiency, deep-junction, epitaxial InP solar cells on (100) and (111)B InP substrates
p 1316 N95-20507

P/N InP solar cells on Ge wafers
p 1317 N95-20511

Radiation effects on p+n InP junctions grown by MOCVD p 1319 N95-20520

Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs
p 1323 N95-20542

Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543

Application of IRIS to semiconductor plasma processing
[DE95-003591] p 1562 N95-22225

METALS

Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964

Monitoring activities in the framework of the Dutch National Air Quality Monitoring Network in 1994
[PB95-131884] p 1406 N95-21351

Simulations of metal dissolution and corrosion
[DE94-019295] p 1257 N95-21476

Corrosion resistance and behavioral characteristics of metals exposed to 70 percent by weight sulfuric acid at elevated temperatures
[DE95-001724] p 1259 N95-21740

A multisite interaction expansion of the total energy in metals
[DE94-017175] p 1262 N95-22313

METAMORPHISM (GEOLOGY)

Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782

Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784

Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790

METASTABLE STATE

Chemical lasers emitting in the visible spectrum: Metastable oxygen reactions and YOSHIDA laser
[PB95-104485] p 1372 N95-20983

Thermodynamic analysis of stable and metastable equilibrium diagrams of the Cu-Cr system
[PB95-127775] p 1255 N95-21111

Metastable bcc phase formation in the Nb-Cr-Ti system
[DE94-016212] p 1255 N95-21137

METEORITES

Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819

Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128

METEORITIC COMPOSITION

Alkali element depletion by core formation and vaporization on the early Earth p 1421 N95-21804

Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819

He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821

METEOROID CONCENTRATION

An experimental determination of meteor daily arrival rate variation
[AD-A279484] p 1600 N95-21679

METEOROID SHOWERS

The relative importance of meteor burst and other distance polar cap propagation modes in the low VHF band p 1293 N95-20928

METEOROIDS

The relative importance of meteor burst and other distance polar cap propagation modes in the low VHF band p 1293 N95-20928

An experimental determination of meteor daily arrival rate variation
[AD-A279484] p 1600 N95-21679

Atmospheres of the Moon and Mercury
p 1419 N95-21794

METEOROLOGICAL BALLOONS

Comparison of meteorological data with fitted values extracted from projectile trajectory
[AD-A285921] p 1428 N95-19989

METEOROLOGICAL CHARTS

Mariners Weather Log, volume 38, number 3, summer 1994
[PB94-209541] p 1428 N95-20099

METEOROLOGICAL PARAMETERS

Effects of meteorology on concentrations of acid aerosols
[PB94-209749] p 1400 N95-19965

Comparison of meteorological data with fitted values extracted from projectile trajectory
[AD-A285921] p 1428 N95-19989

Meso-scale cooling effects of high albedo surfaces: Analysis of meteorological data from White Sands National Monument and White Sands Missile Range
[DE94-018535] p 1429 N95-20782

Line-of-sight multipath propagation measurements at 15 GHz over 500 MHz bandwidth p 1296 N95-20944

Proceedings of the Cloud Impacts on DOD Operations and Systems 1993 Conference (CIDOS 1993)
[AD-A286658] p 1430 N95-20974

Atmospheric stability and its influence on air quality in small communities in northern Sweden
[PB95-131652] p 1405 N95-21181

Applicability of the ECMWF rain height and rainfall rate data to the prediction of low-availability rain attenuation in Europe
[PB95-127684] p 1430 N95-21413

METEOROLOGICAL RADAR

An evaluation of 915-MHz radar wind profiler/RASS by tower and sodar measurements
[DE94-018913] p 1364 N95-20320

Boundary layer cloud studies in support of ASTEX
[AD-A285947] p 1429 N95-20395

Radar studies of aviation hazards
[AD-A285845] p 1203 N95-21831

METEOROLOGY

Effects of meteorology on concentrations of acid aerosols
[PB94-209749] p 1400 N95-19965

Comparison of meteorological data with fitted values extracted from projectile trajectory
[AD-A285921] p 1428 N95-19989

Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea
[AD-A280095] p 1433 N95-21018
Atmospheric stability and its influence on air quality in small communities in northern Sweden
[PB95-131652] p 1405 N95-21181

METHANE
Direct aromatization of methane
[DE94-017131] p 1233 N95-19924
Natural gas cleanup: Evaluation of a molecular sieve carbon as a pressure swing adsorbent for the separation of methane/nitrogen mixtures
[DE94-012263] p 1234 N95-20135
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353
Novel catalysts for methane activation
[DE95-002639] p 1237 N95-20438
The Carnol process for methanol production and utilization with reduced CO2 emissions
[DE94-016808] p 1283 N95-21211
Single-collision studies of energy transfer and chemical reaction
[DE95-002943] p 1244 N95-21517
Numerical study of contaminant effects on combustion of hydrogen, ethane, and methane in air
[NASA-TM-106844] p 1284 N95-22114
Natural gas combustion chemistry mechanisms research
[PB95-111670] p 1247 N95-22150
Transient studies of low temperature catalysts for methane conversion
[DE95-003560] p 1247 N95-22224
Development and demonstration of advanced technologies for direct electrochemical oxidation of hydrocarbons (methanol, methane, propane)
[AD-A285094] p 1224 N95-22474

METHOD OF MOMENTS
Moment approach to high-order accelerator beam optics
[DE95-001018] p 1536 N95-21331
Conditional statistics in a turbulent premixed flame derived from direct numerical simulation
p 1249 N95-22438

METHODOLOGY
Methodology for ESCA analysis of electromigration
[AD-A286229] p 1241 N95-21168
The navigation toolkit
[NASA-CR-197290] p 1205 N95-22161

METHYL ALCOHOL
Thermodynamic and NMR studies of solvent effect on enantiomeric recognition for a chiral organiz ammonium cation by chiral diketopyridino-18-Crown-6 type ligands at 25.0 C
[AD-A279893] p 1223 N95-20592
Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596
The Carnol process for methanol production and utilization with reduced CO2 emissions
[DE94-016808] p 1283 N95-21211
Technical and economic evaluation of natural gas based synthesis gas production technologies
[PB95-130597] p 1242 N95-21426
Catalytic reactions of synthesis gas. Part 3. Determination of reaction kinetics
[PB95-127759] p 1248 N95-22329
Development and demonstration of advanced technologies for direct electrochemical oxidation of hydrocarbons (methanol, methane, propane)
[AD-A285094] p 1224 N95-22474

METHYL CHLORIDE
Radiative forcing calculations for CH3Cl
[DE94-019018] p 1402 N95-20355

METHYL COMPOUNDS
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
New chiral pyrimidino-crown ether ligands
[AD-A279892] p 1223 N95-20590
Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621
Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2)
[AD-A279792] p 1224 N95-20660
Gas-phase generation of zinc sulfide particles using a single-source precursor
[AD-A279700] p 1239 N95-20712
Dynamic NMR studies of restricted arene rotation in the chromiu tricarbonyl thiophene and selenophene complexes
[DE95-001656] p 1257 N95-21399
Translational-energy-resolved studies of photographed carrier-induced reactions on semiconductor surfaces
[DE95-002944] p 1573 N95-21444
Single-collision studies of energy transfer and chemical reaction
[DE95-002943] p 1244 N95-21517

METHYLENE
Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596

METRIC SPACE
Linear invariance of Lindeloef numbers
[PB95-134540] p 1494 N95-21956

METROLOGY
Development, fabrication, and metrology of the electro-optical breadboard model for the reflection grating array of the XMM grating spectrometer
[DE94-016605] p 1543 N95-20612

MEXICO
Dust Bowl migration as an analog for possible global warming-induced migration from Mexico
[DE94-017472] p 1401 N95-20089

MICA
Chemical interactions between protein molecules and polymer membrane materials
[DE95-001808] p 1224 N95-21746

MICE
Enhancement of cell mediated immunity through non-specific immunostimulation with liposome encapsulated gamma-interferon
[AD-A279667] p 1442 N95-20602

MICHELSON INTERFEROMETERS
Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418
Method for characterization of optical waveguide devices using partial coherence interferometry
[AD-D016525] p 1544 N95-21466
Signal to noise improvements with a new Far-IR rapid-scan Michelson Interferometer
[DE95-002416] p 1367 N95-21638

MICROANALYSIS
The in-situ fracture and Auger analysis of Nicalon fibers
[DE94-017771] p 1226 N95-20357
Surface inspection using Fourier Transform Infrared Spectroscopy
[DE95-001699] p 1244 N95-21571
A transmission electron microscope characterization of sodium sulfate hot corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composite
[AD-A286164] p 1231 N95-22038

MICROBALANCES
Generation of micro-domains in AT-cut quartz by thermal processing and the effect on resonator modes
[DE94-017344] p 1564 N95-20087

MICROBIOLOGY
Microbiology and physiology of anaerobic fermentations of cellulose
[DE95-002899] p 1438 N95-20917

MICROCHANNEL PLATES
Unique microchannel plate process doubles MCPI resolution
[DE94-017507] p 1337 N95-22427

MICROCHANNELS
Microchannel heat pipe cooling of modules
p 1211 N95-20649
An augmented Young-Laplace model of an evaporating meniscus in a micro-channel with high heat flux
[NASA-CR-197622] p 1340 N95-20796

MICROCLIMATOLOGY
Microclimate cooling effect on perceived exertion in four heat/exercise scenarios
[AD-A285549] p 1444 N95-21160

MICROCRACKS
Fracture analysis of an all-ceramic bearing system
[AD-A285056] p 1269 N95-20486
The role of microcracking on the crack growth resistance of brittle solids and composites
[DE95-001678] p 1231 N95-21736

MICROCRYSTALS
International collaboration program on innovative chemical processing of superior electronic and optical materials
[AD-A285122] p 1226 N95-20105

MICROELECTRONICS
Solid state research
[AD-A279662] p 1567 N95-20426
The demise of plastic encapsulated microcircuit myths
p 1209 N95-20640
Lightweight electronic enclosures using composite materials p 1213 N95-20656
Method of fabricating a microelectronic photomultiplier device with integrated circuitry
[AD-D016530] p 1325 N95-20726
HTS Josephson technology on silicon with application to high speed digital microelectronics
[AD-A285964] p 1328 N95-21178
RF vacuum microelectronics based on thin film edge-emitter technology
[AD-A279539] p 1331 N95-21690
Surface technology programme
[PB95-132866] p 1262 N95-22174
Manufacturing Technology Bulletin, July 1994
[DE94-017775] p 1605 N95-22262
Parallel nanometer scale fabrication
[DE95-002122] p 1336 N95-22284

MICROGRAVITY
Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952
Modeling platform dynamics and physiological response to short arm centrifugation
[AD-A279640] p 1442 N95-20457
Microgravity: Teacher's guide with activities for physical science
[NASA-EG-103] p 1285 N95-21322
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 3: Sintered reaction bonded silicon nitride ceramic
[AD-A285773] p 1388 N95-22411

MICROINSTRUMENTATION
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507

MICROMACHINING
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507
Surface micromachined capacitive tactile image sensor
[PB95-108031] p 1288 N95-21633

MICROMECHANICS
Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727
Micromechanical approach to transformation toughening in ceramics
[PB95-135422] p 1273 N95-20976
Time-dependent deformation of titanium metal matrix composites
[NASA-CR-195030] p 1230 N95-21363
Surface micromachined capacitive tactile image sensor
[PB95-108031] p 1288 N95-21633

MICROMETEOROLOGY
Effects of microphysics and radiation on mesoscale processes of a midlatitude squall line
[DE94-014732] p 1429 N95-20381
Micrometeorological methods for measurements of mercury emissions over contaminated soils
[DE94-017679] p 1411 N95-22342

MICROPHONES
Wavelet-based acoustic recognition of aircraft
[DE94-017701] p 1503 N95-20019

MICROPOROSITY
Mechanism of the amperometric response of a proposed glucose sensor based on a polypyrrole-tubule-impregnated membrane
[AD-A279836] p 1365 N95-20431
Transport phenomena in the micropores of plug-type phase separators
[NASA-TM-108479] p 1340 N95-20561

MICROPROCESSORS
Non-intrusive SCSI status sensing system
[AD-D016242] p 1476 N95-21307
Method of sensing target status in a local area network
[AD-D016248] p 1478 N95-22090
Method of retrieving and storing computer peripheral data
[AD-D016251] p 1591 N95-22098
Data sampling for a burst mode communications system
[AD-A286098] p 1309 N95-22229

MICROPULSATIONS
Time-resolved study of sideband generation and transition to chaos on an infrared FEL
[DE95-002336] p 1374 N95-21528

MICROSCOPES
X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798

Laboratory characterization of Woelter x ray optics
[DE94-016969] p 1562 N95-22191
MICROSCOPY
Microscopic theory of normal liquid He-3
[DE94-629047] p 1527 N95-22179
MICROSEISMS
Computer programs for analysis of geophysical data
[DE95-002472] p 1415 N95-21511
MICROSTRIP ANTENNAS
The design and analysis of a phased array microstrip antenna for a low earth orbit communication satellite
[AD-A284791] p 1289 N95-20065
Analysis of a microstrip reflectarray antenna for microspacecraft applications p 1305 N95-21541
MICROSTRUCTURE
Mixed-sputter deposition of Ni-Ti-Cu shape memory films
[DE94-017296] p 1250 N95-19900
The environmental durability of fiber reinforced ceramic matrix composites
[AD-A283750] p 1225 N95-19919
Recognition of subsurface defects in machined ceramics by application of neural networks to laser scatter patterns
[DE94-018373] p 1264 N95-20018
Properties of whisker-reinforced ceramics
[DE94-017759] p 1264 N95-20024
Cr2Nb development
[DE94-018697] p 1250 N95-20043
Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047
Application of a dimensionless parameter model for Laser Beam Welding
[DE94-018902] p 1378 N95-20048
Post-irradiation deformation characteristics of heavy-ion irradiated 304L SS
[DE94-017462] p 1251 N95-20088
Development of superplasticity in 5083 aluminum with additions of Mn and Zr
[DE94-017474] p 1251 N95-20090
Reactions and microstructure at ceramic/metal interfaces
[DE94-014287] p 1265 N95-20138
Enhancement of corrosion resistance and mechanical properties of light-weight metals through the use of graded nonequilibrium microstructures
[AD-A286320] p 1251 N95-20178
Tritium and decay helium effects on the fracture toughness properties of types 316L, 304L and 21Cr-6Ni-9Mn stainless steels
[DE95-001248] p 1252 N95-20216
Microstructural contributions to the fracture resistance of silicon nitride ceramics
[DE94-018955] p 1267 N95-20323
Microstructures and tensile properties of as-cast iron-aluminide alloys
[DE94-017868] p 1252 N95-20359
Effect of heat treatment temperature on creep-rupture properties of Fe3Al-based alloys
[DE94-017904] p 1253 N95-20375
Boron carbide-based coatings on graphite for plasma facing components
[DE94-017976] p 1269 N95-20570
Atomically resolved structure and bonding of delta-doped boron layers on Si(001)
[AD-A279820] p 1513 N95-20586
The processing and mechanical properties of high temperature/high performance composites. Processing/property correlations, book 4
[AD-A279739] p 1228 N95-20802
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
2nd International ADI seminar
[PB95-127734] p 1255 N95-21108
Microstructural design for tough ceramics
[AD-A285634] p 1273 N95-21152
Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167
Study of improved critical currents and mechanical properties in the Y-Ba-Cu-O superconductor with silver or Y2BaCuO3 or 211 dispersions
[AD-A285609] p 1502 N95-21194
X-ray studies of microstructures in semiconductor and superconducting materials
[DE95-001802] p 1572 N95-21279
Characterization of poly(tetrafluoroethylene) surfaces by atomic force microscopy: Results and artifacts
[DE95-000742] p 1242 N95-21309
Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398
Molecular-based study of solutions in supercritical solvents
[DE94-019326] p 1580 N95-21420
Creep behavior in SiC whisker-reinforced alumina composite
[DE95-001071] p 1231 N95-21776
Ceramic technology for advanced heat engines
[DE95-000950] p 1278 N95-21937
A new metallographic procedure for edge retention of enclosed surfaces
[DE94-017549] p 1261 N95-22048
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126
Atom probe field ion microscopy of type 308 CRE stainless steel welds
[DE94-019162] p 1261 N95-22127
Surface technology programme
[PB95-132866] p 1262 N95-22174
Gravitational effects on the development of weld-pool and solidification microstructures
[DE94-017772] p 1285 N95-22261
Modeling of fundamental phenomena in welds
[DE94-017859] p 1381 N95-22268
Local texture and strongly linked conduction in spray-pyrolyzed TlBa2Ca2Cu3O(8+x) deposits
[DE94-017887] p 1578 N95-22269
MICROWAVE AMPLIFIERS
Design and construction of the HSX experiment
[DE94-018657] p 1552 N95-20348
Development of an annular electron beam HPM amplifier
[AD-A286646] p 1327 N95-20905
Development status of an intense beam klystron
[DE95-000745] p 1329 N95-21395
A 500 MW annular beam relativistic klystron
[DE95-000867] p 1334 N95-22011
MICROWAVE ATTENUATION
MTX final report
[DE95-002960] p 1559 N95-21451
MICROWAVE CIRCUITS
Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A285611] p 1312 N95-19894
Design and packaging aspects of microwave bandwidth lithium niobate modulators
[DE94-016602] p 1313 N95-20119
High temperature superconducting films and multilayers for electronics
[AD-A279545] p 1331 N95-21693
MICROWAVE EQUIPMENT
Proton irradiation effects on advanced digital and microwave III-V components
[DE94-018742] p 1314 N95-20338
Materials processing using a variable frequency microwave furnace
[DE95-001420] p 1271 N95-20761
High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254
MICROWAVE FREQUENCIES
An application of wavelet transform for decomposition of millimeter-wave spectroscopic signals
[DE94-018366] p 1402 N95-20247
A low temperature, ultrahigh vacuum, microwave-frequency-compatible scanning tunneling microscope
[AD-A279869] p 1365 N95-20413
Small cavity nonresonant tunable microwave-frequency alternating current scanning tunneling microscope
[AD-A285752] p 1328 N95-21218
Development of a portable ice-thickness measuring instrument
[AD-A279472] p 1433 N95-21291
MICROWAVE IMAGERY
Atlas of SSM/I satellite ice concentration interpolated to operational ice model domains of the Arctic for 1993
[AD-A280183] p 1432 N95-20012
Deriving earth science products from SSM/I
[NASA-CR-197299] p 1389 N95-20156
Passive millimetre wave imaging: A review
[AD-A279275] p 1303 N95-21491
MICROWAVE LANDING SYSTEMS
Minima reduction simulation test results
[AD-A285626] p 1204 N95-21148
MICROWAVE RADIOMETERS
Deriving earth science products from SSM/I
[NASA-CR-197299] p 1389 N95-20156
MICROWAVE SCATTERING
Applied mathematical problems in modern electromagnetics
[AD-A286448] p 1303 N95-21462
X-band microwave backscattering from ocean waves
[DE94-016719] p 1309 N95-22241
Design and construction of a Ka-band scatterometer
[AD-A286296] p 1368 N95-22322
MICROWAVES
Microwave sintering of ZrO2-12 mol% CeO2
[DE94-018709] p 1265 N95-20226
An application of wavelet transform for decomposition of millimeter-wave spectroscopic signals
[DE94-018366] p 1402 N95-20247
Applied physics research for innovation in pulsed power
[AD-A285392] p 1324 N95-20610
Modelling of microwave propagation and clutter in a maritime environment p 1295 N95-20938
Time behavior and frequency response of the microwave propagation channel during multipath propagation
p 1296 N95-20942
Angle diversity on digital microwave links: Antenna design and experimental results p 1297 N95-20947
Investigation on the backscattering properties of Finnish boreal forests at C- and X-band: A semi-empirical modeling approach
[PB95-127692] p 1389 N95-21105
Resonant photon-graviton conversion in EM fields: From earth to heaven
[DE95-002784] p 1301 N95-21241
MTX final report
[DE95-002960] p 1559 N95-21451
Applied mathematical problems in modern electromagnetics
[AD-A286448] p 1303 N95-21462
Comparison of properties of sintered and sintered reaction-bonded silicon nitride fabricated by microwave and conventional heating
[DE95-001426] p 1275 N95-21501
The efficiency calibration of the DSS-24 34-meter beam-waveguide antenna p 1305 N95-21542
Design and modelling of a link monitoring mechanism for the Common Data Link (CDL)
[AD-A286167] p 1309 N95-22245
Studies of the microwave resistivity of kappa-(BEDT-TTF)2Cu(N(CN)2)Cl
[DE95-002980] p 1262 N95-22291
MIGRATION
Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016
Dust Bowl migration as an analog for possible global warming-induced migration from Mexico
[DE94-017472] p 1401 N95-20089
MILITARY AVIATION
Forecasting aircraft mishaps using monthly maintenance reports
[AD-A286049] p 1203 N95-22417
MILITARY OPERATIONS
Bomber force 2000: Operational concepts for long-range combat aircraft
[AD-A279378] p 1206 N95-20181
Highly survivable communications: Complementary media packet switched networks p 1292 N95-20922
Mitigation of the effects of F layer regularities by using multiple paths p 1298 N95-20951
Sustaining the health and performance of soldiers/warfighters deployed to harsh environments
[AD-A286270] p 1446 N95-22004
MILITARY TECHNOLOGY
NRL review, 1994
[AD-A279832] p 1605 N95-20182
Unmanned aerial vehicles
[AD-A286190] p 1206 N95-20329
Standard Hardware Acquisition and Reliability Program (SHARP) advanced SEM-E packaging
p 1208 N95-20633
Military standard: Test requirements for launch, upper-stage, and space vehicles
[AD-A286627] p 1218 N95-20770
Space technology: Force multiplier or false sense of security
[AD-A279726] p 1217 N95-20995
Policies concerning military and civilian research and technology applications
[PB95-131355] p 1585 N95-21427
Space systems technology working group: Executive report
[AD-A285778] p 1217 N95-22413
MILLIMETER WAVES
An application of wavelet transform for decomposition of millimeter-wave spectroscopic signals
[DE94-018366] p 1402 N95-20247
Simulation of the impact of atmospheric turbulences on millimeter-wave communications systems
p 1295 N95-20939
Measurements of radar backscatter from the ocean surface at 94 GHz as a function of wind speed, direction and the modulation by the ocean waves during the SAXON-FPN experiment p 1299 N95-20960
MTX final report
[DE95-002960] p 1559 N95-21451

Passive millimetre wave imaging: A review
[AD-A279275] p 1303 N95-21491
Millimeter wave front-end figure of merit, part 1
[AD-A279093] p 1307 N95-21915
Design and construction of a Ka-band scatterometer
[AD-A286296] p 1368 N95-22322

MILLING MACHINES
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422

MIMD (COMPUTERS)
Hindered settling computations using a parallel boundary element method
[DE94-014286] p 1339 N95-20137
Performance issues for engineering analysis on MIMD parallel computers
[DE94-015769] p 1474 N95-20150
MPI workshop
[DE94-017883] p 1475 N95-20366
RALPAR-RAL mesh partitioning program version 1.1
[PB95-129847] p 1475 N95-20435
Direct simulation and graphics post-processing of three-dimensional turbulent flows p 1352 N95-21098
The message passing version of the parallel Community Climate Model
[DE94-019158] p 1407 N95-21608
Fast parallel tree codes for gravitational and fluid dynamical N-body problems
[AD-A286480] p 1358 N95-22290

MIMO (CONTROL SYSTEMS)
Modeling and identification of parallel and feedback nonlinear systems
[DE95-001006] p 1481 N95-20812

MINERALOGY
Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819

MINERALS
Analysis of experimentally shocked minerals by NMR spectroscopy
[DE95-002955] p 1573 N95-21449
Impact degassing of water and noble gases from silicates p 1416 N95-21780
Modeling the effect of water on mantle rheology
p 1417 N95-21783
Structure and stability of hydrous minerals at high pressure p 1417 N95-21786
Phase E in a water-saturated peridotite system at 9.3 GPa p 1420 N95-21799
Subduction and volatile recycling in Earth's mantle
p 1421 N95-21802
Volatiles in the deep Earth: An experimental study using the laser-heated diamond cell p 1421 N95-21803
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813
Subduction of hydrated basalt of the oceanic crust: Implications for recycling of water into the upper mantle and continental growth p 1423 N95-21814
Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128

MINIMA
Ab initio potential energy surface for H + OCS reactions: Extended basis sets and correlation treatment
[AD-A286420] p 1247 N95-22207

MINIMAL SURFACES
Minimal square spectral factors
[PB95-132726] p 1495 N95-22032

MINIMAX TECHNIQUE
Minimax optimal stop rule in reliability checking
[PB95-134557] p 1383 N95-21961

MINORITY CARRIERS
Physical Si(1-x)Ge(x)/Si heterojunction bipolar transistor model for device and circuit simulation
[PB95-110896] p 1312 N95-19934

MIR SPACE STATION
STS 63 flight day 4 highlights/MIR-Shuttle rendezvous
[NASA-TM-110512] p 1219 N95-21113
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558

MIRRORS
Liquid-metal pin-fin pressure drop by correlation in cross flow
[DE94-017086] p 1338 N95-19923
Beryllium based multilayers for normal incidence extreme ultraviolet reflectivity
[DE94-015560] p 1274 N95-21175
Defect geometries and laser-induced damage in multilayer coatings
[DE94-017695] p 1377 N95-22343

MISSILE DEFENSE
Enhanced vehicle and event typing software, phase 1
[AD-A284862] p 1458 N95-20070
Issues in the flight qualification of a space power reactor
[DE95-001606] p 1223 N95-21840

MISSILES
A computer code (SKINTEMP) for predicting transient missile and aircraft heat transfer characteristics
[AD-A286044] p 1341 N95-21001

MISSION PLANNING
Program control on the Tropical Rainfall Measuring Mission p 1584 N95-20750
A strategy of cost control for Mariner Venus/Mercury 1973 p 1585 N95-20751
Program control for mission success
p 1585 N95-20753
STS 63 flight day 4 highlights/MIR-Shuttle rendezvous
[NASA-TM-110512] p 1219 N95-21113
Power systems for future missions
[NASA-CR-195320] p 1222 N95-21531
Electric and Hybrid Vehicle Program: Site Operator Program
[DE95-001925] p 1332 N95-21731
Tethered satellite: Forces and motion
[NASA-TM-110518] p 1220 N95-21858
Common mapping system media study
[AD-A279086] p 1390 N95-21912

MIST
A review of water mist technology for fire suppression
[AD-A285738] p 1202 N95-20071

MIXING LAYERS (FLUIDS)
Effects of non-unity Lewis numbers in diffusion flames
p 1249 N95-21036
Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037
Comparison of DNS and LES of transitional and turbulent compressible flow: Flat plate and mixing layer
p 1347 N95-21066
Direct numerical simulation of turbulent flow in a sudden pipe expansion p 1347 N95-21067
Entrainment in a shear-free turbulent mixing layer
p 1350 N95-21083
Mixing and dynamics of the Mediterranean outflow
[AD-A279803] p 1434 N95-21306
High resolution properties of the equatorial Pacific marine atmospheric boundary layer from lidar and radiosonde observations
[DE95-001028] p 1426 N95-21875
Nonlinear interaction between a pair of oblique modes in a supersonic mixing layer: Long-wave limit
[NASA-CR-197380] p 1357 N95-22173
Forced free-shear layer measurements
p 1362 N95-22460

MIXTURES
Theoretical and experimental study of mixed solvent electrolytes
[DE94-017605] p 1237 N95-20384

MOBILE COMMUNICATION SYSTEMS
A group communication approach for mobile computing mobile channel: An ISIS tool for mobile services
[AD-A279785] p 1290 N95-20306
A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934
Experimental study of the helicopter-mobile radioelectrical channel and possible extension to the satellite-mobile channel p 1296 N95-20945

MOBILITY
Robust agent control of an autonomous robot with many sensors and actuators
[AD-A280148] p 1479 N95-20011
Optimal control of a two wheeled mobile robot
[AD-A286130] p 1485 N95-22233

MODELS
A framework for segmentation using physical models of image formation
[AD-A279900] p 1543 N95-20564
SPICE macro model of a spryton with MOSFET's in the avalanche mode
[DE94-015744] p 1555 N95-21134
Formal model for the dynamics of compositional reasoning systems
[PB95-132056] p 1482 N95-21267
Consortia for Known Good Die (KGD), phase 1
[AD-A279407] p 1383 N95-21933
Conference proceedings. Defense Modeling and Simulation Office Information/Data Base (I/DB) Task Group Meetings, and notes from the previous two I/DB meetings
[AD-A279097] p 1591 N95-22069
Solving the inverse problem in terrain modeling
[AD-A285860] p 1391 N95-22131

MODEMS
DAMSON: A system to measure multipath dispersion, Doppler spread and Doppler shift on multi-mechanism communications channels p 1299 N95-20955

MODULATION
High power spectral and spatial beam control using self-phase modulation and a multisegment monochromator
[DE94-016604] p 1531 N95-20120
Evaluation of superconducting quantum interference devices interfaced with digital signal processing electronics for biomagnetic applications
[DE94-016186] p 1289 N95-20164
Complementary GaAs junction-gated heterostructure field effect transistor fabrication for integrated circuits
[DE95-001522] p 1327 N95-20882
Problems of coding in multipath channels
p 1294 N95-20930
Development of a fast sampling system for estimation of impulse responses of mobile radio channels
p 1296 N95-20943
Measurements of radar backscatter from the ocean surface at 94 GHz as a function of wind speed, direction and the modulation by the ocean waves during the SAXON-FPN experiment p 1299 N95-20960
Development of ferroelectric liquid crystals with enhanced nonlinear optical properties
[AD-A279988] p 1571 N95-20965
Comparison of calculated with measured dynamic aperture
[DE95-002863] p 1534 N95-21246
Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418

MODULATORS
A simple analytical model for asynchronous dense WDM/OOK systems
[AD-A283725] p 1289 N95-19973
Design and packaging aspects of microwave bandwidth lithium niobate modulators
[DE94-016602] p 1313 N95-20119
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Resonant tunneling quantum well integrated optical waveguide modulator/switch
[AD-A285142] p 1542 N95-20501
Applied physics research for innovation in pulsed power
[AD-A285392] p 1324 N95-20610
Heterostructure quantum confined Stark effect electrooptic modulators operating at 938 nm
[AD-A279342] p 1581 N95-21928
Electro-optic effect in the PESO acousto-optic modulator
[AD-A286355] p 1548 N95-22255

MODULES
FASTPACK: Optimized solutions for modular avionics derived from a parametric study. Part 2: Avionics
p 1209 N95-20635
Ultra-Reliable Digital Avionics (URDA) processor
p 1209 N95-20638
Assuring Known Good Die (KGD) for reliable, cost effective MCMs p 1210 N95-20644
Modular supplies for a distributed architecture --- avionics packaging p 1213 N95-20657
Intelligent interactive project management system
[PB95-132684] p 1586 N95-21982
Verification of knowledge-based reasoning modules
[PB95-132692] p 1470 N95-21983
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285775] p 1336 N95-22412

MODULUS OF ELASTICITY
Determination of layer moduli from falling weight deflectometer measurements
[PB95-129748] p 1286 N95-21333
Determination of the complex elastic moduli of materials using a free-free bar technique
[AD-A279861] p 1281 N95-22387
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 3: Sintered reaction bonded silicon nitride ceramic
[AD-A285773] p 1388 N95-22411

MOISTURE
FTIR spectroscopy for the determination of water in corrosive gases
[DE94-014658] p 1235 N95-20139
Development of solid state moisture sensors for semiconductor fabrication applications
[DE94-015771] p 1364 N95-20398

MOISTURE CONTENT
The vertical distribution of heating in the tropical atmosphere
[AD-A285934] p 1429 N95-20391

MOISTURE METERS
Conceptual design analyses for Hanford Site deployable remote spectroscopy systems
[DE95-002078] p 1243 N95-21473

MOLECULAR BEAM EPITAXY
Surface stress, morphological development, and dislocation nucleation during strained-layer epitaxy
[DE94-017682] p 1565 N95-20245

Semiconductor laser joint study program with Rome Laboratory
[AD-A285858] p 1369 N95-20379
Photoluminescence under pressure and annealing of nitrogen-doped ZnSe
[DE95-002355] p 1568 N95-20630
InTISb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774
Growth and electrical and far-infrared properties of wide electron wells in semiconductors
[AD-A279409] p 1333 N95-21917
Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

MOLECULAR BEAMS
State-to-state collisional dynamics of atmospheric species
[AD-A285053] p 1370 N95-20484
Experimental investigation of molecular beam injection in HL-1 tokamak
[DE94-631456] p 1556 N95-21165

MOLECULAR BIOLOGY
Hierarchical structures in biology as a guide for new materials technology
[AD-A286317] p 1265 N95-20176
Proposal for a tutorial on Minimal Length Encoding (MLE) in molecular biology
[DE94-015076] p 1438 N95-21376
Life Sciences Division and Center for Human Genome Studies
[DE94-017796] p 1440 N95-22065
Structures and functions of oligosaccharins
[DE95-003195] p 1440 N95-22220

MOLECULAR CHAINS
A model for electron nuclear dynamics of a monatomic chain
[AD-A279652] p 1506 N95-19960
The electronic properties of polysilanes
[DE94-006464] p 1265 N95-20121
Orientation studies of polyolefins by IR-dichroism
[PB95-104386] p 1236 N95-20256
Scanning tunneling microscopy studies of self-assembled monolayers of alkanethiols on gold
[AD-A279910] p 1253 N95-20577

MOLECULAR CLOUDS
An IRAS Hires study of low mass star formation in the Taurus molecular ring p 1593 N95-21767
Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769
Arcmimute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771
Luminous radio-quiet sources in the W3(MAIN) cloud core p 1594 N95-21773
Solar system formation and the distribution of volatile species p 1421 N95-21806

MOLECULAR CLUSTERS
The energetics and dynamics of free radicals, ions, and clusters
[DE94-018101] p 1244 N95-21701
The enhancement of metallic silver monomer evaporation by the adhesion of polar molecules to silver nanocluster ions
[AD-A284936] p 1281 N95-22470

MOLECULAR COLLISIONS
Recombination, ion-molecule collisions and (laser assisted) electron-excited atom collisions
[AD-A285604] p 1517 N95-21216
Modeling of collision induced absorption spectra of CO2-CO2 pairs for planetary atmosphere of Venus
[NASA-CR-197373] p 1601 N95-22338

MOLECULAR DIFFUSION
Metallic ions and atoms in the upper atmosphere
[AD-A285229] p 1414 N95-20498

MOLECULAR DYNAMICS
A model for electron nuclear dynamics of a monatomic chain
[AD-A279652] p 1506 N95-19960
Density functional studies of decomposition processes of energetic molecules
[AD-A286185] p 1510 N95-20327
Theoretical and experimental study of mixed solvent electrolytes
[DE94-017605] p 1237 N95-20384
Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621
Crystalline beams
[DE95-002656] p 1569 N95-20793
Electron-nuclear dynamics of molecular systems
[AD-A279649] p 1516 N95-21120
Calculation of atom-centered partial charges for heme
[DE94-014447] p 1520 N95-21375
A new parallel method for molecular dynamics simulation of macromolecular systems
[DE94-018621] p 1529 N95-22315
Modeling of collision induced absorption spectra of CO2-CO2 pairs for planetary atmosphere of Venus
[NASA-CR-197373] p 1601 N95-22338

MOLECULAR EXCITATION
Investigation of laser-induced retinal damage: Wavelength and pulsewidth dependent mechanisms
[AD-A286066] p 1443 N95-20848
Two-dimensional imaging of OH in a lean burning high pressure combustor
[NASA-TM-106854] p 1214 N95-21383
Electron attachment to excited molecules
[DE94-019124] p 1522 N95-21519

MOLECULAR INTERACTIONS
Atomic orbital basis sets for molecular interactions
[AD-A279609] p 1506 N95-19959
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 1: Transition properties in HCl
[AD-A285988] p 1239 N95-20613
Ion-molecule chemistry related to plasma deposition and etching of silicon
[AD-A279749] p 1514 N95-20804
A new parallel method for molecular dynamics simulation of macromolecular systems
[DE94-018621] p 1529 N95-22315

MOLECULAR IONS
Resonant charge transfer in hyperthermal atomic and molecular ion-surface collisions
[AD-A284937] p 1530 N95-22471

MOLECULAR ORBITALS
Atomic orbital basis sets for molecular interactions
[AD-A279609] p 1506 N95-19959
A model for electron nuclear dynamics of a monatomic chain
[AD-A279652] p 1506 N95-19960
Electron-nuclear dynamics of molecular systems
[AD-A279649] p 1516 N95-21120

MOLECULAR OSCILLATIONS
The atmospheric neutrino anomaly in Soudan 2
[DE94-019288] p 1604 N95-21475
Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064

MOLECULAR RELAXATION
The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers
[DE94-015742] p 1268 N95-20396
NMR relaxation behavior of the head group of SHBS in lamellar liquid crystals
[AD-A279124] p 1574 N95-21599

MOLECULAR SPECTROSCOPY
Neutron molelcular spectroscopy: Future prospects
[PB95-130357] p 1518 N95-21227

MOLECULAR STRUCTURE
Hierarchical structures in biology as a guide for new materials technology
[AD-A286317] p 1265 N95-20176
Hierarchical structure in advanced polymers. Phase behaviour, orientation, properties
[AD-A285938] p 1268 N95-20392
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
Scanning tunneling microscopy studies of self-assembled monolayers of alkanethiols on gold
[AD-A279910] p 1253 N95-20577
Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2)
[AD-A279792] p 1224 N95-20660
Chemical Structure and Dynamics program
[DE95-001117] p 1403 N95-20834
Electron-nuclear dynamics of molecular systems
[AD-A279649] p 1516 N95-21120
New methods for large scale local and global optimization
[AD-A285635] p 1517 N95-21126
Molecular design concept for multi-kilovolt x-ray amplification
[DE95-001763] p 1374 N95-21743
Selenophene transition metal complexes
[DE95-001675] p 1260 N95-21841
Comparative computational analysis of some nitramine and difluoramine structures, dissociation energies and heats of formation
[AD-A286196] p 1525 N95-21878
Preparation and x-ray structure of Cp2Ti(PH2SiH2)(PMe3)
[AD-A286197] p 1246 N95-21879
Synthesis and structure of a novel bis-stibole
[AD-A286345] p 1224 N95-22252

MOLECULAR WEIGHT
Monomer mapping: A PC-based software tool facilitating the determination of monomer compositions from mass spectrometric molecular weight data
[PB95-132155] p 1275 N95-21470

MOLECULES
Chemical Structure and Dynamics program
[DE95-001117] p 1403 N95-20834
Calculated heats of formation of some predicted stable C, N, O, F molecules
[AD-A285957] p 1517 N95-21127
Ion-molecular spiraling collisions and termolecular recombination
[AD-A285633] p 1517 N95-21151
Electron attachment to excited molecules
[DE94-019124] p 1522 N95-21519
Auger spectrometry of atoms and molecules
[DE94-018052] p 1524 N95-21664
Molecular design concept for multi-kilovolt x-ray amplification
[DE95-001763] p 1374 N95-21743
The status of molecules
[DE95-000952] p 1526 N95-21939
Advanced diagnostics for plasma chemistry
[DE94-018936] p 1561 N95-22116
The enhancement of metallic silver monomer evaporation by the adhesion of polar molecules to silver nanocluster ions
[AD-A284936] p 1281 N95-22470

MOLTEN SALTS
Molten carbonate fuel cell product development test
[DE95-000005] p 1324 N95-20574
Chemistry and electrochemistry in Lewis acid and superacid ionic liquids
[AD-A279396] p 1246 N95-21931

MOLYBDENUM
Reflective masks for extreme ultraviolet lithography
[DE95-003427] p 1336 N95-22236
The thermal conductivity of silicon nitride with molybdenum disilicide additions
[DE94-017757] p 1247 N95-22260

MOLYBDENUM ALLOYS
Lower active metals loading for hydrotreating catalysts
[DE94-018907] p 1261 N95-22119

MOLYBDENUM COMPOUNDS
Third Intermetallic Matrix Composites Symposium, volume 350
[NASA-TM-110059] p 1225 N95-20001

MOLYBDENUM OXIDES
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712

MOMENTUM
Positron annihilation studies of organic superconductivity
[DE94-018371] p 1564 N95-20017
Transport and dynamics in toroidal fusion systems
[DE94-018653] p 1548 N95-20029
Large eddy simulation of channel flow using a vorticity transport subgrid model p 1348 N95-21076

MOMENTUM TRANSFER
Observation of non diffusive term of toroidal momentum transport in the JFT-2M tokamak
[DE94-770686] p 1555 N95-20989
Nonperturbative aspects of the quark-photon vertex
[DE94-012846] p 1520 N95-21315
Classical-quantum correspondence for ionization in fast ion-atom collisions
[DE95-000953] p 1526 N95-21940
The dynamic structure function of Bose liquids in the deep inelastic regime
[DE94-629077] p 1527 N95-22182

MONATOMIC MOLECULES
A model for electron nuclear dynamics of a monatomic chain
[AD-A279652] p 1506 N95-19960

MONITORS
First results from the final focus test beam
[DE95-002897] p 1535 N95-21255
Quartz resonator fluid monitors for vehicle applications
[DE94-018910] p 1367 N95-21546

MONOCHROMATORS
Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
[DE94-016879] p 1500 N95-20108
High power spectral and spatial beam control using self-phase modulation and a multisegment monochromator
[DE94-016604] p 1531 N95-20120
Thermal and deformation analyses of a novel cryogenically cooled monochromator for an Advanced Photon Source beamline
[DE94-016914] p 1527 N95-22190

MONOMERS
The synthesis and characterization of new mesogenic diacetylene monomers and their polymers
[AD-A286188] p 1267 N95-20328
The organic chemistry of conducting polymers
[DE94-018216] p 1270 N95-20680
Macromolecular and materials design using polyphosphazenes
[AD-A279781] p 1273 N95-20978
Monomer mapping: A PC-based software tool facilitating the determination of monomer compositions from mass spectrometric molecular weight data
[PB95-132155] p 1275 N95-21470
The enhancement of metallic silver monomer evaporation by the adhesion of polar molecules to silver nanocluster ions
[AD-A284936] p 1281 N95-22470
MONOPOLE ANTENNAS
Low-cost conical ultra-wideband antenna
[AD-A286569] p 1292 N95-20825
MONOPOLES
Monopoles and quark confinement: Introduction and overview
[DE94-019348] p 1522 N95-21485
MONOPULSE RADAR
Frequency-coded monopulse MTI
[AD-D016495] p 1307 N95-21904
MONOTONE FUNCTIONS
Design of robust optimal control systems and stability analysis of real structured uncertainties
[AD-A279089] p 1483 N95-21913
Bayesian analysis of semiparametric proportional hazards models
[AD-A279394] p 1499 N95-21946
MONSOONS
Monsoons: AMIP simulations of the 1987 and 1988 drought and flood regimes
[DE94-014789] p 1428 N95-20140
MONTE CARLO METHOD
Iterated-bootstrap confidence intervals for the mean
[AD-A279802] p 1498 N95-20102
A practical guide to using MCNP with PVM
[DE94-016162] p 1474 N95-20158
MCNP (trademark) ENDF/B-VI iron benchmark calculations
[DE94-016165] p 1508 N95-20160
MCNP (trademark) directions
[DE94-016216] p 1509 N95-20254
Simulation of large systems with neural networks
[DE94-018898] p 1428 N95-20319
Positron implantation profiles in elemental and multilayer systems
[DE94-014876] p 1566 N95-20382
Program WALKMAN: A code designed to perform electron single collision elastic scattering Monte Carlo calculations
[DE94-017501] p 1511 N95-20444
X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798
A Monte Carlo study of the minus sign problem in the t-J model using an Intel iPSC/860 hypercube
[DE95-001072] p 1570 N95-20819
Correlated wavefunction Monte Carlo studies of excitations in the quantum Hall liquids
[DE95-002337] p 1501 N95-20874
Active neutron multiplicity analysis and Monte Carlo calculations
[DE94-016178] p 1516 N95-21114
Calculation of Z plus four jet production at the Tevatron
[PB95-130472] p 1580 N95-21230
Multiple hard interactions in HERWIG
[PB95-130548] p 1518 N95-21233
Defect production and recombination during low-energy ion processing
[DE95-001827] p 1572 N95-21304
Search for Centauro events in the DO Detector at Fermilab collider
[DE95-002522] p 1535 N95-21314
The atmospheric neutrino anomaly in Soudan 2
[DE94-019288] p 1604 N95-21475
Simulated rarefied entry of the Galileo probe into the atmosphere of Jupiter
[NASA-TM-110507] p 1601 N95-21621
A preliminary, precise measurement of the average B hadron lifetime
[DE95-001848] p 1525 N95-21727
A massively parallel algorithm for grand canonical Monte Carlo computer simulation with the short-ranged Lennard-Jones potential
[DE94-010396] p 1477 N95-21843
On Markov Chain Monte Carlo acceleration
[AD-A279393] p 1499 N95-21945
Atomic velocity distributions in a hydrogen beam effusing out of an RF discharge dissociator
[AD-A279253] p 1307 N95-21985
Variational Monte Carlo study of He-4 in two dimensions
[DE94-629078] p 1576 N95-21998
An improved Monte Carlo algorithm for simulating grain growth
[DE94-017903] p 1578 N95-22272
An exact enumeration of self-avoiding loops on a square lattice
[DE94-628999] p 1578 N95-22276
MONTMORILLONITE
Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596
MOON
A Clementine collection: Moonglow
[AD-A286360] p 1217 N95-20228
Moon: Old and new
[NASA-TM-110511] p 1601 N95-21196
Atmospheres of the Moon and Mercury
p 1419 N95-21794
Polar volatiles on Mercury and the Moon
p 1422 N95-21811
MORPHOLOGY
Microstructures and tensile properties of as-cast iron-aluminide alloys
[DE94-017868] p 1252 N95-20359
Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543
Analysis of mesospheric winds and waves
[AD-A279956] p 1414 N95-20591
Optical pattern recognition
[AD-A285384] p 1480 N95-20607
Spectroscopic, morphological, and electrical characterization of PdGe ohmic contacts to n-GaAs
[DE95-000738] p 1329 N95-21394
Cluster reactions: An approach to understanding the fundamentals of heterogeneous catalysis
[DE95-002947] p 1243 N95-21447
Simulations of metal dissolution and corrosion
[DE94-019295] p 1257 N95-21476
Substorm theories: United they stand, divided they fall
[NASA-CR-197672] p 1427 N95-22326
Magnetospheric Plasma Analyzer (MPA): Plasma observations from geosynchronous orbit
[DE95-002739] p 1427 N95-22477
MORSE POTENTIAL
Microscopic theory of normal liquid He-3
[DE94-629047] p 1527 N95-22179
MORTALITY
Current concepts on airborne particles and health
[DE95-002260] p 1447 N95-22287
MOTION PERCEPTION
Intermediate levels of visual processing
[AD-A284922] p 1448 N95-19998
Neural models of motion perception
[AD-A286560] p 1449 N95-20845
MOTION SICKNESS
Command history, 1993
[AD-A279775] p 1446 N95-21989
MOTION SIMULATION
Simulation of rotor blade element turbulence
[NASA-TM-108862] p 1207 N95-21186
A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659
Occupant reach and mobility apparatus
[AD-D016253] p 1454 N95-22099
MOTION STABILITY
Emittance growth due to negative-mass instability above transition
[DE95-002527] p 1534 N95-20900
Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847
MOTOR VEHICLES
Analysis of invalid emission testing in the California smog check program
[PB95-128922] p 1406 N95-21373
MOUNTAINS
Geometric moire method of strain analysis with displacement discontinuities
[DE95-001114] p 1386 N95-20833
MOVING TARGET INDICATORS
Frequency-coded monopulse MTI
[AD-D016495] p 1307 N95-21904
MULLITES
Reactions and microstructure at ceramic/metal interfaces
[DE94-014287] p 1265 N95-20138
Zirconia precipitates and zirconia: GeO2 interphase in mullite matrix-SiC woven fabrics composites prepared through a sol-gel route
[PB95-133427] p 1275 N95-21272
MULTICHANNEL COMMUNICATION
Transformation of multichannel magnetocardiographic signals to standard grid form
[PB95-127114] p 1447 N95-22371
MULTIGRID METHODS
Multigrid with matrix-dependent transfer operators for convection-diffusion problems
[PB95-110821] p 1487 N95-19915
Convergence acceleration of the Proteus computer code with multigrid methods
[NASA-CR-197677] p 1467 N95-21450
MULTIMEDIA
Efficient caption-based retrieval of multimedia information
[AD-A279604] p 1586 N95-19956
Determining the usability of Digital Video Interactive (DVI) technology in computer-based instruction
[AD-A284717] p 1457 N95-20060
Using local optimality criteria for efficient information retrieval with redundant information filters
[AD-A279603] p 1587 N95-20302
DAVE: A plug and play model for distributed multimedia application development
[DE94-016481] p 1465 N95-21153
Application-oriented architecture for multimedia teleservices
[PB95-135513] p 1306 N95-21623
A computer-based multimedia prototype for night vision goggles
[AD-A286208] p 1546 N95-21882
Modelling multimedia teleservices with OSI upper layers framework: Short paper
[PB95-132734] p 1308 N95-22080
MULTIPATH TRANSMISSION
Multiple Mechanism Propagation Paths (MMPPs): Their Characterisation and Influence on System Design
[AGARD-CP-543] p 1292 N95-20921
Adaptive error-control scheme for 2-200 MHz Multiple-Mechanism Propagation Paths
p 1293 N95-20926
Problems of coding in multipath channels
p 1294 N95-20930
A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934
Time behavior and frequency response of the microwave propagation channel during multipath propagation
p 1296 N95-20942
Line-of-sight multipath propagation measurements at 15 GHz over 500 MHz bandwidth p 1296 N95-20944
Angle diversity on digital microwave links: Antenna design and experimental results p 1297 N95-20947
Mitigation of effects of multiple path nulls at super-high frequencies through diversity and networking
p 1297 N95-20948
Multipath impact on ground-based global positioning system range measurements: Aspects of measurement, modeling, and mitigation p 1297 N95-20949
Temporal and spatial comportment of multiple paths in ionospheric propagation in oblique incidence: Fractal measures of perturbations p 1298 N95-20954
DAMSON: A system to measure multipath dispersion, Doppler spread and Doppler shift on multi-mechanism communications channels p 1299 N95-20955
Sounder calibration with backscattering from Losquet Island in the presence of multipaths
p 1300 N95-20961
MULTIPHASE FLOW
Accurate solution algorithms for incompressible multiphase flows
[DE95-002727] p 1353 N95-21317
Status of CFDLIB performance tests on the T3D
[DE95-002708] p 1478 N95-21925
MULTIPHOTON ABSORPTION
Physics of correlated studies
[DE95-001204] p 1581 N95-21842
MULTIPLEXING
Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418
Multi-port tester interface
[AD-D016240] p 1332 N95-21775
MULTIPOLES
A colocated magnetic loop, electric dipole array antenna (preliminary results)
[AD-A285381] p 1290 N95-20556
Sources of amplitude-dependent tune shift in the PEP-2 design and their compensation with octupoles
[DE94-018198] p 1519 N95-21262
Proposed emittance upgrade for the SLC damping rings
[DE95-002887] p 1538 N95-22155
Fast parallel tree codes for gravitational and fluid dynamical N-body problems
[AD-A286480] p 1358 N95-22290

MULTIPROCESSING (COMPUTERS)

The design and implementation of the functional/daplex data interface for the multimodel and multilingual database system
[AD-A280131] p 1587 N95-20039

ILIAS: A sequential language for parallel matrix computations
[PB95-110631] p 1473 N95-20056

System level fault tolerance in parallel and distributed computing systems
[AD-A279664] p 1474 N95-20305

Task parallel programming in Fx
[AD-A285136] p 1475 N95-20500

Packaging the MAMA module p 1209 N95-20639

Functional and para-functional parallel processing
[DE95-002805] p 1475 N95-20888

The message passing version of the parallel Community Climate Model
[DE94-019158] p 1407 N95-21608

A periodic scheduling heuristic for mapping iterative task graphs onto distributed memory multiprocessors
[AD-A286047] p 1311 N95-22415

MULTIPROGRAMMING

Scheduling: A guide for program managers
p 1584 N95-20748

MULTISENSOR APPLICATIONS

Nonparametric estimation of the cyclic cross-spectrum
[AD-A285756] p 1498 N95-21219

MULTISENSOR FUSION

Airborne Multisensor Pod System (AMPS) data access concept
[DE95-002586] p 1389 N95-20903

Overview of data fusion work for land electronic warfare
[AD-A279829] p 1301 N95-21292

MULTISPECTRAL BAND SCANNERS

A multispectral scanner survey of the Idaho National Engineering Laboratory and the Hanford Reservation
[DE95-003922] p 1391 N95-22398

MULTISPECTRAL LINEAR ARRAYS

Line-of-sight multipath propagation measurements at 15 GHz over 500 MHz bandwidth p 1296 N95-20944

MULTISPECTRAL PHOTOGRAPHY

A multispectral scanner survey of the Idaho National Engineering Laboratory and the Hanford Reservation
[DE95-003922] p 1391 N95-22398

MULTISTATIC RADAR

Large bistatic angle clutter depolarization study
p 1296 N95-20941

MULTIVARIATE STATISTICAL ANALYSIS

A multivariate multisample rank test for stochastic simulation validation
[AD-A285922] p 1498 N95-19990

Nonparametric estimation of the cyclic cross-spectrum
[AD-A285756] p 1498 N95-21219

Search for the top quark using multivariate analysis techniques
[DE95-000561] p 1522 N95-21498

MUON SPIN ROTATION

Muon data analysis program RUMDA
[PB95-129839] p 1511 N95-20434

MUONIUM

Radio-frequency techniques at the ISIS pulsed muon source
[PB95-129854] p 1529 N95-22303

MUONS

Search for top in DO using the electron + jets channel with soft muon tagging
[DE95-001284] p 1509 N95-20217

Nuclear A dependence of exclusive vector meson production in muon scattering
[DE95-002248] p 1511 N95-20418

Search for right-handed currents in the decay chain of K(+) yields muon(+)nu(sub muon), muon(+) yields e(+)nu(sub e)nu(bar)(sub muon)
[DE94-770606] p 1514 N95-20756

Recent results from E665
[DE95-002523] p 1516 N95-20914

Muon beamline at ISIS
[PB95-130324] p 1518 N95-21224

A measurement of the b(bar b) cross section at CDF
[DE95-000642] p 1519 N95-21273

Search for Centauro events in the DO Detector at Fermilab collider
[DE95-002522] p 1535 N95-21314

Structure functions and structure function ratio F2(n)/F2(p) at low X(Bj) and Q2 in inelastic muon scattering
[DE94-018979] p 1573 N95-21561

Measurement of the B meson differential cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV using the exclusive decays B(sup (+-)) (yields) J/(psi)K(sup (+-)) and B(sup 0) (yields) J/(psi)K*(sup 0)
[DE94-018993] p 1523 N95-21562

Muon transfer from muonic atoms of hydrogen isotopes to He nuclei
[DE94-628903] p 1523 N95-21591

Measurement of the B cross section at CDF via B semileptonic decays
[DE95-002217] p 1524 N95-21597

Time of flight spectroscopy with muonic hydrogen
[DE94-017056] p 1245 N95-21845

Radio-frequency techniques at the ISIS pulsed muon source
[PB95-129854] p 1529 N95-22303

Structure functions and structure function ratio F(sup n)2/F(sup p)2 at small x(sub Bj) and Q2 in muon-nucleon scattering
[DE94-017981] p 1530 N95-22340

MUSCLES

Skeletal muscle ischemia and heat shock proteins
[AD-A285364] p 1442 N95-20549

MUSCULOSKELETAL SYSTEM

Skeletal muscle ischemia and heat shock proteins
[AD-A285364] p 1442 N95-20549

Analysis of musculo-skeletal loading using electromyography and biomechanical modelling
[PB95-135828] p 1444 N95-21007

MUTAGENS

The mechanisms and effects off the plant-activations of chemicals in the environment
[AD-A279388] p 1356 N95-22145

MUTATIONS

Cellular responses to environmental DNA damage
[DE94-015606] p 1441 N95-22397

MYOCARDIUM

Intramyocardial blood volume and oxygen exchange
[PB95-108015] p 1445 N95-21580

MYOGLOBIN

A new parallel method for molecular dynamics simulation of macromolecular systems
[DE94-018621] p 1529 N95-22315

N

N-P-N JUNCTIONS

Plastic encapsulated parts
[DE95-001876] p 1332 N95-21729

N-TYPE SEMICONDUCTORS

Semiconductor cold electron emission device
[AD-D016577] p 1314 N95-20298

Complementary GaAs junction-gated heterostructure field effect transistor technology
[DE94-018901] p 1329 N95-21390

InTlSb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774

NARROWBAND

QoS driven routing in packet switched networks of multiple transmission media p 1292 N95-20923

NASA PROGRAMS

But what will it Cost? The history of NASA cost estimating p 1583 N95-20742

The MSFC Program Control Development Program
p 1585 N95-20754

Abbreviations and acronyms
[NASA-TM-110506] p 1590 N95-21457

Annual program analysis of the NASA Space Life Sciences Research and Education Support Program
[NASA-CR-197298] p 1439 N95-21529

Spinoff, 1994
[NASA-NP-214] p 1594 N95-21893

NASA patent abstracts bibliography: A continuing bibliography. Section 2: Indexes (supplement 46)
[NASA-SP-7039(46)-SECT-2] p 1590 N95-21948

NATURAL GAS

Proceedings of the 1994 DOE/NREL Hydrogen Program Review
[DE94-011835] p 1234 N95-20117

Natural gas cleanup: Evaluation of a molecular sieve carbon as a pressure swing adsorbent for the separation of methane/nitrogen mixtures
[DE94-012263] p 1234 N95-20135

Effect of propane-air on NGVs and vehicle fueling stations
[PB94-210085] p 1282 N95-20253

A fuel cell overview
[DE95-001455] p 1393 N95-20839

Performance and cost analysis of monolithic solid oxide fuel cells
[DE95-002511] p 1394 N95-20896

Technical and economic evaluation of natural gas based synthesis gas production technologies
[PB95-130597] p 1242 N95-21426

The ratios of carbon and non-radiogenic helium and argon isotopes in the mantle and crustal rocks
p 1421 N95-21805

Natural gas converter performance and durability
[PB95-135554] p 1284 N95-21966

Natural gas combustion chemistry mechanisms research
[PB95-111670] p 1247 N95-22150

NATURAL LANGUAGE (COMPUTERS)

Functional and para-functional parallel processing
[DE95-002805] p 1475 N95-20888

Usable, real-time, interactive spoken language systems
[AD-A286349] p 1310 N95-22253

NATURAL LANGUAGE PROCESSING

Efficient caption-based retrieval of multimedia information
[AD-A279604] p 1586 N95-19956

Collected papers of the Soar/IFOR project, Spring 1994
[AD-A280063] p 1216 N95-20624

NATURAL SATELLITES

Surface ices in the outer solar system
p 1423 N95-21815

NAVIER-STOKES EQUATION

Open Skies project computational fluid dynamic analysis
[AD-A285928] p 1200 N95-19991

Finite dimensional approximation of a class of constrained nonlinear optimal control problems
[NASA-CR-194891] p 1479 N95-20010

A numerical investigation of energy transfer and subgrid-scale eddy viscosity in homogeneous, isotropic and shear turbulence
[AD-A280005] p 1339 N95-20058

Continuum transient and frozen startup behavior of conventional and gas-loaded heat pipes
[AD-A284297] p 1339 N95-20250

Numerical investigation of supersonic turbulent boundary layers with high wall temperature
p 1344 N95-21050

On the asymptotic similarity of rotating homogeneous turbulence p 1345 N95-21058

Simulation of separated flows p 1347 N95-21068

Large eddy simulation of channel flow using a vorticity transport subgrid model p 1348 N95-21076

Spatial direct numerical simulation of boundary layer transition under strong adverse pressure gradient
p 1351 N95-21093

Navier-Stokes simulations of the effects of suction holes on a flat plate boundary layer p 1352 N95-21094

DNS of turbulent flow in a driven cavity and their analysis using proper orthogonal decomposition
p 1352 N95-21097

Direct simulation and graphics post-processing of three-dimensional turbulent flows p 1352 N95-21098

Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106

The structure of turbulence and other motions beneath an air-water interface
[AD-A279838] p 1434 N95-21293

Application of Navier-Stokes code PAB3D with kappa-epsilon turbulence model to attached and separated flows
[NASA-TP-3480] p 1201 N95-21338

Massively-parallel computational fluid dynamics
[AD-A279389] p 1355 N95-21942

Turbulence modeling for separated flow
p 1359 N95-22443

A dynamic localization model with stochastic backscatter p 1359 N95-22445

Unstructured-grid large-eddy simulation of flow over an airfoil p 1202 N95-22448

Large-eddy simulation of flow through a plane, asymmetric diffuser p 1360 N95-22449

Numerical study of boundary layer interaction with shocks: Method and code validation
p 1362 N95-22461

A method for obtaining a statistically stationary turbulent free shear flow p 1363 N95-22463

NAVIGATION

The GPS Burst Detector W-Sensor
[DE94-017406] p 1204 N95-20269

Automatic generation of fuzzy rules for the sensor-based navigation of a mobile robot
[DE95-001428] p 1481 N95-20837

The navigation toolkit
[NASA-CR-197290] p 1205 N95-22161

Feature extraction without edge detection
[AD-A279842] p 1473 N95-22386

NAVIGATION AIDS

GPS-Squitter capacity analysis
[AD-A280037] p 1291 N95-20599

Minima reduction simulation test results
[AD-A285626] p 1204 N95-21148

NAVIGATION INSTRUMENTS

Assessment of a non-dedicated GPS receiver system for precise airborne attitude determination
[DE94-019309] p 1205 N95-21520

NAVIGATION SATELLITES

Impact of propagation mechanisms on global navigation satellite system performance p 1298 N95-20950

NAVY

NRL review, 1994
[AD-A279832] p 1605 N95-20182

Compilation of 1993 annual reports of the Navy ELF Communications System Ecological Monitoring Program
[AD-A279575] p 1408 N95-21699

NEAR FIELDS

Method and system of mapping acoustic near field
[AD-D016574] p 1504 N95-20296

NEAR INFRARED RADIATION

Visible and near-IR spectroscopic studies of UC1(4) in a basic ambient temperature melt: The observation of a possible geometric distorted UC1(6)(exp 2-) species and the evidence for the hydrogen-bond in the melt
[DE94-017764] p 1237 N95-20493

Conceptual design analyses for Hanford Site deployable remote spectroscopy systems
[DE95-002078] p 1243 N95-21473

Study of pulsed laser effects on living tissues
[PB95-131330] p 1447 N95-22361

NEAR WAKES

Free shear layers, base pressure and bluff-body drag
[AD-A286316] p 1200 N95-20175

Research on bluff body vortex wakes
[AD-A286319] p 1200 N95-20177

The velocity and vorticity fields of the turbulent near wake of a circular cylinder
[NASA-TM-110513] p 1355 N95-21954

NEGATIVE FEEDBACK

Logic programming and negation: A survey
[PB95-110730] p 1472 N95-22302

Pre-amplifier with multi-stage feedback
[AD-D016254] p 1336 N95-22418

NEGATIVE IONS

Dynamics of collision processes
[DE94-017593] p 1509 N95-20242

Study of small carbon and semiconductor clusters using negative ion threshold photodetachment spectroscopy
[DE95-002327] p 1515 N95-20872

Measurements of scattering processes in negative ion: Atom collisions
[DE95-000664] p 1519 N95-21276

NEGATIVE MATTER

Emittance growth due to negative-mass instability above transition
[DE95-002527] p 1534 N95-20900

NEODYMIUM ALLOYS

Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538

NEODYMIUM ISOTOPES

Competing structures in nuclei near closed shells
[DE94-017604] p 1512 N95-20491

NEODYMIUM LASERS

High power spectral and spatial beam control using self-phase modulation and a multisegment monochromator
[DE94-016604] p 1531 N95-20120

Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226

International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

NEON

Two-center, two electron excitations identified in NEXAFS for solid Ne
[AD-A285373] p 1568 N95-20553

Solar helium and neon in the Earth
p 1419 N95-21793

NEON ISOTOPES

Observation of strong emission from NeIX and NeX transitions in a laser-driven plasma
[DE95-002265] p 1555 N95-20813

He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821

NERVOUS SYSTEM

Radiopharmaceuticals for diagnosis
[DE95-002200] p 1445 N95-21595

NETWORK ANALYSIS

Testing paradigm applied to network structure (revised)
[PB95-110706] p 1487 N95-19906

Environment for Test and Analysis of Distributed Software (ETADS)
[AD-A285776] p 1463 N95-20877

Non-intrusive SCSI status sensing system
[AD-D016242] p 1476 N95-21307

SCSI controller with target status retrieval
[AD-D016249] p 1476 N95-21504

Method of sensing target status in a local area network
[AD-D016248] p 1478 N95-22090

Method of non-intrusively sensing status in a computer peripheral
[AD-D016241] p 1478 N95-22146

A survey of artificial neural network applications in flow analysis of energy networks
[DE95-002452] p 1486 N95-22430

NETWORK CONTROL

A multivariate multisample rank test for stochastic simulation validation
[AD-A285922] p 1498 N95-19990

An integrated architecture of adaptive neural network control for dynamic systems
[DE94-014813] p 1481 N95-20693

Routing of unidirectional packet radio for wide-area paging network control and maintenance
[PB95-104428] p 1300 N95-20980

Network file server with automatic sensing means
[AD-D016250] p 1476 N95-21496

A simulation study of TCP performance in ATM networks
[DE94-016622] p 1477 N95-21505

Verification of a timestamp-based sliding-window protocol
[PB95-132759] p 1455 N95-22082

Communications and control for electric power systems: Power system stability applications of artificial neural networks
[NASA-CR-197333] p 1484 N95-22171

NEURAL NETS

High-performance packet switching architecture for ATM: Conventional solution and neural network solution
[PB95-110920] p 1312 N95-19935

Comparison of a back propagation artificial neural network model with a linear regression model for personnel selection
[AD-A280023] p 1479 N95-20005

Recognition of subsurface defects in machined ceramics by application of neural networks to laser scatter patterns
[DE94-018373] p 1264 N95-20018

Fault tolerance of neural networks
[AD-A285098] p 1479 N95-20057

Biological and theoretical studies of adaptive networks: The conditioned response
[AD-A284781] p 1479 N95-20061

A physiological neural network for saccadic eye movement control
[AD-A279599] p 1441 N95-20301

Simulation of large systems with neural networks
[DE94-018898] p 1428 N95-20319

Designing the architecture of hierachical neural networks model attention, learning and goal-oriented behavior
[AD-A279898] p 1452 N95-20562

Multilayer piecewise linear networks
[AD-A285382] p 1480 N95-20606

Optical pattern recognition
[AD-A285384] p 1480 N95-20607

An integrated architecture of adaptive neural network control for dynamic systems
[DE94-014813] p 1481 N95-20693

Neural models of motion perception
[AD-A286560] p 1449 N95-20845

EPSCoR supplemental grant for an application of neural networks to seismic signal discrimination
[AD-A285846] p 1414 N95-20878

Attempt to interpret the self-organizing mapping physiologically
[PB95-127783] p 1438 N95-21112

A neural expert approach to self designing flight control systems
[AD-A279965] p 1215 N95-21122

Neural network construction via back-propagation
[DE95-002867] p 1482 N95-21249

Application of neural networks to seismic signal discrimination research findings
[AD-A285848] p 1415 N95-21308

GRONICs-1994. Proceedings of the 1994 Groningen Student Conference on Computer Science
[PB95-135620] p 1468 N95-21455

Utilizing artificial neural networks in network flow analysis: An annotated bibiliography
[DE95-002453] p 1482 N95-21522

Hardware implementation of a desktop supercomputer for high performance image processing. Color image processing using cellular neural networks
[AD-A286455] p 1455 N95-21589

Communications and control for electric power systems: Power system stability applications of artificial neural networks
[NASA-CR-197594] p 1483 N95-21613

Adaptive capture of expert behavior
[DE94-018285] p 1483 N95-21710

Learning algorithms for feedforward networks based on finite samples
[DE95-001739] p 1483 N95-21741

How the brain works
[AD-A279138] p 1450 N95-21968

Artificial neural network metamodels of stochastic computer simulations
[AD-A285951] p 1484 N95-22056

Communications and control for electric power systems: Power system stability applications of artificial neural networks
[NASA-CR-197333] p 1484 N95-22171

Connectionist models for intelligent computation
[AD-A286436] p 1484 N95-22210

Mathematical theory of neural networks
[AD-A286508] p 1485 N95-22213

The applicability of neural networks to ionospheric modeling in support of relocatable Over-the-Horizon radar
[AD-A286114] p 1309 N95-22230

Learning maneuvers using neural network models
[AD-A286470] p 1486 N95-22267

Advanced Materials and Process Technology for Mechanical Failure Prevention (proceedings of the 48th Meeting of the Mechanical Failures Prevention Group
[AD-A285785] p 1233 N95-22399

Simulation of structural response using a recurrent radial basis function network
[DE94-017342] p 1486 N95-22409

A survey of artificial neural network applications in flow analysis of energy networks
[DE95-002452] p 1486 N95-22430

NEUROMUSCULAR TRANSMISSION

A physiological neural network for saccadic eye movement control
[AD-A279599] p 1441 N95-20301

NEURONS

Biological and theoretical studies of adaptive networks: The conditioned response
[AD-A284781] p 1479 N95-20061

Neural models of motion perception
[AD-A286560] p 1449 N95-20845

Netherlands Institute for Brain Research progress report, 1993
[PB95-135398] p 1445 N95-21352

How the brain works
[AD-A279138] p 1450 N95-21968

NEUROPHYSIOLOGY

A physiological neural network for saccadic eye movement control
[AD-A279599] p 1441 N95-20301

NEUTRAL BEAMS

ALT-2 armor tile design for upgraded TEXTOR operation
[DE94-015749] p 1549 N95-20143

The evolution of configuration from q greater than 1 to q less than 1
[DE94-631396] p 1556 N95-21162

Review of recent D-T experiments from TFTR
[DE95-002755] p 1557 N95-21239

Fusion power production in TFTR
[DE95-002756] p 1557 N95-21240

Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
[DE94-018092] p 1560 N95-21668

NEUTRAL CURRENTS

Search for D(+) yields (pi)(+)(mu)(+)(mu)(-)
[DE94-015538] p 1512 N95-20475

Search for right-handed currents in the decay chain of K(+) yields muon(+)nu(sub muon), muon(+) yields e(+)nu(sub e)nu(bar)(sub muon)
[DE94-770606] p 1514 N95-20756

Calculation of Z plus four jet production at the Tevatron
[PB95-130472] p 1580 N95-21230

A high-rate fixed-target charm experiment
[DE95-001767] p 1521 N95-21378

NEUTRINOS

Neutrino-neutrino scattering and matter-enhanced neutrino flavor transformation in supernovae
[DE94-017577] p 1604 N95-20383

Has a standard model solution to the solar neutrino problem been found?
[DE94-017580] p 1604 N95-20490

Competing structures in nuclei near closed shells
[DE94-017604] p 1512 N95-20491

Search for right-handed currents in the decay chain of K(+) yields muon(+)nu(sub muon), muon(+) yields e(+)nu(sub e)nu(bar)(sub muon)
[DE94-770606] p 1514 N95-20756

Anomalous vector-boson couplings in Majorana neutrino models
[PB95-127460] p 1518 N95-21220

Muon beamline at ISIS
[PB95-130324] p 1518 N95-21224

Experiments at high energy hadron colliders and underground water Cerenkov detector experiment
[DE95-001804] p 1535 N95-21281
The atmospheric neutrino anomaly in Soudan 2
[DE94-019288] p 1604 N95-21475

NEUTRON BEAMS
Muon beamline at ISIS
[PB95-130324] p 1518 N95-21224
A neutron beam polarizer for study of parity violation in neutron-nucleus interactions
[DE95-002743] p 1519 N95-21237
MARI mini-manual
[PB95-134649] p 1526 N95-21965

NEUTRON COUNTERS
A new alpha particle diagnostic using knock-on ion tails
[DE94-015856] p 1553 N95-20402
Active neutron multiplicity analysis and Monte Carlo calculations
[DE94-016178] p 1516 N95-21114

NEUTRON DIFFRACTION
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
PRSCAL manual
[PB95-130480] p 1465 N95-21231
PRISMA operating program manual
[PB95-130498] p 1466 N95-21232
Neutron diffraction study of the magnetic ordering of BaCuO(2+x)
[DE95-001357] p 1572 N95-21297
Strain measurement by diffraction at LANSCE
[DE94-018264] p 1387 N95-21386

NEUTRON FLUX DENSITY
Target area acquisition and control system survivability for the National Ignition Facility
[DE94-016549] p 1550 N95-20190
On conception of a compact neutron source and the possibility of its simulation on the Amba-M end trap
[DE94-633373] p 1562 N95-22282

NEUTRON IRRADIATION
High precision trace neutron transmutation doping of detector-grade high resistance zone-refined silicon mono-crystal
[DE94-631463] p 1563 N95-19978
Influence of oxidation on radiation hardness of silicon detectors
[DE95-002466] p 1272 N95-20894
Effect of neutron irradiation on the impact properties of A533B steel
[DE95-001834] p 1256 N95-21286
Effects of neutron irradiation on the London penetration depth for polycrystalline Bi(1.8)Pb(0.3)Sr2Ca2Cu3O10 superconductor
[DE94-019335] p 1573 N95-21483

NEUTRON SCATTERING
Magnetic excitations in modulated PrNi2Si2
[DE95-001077] p 1254 N95-20822
Topography of neutron scattering from diblock copolymer film
[DE95-001457] p 1229 N95-20840
PRISMA operating program manual
[PB95-130498] p 1466 N95-21232
Error analysis of the quadratic nodal expansion method in slab geometry
[DE95-001352] p 1492 N95-21285
MARI mini-manual
[PB95-134649] p 1526 N95-21965
New techniques in neutron scattering
[DE94-018944] p 1538 N95-22117
Neutron Compton scattering
[PB95-130290] p 1530 N95-22332
Parity violation in the compound nucleus
[DE95-002742] p 1530 N95-22435

NEUTRON SOURCES
Design trade-off study for a large volume short pulse neutron assembly
[DE94-019175] p 1509 N95-20206
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
New techniques in neutron scattering
[DE94-018944] p 1538 N95-22117
Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280
On conception of a compact neutron source and the possibility of its simulation on the Amba-M end trap
[DE94-633373] p 1562 N95-22282

NEUTRON SPECTRA
National Ignition Facility: Experimental plan
[DE94-016542] p 1550 N95-20189
Ion temperature measurement of indirectly-driven implosions using a geometry-compensated neutron time-of-flight detector
[DE94-016967] p 1552 N95-20362
Influence of oxidation on radiation hardness of silicon detectors
[DE95-002466] p 1272 N95-20894

NEUTRON SPECTROMETERS
Ion temperature measurement of indirectly-driven implosions using a geometry-compensated neutron time-of-flight detector
[DE94-016967] p 1552 N95-20362
Neutron molelcular spectroscopy: Future prospects
[PB95-130357] p 1518 N95-21227
PRISMA operating program manual
[PB95-130498] p 1466 N95-21232
New techniques in neutron scattering
[DE94-018944] p 1538 N95-22117

NEUTRON STARS
Properties of strange-matter stars
[DE95-002329] p 1599 N95-20873
Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479
Physics of systems containing neutron stars
[NASA-CR-197304] p 1600 N95-21615

NEUTRONS
Target area acquisition and control system survivability for the National Ignition Facility
[DE94-016549] p 1550 N95-20190
New data for MCNP (trademark)
[DE94-016296] p 1509 N95-20236
Active neutron multiplicity analysis and Monte Carlo calculations
[DE94-016178] p 1516 N95-21114
Neutron molelcular spectroscopy: Future prospects
[PB95-130357] p 1518 N95-21227
NESTLE: Few-group neutron diffusion equation solver utilizing the nodal expansion method for eigenvalue, adjoint, fixed-source steady-state and transient problems
[DE95-001903] p 1466 N95-21288
On the Aharonov-Bohm effect with neutrons
[DE95-002985] p 1521 N95-21454
The ORNL Neutron-Capture Cross Section Facility
[DE94-019146] p 1537 N95-21460
New techniques in neutron scattering
[DE94-018944] p 1538 N95-22117
Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280
Neutron reflectivity study of adsorbed diblock copolymers
[DE95-002740] p 1281 N95-22434
Parity violation in the compound nucleus
[DE95-002742] p 1530 N95-22435

NEWTON METHODS
Error committed by stopping the Newton iteration in Runge-Kutta methods and linear multistep methods
[PB95-106324] p 1492 N95-21421

NICKEL
Fabrication and properties of alumina matrix composites containing nickel aluminide reinforcements
[DE94-018703] p 1250 N95-20044
Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268
Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
[DE94-018184] p 1259 N95-21707
Acid-site characterization of water-oxidized alumina films by near-edge x-ray absorption and soft x-ray photoemission
[DE95-003355] p 1247 N95-22234

NICKEL ALLOYS
Mixed-sputter deposition of Ni-Ti-Cu shape memory films
[DE94-017296] p 1250 N95-19900
Third Intermetallic Matrix Composites Symposium, volume 350
[NASA-TM-110059] p 1225 N95-20001
Processing and characterization of Ni-Al-Fe-B shape-memory alloy wires produced by rapid solidification
[DE94-017702] p 1250 N95-20020
Hydrogen resistant alloy - NASA 23
[NASA-CASE-MFS-26200-1-SB] p 1251 N95-20068
ALCHEMI of Fe-doped B2-ordered NiAl alloys with different doping levels
[DE94-017748] p 1255 N95-20907
Computational modeling of diffusion-controlled transformations in ternary systems
[DE95-001358] p 1256 N95-21298
Processing and mechanical properties of laminar Al2O3-Ni3Al composites
[DE94-019332] p 1230 N95-21481
Corrosion resistance and behavior of construction materials exposed to dilute sulfuric acid at elevated temperatures under static conditions
[DE95-001723] p 1259 N95-21739
The low temperature properties of (Dy(1-x)Er(x))Ni2 alloys
[DE95-001657] p 1260 N95-21923
Incology alloy 908 data handbook
[DE95-001818] p 1260 N95-22013
Lower active metals loading for hydrotreating catalysts
[DE94-018907] p 1261 N95-22119
Bulk and defect properties of ordered intermetallics
[DE94-017706] p 1262 N95-22344
Processing of intermetallic materials by reaction synthesis
[DE94-017710] p 1263 N95-22345

NICKEL CADMIUM BATTERIES
Progress in the development of recycling processes for electric vehicle batteries
[DE94-015894] p 1324 N95-20626

NICKEL ISOTOPES
Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280

NICKEL OXIDES
Nickel hydroxide electrodes in reduced-alkalinity electrolytes
[DE95-002333] p 1326 N95-20814
Transient studies of low temperature catalysts for methane conversion
[DE95-003560] p 1247 N95-22224

NICKEL ZINC BATTERIES
Nickel hydroxide electrodes in reduced-alkalinity electrolytes
[DE95-002333] p 1326 N95-20814

NIGHT FLIGHTS (AIRCRAFT)
Challenger's night flight
[NASA-TM-110503] p 1217 N95-19995
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558
A computer-based multimedia prototype for night vision goggles
[AD-A286208] p 1546 N95-21882

NIGHT VISION
Ultra-Reliable Digital Avionics (URDA) processor
p 1209 N95-20638
The sharper image: Implementing a Fast Fourier Transform (FFT) to enhance a video-captured image
[AD-A279790] p 1445 N95-21180
A computer-based multimedia prototype for night vision goggles
[AD-A286208] p 1546 N95-21882
Factors that determine visual acuity through night vision goggles for emmetropes
[AD-A279339] p 1450 N95-21927

NIOBIUM
Enhanced output of soft x-ray lasers using double slab targets
[DE94-016689] p 1369 N95-20335

NIOBIUM ALLOYS
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
Metastable bcc phase formation in the Nb-Cr-Ti system
[DE94-016212] p 1255 N95-21137

NITRAMINE PROPELLANTS
Density functional studies of decomposition processes of energetic molecules
[AD-A286185] p 1510 N95-20327
Comparative computational analysis of some nitramine and difluoramine structures, dissociation energies and heats of formation
[AD-A286196] p 1525 N95-21878

NITRATES
Safe conditions for contacting nitric acid or nitrates with Tri-n-Butyl Phosphate (TBP)
[DE95-001243] p 1235 N95-20215
Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268
Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy
[DE94-009757] p 1237 N95-20470
Catalyzed reduction of nitrate in aqueous solutions
[DE94-017660] p 1247 N95-22049

NITRATION
Computational evaluation of the feasibility of nitrating precursors to C12N12O12
[AD-A285976] p 1239 N95-20668

NITRIC ACID
Safe conditions for contacting nitric acid or nitrates with Tri-n-Butyl Phosphate (TBP)
[DE95-001243] p 1235 N95-20215

NITRIC OXIDE
Direct catalytic decomposition of nitric oxide
[DE94-018840] p 1233 N95-20045

Superior catalysts for selective catalytic reduction of nitric oxide
|DE94-018845| p 1234 N95-20046
Compatibility testing of explosives and paints by chemiluminescence techniques
|PB95-133609| p 1275 N95-21275

NITRIDES
Reactions and microstructure at ceramic/metal interfaces
|DE94-014287| p 1265 N95-20138
Novel materials
|AD-A279693| p 1227 N95-20427
Atmosphere influence on in situ ion beam analysis of thin film growth
|DE95-001507| p 1570 N95-20881
Deposition and properties of novel nitride superlattice coatings
|DE95-002945| p 1230 N95-21445

NITRIDING
Tribology and surface mechanical properties of excimer laser nitrided titanium
|DE95-002751| p 1255 N95-21238
The formation of reaction bonded Si3N4 at low temperatures and in short times
|DE95-001990| p 1275 N95-21289

NITRILES
A test of the Arrhenius extrapolation assumption for a nitrile rubber
|DE94-017337| p 1263 N95-19926
Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
|DE94-018184| p 1259 N95-21707

NITRITES
Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy
|DE94-009757| p 1237 N95-20470

NITRO COMPOUNDS
Density functional studies of decomposition processes of energetic molecules
|AD-A286185| p 1510 N95-20327

NITROBENZENES
Computational evaluation of the feasibility of nitrating precursors to C12N12O12
|AD-A285976| p 1239 N95-20668

NITROFLUORAMINES
Comparative computational analysis of some nitramine and difluoramine structures, dissociation energies and heats of formation
|AD-A286196| p 1525 N95-21878

NITROGEN
Calculated heats of formation of some predicted stable C, N, O, F molecules
|AD-A285957| p 1517 N95-21127
Nitrogen alloyed martensitic steels
|PB95-127791| p 1255 N95-21128
Tribology and surface mechanical properties of excimer laser nitrided titanium
|DE95-002751| p 1255 N95-21238
Nitrogen control of chloroplast differentiation
|DE95-002797| p 1439 N95-21526
Origin and loss of the volatiles of the terrestrial planets p 1417 N95-21785
Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790
Nitrogen isotopic components in the early solar system p 1420 N95-21800
Solubilities of nitrogen and noble gases in basalt melt
p 1422 N95-21807
Solubilities of nitrogen and helium in water and blood at 37 C and pressures of up to 11 ATA
|AD-A286269| p 1446 N95-22003
Very high-power electron-beam transport in long gas cells from 10(exp -3) to 10(exp 3) Torr N2
|DE95-002611| p 1539 N95-22306

NITROGEN COMPOUNDS
Studies of the microwave resistivity of kappa-(BEDT-TTF)2Cu(N(CN)2)Cl
|DE95-002980| p 1262 N95-22291

NITROGEN METABOLISM
Nitrogen control of chloroplast differentiation
|DE95-002797| p 1439 N95-21526
The Use of Cyanobacteria to Explore Basic Biological Processes
|DE94-019238| p 1440 N95-22066

NITROGEN OXIDES
Laboratory evaluation of a reactive baffle approach to NOx control
|AD-A283802| p 1400 N95-19921
Evaluation of the technical performance of the Duttch National Air Quality Monitoring Network in 1992
|PB95-131892| p 1405 N95-21327
Monitoring activities in the framework of the Dutch National Air Quality Monitoring Network in 1994
|PB95-131884| p 1406 N95-21351

NITROGEN 15
Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
|DE94-019167| p 1600 N95-22128

NITROSO COMPOUNDS
Calculated heats of formation of some predicted stable C, N, O, F molecules
|AD-A285957| p 1517 N95-21127

NITROUS OXIDES
Characteristics of oxynitrides grown in N2O
|DE94-015798| p 1566 N95-20400
Numerical study of contaminant effects on combustion of hydrogen, ethane, and methane in air
|NASA-TM-106844| p 1284 N95-22114

NOBLE METALS
S-D hybridization and anisotropy of the optical second harmonic at low frequencies
|AD-A279449| p 1544 N95-20876
Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
|DE95-001654| p 1257 N95-21398

NOISE
Adaptive detection in stationary and nonstationary noise environments
|AD-A279581| p 1300 N95-21099

NOISE (SOUND)
Ambient noise and surface wave dissipation in the ocean
|AD-A279650| p 1432 N95-20303
Cascade orificial resistive device
|AD-D016529| p 1504 N95-20724
Safety issues in high speed machining
|PB95-127411| p 1287 N95-21422
1/f noise in two-dimensional fluids
|DE95-002617| p 1358 N95-22307

NOISE GENERATORS
Analysis of low frequency ocean noise. 1: From a long-term experiment across the US East Coast. 2: From the Wake Island Hydrophone Array during northwest Pacific typhoons
|AD-A284975| p 1432 N95-20040
Quantum diffusion
|DE95-001015| p 1580 N95-21264
A method for obtaining a statistically stationary turbulent free shear flow p 1363 N95-22463

NOISE INJURIES
Safety issues in high speed machining
|PB95-127411| p 1287 N95-21422

NOISE INTENSITY
Acoustic climb to cruise test
|NASA-TM-110504| p 1206 N95-20155
Ambient noise and surface wave dissipation in the ocean
|AD-A279650| p 1432 N95-20303
Temporary threshold shifts produced by high intensity freefield impulse noise in humans wearing hearing protection
|AD-A286289| p 1454 N95-22045

NOISE PREDICTION
Light-scattering fluctuations and noise in nonlinear optical processing
|AD-A279748| p 1544 N95-20803

NOISE PROPAGATION
Analysis of low frequency ocean noise. 1: From a long-term experiment across the US East Coast. 2: From the Wake Island Hydrophone Array during northwest Pacific typhoons
|AD-A284975| p 1432 N95-20040
Effect of atmospheric pressure on measured aircraft noise levels
|PB95-130423| p 1207 N95-21425

NOISE REDUCTION
Constraints as a destriping tool for Hires images
p 1593 N95-21756
Active control of fan noise-feasibility study. Volume 1: Flyover system noise studies
|NASA-CR-195392-VOL-1| p 1505 N95-21888

NOISE SPECTRA
Ambient noise and surface wave dissipation in the ocean
|AD-A279650| p 1432 N95-20303
Error probabilities of FFH/BFSK with noise normalization and soft decision viterbi decoding in a fading channel with partial-band jamming
|AD-A280041| p 1498 N95-20620
Breakdown of the law of large numbers in Josephson junction series arrays
|DE94-629075| p 1576 N95-21996
Order and turbulence in RF-driven Josephson junction series arrays
|DE94-629076| p 1576 N95-21997

NOISE TEMPERATURE
On-wafer, cryogenic characterization of ultra-low noise HEMT devices p 1305 N95-21539

NONADIABATIC CONDITIONS
Testing the principle of equivalence by solar neutrinos
|DE94-014972| p 1604 N95-22064

NONAQUEOUS ELECTROLYTES
A new family of anion receptors and their effects on ion pair dissociation and conductivity of lithium salts in non-aqueous solutions
|DE94-016822| p 1512 N95-20477

NONDESTRUCTIVE TESTS
Eddy current for detecting second-layer cracks under installed fasteners
|AD-A279871| p 1382 N95-20414
Non destructive characterization using pulsed fast-thermal neutrons
|DE95-002601| p 1511 N95-20422
The 1993 JANNAF Propulsion Meeting, volume 2
|AD-A279569| p 1221 N95-20708
Flux-focusing eddy current probe and rotating probe method for flaw detection
|NASA-CASE-LAR-15231-1-SB| p 1383 N95-20764
Detection of environmental deterioration in fiber reinforced composites by FT-Raman spectroscopy, phase 1
|AD-A279763| p 1228 N95-20805
Three-dimensional ground penetrating radar imaging using multi-frequency diffraction tomography
|DE94-016687| p 1301 N95-21205
Strain measurement by diffraction at LANSCE
|DE94-018264| p 1387 N95-21386
Non-destructive inspection by infrared imaging spectroscopy, phase 1
|AD-A286158| p 1383 N95-22037
Surfaces and thin films studied by picosecond ultrasonics
|DE95-001866| p 1506 N95-22071
Advanced Materials and Process Technology for Mechanical Failure Prevention (proceedings of the 48th Meeting of the Mechanical Failures Prevention Group
|AD-A285785| p 1233 N95-22399

NONEQUILIBRIUM FLOW
Plasma chemistry of vibrationally nonequilibrium molecules
|AD-A279630| p 1553 N95-20411

NONFLAMMABLE MATERIALS
Ignition of submarine materials at various oxygen concentrations
|PB95-131371| p 1243 N95-21428

NONINTRUSIVE MEASUREMENT
Development of a portable ice-thickness measuring instrument
|AD-A279472| p 1433 N95-21291
Non-intrusive SCSI status sensing system
|AD-D016242| p 1476 N95-21307
Method of non-intrusively sensing status in a computer peripheral
|AD-D016241| p 1478 N95-22146

NONLINEAR EQUATIONS
The Nonlinear Characteristic scheme in X-Y geometries
|DE94-016192| p 1488 N95-20167
Squeezing and flow of energy for non linear wave equations
|PB95-111100| p 1489 N95-20172
Stabilization and control problems in structural dynamics
|AD-A279996| p 1340 N95-20312
COYOTE II: A finite element computer program for nonlinear heat conduction problems. Part 1: Theoretical background
|DE95-002587| p 1463 N95-20887
Explicit analytical solution of the nonlinear Vlasov Poisson system
|DE94-628931| p 1500 N95-21592
Report of the Numerical Analysis Group
|PB95-108163| p 1494 N95-21648

NONLINEAR EVOLUTION EQUATIONS
On the sputtering of metals and insulators: A nonlinear evolution problem with nonlinear boundary condition
|DE95-001456| p 1254 N95-20792

NONLINEAR FEEDBACK
Theory of the L-H transition
|DE95-001389| p 1558 N95-21299

NONLINEAR FILTERS
Saddle-node dynamics for edge detection
|DE94-017415| p 1473 N95-22426

NONLINEAR OPTICS
Design, synthesis and characterization of novel nonlinear optical materials
|AD-A285617| p 1540 N95-19897
Transition-energy crossing with a gamma(sub t)(-)jump
|DE94-017315| p 1531 N95-20021
Program of the 1993 9th Interdisciplinary Laser Science Conference (ILS-9)
|AD-A285131| p 1369 N95-20082

The preparation of all para-polyphenyls with increased solubility and enhanced third order NLO activity
[AD-A284301] p 1266 N95-20251
Optical power limiting liquid crystal composites
[AD-A286605] p 1569 N95-20767
Light-scattering fluctuations and noise in nonlinear optical processing
[AD-A279748] p 1544 N95-20803
Nonlinear optical studies of polymer interfaces
[DE94-018199] p 1274 N95-21263
Nonlinear frequency conversion optical filter
[AD-D016523] p 1544 N95-21465
Technique for intracavity sum frequency generation
[AD-D016478] p 1546 N95-21898
Two-band model description of electroabsorption and third-harmonic generation in 1-D MX linear chains
[DE95-000932] p 1526 N95-21934
High temperature polymer for second order nonlinear optics for photonic materials
[AD-A279309] p 1280 N95-22141
Modeling of nonlinear optic and ESR response of CDW MX materials
[DE94-018301] p 1578 N95-22297
Broadband thermal optical limiter for the protection of eyes and sensors
[AD-D016493] p 1377 N95-22304

NONLINEAR SYSTEMS
Semiquantum chaos and the large N expansion
[DE94-016196] p 1488 N95-20169
Modeling and identification of parallel and feedback nonlinear systems
[DE95-001006] p 1481 N95-20812
A neural expert approach to self designing flight control systems
[AD-A279965] p 1215 N95-21122
Linear and nonlinear spectroscopy with the tunable AC scanning tunneling microscope
[AD-A285751] p 1241 N95-21217
International Conference on Control and Estimation of Distributed Parameter Systems: Nonlinear Phenomena
[AD-A286449] p 1493 N95-21582
Adaptive capture of expert behavior
[DE94-018285] p 1483 N95-21710
Cochannel and adjacent-channel interference in nonlinear minimum-shift-keyed satellite system
[NASA-TM-106834] p 1307 N95-21890
Iterated-subspace minimization methods for nonlinear optimization
[PB95-108171] p 1495 N95-22317
Simulation of structural response using a recurrent radial basis function network
[DE94-017342] p 1486 N95-22409

NONLINEARITY
Inelastic torsion of steel I-beams
[PB94-208360] p 1384 N95-20101
Nonlinear dynamic fluid-structure interaction calculations with coupled finite element and finite volume programs
[DE94-016204] p 1339 N95-20166
A S2-like acceleration method for the Nonlinear Characteristic transport scheme
[DE94-016285] p 1509 N95-20235
Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495
Physical-chemical studies on rodlike polymer compositions
[AD-A285361] p 1269 N95-20548
Digital filtering for data compression in telemetry systems
[DE94-016611] p 1219 N95-20567
Optical pattern recognition
[AD-A285384] p 1480 N95-20607
A convergence analysis of an h-version finite element method with high order elements for two dimensional elasto-plasticity problems
[AD-A279975] p 1491 N95-20920
Development of ferroelectric liquid crystals with enhanced nonlinear optical properties
[AD-A279988] p 1571 N95-20965
Eigenmode method for electromagnetic synthesis of diffractive elements with three-dimensional profiles
[PB95-127726] p 1301 N95-21107
Understanding the mechanisms of length scale competition: The sine-Gordan soliton case
[DE94-016201] p 1500 N95-21136
Transient behaviour and stability points of the Poiseuille flow of a KBKZ-fluid
[PB95-132064] p 1353 N95-21268
Domain processes in ferroelectric ceramics
[AD-A279567] p 1276 N95-21697
On the influence of electromagnetic wave and relativistic electron beam on a plasma
[DE94-628962] p 1561 N95-21848
Electromagnetic waves in an ultrarelativistically hot and strongly magnetized electron-positron plasma
[DE94-628963] p 1307 N95-21849
Large amplitude localized structures in a relativistic electron-positron ion plasma
[DE94-628965] p 1561 N95-21851
Breakdown of the law of large numbers in Josephson junction series arrays
[DE94-629075] p 1576 N95-21996
Proposed emittance upgrade for the SLC damping rings
[DE95-002887] p 1538 N95-22155
Nonlinear dynamics of the planar pitch attitude motion for a gravity-gradient satellite
[AD-A286407] p 1220 N95-22204
Novel materials and devices from self-assembled periodic structures
[AD-A286499] p 1232 N95-22211
Robust fixed-structure control
[AD-A286515] p 1485 N95-22216

NONPARAMETRIC STATISTICS
A multivariate multisample rank test for stochastic simulation validation
[AD-A285922] p 1498 N95-19990
Iterated-bootstrap confidence intervals for the mean
[AD-A279802] p 1498 N95-20102
Nonparametric estimation of the cyclic cross-spectrum
[AD-A285756] p 1498 N95-21219
Proof of a conjecture of Narayana on dominance refinements of the Smirnov two-sample test
[PB95-132650] p 1499 N95-21979
Precedence tests and confidence bounds for complete data: An overview and some results
[PB95-132668] p 1499 N95-21980

NORMAL DENSITY FUNCTIONS
Microscopic theory of normal liquid He-3
[DE94-629047] p 1527 N95-22179
Theory of the excitonic lineshape in low-dimensional structures with rough interfaces
[DE95-003434] p 1582 N95-22237

NORMALIZING (STATISTICS)
Geometric characterization of electromigration voids (A statistical analysis of electromigration voids)
[AD-A286494] p 1328 N95-21169

NORTH SEA
Long term changes on the continental shelf of the North Sea: Invertebrate trends, 1931-1990
[PB95-135224] p 1435 N95-21717

NORTHERN HEMISPHERE
Radiative forcing for changes in tropospheric O3
[DE94-019017] p 1413 N95-20354

NORWAY
Ohmsett test of NOFI Vee-Sweep and NOFI 600S Oilboom
[AD-A279525] p 1408 N95-21685

NOTCH SENSITIVITY
The processing and mechanical properties of high temperature/high performance composites. Stress redistribution and notch properties, book 2
[AD-A279737] p 1227 N95-20429

NOZZLE DESIGN
Development of quiet-flow supersonic wind tunnels for laminar-turbulent transition research
[NASA-CR-197286] p 1216 N95-21436

NOZZLE FLOW
Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle
[NASA-TM-4574] p 1199 N95-19913
Numerical investigations of low-density nozzle flow by solving the Boltzmann equation
[NASA-TM-110492] p 1354 N95-21675

NUCLEAR BINDING ENERGY
Pairing on small clusters in the Peierls-Hubbard model: Implications for C60
[DE94-016284] p 1565 N95-20330
Effect of the electron-SO-phonon on the impurity state energies in a semiconductor quantum well
[DE94-628993] p 1581 N95-21887

NUCLEAR DEVICES
Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817

NUCLEAR ELECTRIC PROPULSION
Real-time dynamic simulator for the Topaz II reactor power system
[DE95-001604] p 1535 N95-21278
Issues in the flight qualification of a space power reactor
[DE95-001606] p 1223 N95-21840

NUCLEAR EXPLOSION EFFECT
Nuclear Terms Handbook, 1993
[DE94-016248] p 1589 N95-21131

NUCLEAR EXPLOSIONS
The GPS Burst Detector W-Sensor
[DE94-017406] p 1204 N95-20269

NUCLEAR FUSION
Diffusion enhances spontaneous electroweak baryogenesis
[DE94-017574] p 1512 N95-20451

NUCLEAR INTERACTIONS
Mass and lifetime measurements with exclusive B reconstruction at CDF
[DE94-015849] p 1511 N95-20401
The theory of relativistic heavy ion collisions
[DE95-001805] p 1519 N95-21302

NUCLEAR MAGNETIC RESONANCE
Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047
Physics Division research and development
[DE94-017685] p 1501 N95-20246
Investigation of syngas interaction in alcohol synthesis catalysts
[DE94-018784] p 1236 N95-20349
Actinide(IV) and actinide(VI) carbonate speciation studies by PAS and NMR spectroscopies
[DE94-016957] p 1236 N95-20361
Thermodynamic and NMR studies of solvent effect on enantiomeric recognition for a chiral organiz ammonium cation by chiral diketopyridino-18-Crown-6 type ligands at 25.0 C
[AD-A279893] p 1223 N95-20592
Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors
[DE95-001073] p 1570 N95-20820
Dynamic NMR studies of restricted arene rotation in the chromiu tricarbonyl thiophene and selenophene complexes
[DE95-001656] p 1257 N95-21399
Analysis of experimentally shocked minerals by NMR spectroscopy
[DE95-002955] p 1573 N95-21449
Radiopharmaceuticals for diagnosis
[DE95-002200] p 1445 N95-21595
NMR relaxation behavior of the head group of SHBS in lamellar liquid crystals
[AD-A279124] p 1574 N95-21599
Selenophene transition metal complexes
[DE95-001675] p 1260 N95-21841
Solid-state NMR characterization of C- and N-labelled phthalimides: Model compounds for studying polyimides
[AD-A286479] p 1578 N95-22286
Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385

NUCLEAR MEDICINE
In vivo distribution of liposome encapsulated hemoglobin studied with imaging radiotracers
[AD-A279774] p 1438 N95-20806
Radiopharmaceuticals for diagnosis
[DE95-002200] p 1445 N95-21595
ANSTO: Program of research, 1993-1994
[DE94-631122] p 1605 N95-21828

NUCLEAR MODELS
A model for electron nuclear dynamics of a monatomic chain
[AD-A279652] p 1506 N95-19960
Anomalous vector-boson couplings in Majorana neutrino models
[PB95-127460] p 1518 N95-21220
New improved derivative expansion for field theories with spontaneous symmetry breaking
[DE94-019349] p 1580 N95-21486

NUCLEAR PHYSICS
Has a standard model solution to the solar neutrino problem been found?
[DE94-017580] p 1604 N95-20490
Nuclear research with the electromagnetic probe
[DE95-001812] p 1525 N95-21747
ANSTO: Program of research, 1993-1994
[DE94-631122] p 1605 N95-21828
Theses of the Proceedings of the 23d International Meeting on the Physics of Charged Particle Interaction with Crystals
[DE94-631501] p 1529 N95-22281

NUCLEAR POWER PLANTS
Nuclear Terms Handbook, 1993
[DE94-016248] p 1589 N95-21131

NUCLEAR POWER REACTORS
Mars power system concept definition study. Volume 1: Study results
[NASA-CR-195420-VOL-1] p 1396 N95-21952

NUCLEAR PUMPED LASERS
Applications for reactor-pumped lasers
[DE95-000536] p 1373 N95-21393

NUCLEAR PUMPING
The effect of reusing laser gas on the fission-fragment pumped 1.73 micron atomic xenon laser output
[DE94-018512] p 1369 N95-20225

NUCLEAR REACTIONS
Non destructive characterization using pulsed fast-thermal neutrons
[DE95-002601] p 1511 N95-20422
The solar neutrino problem: Neither astrophysics nor oscillations?
[DE94-012850] p 1603 N95-21316
Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128
Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280
NUCLEAR REACTORS
Real-time dynamic simulator for the Topaz II reactor power system
[DE95-001604] p 1535 N95-21278
Effect of neutron irradiation on the impact properties of A533B steel
[DE95-001834] p 1256 N95-21286
NUCLEAR RESEARCH
Nuclear research with the electromagnetic probe
[DE95-001812] p 1525 N95-21747
NUCLEAR ROCKET ENGINES
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530
NUCLEAR SCATTERING
Nuclear A dependence of exclusive vector meson production in muon scattering
[DE95-002248] p 1511 N95-20418
Multiple hard interactions in HERWIG
[PB95-130548] p 1518 N95-21233
NUCLEAR SPIN
Spin dependence of diffractive processes and implications for the small x behaviour of g1 and the spin content of the nucleon
[PB95-130332] p 1518 N95-21225
Nuclear research with the electromagnetic probe
[DE95-001812] p 1525 N95-21747
NUCLEAR STRUCTURE
Competing structures in nuclei near closed shells
[DE94-017604] p 1512 N95-20491
Universal parametrization for quark and lepton substructure
[DE94-770604] p 1514 N95-20738
Nuclear research with the electromagnetic probe
[DE95-001812] p 1525 N95-21747
NUCLEAR WEAPONS
The development of science during this century
[DE94-632964] p 1582 N95-22185
NUCLEATION
Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543
Antiphase boundaries as nucleation centers in low-temperature epitaxial growth
[AD-A279895] p 1568 N95-20594
Growth, characterization and device development in monocrystalline diamond films
[AD-A285991] p 1568 N95-20614
Microscopy of stress-induced morphological development and dislocation nucleation during semiconductor epitaxy
[DE94-017869] p 1568 N95-20674
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A279811] p 1569 N95-20807
NUCLEI (NUCLEAR PHYSICS)
A model for electron nuclear dynamics of a monatomic chain
[AD-A279652] p 1506 N95-19960
Electron-nuclear dynamics of molecular systems
[AD-A279649] p 1516 N95-21120
NUCLEIC ACIDS
Biomolecular Materials by Design, volume 330
[AD-A285369] p 1269 N95-20551
NUCLEON-NUCLEON INTERACTIONS
Dilepton production from p-p to Ca-Ca at the Bevalac
[DE95-002341] p 1520 N95-21357
Constraints on T-odd and P-even hadronic interactions from nucleon, nuclear, and atomic electric dipole moments
[DE94-012845] p 1526 N95-21920
There might be two kinds of dibaryon
[DE94-014417] p 1526 N95-22058
Parity violation in the compound nucleus
[DE95-002742] p 1530 N95-22435
NUCLEONS
Spin dependence of diffractive processes and implications for the small x behaviour of g1 and the spin content of the nucleon
[PB95-130332] p 1518 N95-21225
Exclusive processes: Tests of coherent QCD phenomena and nucleon substructure at CEBAF
[DE95-002892] p 1520 N95-21336
Strange hadronic matter
[DE94-019345] p 1521 N95-21484
Structure functions and structure function ratio F2(n)/F2(p) at low X(Bj) and Q2 in inelastic muon scattering
[DE94-018979] p 1573 N95-21561
Status of the DO top search
[DE95-002214] p 1525 N95-21715
Nuclear research with the electromagnetic probe
[DE95-001812] p 1525 N95-21747
Proton and produced particle distributions from Au+Au collisions at 11.6 A GeV/c
[DE94-018634] p 1530 N95-22392
NUCLIDES
Surface exposure geochronology using cosmogenic nuclides: Applications in Antarctic glacial geology
[AD-A279392] p 1426 N95-21944
NUMBER THEORY
Second International Conference on Ordinal Data Analysis
[AD-A279756] p 1590 N95-21401
NUMERICAL ANALYSIS
A numerical investigation of energy transfer and subgrid-scale eddy viscosity in homogeneous, isotropic and shear turbulence
[AD-A280005] p 1339 N95-20058
RCS calculation capability
[AD-A286329] p 1289 N95-20211
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A285946] p 1315 N95-20394
Fitting stochastic partial differential equations to spatial data
[AD-A279870] p 1490 N95-20432
Simulation of tearing mode stabilization by using ECH
[DE94-770700] p 1554 N95-20684
Deconvolution and singular value decomposition
[AD-A286582] p 1491 N95-20875
Laser anemometry and viscous computation of the flow through an annular turbine cascade
[AD-A280070] p 1341 N95-20968
Numerical analysis of energetic particle stabilization of ballooning modes in finite-aspect-ratio tokamaks
[DE94-631397] p 1556 N95-21164
Computation of invariant manifolds
[PB95-135687] p 1492 N95-21318
Report of the Numerical Analysis Group
[PB95-108163] p 1494 N95-21648
Object-oriented design of preconditioned iterative methods
[PB95-110276] p 1469 N95-21655
Critical dynamics and plastic flow in disordered Josephson junction arrays
[DE94-629074] p 1576 N95-21995
Activities of the Research Institute for Advanced Computer Science
[NASA-CR-197291] p 1478 N95-22108
On the wavelet optimized finite difference method
[NASA-CR-191601] p 1495 N95-22157
FORTRAN subroutine for column reduction of polynomial matrices
[PB95-134987] p 1497 N95-22379
Transactions of the Eleventh Army Conference on Applied Mathematics and Computing
[AD-A279884] p 1497 N95-22389
NUMERICAL CONTROL
Target area acquisition and control system survivability for the National Ignition Facility
[DE94-016549] p 1550 N95-20190
The development and evaluation of water-mist fire extinguishing systems
[DE94-019019] p 1286 N95-20356
System design document U-AVLIS control system architecture
[DE94-017297] p 1460 N95-20387
Preliminary control system design and analysis for the Space Station Furnace Facility thermal control system
[NASA-TM-108476] p 1365 N95-20560
An integrated architecture of adaptive neural network control for dynamic systems
[DE94-014813] p 1481 N95-20693
Automatic generation of fuzzy rules for the sensor-based navigation of a mobile robot
[DE95-001428] p 1481 N95-20837
Representing manufacturing features to support design and process changes
[DE94-018587] p 1467 N95-21389
Operator's manual for the multistation offgas analysis system
[DE95-002060] p 1243 N95-21472
RF beam control for the AGS Booster
[DE95-001485] p 1538 N95-21720
NUMERICAL INTEGRATION
A control volume method on an icosahedral grid for numerical integration of the shallow-water equations on the sphere
[DE94-016345] p 1489 N95-20170
The numerical integration and 3-D finite element formulation of a viscoelastic model of glass
[DE95-002588] p 1271 N95-20788
NUMERICAL STABILITY
Parallel predictor-corrector methods
[PB95-135711] p 1493 N95-21434
Convergence acceleration of the Proteus computer code with multigrid methods
[NASA-CR-197677] p 1467 N95-21450
NUMERICAL WEATHER FORECASTING
A control volume method on an icosahedral grid for numerical integration of the shallow-water equations on the sphere
[DE94-016345] p 1489 N95-20170
NUTRITION
Sustaining the health and performance of soldiers/warfighters deployed to harsh environments
[AD-A286270] p 1446 N95-22004
NYLON (TRADEMARK)
Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy
[DE94-629992] p 1239 N95-20736
Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

O

OBJECT-ORIENTED PROGRAMMING
Hierarchical diagrammatic representation of class structure
[PB95-110722] p 1456 N95-19908
Design of a parallel object oriented programming language
[AD-A284924] p 1457 N95-20000
Evaluation of Borland Turbo Vision
[AD-A279873] p 1459 N95-20184
Making structured graphics and constraints practical for large-scale applications
[AD-A280062] p 1461 N95-20623
Design and implementation of visual object-oriented LOGO using Prograph
[AD-A285977] p 1461 N95-20687
DIFFPACK: Software for partial differential equations
[PB95-110268] p 1468 N95-21654
Object-oriented design of preconditioned iterative methods
[PB95-110276] p 1469 N95-21655
CAiSE 1994 Doctoral Consortium
[PB95-135182] p 1469 N95-21711
Using the CoRE requirements method with ADARTS. Version 01.00.05
[AD-A279151] p 1470 N95-21972
Modelling multimedia teleservices with OSI upper layers framework: Short paper
[PB95-132734] p 1308 N95-22080
The navigation toolkit
[NASA-CR-197290] p 1205 N95-22161
A conceptual approach to object-oriented data modeling
[AD-A286048] p 1592 N95-22416
OBLIQUE SHOCK WAVES
Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble
p 1352 N95-21095
Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212
OBSERVATION
Mariners Weather Log, volume 38, number 3, summer 1994
[PB94-209541] p 1428 N95-20099
Compositional proof theory for fault tolerant real-time distributed systems
[PB95-127601] p 1465 N95-21025
Duality beyond sober spaces: Topological spaces and observation frames
[PB95-134565] p 1494 N95-21962
OBSTACLE AVOIDANCE
Unknown-terrains navigation of a mobile robot using an array of sonars
[DE94-017902] p 1482 N95-21385
OCCURRENCES
An experimental determination of meteor daily arrival rate variation
[AD-A279484] p 1600 N95-21679
OCEAN BOTTOM
Data report: Stress measurements in the bottom boundary layer with BASS tripods STRESS 2 1990-1991
[AD-A279875] p 1433 N95-20433

Multiple scatter theory of ocean sediments [AD-A286033] p 1433 N95-20999

Simulation of laser bathymetry for irregular bottoms [PB95-133518] p 1434 N95-21320

The determination of static and time varying dipole source. Sensor geometry during sea trials using differential global positioning system [MRL-TN-631] p 1205 N95-21642

A simple ocean bottom hydrophone with 200 megabyte data capacity [AD-A279478] p 1434 N95-21677

Volatiles in the Earth: All shallow and all recycled p 1416 N95-21779

Modeling the effect of water on mantle rheology p 1417 N95-21783

Mantle devolatilization and rheology in the framework of planetary evolution p 1418 N95-21788

Subduction and volatile recycling in Earth's mantle p 1421 N95-21802

Subduction of hydrated basalt of the oceanic crust: Implications for recycling of water into the upper mantle and continental growth p 1423 N95-21814

The isotope geochemistry of abyssal peridotites and related rocks [AD-A279435] p 1435 N95-21918

The dynamic role of ridges in a beta-plane channel. Towards understanding the dynamics of large scale circulation in the Southern Ocean [AD-A279390] p 1435 N95-21943

Rapid determination of geoacoustic properties of the sea floor by simulated annealing [AD-A286297] p 1436 N95-22028

Descriptions of WHOI sediment cores, volume 8 [AD-A279444] p 1436 N95-22073

Seismic anisothropy and large-scale porosity inthe ocean floor [AD-A286580] p 1436 N95-22187

OCEAN CURRENTS

A modal analysis of currents in a Pacific Atoll lagoon [AD-A283721] p 1431 N95-19971

Oceanographic analysis of the acoustic mid-ocean dynamics experiment [AD-A285907] p 1432 N95-19988

Ambient noise and surface wave dissipation in the ocean [AD-A279650] p 1432 N95-20303

Fourth International Symposium on Stratified Flows, volume 3 [AD-A286452] p 1354 N95-21584

CTD calibration and processing methods used at Woods Hole Oceanographic Institution [AD-A279507] p 1435 N95-21681

Modeling the response of the California Current system to Global Greenhouse Warming [DE94-018253] p 1408 N95-21708

The dynamic role of ridges in a beta-plane channel. Towards understanding the dynamics of large scale circulation in the Southern Ocean [AD-A279390] p 1435 N95-21943

Exchanges between hemispheres and gyres: A direct approach to the mean circulation of the equatorial Pacific [NASA-CR-196311] p 1436 N95-22072

Seismic anisothropy and large-scale porosity inthe ocean floor [AD-A286580] p 1436 N95-22187

SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL) [AD-A286462] p 1431 N95-22393

Fourth International Symposium on Stratified Flows, volume 4 [AD-A286453] p 1358 N95-22424

OCEAN DATA ACQUISITIONS SYSTEMS

Resolving velocity profiles with the multi-scale profiler [AD-A286446] p 1434 N95-21461

Climatological data for clouds over the globe from surface observations, 1982-1991: The total cloud edition [DE95-002537] p 1431 N95-22288

OCEAN DYNAMICS

Tests of an improved oceanographic expert system [AD-A280123] p 1431 N95-19888

The Surface Wave Dynamics Experiment (SWADE): A retrospective look at the wave modeling activities [AD-A285612] p 1431 N95-19895

A modal analysis of currents in a Pacific Atoll lagoon [AD-A283721] p 1431 N95-19971

Oceanographic analysis of the acoustic mid-ocean dynamics experiment [AD-A285907] p 1432 N95-19988

Analysis of low frequency ocean noise. 1: From a long-term experiment across the US East Coast. 2: From the Wake Island Hydrophone Array during northwest Pacific typhoons [AD-A284975] p 1432 N95-20040

Model-based inversion for a shallow ocean application [DE94-016968] p 1433 N95-20420

Closure on the global carbon cycle [DE94-018617] p 1404 N95-20991

Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea [AD-A280095] p 1433 N95-21018

Mixing and dynamics of the Mediterranean outflow [AD-A279803] p 1434 N95-21306

Fourth International Symposium on Stratified Flows, volume 1 [AD-A286450] p 1354 N95-21583

Fourth International Symposium on Stratified Flows, volume 3 [AD-A286452] p 1354 N95-21584

Modeling the response of the California Current system to Global Greenhouse Warming [DE94-018253] p 1408 N95-21708

High resolution properties of the equatorial Pacific marine atmospheric boundary layer from lidar and radiosonde observations [DE95-001028] p 1426 N95-21875

A numerical study of wind forcing effects on the California Current System [AD-A286205] p 1435 N95-21880

Fourth International Symposium on Stratified Flows, volume 4 [AD-A286453] p 1358 N95-22424

OCEAN MODELS

Tests of an improved oceanographic expert system [AD-A280123] p 1431 N95-19888

The Surface Wave Dynamics Experiment (SWADE): A retrospective look at the wave modeling activities [AD-A285612] p 1431 N95-19895

Radiance of the ocean horizon [AD-A285613] p 1431 N95-19896

A modal analysis of currents in a Pacific Atoll lagoon [AD-A283721] p 1431 N95-19971

Oceanographic analysis of the acoustic mid-ocean dynamics experiment [AD-A285907] p 1432 N95-19988

NOMADS graphical user interface version 2.0 user's manual [AD-A286314] p 1458 N95-20095

Mississippi State University Center for Air Sea Technology FY 1993 and FY 1994 research program in Navy ocean modeling and prediction [AD-A286322] p 1432 N95-20209

Model-based inversion for a shallow ocean application [DE94-016968] p 1433 N95-20420

Closure on the global carbon cycle [DE94-018617] p 1404 N95-20991

Modeling open boundary conditions by using the optimization approach [AD-A285548] p 1433 N95-21158

Sensitivity of climate models: Comparison of simulated and observed patterns for past climates [DE95-002257] p 1406 N95-21379

Modeling the response of the California Current system to Global Greenhouse Warming [DE94-018253] p 1408 N95-21708

A numerical study of wind forcing effects on the California Current System [AD-A286205] p 1435 N95-21880

Seismic anisothropy and large-scale porosity inthe ocean floor [AD-A286580] p 1436 N95-22187

OCEAN SURFACE

The Surface Wave Dynamics Experiment (SWADE): A retrospective look at the wave modeling activities [AD-A285612] p 1431 N95-19895

Radiance of the ocean horizon [AD-A285613] p 1431 N95-19896

Deriving earth science products from SSM/I [NASA-CR-197299] p 1389 N95-20156

Ambient noise and surface wave dissipation in the ocean [AD-A279650] p 1432 N95-20303

Methods for evaluating the effects of conduits at the surface of the sea p 1294 N95-20932

Modelling of microwave propagation and clutter in a maritime environment p 1295 N95-20938

Measurements of radar backscatter from the ocean surface at 94 GHz as a function of wind speed, direction and the modulation by the ocean waves during the SAXON-FPN experiment p 1299 N95-20960

X-band microwave backscattering from ocean waves [DE94-016719] p 1309 N95-22241

SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL) [AD-A286462] p 1431 N95-22393

OCEAN TEMPERATURE

Long Time Series Measurements in the Coastal Ocean: A workshop [AD-A279509] p 1435 N95-21682

Real time system for practical acoustic monitoring of global ocean temperature [AD-A286435] p 1436 N95-22209

OCEAN THERMAL ENERGY CONVERSION

Seawater test results of Open-Cycle Ocean Thermal Energy Conversion (OC-OTEC) components [DE94-019254] p 1396 N95-21897

OCEANOGRAPHIC PARAMETERS

A modal analysis of currents in a Pacific Atoll lagoon [AD-A283721] p 1431 N95-19971

Mariners Weather Log, volume 38, number 3, summer 1994 [PB94-209541] p 1428 N95-20099

Long Time Series Measurements in the Coastal Ocean: A workshop [AD-A279509] p 1435 N95-21682

NODDS/WOSM interface user's manual [AD-A279095] p 1471 N95-22068

OCEANOGRAPHY

Tests of an improved oceanographic expert system [AD-A280123] p 1431 N95-19888

Oceanographic analysis of the acoustic mid-ocean dynamics experiment [AD-A285907] p 1432 N95-19988

Mississippi State University Center for Air Sea Technology FY 1993 and FY 1994 research program in Navy ocean modeling and prediction [AD-A286322] p 1432 N95-20209

Synthesizing the Gulf Stream thermal structure from XBT data [AD-A279665] p 1433 N95-20458

Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea [AD-A280095] p 1433 N95-21018

Modeling open boundary conditions by using the optimization approach [AD-A285548] p 1433 N95-21158

CTD calibration and processing methods used at Woods Hole Oceanographic Institution [AD-A279507] p 1435 N95-21681

Long Time Series Measurements in the Coastal Ocean: A workshop [AD-A279509] p 1435 N95-21682

Modeling the response of the California Current system to Global Greenhouse Warming [DE94-018253] p 1408 N95-21708

Descriptions of WHOI sediment cores, volume 8 [AD-A279444] p 1436 N95-22073

OCEANS

Analysis of low frequency ocean noise. 1: From a long-term experiment across the US East Coast. 2: From the Wake Island Hydrophone Array during northwest Pacific typhoons [AD-A284975] p 1432 N95-20040

Mississippi State University Center for Air Sea Technology FY 1993 and FY 1994 research program in Navy ocean modeling and prediction [AD-A286322] p 1432 N95-20209

Terrain and refractivity effects on non-optical paths p 1294 N95-20931

European Workshop on Optical Ground Truth Instrumentation for the Validation of Space-Borne Optical Remote Sensing Data of the Marine Environment [PB95-134144] p 1390 N95-21872

The dynamic role of ridges in a beta-plane channel. Towards understanding the dynamics of large scale circulation in the Southern Ocean [AD-A279390] p 1435 N95-21943

OFFGASSING

Operator's manual for the multistation offgas analysis system [DE95-002060] p 1243 N95-21472

Removal of CO2 in closed loop off-gas treatment systems [DE94-019259] p 1407 N95-21617

OHMIC DISSIPATION

Joule heating of the ITER TF cold structure: Effects of vertical control coil currents and ELMS [DE95-001817] p 1560 N95-21724

OIL POLLUTION

Ohmsett test of NOFI Vee-Sweep and NOFI 600S Oilboom [AD-A279525] p 1408 N95-21685

OIL SLICKS

Ohmsett test of NOFI Vee-Sweep and NOFI 600S Oilboom [AD-A279525] p 1408 N95-21685

NODDS/WOSM interface user's manual [AD-A279095] p 1471 N95-22068

OILS

Impact behavior of FeAl alloy FA-350 [DE94-018128] p 1254 N95-20705

OLIVINE
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813
ON-LINE SYSTEMS
Daytime Raman lidar profiling of atmospheric water vapor
[DE94-015747] p 1413 N95-20397
FEDIX: User's guide, version 5.0/release 3.0
[DE95-002274] p 1588 N95-20762
FIREDOC users manual, 3rd edition
[PB95-128674] p 1286 N95-21129
Taking AIM: The management of scientific and technical information at Argonne National Laboratory
[DE94-019279] p 1591 N95-22092
ONE DIMENSIONAL FLOW
Multigrid with matrix-dependent transfer operators for convection-diffusion problems
[PB95-110821] p 1487 N95-19915
One-dimensional reactive Euler equations
[PB95-135430] p 1244 N95-21573
Large amplitude localized structures in a relativistic electron-positron ion plasma
[DE94-628965] p 1561 N95-21851
OPEN CIRCUIT VOLTAGE
Status of diffused junction p+n InP solar cells for space applications p 1317 N95-20509
OPENINGS
Geometric moire method of strain analysis with displacement discontinuities
[DE95-001114] p 1386 N95-20833
OPERATING COSTS
An analysis of cost overruns on defense acquisition contracts p 1584 N95-20749
NASA's attack on costs p 1585 N95-20755
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
OPERATING SYSTEMS (COMPUTERS)
DONIO: Distributed object network I/O library
[DE94-019163] p 1477 N95-21602
OPERATING TEMPERATURE
Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170
OPERATIONAL AMPLIFIERS
Pre-amplifier with multi-stage feedback
[AD-D016254] p 1336 N95-22418
OPERATIONAL HAZARDS
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422
OPERATIONS RESEARCH
Use of operations research techniques in deductive databases
[PB95-135349] p 1589 N95-21004
OPERATOR PERFORMANCE
Human performance studies for control of multiple remote systems
[AD-A286623] p 1452 N95-20768
Effect of lags on human performance with head-coupled simulators
[AD-A279577] p 1453 N95-21700
OPERATORS (MATHEMATICS)
Multigrid with matrix-dependent transfer operators for convection-diffusion problems
[PB95-110821] p 1487 N95-19915
Weighted strongly elliptic operators on lie groups
[PB95-110847] p 1487 N95-19917
Abstract reduction and topology
[PB95-110615] p 1488 N95-20054
Banach spaces with small spaces of operators
[PB95-111134] p 1489 N95-20273
On the differential representations of quantum Lie superalgebras
[DE94-629874] p 1491 N95-20734
Monadic maps and folds for arbitrary datatypes
[PB95-134045] p 1492 N95-21032
Positive rockland operators
[PB95-127510] p 1493 N95-21423
Preconditioning via asymptotically-defined domain decomposition
[DE94-019046] p 1493 N95-21564
Right inverse for the divergence operator in spaces of continuous piecewise polynomials
[PB95-127080] p 1496 N95-22369
Self-similar solutions of a fast diffusion equation that do not conserve mass
[PB95-134920] p 1497 N95-22375
OPERATORS (PERSONNEL)
Navigation system in combat vehicle
[PB95-131629] p 1452 N95-21467
OPTICAL ACTIVITY
Perception and control of locomotion
[AD-A285605] p 1450 N95-21192
OPTICAL COMMUNICATION
Optical backplane for modular avionics
p 1212 N95-20652
Eigenmode method for electromagnetic synthesis of diffractive elements with three-dimensional profiles
[PB95-127726] p 1301 N95-21107
Threshold detection in the presence of atmospheric turbulence
[AD-A286175] p 1427 N95-22249
OPTICAL COMPUTERS
Preliminary evaluation of a digital optical systolic processor implemented with acousto-optic cells
[AD-A286377] p 1541 N95-20231
International Conference on Optical Computing: Technical digest
[AD-A284293] p 1541 N95-20249
High performance backplane components for modular avionics p 1212 N95-20653
OPTICAL COUPLING
Semiconductor laser joint study program with Rome Laboratory
[AD-A285858] p 1369 N95-20379
Second order approximation for optical polaron in the strong coupling case
[DE94-628997] p 1525 N95-21856
OPTICAL DATA PROCESSING
Preliminary evaluation of a digital optical systolic processor implemented with acousto-optic cells
[AD-A286377] p 1541 N95-20231
International Conference on Optical Computing: Technical digest
[AD-A284293] p 1541 N95-20249
GaAs optical circuits
[AD-A285859] p 1369 N95-20389
Optical pattern recognition
[AD-A285384] p 1480 N95-20607
High contrast organic crystal optical modulator for phased array antenna and optical signal processing
[AD-A286557] p 1544 N95-20844
OPTICAL DENSITY
Fire smoke ventilation through shafts: Experiments
[PB95-132247] p 1288 N95-21978
OPTICAL DISKS
Common mapping system media study
[AD-A279086] p 1390 N95-21912
OPTICAL EMISSION SPECTROSCOPY
Time-resolved diagnostics of excimer laser-generated ablation plasmas used for pulsed laser deposition
[DE94-018950] p 1559 N95-21547
A HIRES analysis of the FIR emission of supernova remnants p 1594 N95-21770
OPTICAL EQUIPMENT
Characterization of an expanded-field Schwarzschild objective for extreme ultraviolet lithography
[DE94-016780] p 1541 N95-20239
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A285621] p 1571 N95-21145
Twentysixth YERAC
[PB95-127437] p 1599 N95-21347
Nonlinear frequency conversion optical filter
[AD-D016523] p 1544 N95-21465
Method for characterization of optical waveguide devices using partial coherence interferometry
[AD-D016525] p 1544 N95-21466
High-capacity optical multichannel virtual mesh interconnection networks
[PB95-134094] p 1546 N95-21870
High temperature polymer for second order nonlinear optics for photonic materials
[AD-A279309] p 1280 N95-22141
OPTICAL FIBERS
Technical digest: Eighth Symposium on Optical Fiber Measurements
[PB94-207636] p 1540 N95-19976
Control of continuous phase PH using visible light to activate PH-dependent fibers and gels in a controlled and reversible manner
[AD-D016532] p 1543 N95-20728
A three-dimensional orthogonal laser velocimeter for the NASA Ames 7- by 10-foot wind tunnel
[NASA-TM-108864] p 1366 N95-21323
High frequency current sensors using the Faraday effect in optical fibers
[DE95-001859] p 1545 N95-21728
High-capacity optical multichannel virtual mesh interconnection networks
[PB95-134094] p 1546 N95-21870
Heterostructure quantum confined Stark effect electrooptic modulators operating at 938 nm
[AD-A279342] p 1581 N95-21928
Tunable CW blue, green, orange and red upconversion fiber lasers at room temperature
[DE95-000851] p 1375 N95-22007
Optical fiber pressure sensor for liquid level monitoring
[AD-D016246] p 1547 N95-22089
Embedded optical fibres as strain sensors in polymer matrix fibre composites: The influence of adhesion in strain transfer
[PB95-133617] p 1547 N95-22140
OPTICAL FILTERS
A simple analytical model for asynchronous dense WDM/OOK systems
[AD-A283725] p 1289 N95-19973
Methods and components for optical contention resolution in high speed networks
[AD-A280016] p 1543 N95-20598
Nonlinear frequency conversion optical filter
[AD-D016523] p 1544 N95-21465
OPTICAL MATERIALS
Design, synthesis and characterization of novel nonlinear optical materials
[AD-A285617] p 1540 N95-19897
International collaboration program on innovative chemical processing of superior electronic and optical materials
[AD-A285122] p 1226 N95-20105
Optical multilayers with an amorphous fluoropolymer
[DE94-017693] p 1541 N95-20218
The preparation of all para-polyphenyls with increased solubility and enhanced third order NLO activity
[AD-A284301] p 1266 N95-20251
The synthesis and characterization of new mesogenic diacetylene monomers and their polymers
[AD-A286188] p 1267 N95-20328
A URI program for Ultraviolet/extreme ultraviolet research
[AD-A279159] p 1370 N95-20600
Reactor pumped laser research at the Sandia National Laboratories pulsed reactor facilities
[DE95-002181] p 1371 N95-20867
Development of ferroelectric liquid crystals with enhanced nonlinear optical properties
[AD-A279988] p 1571 N95-20965
Optical, electronic and optoelectronic material and device research
[AD-A280111] p 1374 N95-21630
High temperature polymer for second order nonlinear optics for photonic materials
[AD-A279309] p 1280 N95-22141
OPTICAL MEASUREMENT
Technical digest: Eighth Symposium on Optical Fiber Measurements
[PB94-207636] p 1540 N95-19976
Surface characterization and contamination analysis
[NASA-CR-197374] p 1238 N95-20557
Mechanisms and diagnostics of ultrashort pulse laser ocular effects
[AD-A285610] p 1373 N95-21195
International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164
OPTICAL MEASURING INSTRUMENTS
Molecular snapshots: Product imaging of dynamics important to fundamental combustion processes
[DE94-018595] p 1510 N95-20346
State-to-state collisional dynamics of atmospheric species
[AD-A285053] p 1370 N95-20484
Fiber grating-based detection system for wavelength encoded fiber sensors
[AD-D016208] p 1545 N95-21825
Optical processing and control
[AD-A279157] p 1546 N95-21975
OPTICAL MEMORY (DATA STORAGE)
High speed optical storage technology
[AD-A285788] p 1456 N95-22400
OPTICAL POLARIZATION
S-D hybridization and anisotropy of the optical second harmonic at low frequencies
[AD-A279449] p 1544 N95-20876
OPTICAL PROPERTIES
Free electron laser program
[AD-A285906] p 1368 N95-19987
Nonlinear Faraday effect in CdS semiconductor in an ultrahigh magnetic field
[DE94-016804] p 1564 N95-20240
The synthesis and characterization of new mesogenic diacetylene monomers and their polymers
[AD-A286188] p 1267 N95-20328
Optical properties of silicon clusters deposited on the basal plane of graphite
[DE94-017529] p 1542 N95-20450
Physical-chemical studies on rodlike polymer compositions
[AD-A285361] p 1269 N95-20548
Molecularly Designed Ultrafine/Nanostructured Materials, volume 351
[AD-A285370] p 1568 N95-20552
Optical power limiting liquid crystal composites
[AD-A286605] p 1569 N95-20767

S-D hybridization and anisotropy of the optical second harmonic at low frequencies
[AD-A279449] p 1544 N95-20876

Development of ferroelectric liquid crystals with enhanced nonlinear optical properties
[AD-A279988] p 1571 N95-20965

Light output and radiation damage in a YAIO3:Ce crystal
[DE94-016815] p 1545 N95-21643

Optical radiation: Health based exposure limits for electromagnetic radiation in the wavelength range from 100 nanometer to 1 millimeter
[PB95-132767] p 1447 N95-22083

International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

OPTICAL PUMPING

Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-000862] p 1373 N95-21312

OPTICAL RADAR

BACKSCAT lidar simulation version 4.0: Technical documentation and users guide
[AD-A285851] p 1290 N95-20376

Daytime Raman lidar profiling of atmospheric water vapor
[DE94-015747] p 1413 N95-20397

Project Whitefeather
[DE94-016575] p 1415 N95-21184

Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-000862] p 1373 N95-21312

Lidar technologies for airborne and space-based applications
[DE95-002954] p 1302 N95-21448

High resolution properties of the equatorial Pacific marine atmospheric boundary layer from lidar and radiosonde observations
[DE95-001028] p 1426 N95-21875

LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134

OPTICAL REFLECTION

The optical properties of particles deposited on a surface
[AD-A286258] p 1546 N95-22002

Defect geometries and laser-induced damage in multilayer coatings
[DE94-017695] p 1377 N95-22343

OPTICAL RESONATORS

Technique for intracavity sum frequency generation
[AD-D016478] p 1546 N95-21898

OPTICAL SCANNERS

Effect of heat treatment temperature on creep-rupture properties of Fe3Al-based alloys
[DE94-017904] p 1253 N95-20375

OPTICAL SWITCHING

International Conference on Optical Computing: Technical digest
[AD-A284293] p 1541 N95-20249

Methods and components for optical contention resolution in high speed networks
[AD-A280016] p 1543 N95-20598

Optical processing and control
[AD-A279157] p 1546 N95-21975

Polycrystalline PLZT/ITO ceramic electro-optic phase gratings: Electro-optically reconfigurable difffractive devices for free-space and in-wafer interconnects
[AD-A285861] p 1547 N95-22076

Novel materials and devices from self-assembled periodic structures
[AD-A286499] p 1232 N95-22211

Fabrication of PLZT/ITO grating for optical switching and reconfigurable optical interconnect applications
[AD-A286389] p 1548 N95-22248

OPTICAL TRACKING

Passive range measurement system
[AD-D016222] p 1544 N95-21100

Thousand golden ten orbits
[PB95-135109] p 1592 N95-22334

OPTICAL WAVEGUIDES

Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG
[AD-A285857] p 1369 N95-20378

Resonant tunneling quantum well integrated optical waveguide modulator/switch
[AD-A285142] p 1542 N95-20501

Methods and components for optical contention resolution in high speed networks
[AD-A280016] p 1543 N95-20598

Analog processing of optical wavefront using integrated guided-wave optics
[AD-A279596] p 1543 N95-20601

Method for characterization of optical waveguide devices using partial coherence interferometry
[AD-D016525] p 1544 N95-21466

Electromagnetic radiation detector utilizing an electromagnetic radiation absorbing element in a mach-zehnder interferometer arrangement
[AD-D016507] p 1306 N95-21835

OPTICS

The 12-GeV/c beam transfer and absorber lines for the Superconducting Super Collider
[DE95-002100] p 1538 N95-21733

OPTIMAL CONTROL

Application of Markov decision processes to search problems
[PB95-110813] p 1497 N95-19914

Finite dimensional approximation of a class of constrained nonlinear optimal control problems
[NASA-CR-194891] p 1479 N95-20010

Optimal distributed control system for a linear distributed parameter system
[AD-D016583] p 1480 N95-20202

International Conference on Control and Estimation of Distributed Parameter Systems: Nonlinear Phenomena
[AD-A286449] p 1493 N95-21582

Inverse and control problems in electromagnetics
[AD-A286438] p 1310 N95-22250

Learning maneuvers using neural network models
[AD-A286470] p 1486 N95-22267

Quadratic optimal control of a delay equation II: The unstable case
[PB95-127064] p 1486 N95-22366

Quadratic optimal control of a delay equation I: The stable case
[PB95-127072] p 1486 N95-22367

Drag reduction strategies p 1361 N95-22453

Optimal active control for Burgers equations
p 1361 N95-22454

OPTIMIZATION

Finite dimensional approximation of a class of constrained nonlinear optimal control problems
[NASA-CR-194891] p 1479 N95-20010

Abstract reduction and topology
[PB95-110615] p 1488 N95-20054

An object-oriented optimization systems
[DE94-016190] p 1459 N95-20165

Using local optimality criteria for efficient information retrieval with redundant information filters
[AD-A279603] p 1587 N95-20302

Parallel calculation of sensitivity derivatives for aircraft design using automatic differentiation
[NASA-TM-110103] p 1206 N95-20370

On commonalities in signal design for non-Gaussian channels
[AD-A285385] p 1498 N95-20608

NASA's attack on costs p 1585 N95-20755

Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982

Modeling open boundary conditions by using the optimization approach
[AD-A285548] p 1433 N95-21158

SEEK: A FORTRAN optimization program using a feasible directions gradient search
[NASA-CR-4641] p 1380 N95-21359

Report of the Numerical Analysis Group
[PB95-108163] p 1494 N95-21648

Note on the characterizations of the compromise value
[PB95-135117] p 1499 N95-21709

SCOPE 1.5: A Source-Code Optimization PackagEfor REDUCE 3.5: User's manual
[PB95-107579] p 1472 N95-22159

Robust fixed-structure control
[AD-A286515] p 1485 N95-22216

Iterated-subspace minimization methods for nonlinear optimization
[PB95-108171] p 1495 N95-22317

Quadratic optimal control of a delay equation II: The unstable case
[PB95-127064] p 1486 N95-22366

OPTOELECTRONIC DEVICES

GaAs optical circuits
[AD-A285859] p 1369 N95-20389

High performance backplane components for modular avionics p 1212 N95-20653

The ROC optical connector p 1212 N95-20654

High contrast organic crystal optical modulator for phased array antenna and optical signal processing
[AD-A286557] p 1544 N95-20844

Optical, electronic and optoelectronic material and device research
[AD-A280111] p 1374 N95-21630

OPTOGALVANIC SPECTROSCOPY

Application of diode lasers to the isotopically selective determination of uranium in oxides by optogalvanic spectroscopy
[DE94-018045] p 1370 N95-20698

ORBIT CALCULATION

A comparative survey of current and proposed tropospheric refraction-delay models for DSN radio metric data calibration
[NASA-CR-197338] p 1412 N95-20002

Orbit determination of highly elliptical Earth orbiters using improved Doppler data-processing modes
p 1218 N95-21533

ORBIT PERTURBATION

NEO-LISP: Deflecting near-Earth objects using high average power, repetitively pulsed lasers
[DE95-000863] p 1599 N95-21367

ORDER-DISORDER TRANSFORMATIONS

First principles simulation of materials properties
[DE94-016781] p 1566 N95-20405

Metastable bcc phase formation in the Nb-Cr-Ti system
[DE94-016212] p 1255 N95-21137

Critical dynamics and plastic flow in disordered Josephson junction arrays
[DE94-629074] p 1576 N95-21995

Order and turbulence in RF-driven Josephson junction series arrays
[DE94-629076] p 1576 N95-21997

Localization phenomenon in some random classical systems
[AD-A286514] p 1309 N95-22215

ORGANIC CHEMISTRY

Biomolecular Materials by Design, volume 330
[AD-A285369] p 1269 N95-20551

The organic chemistry of conducting polymers
[DE94-018216] p 1270 N95-20680

ORGANIC COMPOUNDS

Resonance Raman spectroscopy of volatile organics: Carbon tetrachloride
[DE95-000627] p 1233 N95-19980

Experimental investigation of PIC formation during the incineration of recovered CFC-11
[PB94-214772] p 1401 N95-20192

Performance specifications for technology development: Application for characterization of volatile organic compounds in the environment
[DE94-016627] p 1401 N95-20234

Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456

Thermodynamic and NMR studies of solvent effect on enantiomeric recognition for a chiral organiz ammonium cation by chiral diketopyridino-18-Crown-6 type ligands at 25.0 C
[AD-A279893] p 1223 N95-20592

Non-local density functional calculations of gas phase heats of formation
[AD-A286213] p 1246 N95-22000

Derivation of preliminary maximum permissible concentrations of volatile compounds in air
[PB95-107447] p 1410 N95-22125

Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381

ORGANIC MATERIALS

Inorganic-organic polymers and their role in materials science
[AD-A279715] p 1270 N95-20671

Protective organic coatings on steel: Accelerated corrosion test method for paint/coatings exposed to water with low conductivity. Nordtest project no. 1010-92. Degradation of organic coatings in fresh water
[PB95-134185] p 1277 N95-21873

ORGANIC SUPERCONDUCTORS

Positron annihilation studies of organic superconductivity
[DE94-018371] p 1564 N95-20017

New ET-based organic superconductors with the organometallic anion Cu(CF3)4(-)
[DE94-016904] p 1567 N95-20479

Studies of the microwave resistivity of kappa-(BEDT-TTF)2Cu(N(CN)2)Cl
[DE95-002980] p 1262 N95-22291

ORGANIZATIONS

Downsizing information systems: Framing the issues for the Office of Naval Intelligence (ONI)
[AD-A279888] p 1588 N95-20589

Summaries of BFRL fire research in-house projects and grants, 1994
[PB95-130845] p 1286 N95-21130

ORGANOMETALLIC COMPOUNDS

Synthesis and studies of organometallic precursors for CVD of thin film electronic materials
[AD-A285834] p 1223 N95-20033

New ET-based organic superconductors with the organometallic anion Cu(CF3)4(-)
[DE94-016904] p 1567 N95-20479

Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric study of singly and doubly charged organometallic complexes
[AD-A279899] p 1238 N95-20563
Inorganic-organic polymers and their role in materials science
[AD-A279715] p 1270 N95-20671
Photochemistry of intermolecular C-H bond activation reactions
[DE94-018417] p 1239 N95-20682
Dynamic NMR studies of restricted arene rotation in the chromiu tricarbonyl thiophene and selenophene complexes
[DE95-001656] p 1257 N95-21399
Application of IRIS to semiconductor plasma processing
[DE95-003591] p 1562 N95-22225
Synthesis and structure of a novel bis-stibole
[AD-A286345] p 1224 N95-22252
Studies of the microwave resistivity of kappa-(BEDT-TTF)2Cu(N(CN)2)Cl
[DE95-002980] p 1262 N95-22291

ORGANS
Thorium-232 in human tissues: Metabolic parameters and radiation doses
[DE94-019275] p 1441 N95-20074

ORIFICES
Flow coefficient behavior for boundary layer bleed holes and slots
[NASA-TM-106846] p 1338 N95-19953
Cascade orificial resistive device
[AD-D016529] p 1504 N95-20724

ORTHOGONALITY
Orthogonal representations over finite fields and the chromatic number of graphs
[PB95-110953] p 1487 N95-19937

OSCILLATIONS
Six-dimensional modeling of coherent bunch instabilities and related feedback systems in storage rings with power-series maps for the lattice
[DE94-017965] p 1532 N95-20494
Direct simulation of tridimensional wake of NACA 0012 profile p 1350 N95-21086
Quasi-linear equation for magnetoplasma oscillations in the weakly relativistic approximation
[DE94-628932] p 1560 N95-21593
Robust fixed-structure control
[AD-A286515] p 1485 N95-22216

OSCILLATORS
Fiber laser amplifiers and oscillators
[AD-A285835] p 1368 N95-20035
Semiquantum chaos and the large N expansion
[DE94-016196] p 1488 N95-20169
Pasotron(TM) technology
[AD-A279994] p 1314 N95-20311
Competition between electromagnetic modes in a free-electron maser
[AD-A279546] p 1374 N95-21694
Sub-millimeterwave semiconductor signal sources
[AD-A279375] p 1335 N95-22144
Radiation tests on service electronics for future multi TeV detectors
[DE94-632822] p 1335 N95-22184

OUTLET FLOW
Mixing and dynamics of the Mediterranean outflow
[AD-A279803] p 1434 N95-21306

OVER-THE-HORIZON RADAR
The effects of multihop HF propagation on the performance of OTH backscatter radars
p 1298 N95-20953
The applicability of neural networks to ionospheric modeling in support of relocatable Over-the-Horizon radar
[AD-A286114] p 1309 N95-22230

OXAZOLE
An initial assessment of the properties of 2,5-dipicryl-1,3,4-oxadiazole: A secondary explosive with high thermal stability
[MRL-TR-93-16] p 1284 N95-21624

OXIDASE
Mechanism of the amperometric response of a proposed glucose sensor based on a polypyrrole-tubule-impregnated membrane
[AD-A279836] p 1365 N95-20431

OXIDATION
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
Characteristics of oxynitrides grown in N2O
[DE94-015798] p 1566 N95-20400
Influence of oxidation on radiation hardness of silicon detectors
[DE95-002466] p 1272 N95-20894
Aromatics oxidation and soot formation in flames
[DE95-001803] p 1241 N95-21280
Cluster reactions: An approach to understanding the fundamentals of heterogeneous catalysis
[DE95-002947] p 1243 N95-21447
Water abundance and accretion history of terrestrial planets p 1424 N95-21820
Oxidation behavior of aluminum nanopowders
[DE95-002721] p 1260 N95-21926
Spectroscopic assessment of the reliability of metal/metal oxide interfaces
[AD-A286131] p 1261 N95-22035
Acid-site characterization of water-oxidized alumina films by near-edge x-ray absorption and soft x-ray photoemission
[DE95-003355] p 1247 N95-22234
The interaction of localized solutions in a surface reaction
[DE95-002736] p 1248 N95-22433

OXIDATION RESISTANCE
Toughened Silcomp composites for gas turbine engine applications
[DE95-002851] p 1214 N95-21243
Lubricant evaluation and performance, 2
[AD-A279144] p 1278 N95-21969

OXIDATION-REDUCTION REACTIONS
The primary carbon and the formation of carbon species in terrestrial magmas p 1420 N95-21797
Solubilities of nitrogen and noble gases in basalt melt
p 1422 N95-21807

OXIDE FILMS
Generation of micro-domains in AT-cut quartz by thermal processing and the effect on resonator modes
[DE94-017344] p 1564 N95-20087
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664
Methods of measuring adhesion for thermally grown oxide scales
[DE94-018177] p 1256 N95-21260
Characterization and performance of DLC films synthesized by plasma and ion beam techniques
[DE94-018287] p 1281 N95-22428

OXIDES
Reactions and microstructure at ceramic/metal interfaces
[DE94-014287] p 1265 N95-20138
Rate controlled synthesis of composition modulated, metal-oxide thin films
[DE94-016596] p 1267 N95-20317
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
The effect of oxide inclusions on the kinetics of the austenite to ferrite transformation in low alloy steel weld metal
[DE94-018131] p 1253 N95-20676
Reactive nanophase oxide additions to melt-processed high-T(sub c) superconductors
[DE95-001470] p 1570 N95-20841
Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881
Performance and cost analysis of monolithic solid oxide fuel cells
[DE95-002511] p 1394 N95-20896
Methods of measuring adhesion for thermally grown oxide scales
[DE94-018177] p 1256 N95-21260
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361
Gate oxide shorts in nMOS transistors: Electrical properties and lifetime prediction method
[DE94-018904] p 1330 N95-21545
Tailoring suspension flow for the gelcasting of oxide and nonoxide ceramics
[DE95-001351] p 1277 N95-21861

OXIDIZERS
Launch safety, toxicity, and environmental effects of the high performance oxidizer ClF(5)
[AD-A286095] p 1284 N95-22227

OXYFLUORIDES
Production of S2F10, S2OF10 and S2O2F10 by spark discharges in SF6*
[DE95-001421] p 1243 N95-21500
Novel fluorine oxidizers
[AD-A279480] p 1284 N95-21678

OXYGEN
Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268
Spectroscopic studies of glass structure
[DE94-016551] p 1268 N95-20468
High performance YBCO films
[AD-A286567] p 1326 N95-20824
Inert gas purification and measuring oxygen partial pressure in gas mixtures with EMF method based on solid electrolyte cell
[PB95-127767] p 1240 N95-21110
Calculated heats of formation of some predicted stable C, N, O, F molecules
[AD-A285957] p 1517 N95-21127
Tribology and surface mechanical properties of excimer laser nitrided titanium
[DE95-002751] p 1255 N95-21238
Ignition of submarine materials at various oxygen concentrations
[PB95-131371] p 1243 N95-21428
Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792
Water abundance and accretion history of terrestrial planets p 1424 N95-21820
High temperature corrosion and crack growth of SiC/SiC at variable oxygen partial pressures
[DE94-018715] p 1232 N95-22115
Hydrothermal conversion of carbohydrates and related compounds
[PB95-134011] p 1396 N95-22175

OXYGEN ATOMS
An overview of the Evaluation of Oxygen Interactions with Materials 3 Experiment: Space Shuttle Mission 46; July-August, 1992
[NASA-TM-110129] p 1412 N95-20278
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576

OXYGEN COMPOUNDS
Computational evaluation of the feasibility of nitrating precursors to C12N12O12
[AD-A285976] p 1239 N95-20668

OXYGEN CONSUMPTION
Intramyocardial blood volume and oxygen exchange
[PB95-108015] p 1445 N95-21580

OXYGEN ISOTOPES
Ignition of submarine materials at various oxygen concentrations
[PB95-131371] p 1243 N95-21428

OXYGEN 18
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365

OXYNITRIDES
Characteristics of oxynitrides grown in N2O
[DE94-015798] p 1566 N95-20400

OZONE
Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353
Radiative forcing for changes in tropospheric O3
[DE94-019017] p 1413 N95-20354
Compatibility testing of explosives and paints by chemiluminescence techniques
[PB95-133609] p 1275 N95-21275
Evaluation of the technical performance of the Duttch National Air Quality Monitoring Network in 1992
[PB95-131892] p 1405 N95-21327
Ozone quality control measurements in the Dutch National Air Quality Monitoring Network
[PB95-131900] p 1405 N95-21329
Monitoring activities in the framework of the Dutch National Air Quality Monitoring Network in 1994
[PB95-131884] p 1406 N95-21351
Transport, radiative, and dynamical effects of the Antarctic ozone hole: A GFDL SKYHI model experiment
[PB94-192754] p 1409 N95-22101
Confirmatory analysis of SAGE-1, and -2 data
[DE95-003623] p 1427 N95-22240

OZONE DEPLETION
Computer model predictions of the local effects of large, solid-fuel rocket motors on stratospheric ozone
[AD-A285632] p 1404 N95-21150
Definition report on environmental indices in future environmental assessments environmental balance/environmental outlook
[PB95-131876] p 1405 N95-21350
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
Ozone-depleting-substance control and phase-out plan
[DE95-001647] p 1409 N95-21722
Transport, radiative, and dynamical effects of the Antarctic ozone hole: A GFDL SKYHI model experiment
[PB94-192754] p 1409 N95-22101

Assessment of the atmospheric hazards and risks of new chemicals: Procedures to estimate hazard potentials
[PB95-107488] p 1410 N95-22186

OZONOSPHERE

The development and evaluation of water-mist fire extinguishing systems
[DE94-019019] p 1286 N95-20356

Effects of increased UV-B radiation on phytoplankton: A preliminary study and research programme
[PB95-133732] p 1439 N95-21884

P

P WAVES

Velocity analysis for transversely isotropic media
[DE95-000643] p 1411 N95-19981

P-wave signatures and parameterization of transversely isotropic media: An overview
[DE95-000644] p 1411 N95-19982

Seismic evidence for volatiles at large depth in the Earth p 1422 N95-21808

Parity violation in the compound nucleus
[DE95-002742] p 1530 N95-22435

P-I-N JUNCTIONS

Heterostructure quantum confined Stark effect electrooptic modulators operating at 938 nm
[AD-A279342] p 1581 N95-21928

Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

P-N JUNCTIONS

Radiation effects on p+n InP junctions grown by MOCVD p 1319 N95-20520

Annealing of irradiated n+p InP buried homojunctions
p 1320 N95-20524

P/N In(Al) GaAs multijunction laser power converters
p 1323 N95-20539

P-TYPE SEMICONDUCTORS

Visible light emitting materials and injection devices
[AD-A284796] p 1541 N95-20066

Semiconductor cold electron emission device
[AD-D016577] p 1314 N95-20298

Complementary GaAs junction-gated heterostructure field effect transistor technology
[DE94-018901] p 1329 N95-21390

InTISb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774

PACIFIC OCEAN

Hydrographic data from equatorial Pacific waters near the Galapagos
[AD-A283741] p 1431 N95-19918

Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792

Acoustic Thermometry of Ocean Climate (ATOC): Selection of California source site
[AD-A279295] p 1436 N95-21987

Exchanges between hemispheres and gyres: A direct approach to the mean circulation of the equatorial Pacific
[NASA-CR-196311] p 1436 N95-22072

PACKAGING

Advanced Packaging Concepts for Digital Avionics
[AGARD-CP-562] p 1208 N95-20631

The impact of advanced packaging technology on modular avionics architectures p 1208 N95-20632

Standard Hardware Acquisition and Reliability Program (SHARP) advanced SEM-E packaging
p 1208 N95-20633

FASTPACK: Optimized solutions for modular avionics derived from a parametric study. Part 2: Avionics
p 1209 N95-20635

Ultra-Reliable Digital Avionics (URDA) processor
p 1209 N95-20638

Packaging the MAMA module p 1209 N95-20639

PACKET SWITCHING

High-performance packet switching architecture for ATM: Conventional solution and neural network solution
[PB95-110920] p 1312 N95-19935

A group communication approach for mobile computing mobile channel: An ISIS tool for mobile services
[AD-A279785] p 1290 N95-20306

Cell loss analysis of two-class priority generalized knockout switch
[PB95-127742] p 1301 N95-21109

PACKET TRANSMISSION

Routing of unidirectional packet radio for wide-area paging network control and maintenance
[PB95-104428] p 1300 N95-20980

Modelling the reassembly buffer in a connectionless server
[PB95-132908] p 1308 N95-22087

PACKETS (COMMUNICATION)

Routing of unidirectional packet radio for wide-area paging network control and maintenance
[PB95-104428] p 1300 N95-20980

An object-oriented implementation of the Xpress transfor protocol
[DE95-001506] p 1301 N95-21277

Verification of a timestamp-based sliding-window protocol
[PB95-132759] p 1455 N95-22082

Modelling the reassembly buffer in a connectionless server
[PB95-132908] p 1308 N95-22087

Method of sensing target status in a local area network
[AD-D016248] p 1478 N95-22090

PAINTS

Application of pressure sensitive paint in hypersonic flows
[NASA-TM-106824] p 1201 N95-20794

Compatibility testing of explosives and paints by chemiluminescence techniques
[PB95-133609] p 1275 N95-21275

Robotic paint stripping cell
[AD-A279158] p 1279 N95-21976

PAIR PRODUCTION

Electron-positron pair production in ultrarelativistic atomic collisions: 6.4 TeV S(sup 16+) with Au, Pd and Al
[DE95-000690] p 1508 N95-20133

Search for W pair production with dilepton decay modes at D0
[DE95-000724] p 1508 N95-20134

Signals for top quark anomalous chromomagnetic moments at colliders
[DE95-002896] p 1535 N95-21254

Pair production as a probe of colliding beam size
[DE95-002893] p 1536 N95-21337

Electroweak boson pair production in p(-p) collisions at the square root of s = 1.8 TeV
[DE95-000725] p 1527 N95-22194

Search for top with DO detector in dilepton channel
[DE95-000731] p 1529 N95-22314

PALEOCLIMATOLOGY

Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE95-002257] p 1406 N95-21379

PALLADIUM

Properties of aged metal tritides
[DE95-001787] p 1243 N95-21440

PALLADIUM ALLOYS

Thermodynamic characterization of new palladium alloy tritides
[DE94-018430] p 1579 N95-20028

Natural gas converter performance and durability
[PB95-135554] p 1284 N95-21966

PALLADIUM COMPOUNDS

Evaluation of Pd-Cr wires for strain gage application
[NASA-TM-106857] p 1366 N95-21259

Spectroscopic, morphological, and electrical characterization of PdGe ohmic contacts to n-GaAs
[DE95-000738] p 1329 N95-21394

PANEL METHOD (FLUID DYNAMICS)

Open Skies project computational fluid dynamic analysis
[AD-A285928] p 1200 N95-19991

PARABOLIC BODIES

Experimental study of the helicopter-mobile radioelectrical channel and possible extension to the satellite-mobile channel p 1296 N95-20945

PARABOLIC DIFFERENTIAL EQUATIONS

On the sputtering of metals and insulators: A nonlinear evolution problem with nonlinear boundary condition
[DE95-001456] p 1254 N95-20792

PARABOLIC REFLECTORS

Testing of the SAIC facets on the stretched-membrane dish
[DE95-001831] p 1393 N95-20864

Propagation measurements on a troposcatter link in the Canadian High Arctic p 1295 N95-20940

D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781

PARALLEL COMPUTERS

Performance issues for engineering analysis on MIMD parallel computers
[DE94-015769] p 1474 N95-20150

Parallel solid mechanics codes at Sandia National Laboratories
[DE94-015770] p 1474 N95-20152

A scalable video rate camera interface
[AD-A286144] p 1474 N95-20325

Task parallel programming in Fx
[AD-A285136] p 1475 N95-20500

PVM a platform for portable distributed computing
[DE94-019156] p 1455 N95-21607

Scalable programming environment
[AD-A286390] p 1472 N95-22201

Fast parallel tree codes for gravitational and fluid dynamical N-body problems
[AD-A286480] p 1358 N95-22290

PARALLEL PROCESSING (COMPUTERS)

O(log2 n) time efficient parallel factorization of dense, sparse separable, and banded matrices
[NASA-CR-197356] p 1473 N95-19885

Design considerations for parallel graphics libraries
[NASA-CR-194935] p 1473 N95-20013

ILIAS: A sequential language for parallel matrix computations
[PB95-110631] p 1473 N95-20056

Split-C and active messages under SUNMOS on the Intel Paragon
[DE94-011418] p 1474 N95-20123

Performance issues for engineering analysis on MIMD parallel computers
[DE94-015769] p 1474 N95-20150

A practical guide to using MCNP with PVM
[DE94-016162] p 1474 N95-20158

System level fault tolerance in parallel and distributed computing systems
[AD-A279664] p 1474 N95-20305

Explicit parallel two-step Runge-Kutta-Nystroem methods
[PB95-135752] p 1489 N95-20423

Parallelism across the steps in iterated Runge-Kutta methods for stiff initial value problems
[PB95-135760] p 1490 N95-20424

RALPAR-RAL mesh partitioning program version 1.1
[PB95-129847] p 1475 N95-20435

A theoretical study on the performance of the FDTD code on a massively parallel computer
[AD-A285346] p 1475 N95-20499

Stochastic network processes
[AD-A279905] p 1475 N95-20566

ECSU-AASERT summer research project in parallel processing and computer visualization
[AD-A285983] p 1475 N95-20618

Computing methods for the approximate solution of time dependent problems
[AD-A286007] p 1491 N95-20719

Functional and para-functional parallel processing
[DE95-002805] p 1475 N95-20888

Polymer based all-optic reconfigurable interconnects
[AD-A279976] p 1272 N95-20962

Direct simulation and graphics post-processing of three-dimensional turbulent flows p 1352 N95-21098

New methods for large scale local and global optimization
[AD-A285635] p 1517 N95-21126

A divide-and-conquer method for tridiagonalizing symmetric matrices with repeated eigenvalues
[DE95-002918] p 1476 N95-21257

A framework for symmetric band reduction and tridiagonalization
[DE95-002919] p 1476 N95-21341

Parallel predictor-corrector methods
[PB95-135711] p 1493 N95-21434

GRONICs-1994. Proceedings of the 1994 Groningen Student Conference on Computer Science
[PB95-135620] p 1468 N95-21455

CDMA with interference cancellation for multiprobe missions p 1304 N95-21536

PVM 3 beyond network computing
[DE94-019115] p 1477 N95-21556

DONIO: Distributed object network I/O library
[DE94-019163] p 1477 N95-21602

PVM a platform for portable distributed computing
[DE94-019156] p 1455 N95-21607

The message passing version of the parallel Community Climate Model
[DE94-019158] p 1407 N95-21608

A massively parallel algorithm for grand canonical Monte Carlo computer simulation with the short-ranged Lennard-Jones potential
[DE94-010396] p 1477 N95-21843

Status of CFDLIB performance tests on the T3D
[DE95-002708] p 1478 N95-21925

Massively-parallel computational fluid dynamics
[AD-A279389] p 1355 N95-21942

Activities of the Research Institute for Advanced Computer Science
[NASA-CR-197291] p 1478 N95-22108

High performance computing for beam physics applications
[DE94-018312] p 1539 N95-22243

Recent results in analysis and simulation of beam halo
[DE94-018313] p 1539 N95-22298

A new parallel method for molecular dynamics simulation of macromolecular systems
[DE94-018621] p 1529 N95-22315

Formal specification and compositional verification of an atomic broadcast protocol
[PB95-110508] p 1472 N95-22351
Design of a massively parallel computer using bit serial processing elements
[NASA-CR-197365] p 1479 N95-22406

PARALLEL PROGRAMMING
Design of a parallel object oriented programming language
[AD-A284924] p 1457 N95-20000
Task parallel programming in Fx
[AD-A285136] p 1475 N95-20500

PARALLELOGRAMS
A convergence analysis of an h-version finite element method with high order elements for two dimensional elasto-plasticity problems
[AD-A279975] p 1491 N95-20920

PARAMAGNETISM
Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725

PARAMETER IDENTIFICATION
Mathematical theory of neural networks
[AD-A286508] p 1485 N95-22213
Biaxiality of chiral liquid crystals
[DE94-629032] p 1578 N95-22277

PARAMETERIZATION
P-wave signatures and parameterization of transversely isotropic media: An overview
[DE95-000644] p 1411 N95-19982
Universal parametrization for quark and lepton substructure
[DE94-770604] p 1514 N95-20738
EPSCoR supplemental grant for an application of neural networks to seismic signal discrimination
[AD-A285846] p 1414 N95-20878
Minimal square spectral factors
[PB95-132726] p 1495 N95-22032

PARAMETRIC AMPLIFIERS
Solid state frequency conversion technology for remote sensing
[DE94-019102] p 1389 N95-21433

PARITY
Parity nonconservation in radioactive atoms: An experimental perspective
[DE95-002737] p 1518 N95-21235
A neutron beam polarizer for study of parity violation in neutron-nucleus interactions
[DE95-002743] p 1519 N95-21237
Parity violation in the compound nucleus
[DE95-002742] p 1530 N95-22435

PARSING ALGORITHMS
Initial experience with noncorrecting syntax error handling
[PB95-132700] p 1471 N95-22029
Top-down non-correcting error recovery in LLgen
[PB95-132718] p 1471 N95-22031

PARTIAL DIFFERENTIAL EQUATIONS
Solutions of D(sup n)D(sup m)f=0
[PB95-110839] p 1487 N95-19916
Squeezing and flow of energy for non linear wave equations
[PB95-111100] p 1489 N95-20172
Stabilization and control problems in structural dynamics
[AD-A279996] p 1340 N95-20312
Fitting stochastic partial differential equations to spatial data
[AD-A279870] p 1490 N95-20432
VLUGr3: A vectorizable adaptive grid solver for PDEs in 3D. 2: Code description
[PB95-135737] p 1465 N95-21033
VLUGR3: A vectorizable adaptive grid solver for PDEs in 3D. 1: Algorithmic aspects and applications
[PB95-135729] p 1467 N95-21435
DIFFPACK: Software for partial differential equations
[PB95-110268] p 1468 N95-21654
Object-oriented design of preconditioned iterative methods
[PB95-110276] p 1469 N95-21655
Locking of the finite element method in thermoelasticity
[PB95-127098] p 1496 N95-22370

PARTIAL PRESSURE
Inert gas purification and measuring oxygen partial pressure in gas mixtures with EMF method based on solid electrolyte cell
[PB95-127767] p 1240 N95-21110
High performance YBCO films
[AD-A279560] p 1276 N95-21695

PARTICLE ACCELERATION
Charged particle dynamics in the acceleration gap of the PBFA 2 ion diode
[DE94-017347] p 1506 N95-20026
Approach to compact terawatt CO2 laser system for particle acceleration
[DE95-002170] p 1371 N95-20866
Confinement and stability of crystalline beams in storage rings
[DE95-002515] p 1533 N95-20886
Theory of the excitonic lineshape in low-dimensional structures with rough interfaces
[DE95-003434] p 1582 N95-22237

PARTICLE ACCELERATOR TARGETS
Accelerators for energy production
[DE94-770764] p 1392 N95-20685
Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891
Use of the National Ignition Facility for the development of inertial fusion energy
[DE94-016696] p 1557 N95-21206

PARTICLE ACCELERATORS
Relational databases for RHIC design and control
[DE94-016785] p 1532 N95-20336
Optimizing the length of the stores and related effects
[DE95-002531] p 1533 N95-20885
Xwake 1.0 user's manual
[DE95-002528] p 1463 N95-20901
Moment approach to high-order accelerator beam optics
[DE95-001018] p 1536 N95-21331
Normal form analysis of the Tevatron
[DE94-017172] p 1539 N95-22192

PARTICLE BEAMS
Crystalline beam in a storage ring: How long can it last?
[DE94-017303] p 1563 N95-20014
Particle beam fusion
[DE95-000711] p 1549 N95-20075
Crystalline beams: The horizontal zigzag
[DE95-002227] p 1533 N95-20766
Crystalline beams
[DE95-002656] p 1569 N95-20793
Confinement and stability of crystalline beams in storage rings
[DE95-002515] p 1533 N95-20886
Xwake 1.0 user's manual
[DE95-002528] p 1463 N95-20901
Moment approach to high-order accelerator beam optics
[DE95-001018] p 1536 N95-21331
High performance computing for beam physics applications
[DE94-018312] p 1539 N95-22243
Bunched beam instability with frequency spread
[DE94-018632] p 1539 N95-22357
The Double Eagle Space Experiment (DESE) beamline design
[DE94-018319] p 1601 N95-22419

PARTICLE COLLISIONS
J/psi,psi(prime) yields mu(+)mu(-) and B yields J/psi,psi(prime) cross sections
[DE94-017184] p 1507 N95-20108
D0 quantum chromodynamics: A compilation of results presented at DPF 1994
[DE95-000838] p 1510 N95-20344
High energy photon-photon collisions
[DE94-017494] p 1532 N95-20388
Mass and lifetime measurements with exclusive B reconstruction at CDF
[DE94-015849] p 1511 N95-20401
Measurements of the mass and width of the W boson from CDF
[DE94-015380] p 1511 N95-20415
State-to-state collisional dynamics of atmospheric species
[AD-A285053] p 1370 N95-20484
Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section
[DE95-002524] p 1515 N95-20897
Charmonium production, b quark and B meson production and b(bar b) correlations at CDF
[DE95-002525] p 1515 N95-20898
Emittance growth due to negative-mass instability above transition
[DE95-002527] p 1534 N95-20900
Heavy ion track-structure calculations for radial dose in arbitrary materials
[NASA-TP-3497] p 1517 N95-21191
Multiple hard interactions in HERWIG
[PB95-130548] p 1518 N95-21233
Experiments at high energy hadron colliders and underground water Cerenkov detector experiment
[DE95-001804] p 1535 N95-21281
Measurement of the polarization in the decay B(sup 0) (yields) J/(psi)K*(sup 0) in (bar p)p collisions at (radical)s = 1.8 TeV
[DE95-002521] p 1520 N95-21313
1994 Nonneutral Plasma Workshop
[AD-A285656] p 1559 N95-21404
The diphoton production rate in (bar p)p collisions at the square root of s = 1800 GeV
[DE95-000559] p 1522 N95-21497
Measurement of W and Z production cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV
[DE95-002250] p 1523 N95-21521
Polarization of charmonium in pion-nucleus collisions
[DE95-002783] p 1523 N95-21525
Measurement of the B meson differential cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV using the exclusive decays B(sup (+-)) (yields) J/(psi)K(sup (+-)) and B(sup 0) (yields) J/(psi)K*(sup 0)
[DE94-018993] p 1523 N95-21562
Search for new particles decaying to dijets in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-018994] p 1523 N95-21563
Status of the DO top search
[DE95-002214] p 1525 N95-21715
Single particle measurements and two particle interferometry results from CERN experiment NA44
[DE95-003041] p 1527 N95-22078
Proton and produced particle distributions from Au+Au collisions at 11.6 A GeV/c
[DE94-018634] p 1530 N95-22392

PARTICLE DECAY
J/psi,psi(prime) yields mu(+)mu(-) and B yields J/psi,psi(prime) cross sections
[DE94-017184] p 1507 N95-20108
B meson lifetimes at CDF
[DE95-000564] p 1507 N95-20110
Search for W pair production with dilepton decay modes at D0
[DE95-000724] p 1508 N95-20134
Search for top in DO using the electron + jets channel with soft muon tagging
[DE95-001284] p 1509 N95-20217
CDF top results in the dilepton channel
[DE95-000837] p 1510 N95-20343
Semi-leptonic form-factors from lattice QCD
[DE95-000871] p 1510 N95-20367
Mass and lifetime measurements with exclusive B reconstruction at CDF
[DE94-015849] p 1511 N95-20401
Higgs decay to bottom quarks at the Tevatron
[DE94-016715] p 1511 N95-20404
GAJET experiment at the LHC: The GAJET collaboration
[PB95-129813] p 1512 N95-20454
Constraints on SUSy-GUT unification from b yields s-gamma decay
[PB95-130373] p 1580 N95-21229
Top ten models constrained by b (yields) s(gamma)
[DE95-002870] p 1519 N95-21250
A measurement of the b(bar b) cross section at CDF
[DE95-000642] p 1519 N95-21273
A high-rate fixed-target charm experiment
[DE95-001767] p 1521 N95-21378
Measurement of the B meson differential cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV using the exclusive decays B(sup (+-)) (yields) J/(psi)K(sup (+-)) and B(sup 0) (yields) J/(psi)K*(sup 0)
[DE94-018993] p 1523 N95-21562
Search for new particles decaying to dijets in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-018994] p 1523 N95-21563
Measurement of the B cross section at CDF via B semileptonic decays
[DE95-002217] p 1524 N95-21597
Status of the DO top search
[DE95-002214] p 1525 N95-21715
A preliminary, precise measurement of the average B hadron lifetime
[DE95-001848] p 1525 N95-21727
Tests of structure functions using lepton pairs: W-charge asymmetry at CDF
[DE95-000560] p 1527 N95-22122
Measurement of the average lifetime of B hadrons at SLD
[DE95-002121] p 1527 N95-22152
Physics at the Fermilab Collider
[DE95-000726] p 1539 N95-22195
Constraints on the left-right symmetric model from b yields s gamma
[DE95-003469] p 1528 N95-22239
Topics in gauge theories and the unification of elementary particle interactions
[DE94-013485] p 1529 N95-22279
Search for top with DO detector in dilepton channel
[DE95-000731] p 1529 N95-22314

PARTICLE DIFFUSION
Positron implantation profiles in elemental and multilayer systems
[DE94-014876] p 1566 N95-20382

PARTICLE ENERGY
Resonant photon-graviton conversion in EM fields: From earth to heaven
[DE95-002784] p 1301 N95-21241

Search for Centauro events in the DO Detector at Fermilab collider
[DE95-002522] p 1535 N95-21314
Luminosity polarization correlation in the SLC
[DE95-002889] p 1536 N95-21335

PARTICLE IMAGE VELOCIMETRY
Visualizing 3D velocity fields near contour surfaces
[DE95-000841] p 1353 N95-21182

PARTICLE IN CELL TECHNIQUE
PIC simulation of surface waves
[AD-A285358] p 1563 N95-22422

PARTICLE INTERACTIONS
A tau-charm-factory at Argonne
[DE94-016913] p 1510 N95-20360
Neutrino-neutrino scattering and matter-enhanced neutrino flavor transformation in supernovae
[DE94-017577] p 1604 N95-20383
Symmetry, Wigner functions and particle reactions
[DE94-629887] p 1514 N95-20735
Recent results from E665
[DE95-002523] p 1516 N95-20914
Construction of non-critical string field theory by transfer matrix formalism in dynamical triangulation
[DE94-770607] p 1516 N95-20986
Heavy ion track-structure calculations for radial dose in arbitrary materials
[NASA-TP-3497] p 1517 N95-21191
A high-rate fixed-target charm experiment
[DE95-001767] p 1521 N95-21378
Explicit analytical solution of the nonlinear Vlasov Poisson system
[DE94-628931] p 1500 N95-21592
Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177
Theses of the Proceedings of the 23d International Meeting on the Physics of Charged Particle Interaction with Crystals
[DE94-631501] p 1529 N95-22281

PARTICLE MASS
Constraints on SUSy-GUT unification from b yields s-gamma decay
[PB95-130373] p 1580 N95-21229

PARTICLE MOTION
Matrix formulation of the particle motion in crystalline beams
[DE94-017301] p 1563 N95-19925
Analysis methods for fast impurity ion dynamics data
[DE95-000589] p 1549 N95-20112
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345

PARTICLE PRODUCTION
Search for top in DO using the electron + jets channel with soft muon tagging
[DE95-001284] p 1509 N95-20217
Strange particle and antiproton production in S + nucleus collisions at 200 GeV/nucleon
[DE95-002348] p 1513 N95-20575
Universality of particle multiplicities
[DE95-000727] p 1515 N95-20879
Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section
[DE95-002524] p 1515 N95-20897
Charmonium production, b quark and B meson production and b(bar b) correlations at CDF
[DE95-002525] p 1515 N95-20898
Recent results from E665
[DE95-002523] p 1516 N95-20914
Theories of the eta-meson-nucleus interaction
[DE94-016055] p 1516 N95-21125
A measurement of the b(bar b) cross section at CDF
[DE95-000642] p 1519 N95-21273
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Dilepton production from p-p to Ca-Ca at the Bevalac
[DE95-002341] p 1520 N95-21357
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380
Search for the top quark using multivariate analysis techniques
[DE95-000561] p 1522 N95-21498
QCD corrections to Higgs boson production: An update
[DE95-000626] p 1522 N95-21506
Measurement of W and Z production cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV
[DE95-002250] p 1523 N95-21521
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704
Status of the DO top search
[DE95-002214] p 1525 N95-21715
Physics at the Fermilab Collider
[DE95-000726] p 1539 N95-22195
Inclusive B production at CDF and D0
[DE95-000728] p 1528 N95-22196
Topics in gauge theories and the unification of elementary particle interactions
[DE94-013485] p 1529 N95-22279
Beam flavor dependence in the hadroproduction of D(+-) and D(sub s)(+-) mesons
[DE94-015541] p 1530 N95-22339

PARTICLE SIZE DISTRIBUTION
Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725
Diffuse reflectance spectra of energetic material
[DSTO-TR-0065] p 1284 N95-21951
Single particle measurements and two particle interferometry results from CERN experiment NA44
[DE95-003041] p 1527 N95-22078

PARTICLE SPIN
Neutrino magnetic moments and the solar neutrino problem
[DE94-017579] p 1602 N95-20147
Hadron beams and accelerators
[DE95-002932] p 1536 N95-21342
Rigorous spin-spin correlation function of Ising model on a special kind of Sierpinski Carpets
[DE94-628995] p 1575 N95-21854

PARTICLE THEORY
Chiral symmetry and lattice gauge theory
[DE94-018676] p 1564 N95-20130
Using science centers to expose the general public to the microworld
[DE95-000647] p 1508 N95-20132
Research in theoretical elementary particle physics at the University of Florida, task A
[DE94-004373] p 1512 N95-20469
Proceedings of the School for Young High Energy Physicists
[PB95-108114] p 1537 N95-21647

PARTICLE TRAJECTORIES
Thousand golden ten orbits
[PB95-135109] p 1592 N95-22334

PARTICLES
Computer simulation of the diocotron instability
[AD-A285655] p 1559 N95-21403
The optical properties of particles deposited on a surface
[AD-A286258] p 1546 N95-22002

PARTICULATE REINFORCED COMPOSITES
Comparison of the dynamic fatigue behavior of two monolithic SiC and an Al2O3/SiC composite
[DE94-017751] p 1225 N95-20022
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 4: Silicon carbide particulate reinforced alumina ceramic
[AD-A286299] p 1279 N95-22047

PARTICULATES
Low flow fluid separator
[AD-D016575] p 1339 N95-20297
Approaches to the design of structural ceramics incorporating whiskers and particulate phases
[DE94-018126] p 1271 N95-20704
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
Current concepts on airborne particles and health
[DE95-002260] p 1447 N95-22287

PARTITIONS (MATHEMATICS)
Classification of diagonal coset modular invariants
[PB95-111118] p 1489 N95-20259
The method of evaluating quantum partition function for the Hubbard model
[DE94-628991] p 1581 N95-21639
An exact enumeration of self-avoiding loops on a square lattice
[DE94-628999] p 1578 N95-22276

PARTONS
Antishadowing contribution to the pomeron structure function
[PB95-127478] p 1518 N95-21221
Multiple hard interactions in HERWIG
[PB95-130548] p 1518 N95-21233

PASSAGEWAYS
Elastic micro-fabricated surface layer for reducing turbulence and drag on an object while it moves through a fluid medium
[AD-D016516] p 1356 N95-22060

PASSENGER AIRCRAFT
Commuter/air taxi ditchings and water-related impacts that occurred from 1979 to 1989
[AD-A285691] p 1202 N95-20275

PASSENGERS
Test and evaluation report for the Manual Domestic Passive Profiling System (MDPPS)
[AD-A286312] p 1202 N95-20093

PASSIVITY
Low electron beam energy CIVA analysis of passivated ICs
[DE94-017421] p 1314 N95-20286
Status of diffused junction p+n InP solar cells for space applications p 1317 N95-20509
Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs
p 1323 N95-20542
VOC compliant wash primer
[AD-A286034] p 1273 N95-21000

PASTES
The permeation of bis(2-fluoro-2,2-dinitroethyl) formal (FEFO), ethyl 4,4-dinitropentanoate (EDNP), ethyl 4-nitropentanoate (ENP), and 1,2,4-trichlorobenzene (TCB) through barrier membranes
[DE95-002492] p 1283 N95-21514

PATENT POLICY
NASA patent abstracts bibliography: A continuing bibliography. Section 2: Indexes (supplement 46)
[NASA-SP-7039(46)-SECT-2] p 1590 N95-21948

PATTERN RECOGNITION
High performance hardware and software for pattern recognition and image processing
[AD-A279776] p 1457 N95-19961
Intermediate levels of visual processing
[AD-A284922] p 1448 N95-19998
Recognition of subsurface defects in machined ceramics by application of neural networks to laser scatter patterns
[DE94-018373] p 1264 N95-20018
View-based models of 3D object recognition and class-specific invariance
[AD-A279858] p 1459 N95-20157
Viewer-centered object recognition in monkeys
[AD-A279876] p 1437 N95-20185
Electrochemical impedance pattern recognition for detection of hidden chemical corrosion on aircraft components
[AD-A284998] p 1253 N95-20481
Multilayer piecewise linear networks
[AD-A285382] p 1480 N95-20606
Optical pattern recognition
[AD-A285384] p 1480 N95-20607
Proposal for a tutorial on Minimal Length Encoding (MLE) in molecular biology
[DE94-015076] p 1438 N95-21376
Object recognition by alignment using invariant projections of planar surfaces
[AD-A279841] p 1468 N95-21495
The use of fuzzy set classification for pattern recognition of the polygraph
[AD-A279148] p 1470 N95-21971
Discovering related DNA sequences via mutual information
[DE95-001101] p 1440 N95-22067
Feature extraction without edge detection
[AD-A279842] p 1473 N95-22386

PATTERN REGISTRATION
SAR image registration in absolute coordinates using GPS carrier phase position and velocity information
[DE94-018738] p 1204 N95-20195

PATTERSON MAP
HASSP and HEAVY: Tools for automated heavy atom searches and refinement
[DE94-016071] p 1569 N95-20696

PAVEMENTS
Super-heavy aircraft study
[AD-A279602] p 1215 N95-19955
Determination of layer moduli from falling weight deflectometer measurements
[PB95-129748] p 1286 N95-21333

PAYLOAD DEPLOYMENT & RETRIEVAL SYSTEM
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558
Tethered satellite: Forces and motion
[NASA-TM-110518] p 1220 N95-21858
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295

PAYLOADS
Preliminary study of HUTSAT microsatellite
[PB95-127619] p 1220 N95-21026

PEEK
Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596
Damage tolerance of carbon fibre polyetheretherketone laminates
[PB95-131611] p 1230 N95-2143

PELLETS
Review of recent D-T experiments from TFTR
[DE95-002755] p 1557 N95-21239
Fusion power production in TFTR
[DE95-002756] p 1557 N95-21240
Cryogenic pellet laser plasma source targets
[DE95-002488] p 1376 N95-22169

PENDULUMS
The production of calibration specimens for impact testing of subsize Charpy specimens
[DE94-018125] p 1386 N95-20703
PENETRANTS
Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596
PENETRATION
Tungsten-uranium penetrator target interaction
[DE95-000847] p 1387 N95-21364
Flux creep with logarithmic U(j) dependence
[DE94-629058] p 1577 N95-22180
PERCHLORATES
Thermodynamic and NMR studies of solvent effect on enantiomeric recognition for a chiral organiz ammonium cation by chiral diketopyridino-18-Crown-6 type ligands at 25.0 C
[AD-A279893] p 1223 N95-20592
PERFORMANCE PREDICTION
Noise model of the MSX SPIRIT 3 interferometer
[AD-A285837] p 1364 N95-20036
Performance specifications for technology development: Application for characterization of volatile organic compounds in the environment
[DE94-016627] p 1401 N95-20234
An evaluation of 915-MHz radar wind profiler/RASS by tower and sodar measurements
[DE94-018913] p 1364 N95-20320
BACKSCAT lidar simulation version 4.0: Technical documentation and users guide
[AD-A285851] p 1290 N95-20376
Development and enhancement of a model of performance and decision making under stress in a real life setting
[AD-A285945] p 1449 N95-20393
Performance measurement: A tool for program control
p 1585 N95-20752
Performance and cost analysis of monolithic solid oxide fuel cells
[DE95-002511] p 1394 N95-20896
Underwater Acoustic Generator Phase 2: Sea trial, March 1992
[MRL-TN-640] p 1434 N95-21657
Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
[DE94-018092] p 1560 N95-21668
EAGLES 1.1: A microcomputer software package for analyzing fuel efficiency of electric and gasoline vehicles
[DE95-001119] p 1469 N95-21829
Lubricant evaluation and performance, 2
[AD-A279144] p 1278 N95-21969
Effects of cyclic stress distribution models on fatigue life predictions
[DE95-001619] p 1388 N95-22070
PERFORMANCE TESTS
Round-robin comparison of heat release apparatus
[AD-A285831] p 1363 N95-20031
A review of water mist technology for fire suppression
[AD-A285738] p 1202 N95-20071
Test and evaluation of electric vehicles
[DE95-001153] p 1313 N95-20213
In situ viscometer instrument acceptance test report
[DE94-018507] p 1364 N95-20224
A theoretical study on the performance of the FDTD code on a massively parallel computer
[AD-A285346] p 1475 N95-20499
Qualification test results for blue-red reflecting solar covers p 1320 N95-20525
GPS-Squitter capacity analysis
[AD-A280037] p 1291 N95-20599
Field-emitter arrays for RF vacuum microelectronics
[AD-A279959] p 1325 N95-20661
Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817
Test and Evaluation Master Plan (TEMP) for the Weather Message Switching Center Replacement (WMSCR)
[AD-A286590] p 1429 N95-20857
Si concentrator solar cell development
[DE95-002314] p 1393 N95-20870
Development of concentrator solar cells
[DE95-002316] p 1394 N95-20871
Real-data tests of a single-Doppler radar assimilation system
[AD-A286638] p 1292 N95-20904
Impact of propagation mechanisms on global navigation satellite system performance p 1298 N95-20950
The iMAPS: General information
[AD-A285421] p 1465 N95-21176
Recent National Solar Thermal Test Facility activities, in partnership with industry
[DE95-001828] p 1394 N95-21353
A low energy continuous reactor separator for the production of ethanol from corn grits/starch and biomass streams
[DE95-002256] p 1283 N95-21356
Quantitative evaluation of wrist posture and typing performance: A comparative study of 4 computer keyboards
[DE95-002392] p 1452 N95-21358
An in-line ultrasonic viscometer
[DE95-002982] p 1366 N95-21453
An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478
The efficiency calibration of the DSS-24 34-meter beam-waveguide antenna p 1305 N95-21542
Underwater Acoustic Generator Phase 2: Sea trial, March 1992
[MRL-TN-640] p 1434 N95-21657
The ITER in-vessel system
[DE94-018053] p 1560 N95-21665
Applications of ICP magnetic sector multicollector mass spectrometry to basic energy research
[DE95-002600] p 1246 N95-21886
Performance of cesium telluride photocathodes as an electron source for the Los Alamos FEL
[DE94-018302] p 1375 N95-21919
Electric and Hybrid Vehicle Program Site Operator Program
[DE95-002042] p 1333 N95-21960
Natural gas converter performance and durability
[PB95-135554] p 1284 N95-21966
Cathode Life Test Facility
[AD-A286232] p 1334 N95-22023
Response of the B-1B air data sensor to simulated dust cloud environments
[AD-A286134] p 1213 N95-22036
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-197339] p 1397 N95-22336
Wave journal bearing. Part 1: Analysis
[NASA-CR-195431-PT-1] p 1382 N95-22404
Wave journal bearing. Part 2: Experimental pressure measurements and fractional frequency whirl threshold for wave and plain journal bearings
[NASA-TM-106848-PT-2] p 1382 N95-22405
Design of a massively parallel computer using bit serial processing elements
[NASA-CR-197365] p 1479 N95-22406
PERIDOTITE
Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784
Phase E in a water-saturated peridotite system at 9.3 GPa p 1420 N95-21799
The isotope geochemistry of abyssal peridotites and related rocks
[AD-A279435] p 1435 N95-21918
PERIPHERAL EQUIPMENT (COMPUTERS)
Non-intrusive SCSI status sensing system
[AD-D016242] p 1476 N95-21307
Network file server with automatic sensing means
[AD-D016250] p 1476 N95-21496
Method of retrieving and storing computer peripheral data
[AD-D016251] p 1591 N95-22098
Method of non-intrusively sensing status in a computer peripheral
[AD-D016241] p 1478 N95-22146
PERMAFROST
Operating manual for hybrid thermosyphons at the Gakona Power Plant, Alaska
[AD-A279068] p 1287 N95-21626
PERMALLOYS (TRADEMARK)
Giant magnetoresistance calculated from first principles
[DE94-018658] p 1500 N95-20129
PERMANENT MAGNETS
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292
PERMEABILITY
Classification of bianisotropic media
[PB95-127635] p 1502 N95-21102
The permeation of bis(2-fluoro-2,2-dinitroethyl) formal (FEFO), ethyl 4,4-dinitropentanoate (EDNP), ethyl 4-nitropentanoate (ENP), and 1,2,4-trichlorobenzene (TCB) through barrier membranes
[DE95-002492] p 1283 N95-21514
Development and applications of flat ceramic membranes
[PB95-110219] p 1276 N95-21650
PERMEATING
The permeation of bis(2-fluoro-2,2-dinitroethyl) formal (FEFO), ethyl 4,4-dinitropentanoate (EDNP), ethyl 4-nitropentanoate (ENP), and 1,2,4-trichlorobenzene (TCB) through barrier membranes
[DE95-002492] p 1283 N95-21514
PERMISSIVITY
Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381
PERMITTIVITY
Dielectric models in adhesion and extrapolations of molecular modeling
[AD-A279675] p 1516 N95-21121
Electrical impedance studies of acid-form NAFION membranes
[AD-A279271] p 1330 N95-21490
Role of dielectric constant in electrohydrodynamics of conducting fluids
[NASA-TM-110499] p 1331 N95-21614
Dielectric mixtures with arbitrarily anisotropic components: Focus on special gyrotropic effects
[PB95-127015] p 1311 N95-22363
PERMUTATIONS
A multivariate multisample rank test for stochastic simulation validation
[AD-A285922] p 1498 N95-19990
Almost kappa-wise independent random permutation of the cube
[PB95-108098] p 1495 N95-22147
Vertex ranking for permutation and other graphs
[PB95-127569] p 1496 N95-22327
PEROVSKITES
Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films
[DE94-018964] p 1244 N95-21549
PERSONAL COMPUTERS
Personal computer and workstation operating systems tutorial
[AD-A280132] p 1451 N95-20041
PERSONNEL SELECTION
Comparison of a back propagation artificial neural network model with a linear regression model for personnel selection
[AD-A280023] p 1479 N95-20005
PERT
Scheduling: A guide for program managers
p 1584 N95-20748
PERTURBATION
Numerical study of realistic perturbations in three-dimensional boundary layers p 1351 N95-21091
Equivalent source current formulation in impedance tomography
[PB95-127627] p 1329 N95-21326
Explicit analytical solution of the nonlinear Vlasov Poisson system
[DE94-628931] p 1500 N95-21592
Dynamics of volatile delivery from outer to inner solar system p 1420 N95-21798
PERTURBATION THEORY
Analytic Perturbation Analysis of Discrete Event Dynamic Systems
[DE94-018635] p 1480 N95-20126
Theoretical particle physics
[DE95-002447] p 1515 N95-20893
Electromagnetic wave reflection from irregular plasma layers p 1298 N95-20952
PESTICIDES
Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330
PETRI NETS
Multi-dimensional Petri nets
[PB95-127593] p 1491 N95-21024
Design model for open distributed processing systems
[PB95-135505] p 1477 N95-21620
PETROLOGY
D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781
Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787
PH
Actinide(IV) and actinide(VI) carbonate speciation studies by PAS and NMR spectroscopies
[DE94-016957] p 1236 N95-20361
PH FACTOR
Control of continuous phase PH using visible light to activate PH-dependent fibers and gels in a controlled and reversible manner
[AD-D016532] p 1543 N95-20728
PHARMACOLOGY
Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species
[AD-A285055] p 1442 N95-20485
ANSTO: Mission statement, significant events and achievements
[DE94-631123] p 1605 N95-21830
PHASE CHANGE MATERIALS
Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952

PHASE DETECTORS

Unlimited-bandwidth distributed optical phase modulators and detectors: Design and fabrication issues [DE94-017418] p 1545 N95-21509

PHASE DEVIATION

Josephson acoustic radiation in superfluid helium [AD-A279809] p 1503 N95-20098

Evaluating impedances in a Sacherer integral equation [DE94-016823] p 1489 N95-20266

PHASE DIAGRAMS

Carrier doping and interlayer coupling in HTSC single crystals [DE94-018637] p 1564 N95-20127

Thermodynamic analysis of stable and metastable equilibrium diagrams of the Cu-Cr system [PB95-127775] p 1255 N95-21111

Application of quaternary phase diagrams to compound semiconductor processing [DE95-001813] p 1277 N95-21748

Nonlinear dynamics of the planar pitch attitude motion for a gravity-gradient satellite [AD-A286407] p 1220 N95-22204

New thermodynamic description of the Cu-Zr system [PB95-127189] p 1263 N95-22374

PHASE MATCHING

Technique for intracavity sum frequency generation [AD-D016478] p 1546 N95-21898

PHASE MODULATION

Pasotron(TM) technology [AD-A279994] p 1314 N95-20311

Comparative study of C- and K-band propagation mechanisms beyond the horizon p 1297 N95-20946

Unlimited-bandwidth distributed optical phase modulators and detectors: Design and fabrication issues [DE94-017418] p 1545 N95-21509

PHASE SHIFT

Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells [DE94-018190] p 1569 N95-20679

Ultrafast magnetoexciton dynamics in GaAs [DE94-018175] p 1514 N95-20732

PHASE STABILITY (MATERIALS)

Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522

PHASE TRANSFORMATIONS

Properties of molecular solids and fluids at high pressure and temperature [DE94-017594] p 1565 N95-20243

Hierarchical structure in advanced polymers. Phase behaviour, orientation, properties [AD-A285938] p 1268 N95-20392

The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers [DE94-015742] p 1268 N95-20396

The effect of oxide inclusions on the kinetics of the austenite to ferrite transformation in low alloy steel weld metal [DE94-018131] p 1253 N95-20676

Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy [DE94-629992] p 1239 N95-20736

Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4 [DE94-631462] p 1255 N95-20909

Computational modeling of diffusion-controlled transformations in ternary systems [DE95-001358] p 1256 N95-21298

Dynamics of the chiral transition [DE94-016813] p 1524 N95-21641

Biaxiality of chiral liquid crystals [DE94-629032] p 1578 N95-22277

New thermodynamic description of the Cu-Zr system [PB95-127189] p 1263 N95-22374

PHASE VELOCITY

SAR image registration in absolute coordinates using GPS carrier phase position and velocity information [DE94-018738] p 1204 N95-20195

PHASED ARRAYS

The design and analysis of a phased array microstrip antenna for a low earth orbit communication satellite [AD-A284791] p 1289 N95-20065

High contrast organic crystal optical modulator for phased array antenna and optical signal processing [AD-A286557] p 1544 N95-20844

Inband scattering from arrays with series feed networks [AD-A286209] p 1307 N95-21883

PHENOMENOLOGY

Optimizing the length of the stores and related effects [DE95-002531] p 1533 N95-20885

PHENYLS

Low temperature synthesis of semiconductor materials [AD-A285120] p 1226 N95-20081

Photophysical processes on triplet states and radical ions in pure and molecularly doped polymers [DE95-002681] p 1570 N95-20916

Synthesis and structure of a novel bis-stibole [AD-A286345] p 1224 N95-22252

PHONONS

Resonant generation of nonequilibrium phonons in GaAs/AlAs quantum wells via intersubband scattering [DE95-002338] p 1581 N95-21604

Surfaces and thin films studied by picosecond ultrasonics [DE95-001866] p 1506 N95-22071

Tunneling of self-trapped states and formation of a band [DE94-629001] p 1582 N95-22378

PHOSPHATES

Safe conditions for contacting nitric acid or nitrates with Tri-n-Butyl Phosphate (TBP) [DE95-001243] p 1235 N95-20215

Polyurethane self-priming topcoats [AD-D016204] p 1274 N95-21154

Polyurethane self-priming topcoats [AD-D016205] p 1274 N95-21155

PHOSPHAZENE

Synthesis and characterization of poly(organophosphazene) interpenetrating polymer networks [AD-A279872] p 1265 N95-20183

Radiation-induced modifications of allylamino-substituted polyphosphazenes [AD-A279694] p 1268 N95-20428

The synthesis and characterization of small molecule and photo-cross-linkable high polymeric phosphazenes bearing cinnamate groups [AD-A279782] p 1268 N95-20442

Cross-linking reactions for the conversion of polyphosphazenes into useful materials [AD-A279696] p 1271 N95-20709

Macromolecular and materials design using polyphosphazenes [AD-A279781] p 1273 N95-20978

PHOSPHINES

An atomically-resolved STM study of the interaction of phosphine (PH3) with the silicon (001) surface [AD-A279819] p 1513 N95-20585

Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2) [AD-A279792] p 1224 N95-20660

Photochemistry of intermolecular C-H bond activation reactions [DE94-018417] p 1239 N95-20682

PHOSPHORESCENCE

Application of pressure sensitive paint in hypersonic flows [NASA-TM-106824] p 1201 N95-20794

PHOSPHORIC ACID FUEL CELLS

Research on the power generation system with thermoelectric conversion elements [DE95-714804] p 1397 N95-22309

PHOSPHORUS COMPOUNDS

Photophysical processes on triplet states and radical ions in pure and molecularly doped polymers [DE95-002681] p 1570 N95-20916

PHOSPHORUS POLYMERS

The synthesis and characterization of small molecule and photo-cross-linkable high polymeric phosphazenes bearing cinnamate groups [AD-A279782] p 1268 N95-20442

Water-soluble polyphosphazenes and their hydrogels [AD-A279695] p 1269 N95-20580

PHOTOACOUSTIC SPECTROSCOPY

Actinide(IV) and actinide(VI) carbonate speciation studies by PAS and NMR spectroscopies [DE94-016957] p 1236 N95-20361

Vibrational overtone spectroscopy of pyridine and related compounds [AD-A280105] p 1224 N95-21911

PHOTOCATHODES

Photoelectrons beam measurement from a magnesium cathode in a RF electron gun [DE94-017994] p 1533 N95-20573

Method of fabricating a microelectronic photomultiplier device with integrated circuitry [AD-D016530] p 1325 N95-20726

Performance of cesium telluride photocathodes as an electron source for the Los Alamos FEL [DE94-018302] p 1375 N95-21919

Photocathodes for free electron lasers [DE94-018305] p 1376 N95-22242

Fabrication and characterization of cesium telluride photocathodes: A promising electron source for the Los Alamos Advanced FEL [DE94-018303] p 1377 N95-22348

PHOTOCHEMICAL REACTIONS

Cavity-QED enhancement of fluorescence yields in microdroplets [DE94-018662] p 1506 N95-20030

Photodegradation and photophysics of laser dyes [AD-A285105] p 1368 N95-20063

The synthesis and characterization of small molecule and photo-cross-linkable high polymeric phosphazenes bearing cinnamate groups [AD-A279782] p 1268 N95-20442

Photochemistry of intermolecular C-H bond activation reactions [DE94-018417] p 1239 N95-20682

Cross-linking reactions for the conversion of polyphosphazenes into useful materials [AD-A279696] p 1271 N95-20709

Investigation of laser-induced retinal damage: Wavelength and pulsewidth dependent mechanisms [AD-A286066] p 1443 N95-20848

Translational-energy-resolved studies of photographed carrier-induced reactions on semiconductor surfaces [DE95-002944] p 1573 N95-21444

Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape p 1420 N95-21796

International Symposium on Advanced Laser Technologies [AD-A279849] p 1376 N95-22164

Indian Academy of Sciences. Volume 105, number 6, December 1993. Proceedings of the 2nd International Conference on Solar Energy Storage Applied Photochemistry [AD-A286481] p 1605 N95-22394

PHOTOCONDUCTIVITY

Kondo insulators [DE95-001156] p 1237 N95-20368

Fiber-optic control of current filaments in high gain photoconductive semiconductor switches [DE94-015804] p 1328 N95-21139

The role of point defects and defect complexes in silicon device processing [DE94-011876] p 1279 N95-22091

PHOTODETACHMENT

Dynamics of collision processes [DE94-017593] p 1509 N95-20242

Study of small carbon and semiconductor clusters using negative ion threshold photodetachment spectroscopy [DE95-002327] p 1515 N95-20872

PHOTODISSOCIATION

Molecular snapshots: Product imaging of dynamics important to fundamental combustion processes [DE94-018595] p 1510 N95-20346

Excess energy and structural dependence of the rate of energy redistribution during the photodissociation of iodotoluenes [AD-A279997] p 1241 N95-21124

PHOTOELECTRIC EMISSION

Correlations between surface structure and catalytic activity/selectivity [DE94-019023] p 1234 N95-20052

Photoemission and ferromagnetism [DE95-002419] p 1520 N95-21362

Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2 [DE94-018300] p 1574 N95-21712

Acid-site characterization of water-oxidized alumina films by near-edge x-ray absorption and soft x-ray photoemission [DE95-003355] p 1247 N95-22234

PHOTOELECTRON SPECTROSCOPY

Correlations between surface structure and catalytic activity/selectivity [DE94-019023] p 1234 N95-20052

Electron propagator theory and application [AD-A279761] p 1507 N95-20097

Oxide formation on NbAl3 and TiAl due to ion implantation of O-18 [DE94-017874] p 1252 N95-20365

PHOTOELECTRONS

Electron propagator theory and application [AD-A279761] p 1507 N95-20097

Spin-specific photoelectron diffraction using magnetic x ray circular dichroism [DE94-017527] p 1567 N95-20448

A structural determination using magnetic x ray circular dichroism in spin-polarized photoelectron diffraction [DE94-017528] p 1567 N95-20449

Photoelectrons beam measurement from a magnesium cathode in a RF electron gun [DE94-017994] p 1533 N95-20573

Magnetic x-ray circular dichroism in spin-polarized photoelectron diffraction [DE95-002394] p 1520 N95-21360

Physics of correlated studies [DE95-001204] p 1581 N95-21842

PHOTOEXCITATION
Photophysical processes on triplet states and radical ions in pure and molecularly doped polymers
[DE95-002681] p 1570 N95-20916
PHOTOGRAMMETRY
Integration of segmentation and stereo matching
[PB95-107819] p 1444 N95-21028
PHOTOGRAPHIC EQUIPMENT
Cold regions instrumentation considerations
[AD-A279492] p 1367 N95-21680
PHOTOIONIZATION
Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707
EBIT x ray spectroscopy studies for applications to photo-pumped x ray lasers
[DE94-016701] p 1373 N95-21210
Ion charge-state production and photoionization near the K edge in argon and potassium
[DE95-001443] p 1522 N95-21502
Atmospheres of the Moon and Mercury
p 1419 N95-21794
Physics of correlated studies
[DE95-001204] p 1581 N95-21842
The two-electron problem and prospects for atomic collision theory on a numerical lattice
[DE94-017856] p 1528 N95-22265
PHOTOLITHOGRAPHY
Solid state research
[AD-A279662] p 1567 N95-20426
PHOTOLUMINESCENCE
Observation of excitonic and band-to-band behavior in ordered InGaP2 alloys
[DE94-018891] p 1314 N95-20341
High-efficiency, deep-junction, epitaxial InP solar cells on (100) and (111)B InP substrates
p 1316 N95-20507
Photoluminescence under pressure and annealing of nitrogen-doped ZnSe
[DE95-002355] p 1568 N95-20630
Correlated wavefunction Monte Carlo studies of excitations in the quantum Hall liquids
[DE95-002337] p 1501 N95-20874
Conducting thermoset polymers
[AD-A286541] p 1273 N95-21014
Transient photoluminescence measurements on GaAs and AlGaAs double heterostructures
[AD-A279408] p 1575 N95-21916
PHOTOMASKS
A versatile masking process for plasma etched backside via holes in GaAs
[DE94-019176] p 1572 N95-21419
PHOTOMETERS
Methods and components for optical contention resolution in high speed networks
[AD-A280016] p 1543 N95-20598
Unlimited-bandwidth distributed optical phase modulators and detectors: Design and fabrication issues
[DE94-017418] p 1545 N95-21509
InTISb for long-wavelength infrared photodetectors and arrays
[AD-A280109] p 1331 N95-21660
InTISb for long-wavelength infrared photodetectors and arrays
[AD-A280108] p 1332 N95-21774
Design, fabrication, and characterization of reflective diffractive optical elements in Si for free-space optical interconnects
[AD-A286416] p 1547 N95-22205
PHOTOMETRY
MEM application to IRAS CPC images
p 1592 N95-21751
An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752
PHOTOMULTIPLIER TUBES
Method of fabricating a microelectronic photomultiplier device with integrated circuitry
[AD-D016530] p 1325 N95-20726
Detection efficiency and dark pulse rate of Rockwell (SSPM) single photon counters
[DE94-016872] p 1524 N95-21646
PHOTON BEAMS
Beam instability studies at the APS
[DE95-001448] p 1537 N95-21503
PHOTON-ELECTRON INTERACTION
X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798
PHOTONS
High energy photon-photon collisions
[DE94-017494] p 1532 N95-20388
Unbinned maximum likelihood fit for the CP conserving couplings for W + photon production at CDF
[DE95-001471] p 1514 N95-20852
Nonperturbative aspects of the quark-photon vertex
[DE94-012846] p 1520 N95-21315
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Monopoles and quark confinement: Introduction and overview
[DE94-019348] p 1522 N95-21485
The diphoton production rate in (bar p)p collisions at the square root of s = 1800 GeV
[DE95-000559] p 1522 N95-21497
New shower maximum trigger for electrons and photons at CDF
[DE95-000563] p 1522 N95-21499
Detection efficiency and dark pulse rate of Rockwell (SSPM) single photon counters
[DE94-016872] p 1524 N95-21646
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704
PHOTOOXIDATION
Gas-phase photocatalytic oxidation: Cost comparison with other air pollution control technologies
[DE95-000241] p 1410 N95-22278
PHOTOPRODUCTION
Multiple hard interactions in HERWIG
[PB95-130548] p 1518 N95-21233
Exclusive processes: Tests of coherent QCD phenomena and nucleon substructure at CEBAF
[DE95-002892] p 1520 N95-21336
The diphoton production rate in (bar p)p collisions at the square root of s = 1800 GeV
[DE95-000559] p 1522 N95-21497
PHOTORECEPTORS
Computer based analysis and synthesis of retinal function
[AD-A286084] p 1443 N95-20811
PHOTOSPHERE
Solar wind composition
[NASA-TM-197364] p 1604 N95-22384
PHOTOSYNTHESIS
A photophysical control mechanism for zeaxanthin-associated radiationless energy dissipation in photosynthesis
[DE94-018383] p 1437 N95-19969
Nitrogen control of chloroplast differentiation
[DE95-002797] p 1439 N95-21526
The Use of Cyanobacteria to Explore Basic Biological Processes
[DE94-019238] p 1440 N95-22066
Electrostatic basis for molecular recognition in photosynthesis
[DE95-002979] p 1440 N95-22075
PHOTOTHERMAL CONVERSION
InGaAs PV device development for TPV power systems p 1322 N95-20537
PHOTOVOLTAIC CELLS
Analyses of grounded and ungrounded photovoltaic power systems
[DE94-015015] p 1391 N95-20263
InGaAs PV device development for TPV power systems p 1322 N95-20537
Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538
Development of concentrator solar cells
[DE95-002316] p 1394 N95-20871
The Photovoltaic Higher Education National Exemplar Facility (PHENEF)
[DE94-015641] p 1395 N95-21409
Thin-film cadmium telluride photovoltaic cells
[DE94-011886] p 1395 N95-21508
Method of forming a high voltage silicon-on-sapphire photocell array
[AD-D016479] p 1396 N95-21899
Solar collector manufacturing activity 1993
[DE94-017340] p 1398 N95-22429
PHOTOVOLTAIC CONVERSION
Trimode Power Converter optimizes PV, diesel and battery energy sources
[DE94-015014] p 1313 N95-20262
The First NREL Conference on Thermophotovoltaic Generation of Electricity: Proceedings
[DE94-011831] p 1391 N95-20332
The Photovolatic Manufacturing Technology project (PVMaT) after three years
[DE94-011877] p 1392 N95-20473
Proceedings of the 13th Space Photovoltaic Research and Technology Conference (SPRAT 13)
[NASA-CP-3278] p 1316 N95-20502
BMDO photovoltaics program overview
p 1316 N95-20504
An update on the Department of Energy's photovoltaic program p 1316 N95-20505
Europe's space photovoltaics programme
p 1316 N95-20506
High-efficiency, deep-junction, epitaxial InP solar cells on (100) and (111)B InP substrates
p 1316 N95-20507
Chemical beam epitaxy for high efficiency photovoltaic devices p 1316 N95-20508
Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514
Photovoltaic electric power applied to Unmanned Aerial Vehicles (UAV) p 1321 N95-20530
Rare earth garnet selective emitter
p 1322 N95-20536
Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538
Highlights of recent balance of system research and evaluation
[DE95-001626] p 1393 N95-20863
The Photovoltaic Higher Education National Exemplar Facility (PHENEF)
[DE94-015641] p 1395 N95-21409
Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953
Bridging worlds/charting new courses
[DE95-003808] p 1397 N95-22335
Advanced energy systems and technologies research programme
[DE95-717486] p 1397 N95-22337
PHOTOVOLTAIC EFFECT
The First NREL Conference on Thermophotovoltaic Generation of Electricity: Proceedings
[DE94-011831] p 1391 N95-20332
InTISb for long-wavelength infrared photodetectors and arrays
[AD-A280109] p 1331 N95-21660
Optical processing and control
[AD-A279157] p 1546 N95-21975
PHYSICAL CHEMISTRY
Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782
A crystallographic model for hydrous wadsleyite (Beta-Mg2SiO4) p 1424 N95-21817
PHYSICAL EXERCISE
Modeling platform dynamics and physiological response to short arm centrifugation
[AD-A279640] p 1442 N95-20457
Hypervolemia in men from drinking hyperhydration fluids at rest and during exercise
[NASA-TM-4657] p 1439 N95-21544
A method to determine the kinematics of the lower limbs of a subject pedaling a bicycle using encoders and accelerometers
[NASA-CR-197401] p 1453 N95-21866
PHYSICAL OPTICS
Resonant tunneling quantum well integrated optical waveguide modulator/switch
[AD-A285142] p 1542 N95-20501
Diffraction computation by means of the method of equivalent currents
[AD-A285347] p 1291 N95-20692
PHYSICAL PROPERTIES
Lead-indium phosphate glasses for optical applications
[DE94-019333] p 1275 N95-21482
Weld pool phenomena
[DE94-018965] p 1381 N95-21550
An initial assessment of the properties of 2,5-dipicryl-1,3,4-oxadiazole: A secondary explosive with high thermal stability
[MRL-TR-93-16] p 1284 N95-21624
PHYSICAL WORK
Human force exertion in user-product interaction. Backgrounds for design
[PB95-132858] p 1452 N95-21283
PHYSICS
The development of science during this century
[DE94-632964] p 1582 N95-22185
PHYSIOLOGICAL DEFENSES
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-197367] p 1437 N95-20559
PHYSIOLOGICAL EFFECTS
Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species
[AD-A285055] p 1442 N95-20485
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-197367] p 1437 N95-20559
Influence of oxidation on radiation hardness of silicon detectors
[DE95-002466] p 1272 N95-20894
Helicopter crewseat cushion program
[AD-A286654] p 1452 N95-20973
A method to determine the kinematics of the lower limbs of a subject pedaling a bicycle using encoders and accelerometers
[NASA-CR-197401] p 1453 N95-21866
Command history, 1993
[AD-A279775] p 1446 N95-21989

PHYSIOLOGICAL RESPONSES
Modeling platform dynamics and physiological response to short arm centrifugation
[AD-A279640] p 1442 N95-20457
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-197367] p 1437 N95-20559
PHYSIOLOGICAL TESTS
Evaluation of stress experienced by soldiers wearing chemical protective clothing during varying work loads in desert or tropical environments
[AD-A280113] p 1452 N95-20625
PHYSIOLOGY
Microbiology and physiology of anaerobic fermentations of cellulose
[DE95-002899] p 1438 N95-20917
Compilation of 1993 annual reports of the Navy ELF Communications System Ecological Monitoring Program
[AD-A279575] p 1408 N95-21699
PHYTOPLANKTON
Effects of increased UV-B radiation on phytoplankton: A preliminary study and research programme
[PB95-133732] p 1439 N95-21884
PIEZOELECTRIC CERAMICS
Compositive piezoelectrics utilizing a negative Poisson ratio polymer
[AD-D016579] p 1268 N95-20460
Polycrystalline PLZT/ITO ceramic electro-optic phase gratings: Electro-optically reconfigurable difffractive devices for free-space and in-wafer interconnects
[AD-A285861] p 1547 N95-22076
PIEZOELECTRIC CRYSTALS
Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664
PIEZOELECTRIC TRANSDUCERS
Transducers with improved signal transfer field of the invention
[AD-D016228] p 1328 N95-21118
PIEZOELECTRICITY
Materials for adaptive structural acoustic control, volume 2
[AD-A279222] p 1502 N95-19883
Vacuum holding fixture and method for fabricating piezoelectric polymer acoustic sensors
[NASA-CASE-LAR-14240-1] p 1268 N95-20410
Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664
Monolithic low noise preamplifier for piezoelectric sensors
[AD-D016524] p 1333 N95-21865
PIGMENTS
Polyurethane self-priming topcoats
[AD-D016204] p 1274 N95-21154
Polyurethane self-priming topcoats
[AD-D016205] p 1274 N95-21155
PILOT PERFORMANCE
Using the backward transfer paradigm to validate the AH-64 Simulator Training Research Advanced Testbed for Aviation
[AD-A285758] p 1215 N95-19931
The advanced technology crew station: Development and validation of a workload assessment technique for cockpit function allocation
[AD-A279544] p 1453 N95-21691
Age 60 study. Part 1: Bibliographic database
[AD-A286245] p 1446 N95-22027
Age 60 study. Part 2: Airline pilot age and performance. A review of the scientific literature
[AD-A286246] p 1447 N95-22040
PILOT PLANTS
A low energy continuous reactor separator for the production of ethanol from corn grits/starch and biomass streams
[DE95-002256] p 1283 N95-21356
PILOT TRAINING
A computer-based multimedia prototype for night vision goggles
[AD-A286208] p 1546 N95-21882
PILOTLESS AIRCRAFT
Unmanned aerial vehicles
[AD-A286190] p 1206 N95-20329
Photovoltaic electric power applied to Unmanned Aerial Vehicles (UAV) p 1321 N95-20530
PILOTS
The influence of coronary artery disease on +Gz tolerance: A preliminary study
[AD-A279305] p 1446 N95-21941
PINNING
Superconducting thin film with fullerenes and method of making
[AD-D016580] p 1567 N95-20461
PION BEAMS
Polarization of charmonium in pion-nucleus collisions
[DE95-002783] p 1523 N95-21525
PIONS
D(sup 0)-(anti-D)(sup 0) mixing and doubly Cabibbo-suppressed decays of the D(+)
[DE94-015540] p 1512 N95-20476
Strange particle and antiproton production in S + nucleus collisions at 200 GeV/nucleon
[DE95-002348] p 1513 N95-20575
Theories of the eta-meson-nucleus interaction
[DE94-016055] p 1516 N95-21125
Where are we going with Bose-Einstein: A mini review
[PB95-130308] p 1518 N95-21222
Single particle measurements and two particle interferometry results from CERN experiment NA44
[DE95-003041] p 1527 N95-22078
Proton and produced particle distributions from Au+Au collisions at 11.6 A GeV/c
[DE94-018634] p 1530 N95-22392
PIPE FLOW
Continuum transient and frozen startup behavior of conventional and gas-loaded heat pipes
[AD-A284297] p 1339 N95-20250
Direct numerical simulation of turbulent flow in a sudden pipe expansion p 1347 N95-21067
Simulation of pipe flow p 1349 N95-21078
Fluid dynamics of the freeboard in a fluidized bed reactor
[PB95-134029] p 1357 N95-22160
PIPELINING (COMPUTERS)
Software for flow distribution in electronic rack structures
[AD-A285994] p 1325 N95-20715
PIPES (TUBES)
Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782
Epoxy lining for shipboard piping systems
[AD-A286228] p 1279 N95-22022
PISTONS
Abrasive wear by diesel engine coal-fuel and related particles
[PB95-104915] p 1379 N95-20984
PITCH (INCLINATION)
Visual perception of elevation
[AD-A284938] p 1451 N95-22472
PITCHING MOMENTS
Effects of yaw and pitch motion on model attitude measurements
[NASA-TM-4641] p 1368 N95-22109
PITOT TUBES
Response of the B-1B air data sensor to simulated dust cloud environments
[AD-A286134] p 1213 N95-22036
PITTING
Corrosion of aircraft materials: Correlation between nanometer scale and macroscopic structural damage parameters
[AD-A285930] p 1252 N95-20299
Identification of resonant, two-electron, and inter-atomic features in K and L23 NEXAFS spectra
[AD-A285374] p 1513 N95-20554
PIXELS
A framework for segmentation using physical models of image formation
[AD-A279900] p 1543 N95-20564
PLANAR STRUCTURES
Object recognition by alignment using invariant projections of planar surfaces
[AD-A279841] p 1468 N95-21495
On-wafer, cryogenic characterization of ultra-low noise HEMT devices p 1305 N95-21539
PLANE STRAIN
Morphology of highly textured E/EP diblock copolymers
[AD-A279813] p 1269 N95-20582
PLANE WAVES
Diffraction computation by means of the method of equivalent currents
[AD-A285347] p 1291 N95-20692
PLANETARY ATMOSPHERES
Comets, impacts, and atmospheres
p 1422 N95-21810
Degassing history and evolution of volcanic activity of terrestrial planets based on radiogenic noble gas degassing models p 1424 N95-21816
PLANETARY BOUNDARY LAYER
Front-boundary layer models from STORM-FEST observations
[AD-A279907] p 1428 N95-20186
PLANETARY EVOLUTION
Mantle devolatilization and rheology in the framework of planetary evolution p 1418 N95-21788
Solar system formation and the distribution of volatile species p 1421 N95-21806
Degassing history and evolution of volcanic activity of terrestrial planets based on radiogenic noble gas degassing models p 1424 N95-21816
PLANETARY MAPPING
The Double Eagle Space Experiment (DESE) beamline design
[DE94-018319] p 1601 N95-22419
PLANETARY NEBULAE
Solar system formation and the distribution of volatile species p 1421 N95-21806
Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128
PLANNING
Planning and scheduling for success
p 1584 N95-20747
PLANTS (BOTANY)
Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456
Compilation of 1993 annual reports of the Navy ELF Communications System Ecological Monitoring Program
[AD-A279575] p 1408 N95-21699
The mechanisms and effects off the plant-activations of chemicals in the environment
[AD-A279388] p 1356 N95-22145
Structures and functions of oligosaccharins
[DE95-003195] p 1440 N95-22220
PLASMA ANTENNAS
Three-dimensional effects for radio frequency antenna modeling
[DE94-019125] p 1303 N95-21459
PLASMA CHEMISTRY
Plasma chemistry of vibrationally nonequilibrium molecules
[AD-A279630] p 1553 N95-20411
Advanced diagnostics for plasma chemistry
[DE94-018936] p 1561 N95-22116
PLASMA COMPOSITION
Analysis methods for fast impurity ion dynamics data
[DE95-000589] p 1549 N95-20112
Experimental measurements and modeling of impurity transport in the divertor and boundary plasma of D3-D
[DE94-016519] p 1556 N95-21159
PLASMA COMPRESSION
Soft X-Ray Innovative Source Development Program
[AD-A286380] p 1551 N95-20232
PLASMA CONTROL
Recent DIII-D results
[DE94-017519] p 1549 N95-20038
Fluctuations and transport in the reversed field pinch: Characterization and reduction
[DE95-000590] p 1549 N95-20113
Magnetic fluctuation induced transport and edge dynamo measurements in the MST reversed-field pinch
[DE95-000591] p 1549 N95-20114
Fluctuations in high Beta(sub p) plasmas in D3-D
[DE94-017510] p 1550 N95-20146
Helium exhaust studies in the D3-D tokamak
[DE94-016682] p 1552 N95-20334
Hybrid model in general geometry
[DE95-002614] p 1553 N95-20437
Plasma shape experiments for an optimized tokamak
[DE94-017508] p 1553 N95-20445
Boron carbide-based coatings on graphite for plasma facing components
[DE94-017976] p 1269 N95-20570
Enhanced scrape-off layer plasma in D3-D double-null discharges
[DE94-017977] p 1554 N95-20571
Ideal Magnetohydrodynamic stabilities in JT-60 and D3-D tokamak plasmas
[DE94-770684] p 1555 N95-20987
Source mechanisms and radio effects of ionospheric plasma disturbances
[AD-A286529] p 1555 N95-21013
Extended theory of main ion and impurity rotation and bootstrap current in a shear layer
[DE94-015857] p 1555 N95-21141
Investigations of VH-mode in D3-D and JET
[DE94-015859] p 1556 N95-21142
The parametric dependence of the spatial structure of the radial electric field at the plasma edge in the D3-D tokamak
[DE94-016520] p 1556 N95-21163
Experimental investigation of molecular beam injection in HL-1 tokamak
[DE94-631456] p 1556 N95-21165
Fusion power production in TFTR
[DE95-002756] p 1557 N95-21240
Theory of the L-H transition
[DE95-001389] p 1558 N95-21299
1994 Nonneutral Plasma Workshop
[AD-A285656] p 1559 N95-21404
Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702

Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847

On conception of a compact neutron source and the possibility of its simulation on the Amba-M end trap
[DE94-633373] p 1562 N95-22282

PLASMA CURRENTS

A method for measuring the inductive electric field profile and noninductive current profiles on D3-D
[DE94-016683] p 1551 N95-20279

Recent results from Fast Wave Current Drive experiments on DIII-D
[DE94-016718] p 1551 N95-20285

Power balance in D3-D during single-null ELMing H-mode plasmas
[DE94-016680] p 1554 N95-20568

Observation of non diffusive term of toroidal momentum transport in the JFT-2M tokamak
[DE94-770686] p 1555 N95-20989

SPICE macro model of a spryton with MOSFET's in the avalanche mode
[DE94-015744] p 1555 N95-21134

Extended theory of main ion and impurity rotation and bootstrap current in a shear layer
[DE94-015857] p 1555 N95-21141

The evolution of configuration from q greater than 1 to q less than 1
[DE94-631396] p 1556 N95-21162

PLASMA DENSITY

The control system position to the electric probe in the Tokamak Novillo
[DE94-629938] p 1550 N95-20204

Enhanced scrape-off layer plasma in D3-D double-null discharges
[DE94-017977] p 1554 N95-20571

Electrostatic noise in the plasma environment around the shuttle
[NASA-TM-106856] p 1415 N95-21188

Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226

Explicit analytical solution of the nonlinear Vlasov Poisson system
[DE94-628931] p 1500 N95-21592

Gas-dynamic trap diagnostic complex for study on plasma heating and power atomic beam injection
[DE94-633377] p 1529 N95-22283

PLASMA DIAGNOSTICS

X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015

Analysis methods for fast impurity ion dynamics data
[DE95-000589] p 1549 N95-20112

National Ignition Facility: Experimental plan
[DE94-016542] p 1550 N95-20189

The control system position to the electric probe in the Tokamak Novillo
[DE94-629938] p 1550 N95-20204

A method for measuring the inductive electric field profile and noninductive current profiles on D3-D
[DE94-016683] p 1551 N95-20279

Ion temperature measurement of indirectly-driven implosions using a geometry-compensated neutron time-of-flight detector
[DE94-016967] p 1552 N95-20362

Characterization of nova plasmas using an x-ray spectrometer with temporal and spatial resolution
[DE94-016970] p 1553 N95-20363

High precision Woelter optic calibration facility
[DE94-016973] p 1542 N95-20364

A new alpha particle diagnostic using knock-on ion tails
[DE94-015856] p 1553 N95-20402

A portable and independent edge fluctuation diagnostic
[DE94-018254] p 1554 N95-20681

Chaotic phenomena in plasma 3
[DE94-770765] p 1554 N95-20686

Observation of non diffusive term of toroidal momentum transport in the JFT-2M tokamak
[DE94-770686] p 1555 N95-20989

Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226

Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
[DE94-018092] p 1560 N95-21668

Advanced diagnostics for plasma chemistry
[DE94-018936] p 1561 N95-22116

Measurements of the Auburn ECE optical system parameters for temperature fluctuation measurements on TEXT-U
[DE94-019217] p 1562 N95-22120

Plasma processing for integrated circuits
[DE95-001419] p 1335 N95-22149

Laboratory characterization of Woelter x ray optics
[DE94-016969] p 1562 N95-22191

Gas-dynamic trap diagnostic complex for study on plasma heating and power atomic beam injection
[DE94-633377] p 1529 N95-22283

PLASMA DIFFUSION

Variations of helicon wave induced radial plasma transport in different experimental conditions
[DE94-631410] p 1550 N95-20200

Heating and transport in TFTR D-T plasmas
[DE95-002812] p 1558 N95-21242

PLASMA DRIFT

Theory of the L-H transition
[DE95-001389] p 1558 N95-21299

Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847

Very high-power electron-beam transport in long gas cells from 10(exp -3) to 10(exp 3) Torr N2
[DE95-002611] p 1539 N95-22306

PLASMA DYNAMICS

Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
[DE94-018092] p 1560 N95-21668

PLASMA ELECTRODES

Plasma Electrode Pockels Cells for the Beamlet and NIF lasers
[DE94-016541] p 1557 N95-21166

PLASMA EQUILIBRIUM

Ideal Magnetohydrodynamic stabilities in JT-60 and D3-D tokamak plasmas
[DE94-770684] p 1555 N95-20987

PLASMA ETCHING

Ion-molecule chemistry related to plasma deposition and etching of silicon
[AD-A279749] p 1514 N95-20804

A versatile masking process for plasma etched backside via holes in GaAs
[DE94-019176] p 1572 N95-21419

PLASMA GUNS

Magnetically controlled deposition of metals using gas plasma
[DE94-018654] p 1251 N95-20128

Plasma processing for integrated circuits
[DE95-001419] p 1335 N95-22149

PLASMA HEATING

Experimental measurements of ICRF and edge plasma interactions on Tore Supra
[DE94-019154] p 1551 N95-20205

Recent results from Fast Wave Current Drive experiments on DIII-D
[DE94-016718] p 1551 N95-20285

Plasma shape experiments for an optimized tokamak
[DE94-017508] p 1553 N95-20445

Simulation of tearing mode stabilization by using ECH
[DE94-770700] p 1554 N95-20684

The evolution of configuration from q greater than 1 to q less than 1
[DE94-631396] p 1556 N95-21162

The ITER in-vessel system
[DE94-018053] p 1560 N95-21665

Gas-dynamic trap diagnostic complex for study on plasma heating and power atomic beam injection
[DE94-633377] p 1529 N95-22283

PLASMA INTERACTIONS

Experimental measurements of ICRF and edge plasma interactions on Tore Supra
[DE94-019154] p 1551 N95-20205

Preliminary results from the flight of the Solar Array Module Plasma Interactions Experiment (SAMPIE)
p 1321 N95-20529

PLASMA JETS

Recent results from Fast Wave Current Drive experiments on DIII-D
[DE94-016718] p 1551 N95-20285

New high temperature plasmas and sample introduction systems for analytical atomic emission and mass spectrometry
[DE94-018580] p 1552 N95-20345

Enhanced scrape-off layer plasma in D3-D double-null discharges
[DE94-017977] p 1554 N95-20571

Kinematical evidence for top pairs at the Tevatron
[DE95-000729] p 1515 N95-20880

Plasma Electrode Pockels Cells for the Beamlet and NIF lasers
[DE94-016541] p 1557 N95-21166

Electrostatic noise in the plasma environment around the shuttle
[NASA-TM-106856] p 1415 N95-21188

Search for new particles decaying to dijets in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-018994] p 1523 N95-21563

PLASMA LAYERS

Electromagnetic wave reflection from irregular plasma layers p 1298 N95-20952

Experimental measurements and modeling of impurity transport in the divertor and boundary plasma of D3-D
[DE94-016519] p 1556 N95-21159

PLASMA OSCILLATIONS

Fluctuations and transport in the reversed field pinch: Characterization and reduction
[DE95-000590] p 1549 N95-20113

PLASMA PHYSICS

Soft X-Ray Innovative Source Development Program
[AD-A286380] p 1551 N95-20232

Israel Physical Society Annual Meeting 1994
[DE94-630140] p 1565 N95-20261

24th Annual Anomalous Absorption Conference
[DE94-016457] p 1551 N95-20283

Effects of plasma physics on capsule implosions in gas-filled hohlraums
[DE95-000923] p 1371 N95-20786

Source mechanisms and radio effects of ionospheric plasma disturbances
[AD-A286529] p 1555 N95-21013

PRS scoping study. 2: ZPIMP predictions for radiation yields on a JUPITER-class generator
[AD-A279823] p 1537 N95-21494

Theoretical atomic physics for fusion
[DE94-019196] p 1524 N95-21605

Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847

On the influence of electromagnetic wave and relativistic electron beam on a plasma
[DE94-628962] p 1561 N95-21848

On the theory of strong electromagnetic waves propagation in an electron-positron-ion plasma
[DE94-628964] p 1561 N95-21850

Large amplitude localized structures in a relativistic electron-positron ion plasma
[DE94-628965] p 1561 N95-21851

Plasma processing for integrated circuits
[DE95-001419] p 1335 N95-22149

PLASMA PINCH

PRS scoping study 1: Scaling law estimates for K-shell radiation yields on JUPITER-class generators
[AD-A279716] p 1533 N95-20672

PLASMA POTENTIALS

The control system position to the electric probe in the Tokamak Novillo
[DE94-629938] p 1550 N95-20204

Electrostatic noise in the plasma environment around the shuttle
[NASA-TM-106856] p 1415 N95-21188

Plasma model for charging damage
[DE95-000788] p 1558 N95-21310

On the theory of strong electromagnetic waves propagation in an electron-positron-ion plasma
[DE94-628964] p 1561 N95-21850

PLASMA POWER SOURCES

Magnetron power supply at high stability and its application in plasma excitation for the production of ultraviolet radiation
[DE94-629656] p 1326 N95-20733

PLASMA PRESSURE

Fluctuations in high Beta(sub p) plasmas in D3-D
[DE94-017510] p 1550 N95-20146

PLASMA PROBES

Plasma model for charging damage
[DE95-000788] p 1558 N95-21310

PLASMA PROPULSION

Propulsion research on the variable tandem mirror plasma rocket
[NASA-CR-196310] p 1221 N95-20059

PLASMA RADIATION

Power balance in D3-D during single-null ELMing H-mode plasmas
[DE94-016680] p 1554 N95-20568

Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226

PRS scoping study. 2: ZPIMP predictions for radiation yields on a JUPITER-class generator
[AD-A279823] p 1537 N95-21494

PLASMA SHEATHS

Atomic processes in processing plasmas
[DE94-019177] p 1560 N95-21609

PIC simulation of surface waves
[AD-A285358] p 1563 N95-22422

PLASMA SPRAYING

Magnetically controlled deposition of metals using gas plasma
[DE94-018654] p 1251 N95-20128

Improved die castings through plasma surface modification, improved sensors and die soldering prevention
[DE95-002238] p 1253 N95-20417

PLASMA TEMPERATURE
The control system position to the electric probe in the Tokamak Novillo
[DE94-629938] p 1550 N95-20204
Experimental investigation of molecular beam injection in HL-1 tokamak
[DE94-631456] p 1556 N95-21165
PLASMA TURBULENCE
Fluctuations and transport in the reversed field pinch: Characterization and reduction
[DE95-000590] p 1549 N95-20113
Chaotic phenomena in plasma 3
[DE94-770765] p 1554 N95-20686
The parametric dependence of the spatial structure of the radial electric field at the plasma edge in the D3-D tokamak
[DE94-016520] p 1556 N95-21163
PLASMA WAVES
Advanced detector development, laboratory simulations, diagnostic development, and data analysis on wake physics
[AD-A284798] p 1364 N95-20069
Variations of helicon wave induced radial plasma transport in different experimental conditions
[DE94-631410] p 1550 N95-20200
Recent results from Fast Wave Current Drive experiments on DIII-D
[DE94-016718] p 1551 N95-20285
Source mechanisms and radio effects of ionospheric plasma disturbances
[AD-A286529] p 1555 N95-21013
Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847
PIC simulation of surface waves
[AD-A285358] p 1563 N95-22422
PLASMAS (PHYSICS)
X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015
Toward a design for the ITER plasma shape and stability control system
[DE94-017516] p 1548 N95-20037
Fluctuations in high Beta(sub p) plasmas in D3-D
[DE94-017510] p 1550 N95-20146
Computational modeling of physical processes during laser ablation
[DE94-017699] p 1369 N95-20221
Physics Division research and development
[DE94-017685] p 1501 N95-20246
A method for measuring the inductive electric field profile and noninductive current profiles on D3-D
[DE94-016683] p 1551 N95-20279
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
[DE94-016447] p 1551 N95-20315
Plasma arc melting of titanium-tantalum alloys
[DE94-016291] p 1252 N95-20331
Power balance in D3-D during single-null ELMing H-mode plasmas
[DE94-016680] p 1554 N95-20568
Boron carbide-based coatings on graphite for plasma facing components
[DE94-017976] p 1269 N95-20570
Enhanced scrape-off layer plasma in D3-D double-null discharges
[DE94-017977] p 1554 N95-20571
Ion scattering and deposition: The role of energetic particles in thin film growth
[AD-A285975] p 1514 N95-20667
A portable and independent edge fluctuation diagnostic
[DE94-018254] p 1554 N95-20681
Current diffusive ballooning mode in second stability region of tokamaks
[DE94-770690] p 1554 N95-20683
Simulation of tearing mode stabilization by using ECH
[DE94-770700] p 1554 N95-20684
Chaotic phenomena in plasma 3
[DE94-770765] p 1554 N95-20686
Magnetron power supply at high stability and its application in plasma excitation for the production of ultraviolet radiation
[DE94-629656] p 1326 N95-20733
An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation
[DE95-001078] p 1515 N95-20911
Ideal Magnetohydrodynamic stabilities in JT-60 and D3-D tokamak plasmas
[DE94-770684] p 1555 N95-20987
Ion heat pulse after sawtooth crash in the JFT-2M tokamak
[DE94-770685] p 1555 N95-20988
Cryogenic targets for inertial confinement fusion
[DE94-016200] p 1555 N95-21115
The evolution of configuration from q greater than 1 to q less than 1
[DE94-631396] p 1556 N95-21162
The parametric dependence of the spatial structure of the radial electric field at the plasma edge in the D3-D tokamak
[DE94-016520] p 1556 N95-21163
Experimental investigation of molecular beam injection in HL-1 tokamak
[DE94-631456] p 1556 N95-21165
Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226
Review of recent D-T experiments from TFTR
[DE95-002755] p 1557 N95-21239
Fusion power production in TFTR
[DE95-002756] p 1557 N95-21240
Heating and transport in TFTR D-T plasmas
[DE95-002812] p 1558 N95-21242
Assessment of database for interaction of tritium with ITER plasma facing materials
[DE95-002038] p 1558 N95-21290
Theory of the L-H transition
[DE95-001389] p 1558 N95-21299
Low density gas and foam targets for ICF long scale length plasma experiments: Fabrication and characterization
[DE95-000935] p 1558 N95-21368
Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380
Computer simulation of the diocotron instability
[AD-A285655] p 1559 N95-21403
1994 Nonneutral Plasma Workshop
[AD-A285656] p 1559 N95-21404
Atomic processes in processing plasmas
[DE94-019177] p 1560 N95-21609
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704
Studies of selenium and xenon in inductively coupled plasma mass spectrometry
[DE95-001676] p 1245 N95-21734
Plasma-induced-damage of GaAs during etching of refractory metal contacts
[DE95-001525] p 1259 N95-21838
A syncopated leap-frog algorithm for orbit consistent plasma simulation of materials processing reactors
[DE95-000954] p 1561 N95-21922
A simulation of plasma motion in the polar ionosphere
[AD-A286166] p 1426 N95-22019
Plasma processing for integrated circuits
[DE95-001419] p 1335 N95-22149
PLASMASPHERE
Observations of cold magnetospheric ions at geosynchronous orbit during times of high activity
[DE95-000936] p 1600 N95-21935
Magnetospheric Plasma Analyzer (MPA): Plasma observations from geosynchronous orbit
[DE95-002739] p 1427 N95-22477
PLASTIC ANISOTROPY
Plastic deformation of ordered intermetallic alloys: Fundamental aspects
[DE95-001070] p 1256 N95-21265
PLASTIC DEFORMATION
Inelastic torsion of steel I-beams
[PB94-208360] p 1384 N95-20101
Plastic deformation of ordered intermetallic alloys: Fundamental aspects
[DE95-001070] p 1256 N95-21265
Sheet metal formability
[PB95-110250] p 1258 N95-21653
Forming of superplastic ceramics
[DE94-017306] p 1276 N95-21662
Irradiation creep in structural materials at ITER operating conditions
[DE94-018946] p 1261 N95-22123
Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289
PLASTIC FLOW
Simulation of the injection moulding process
[PB94-215555] p 1286 N95-21027
Critical dynamics and plastic flow in disordered Josephson junction arrays
[DE94-629074] p 1576 N95-21995
PLASTIC PROPERTIES
Attempt to interpret the self-organizing mapping physiologically
[PB95-127783] p 1438 N95-21112
Netherlands Institute for Brain Research progress report, 1993
[PB95-135398] p 1445 N95-21352
PLASTICIZERS
The development of a new plasticizer for poly(ethylene oxide) based polymer electrolyte and the investigation of their ion-pair dissociation effect
[DE94-016821] p 1276 N95-21644
PLASTICS
Plastic encapsulated parts
[DE95-001876] p 1332 N95-21729
PLATEAUS
Thermodynamic characterization of new palladium alloy tritides
[DE94-018430] p 1579 N95-20028
PLATELETS
Refractive index change in dissociating shocked benzene
[DE94-019015] p 1541 N95-20352
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A286078] p 1443 N95-20850
Preclinical investigation of lyophilized platelet preparations
[AD-A286079] p 1443 N95-20851
PLATES (STRUCTURAL MEMBERS)
Analyses of some benchmark cases in fracture mechanics using boundary element method
[PB95-110888] p 1384 N95-19930
Low frequency sound radiation from finite stiffened plates
[AD-A279395] p 1505 N95-21930
PLATINUM
Magnetic x ray circular dichroism in Fe Co Pt multilayers
[DE94-017522] p 1253 N95-20447
Bridging the pressure gap: In situ atomic-level investigations of model platinum catalyst surfaces under reaction conditions by scanning tunneling microscopy
[DE95-002346] p 1246 N95-21990
PLATINUM COMPOUNDS
Modeling of nonlinear optic and ESR response of CDW MX materials
[DE94-018301] p 1578 N95-22297
PLETHYSMOGRAPHY
Acoustic calibration apparatus for calibrating plethysmographic acoustic pressure sensors
[NASA-CASE-LAR-14977-1] p 1443 N95-20763
PLOTTING
PRSPLOT6 manual
[PB95-110862] p 1456 N95-19928
ALCHEMI of Fe-doped B2-ordered NiAl alloys with different doping levels
[DE94-017748] p 1255 N95-20907
PLUMES
Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170
He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821
Launch safety, toxicity, and environmental effects of the high performance oxidizer ClF(5)
[AD-A286095] p 1284 N95-22227
PLUTONIUM
The interaction of localized solutions in a surface reaction
[DE95-002736] p 1248 N95-22433
PLUTONIUM COMPOUNDS
Actinide(IV) and actinide(VI) carbonate speciation studies by PAS and NMR spectroscopies
[DE94-016957] p 1236 N95-20361
PLUTONIUM ISOTOPES
Advanced concepts for gamma ray isotopic analysis and instrumentation
[DE94-016610] p 1517 N95-21174
PLY ORIENTATION
The influence of ply waviness with nonlinear shear on the stiffness and strength reduction of composite laminates
[AD-A285736] p 1224 N95-19899
Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543
PODS (EXTERNAL STORES)
Airborne Multisensor Pod System (AMPS) data access concept
[DE95-002586] p 1389 N95-20903
POINCARE PROBLEM
Almost kappa-wise independent random permutation of the cube
[PB95-108098] p 1495 N95-22147
POINT DEFECTS
Defect production and recombination during low-energy ion processing
[DE95-001827] p 1572 N95-21304
The role of point defects and defect complexes in silicon device processing
[DE94-011876] p 1279 N95-22091

Bulk and defect properties of ordered intermetallics
[DE94-017706] p 1262 N95-22344

POINT SOURCES

High precision Woelter optic calibration facility
[DE94-016973] p 1542 N95-20364
In search of random noise p 1592 N95-21753
High resolution descriptions of IRAS 12 and 25 microns confused regions
[AD-A285847] p 1545 N95-21832

POINT TO POINT COMMUNICATION

MPI workshop
[DE94-017883] p 1475 N95-20366
Design and modelling of a link monitoring mechanism for the Common Data Link (CDL)
[AD-A286167] p 1309 N95-22245

POINTS (MATHEMATICS)

Tracking a dynamic set of feature points
[AD-A285124] p 1313 N95-20257

POISSON EQUATION

Analysis of a local defect correction approach on composite grids
[PB95-135455] p 1493 N95-21574
Image solution for poisson's equation in wedge geometry
[PB95-127171] p 1310 N95-22311
Locking of the finite element method in thermoelasticity
[PB95-127098] p 1496 N95-22370

POISSON RATIO

Compositive piezoelectrics utilizing a negative Poisson ratio polymer
[AD-D016579] p 1268 N95-20460

POLAR CAPS

The relative importance of meteor burst and other distance polar cap propagation modes in the low VHF band p 1293 N95-20928

POLAR COORDINATES

A control volume method on an icosahedral grid for numerical integration of the shallow-water equations on the sphere
[DE94-016345] p 1489 N95-20170

POLAR METEOROLOGY

A simulation of plasma motion in the polar ionosphere
[AD-A286166] p 1426 N95-22019

POLAR REGIONS

Mitigation of the effects of F layer regularities by using multiple paths p 1298 N95-20951
DAMSON: A system to measure multipath dispersion, Doppler spread and Doppler shift on multi-mechanism communications channels p 1299 N95-20955
Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377
An experimental determination of meteor daily arrival rate variation
[AD-A279484] p 1600 N95-21679
Arcmimute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771
Polar volatiles on Mercury and the Moon
p 1422 N95-21811

POLAR SUBSTORMS

Substorm theories: United they stand, divided they fall
[NASA-CR-197672] p 1427 N95-22326

POLARIMETRY

Identification of the propagation modes and paths on HF links using a goniopolarimeter p 1299 N95-20956

POLARIZATION

Magnetoelectric properties of reciprocal bianisotropic materials with focus on the polarizability of chiro-omega spheres
[PB95-127650] p 1544 N95-21103
Ultraviolet laser emission properties of Ce(3+)-doped LiSrAlF6
[DE94-016364] p 1372 N95-21135
Hadron beams and accelerators
[DE95-002932] p 1536 N95-21342

POLARIZATION (CHARGE SEPARATION)

Magnetic flocculation of paramagnetic particles
[DE94-018144] p 1501 N95-20725
Measurement of the polarization in the decay B(sup 0) (yields) J/(psi)K*(sup 0) in (bar p)p collisions at (radical)s = 1.8 TeV
[DE95-002521] p 1520 N95-21313

POLARIZATION (SPIN ALIGNMENT)

Spin dependence of diffractive processes and implications for the small x behaviour of g1 and the spin content of the nucleon
[PB95-130332] p 1518 N95-21225

POLARIZATION (WAVES)

Measurements of angles of elevation of HF by a high resolution method using polarization diversity
p 1299 N95-20959
Polarization of charmonium in pion-nucleus collisions
[DE95-002783] p 1523 N95-21525
Electric-field effects on shallow donor impurity in a harmonic quantum dot
[DE94-629034] p 1577 N95-22176
Image theory for the unidirectionally conducting screen
[PB95-127031] p 1311 N95-22365

POLARIZATION CHARACTERISTICS

Dielectric mixtures with arbitrarily anisotropic components: Focus on special gyrotropic effects
[PB95-127015] p 1311 N95-22363

POLARIZED RADIATION

Technical digest: Eighth Symposium on Optical Fiber Measurements
[PB94-207636] p 1540 N95-19976

POLARIZERS

A neutron beam polarizer for study of parity violation in neutron-nucleus interactions
[DE95-002743] p 1519 N95-21237

POLARONS

Conducting thermoset polymers
[AD-A286541] p 1273 N95-21014
Second order approximation for optical polaron in the strong coupling case
[DE94-628997] p 1525 N95-21856
Uniform upper bounds in the Froehlich polaron theory
[DE94-628998] p 1525 N95-21860
Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177
Temperature dependence of magnetopolarons in a parabolic quantum dot in arbitrary magnetic fields
[DE94-629033] p 1528 N95-22218

POLICIES

Patterns of financial change in the OECD area
[PB95-110979] p 1594 N95-19939
Workshop on Uncertainty and Global Climate Change Research
[DE94-016728] p 1401 N95-20238
The MSFC Program Control Development Program
p 1585 N95-20754
Policies concerning military and civilian research and technology applications
[PB95-131355] p 1585 N95-21427
Definition report on target and related steering variables of radiation as a part of the environmental balance and environmental outlook investigation
[PB95-135471] p 1409 N95-21846

POLISHING

Numerical controlled polishing program, continued forced wear and part correction experiments
[DE94-018084] p 1285 N95-20288

POLLUTION CONTROL

Mercury usage and alternatives in the electrical and electronics industries
[PB94-165362] p 1312 N95-19966
Proceedings of the 1993 Non-Fluorocarbon Insulation, Refrigeration and Air Conditioning Technology Workshop
[DE94-018333] p 1285 N95-20194
Environmental Compliance Assessment and Management Program
[AD-A279605] p 1402 N95-20441
Energy impacts of controlling carbon dioxide emissions from an integrated gasification/combined-cycle system
[DE94-016878] p 1403 N95-20478
Progress in the development of recycling processes for electric vehicle batteries
[DE94-015894] p 1324 N95-20626
Energy and environmental issues and international opperation in Asia
[DE94-796596] p 1404 N95-21143
Reducing exhaust gas emissions from Citydiesel busses
[DE95-700245] p 1380 N95-21295
New concepts for refrigerant leak detection and mixture measurement
[DE94-018967] p 1287 N95-21559
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
Gas-phase photocatalytic oxidation: Cost comparison with other air pollution control technologies
[DE95-000241] p 1410 N95-22278
Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330

POLLUTION MONITORING

Resonance Raman spectroscopy of volatile organics: Carbon tetrachloride
[DE95-000627] p 1233 N95-19980
Proceedings of the 1993 Non-Fluorocarbon Insulation, Refrigeration and Air Conditioning Technology Workshop
[DE94-018333] p 1285 N95-20194
Performance specifications for technology development: Application for characterization of volatile organic compounds in the environment
[DE94-016627] p 1401 N95-20234
An application of wavelet transform for decomposition of millimeter-wave spectroscopic signals
[DE94-018366] p 1402 N95-20247
Environmental Compliance Assessment and Management Program
[AD-A279605] p 1402 N95-20441
Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456
Progress in the development of recycling processes for electric vehicle batteries
[DE94-015894] p 1324 N95-20626
Evaluation of the technical performance of the Duttch National Air Quality Monitoring Network in 1992
[PB95-131892] p 1405 N95-21327
Ozone quality control measurements in the Dutch National Air Quality Monitoring Network
[PB95-131900] p 1405 N95-21329
Monitoring activities in the framework of the Dutch National Air Quality Monitoring Network in 1994
[PB95-131884] p 1406 N95-21351
Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596
Removal of CO2 in closed loop off-gas treatment systems
[DE94-019259] p 1407 N95-21617
Current concepts on airborne particles and health
[DE95-002260] p 1447 N95-22287

POLLUTION TRANSPORT

Implementation and performance of a three-dimensional numerical transport model
[PB95-135745] p 1402 N95-20440
Launch safety, toxicity, and environmental effects of the high performance oxidizer ClF(5)
[AD-A286095] p 1284 N95-22227
Current concepts on airborne particles and health
[DE95-002260] p 1447 N95-22287

POLOIDAL FLUX

A method for measuring the inductive electric field profile and noninductive current profiles on D3-D
[DE94-016683] p 1551 N95-20279

POLYACETYLENE

The organic chemistry of conducting polymers
[DE94-018216] p 1270 N95-20680

POLYACRYLONITRILE

Fibre-reinforced high-strength concrete
[PB95-131942] p 1232 N95-22158

POLYAMIDE RESINS

Reactive compatibilization of polymer blends
[AD-A284836] p 1263 N95-19893

POLYATOMIC GASES

Plasma chemistry of vibrationally nonequilibrium molecules
[AD-A279630] p 1553 N95-20411

POLYCHLORINATED BIPHENYLS

The impact of advanced packaging technology on modular avionics architectures p 1208 N95-20632

POLYCRYSTALS

Elastic anisotropy in hot-pressed Si3N4 composites: Role of in situ (beta)-Si3N4 grains and added (beta)-Si3N4 whiskers
[DE94-018387] p 1226 N95-20027
Polycrystalline thin film cadmium telluride solar cells fabricated by electrodeposition
[DE94-011848] p 1391 N95-20118
Polycrystalline CuInSe2 and CdTe solar cells
[DE94-011875] p 1392 N95-20333
Hierarchical structure in advanced polymers. Phase behaviour, orientation, properties
[AD-A285938] p 1268 N95-20392
Mean field analysis of orientation selective grain growth driven by interface-energy anisotropy
[DE94-015797] p 1566 N95-20399
Status of flexible CIS research at ISET
p 1317 N95-20512
Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514
Molecularly Designed Ultrafine/Nanostructured Materials, volume 351
[AD-A285370] p 1568 N95-20552
Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707
Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167
Deposition and properties of novel nitride superlattice coatings
[DE95-002945] p 1230 N95-21445
Effects of neutron irradiation on the London penetration depth for polycrystalline Bi(1.8)Pb(0.3)Sr2Ca2Cu3O10 superconductor
[DE94-019335] p 1573 N95-21483

Aligned bismuth, strontium, calcium cuprate coatings on polycrystalline substrates
[AD-D016512] p 1278 N95-21907
Polycrystalline PLZT/ITO ceramic electro-optic phase gratings: Electro-optically reconfigurable difffractive devices for free-space and in-wafer interconnects
[AD-A285861] p 1547 N95-22076
Surface technology programme
[PB95-132866] p 1262 N95-22174
Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183
Local texture and strongly linked conduction in spray-pyrolyzed TlBa2Ca2Cu3O(8+x) deposits
[DE94-017887] p 1578 N95-22269
Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289

POLYCYCLIC AROMATIC HYDROCARBONS
Aromatics oxidation and soot formation in flames
[DE95-001803] p 1241 N95-21280

POLYETHYLENE TEREPHTHALATE
Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy
[DE94-629992] p 1239 N95-20736

POLYETHYLENES
Orientation studies of polyolefins by IR-dichroism
[PB95-104386] p 1236 N95-20256
Morphology of highly textured [illegible]/EP diblock copolymers
[AD-A279813] p 1269 N95-20582
The development of a new plasticizer for poly(ethylene oxide) based polymer electrolyte and the investigation of their ion-pair dissociation effect
[DE94-016821] p 1276 N95-21644
Investigation on research for degradable plastics
[DE94-796550] p 1277 N95-21714
Neutron reflectivity study of adsorbed diblock copolymers
[DE95-002740] p 1281 N95-22434

POLYHEDRONS
Balanced matrices
[AD-A280021] p 1490 N95-20662

POLYIMIDES
Thianthrene containing polyimides with monomer formation via nucleophilic aromatic substitution
[AD-A286313] p 1265 N95-20094
A direct process for preparing semi-crystalline polyimides
[NASA-CASE-LAR-15020-1] p 1268 N95-20407
Embedded optical fibres as strain sensors in polymer matrix fibre composites: The influence of adhesion in strain transfer
[PB95-133617] p 1547 N95-22140
Solid-state NMR characterization of C- and N-labelled phthalimides: Model compounds for studying polyimides
[AD-A286479] p 1578 N95-22286

POLYMER BLENDS
Reactive compatibilization of polymer blends
[AD-A284836] p 1263 N95-19893
Orientation studies of polyolefins by IR-dichroism
[PB95-104386] p 1236 N95-20256

POLYMER CHEMISTRY
Reactive compatibilization of polymer blends
[AD-A284836] p 1263 N95-19893
Technical Summary for 1993 fall MRS Symposium O, Complex Fluids
[AD-A283722] p 1264 N95-19972
Synthesis and characterization of poly(organophosphazene) interpenetrating polymer networks
[AD-A279872] p 1265 N95-20183
Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A279694] p 1268 N95-20428
The organic chemistry of conducting polymers
[DE94-018216] p 1270 N95 20680
Siloxanes with strong hydrogen bond donating functionalities
[AD-D016499] p 1279 N95-22057

POLYMER MATRIX COMPOSITES
Design, synthesis and characterization of novel nonlinear optical materials
[AD-A285617] p 1540 N95-19897
Thermo-mechanical fatigue of polymer matrix composites
[AD-A285931] p 1267 N95-20390
Compositive piezoelectrics utilizing a negative Poisson ratio polymer
[AD-D016579] p 1268 N95-20460
The 29th MIL-HDBK-17 Polymer Matrix Composites Coordination Group Meeting
[AD-A279917] p 1269 N95-20578
Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285629] p 1229 N95-21149
Implementation of the military handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285595] p 1229 N95-21215
Embedded optical fibres as strain sensors in polymer matrix fibre composites: The influence of adhesion in strain transfer
[PB95-133617] p 1547 N95-22140
Implementation of the Military Handbook 17 for polymer matrix composites and metal matrix composites
[AD-A285772] p 1233 N95-22395

POLYMER PHYSICS
Nonlinear optical studies of polymer interfaces
[DE94-018199] p 1274 N95-21263
Extrudate swell and extrudate distortion of HDPE as a result of different deformation mechanisms during extrusion through capillary dies
[PB95-110227] p 1288 N95-21651
High temperature polymer for second order nonlinear optics for photonic materials
[AD-A279309] p 1280 N95-22141

POLYMERIC FILMS
Thianthrene containing polyimides with monomer formation via nucleophilic aromatic substitution
[AD-A286313] p 1265 N95-20094
Vacuum holding fixture and method for fabricating piezoelectric polymer acoustic sensors
[NASA-CASE-LAR-14240-1] p 1268 N95-20410

POLYMERIZATION
Thianthrene containing polyimides with monomer formation via nucleophilic aromatic substitution
[AD-A286313] p 1265 N95-20094
Synthesis and characterization of poly(organophosphazene) interpenetrating polymer networks
[AD-A279872] p 1265 N95-20183
Polyurethane-acrylic interpenetrating polymer network acoustic damping material
[AD-D016572] p 1266 N95-20294
The synthesis and characterization of new mesogenic diacetylene monomers and their polymers
[AD-A286188] p 1267 N95-20328
Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A279694] p 1268 N95-20428
Macromolecular and materials design using polyphosphazenes
[AD-A279781] p 1273 N95-20978
Tailoring suspension flow for the gelcasting of oxide and nonoxide ceramics
[DE95-001351] p 1277 N95-21861
Synthesis of polymeric microcapsule arrays and their use for enzyme immobilization
[AD-A279125] p 1277 N95-21876
Chemistry and electrochemistry in Lewis acid and superacid ionic liquids
[AD-A279396] p 1246 N95-21931

POLYMERS
The preparation of all para-polyphenyls with increased solubility and enhanced third order NLO activity
[AD-A284301] p 1266 N95-20251
Hierarchical structure in advanced polymers. Phase behaviour, orientation, properties
[AD-A285938] p 1268 N95-20392
Photophysical processes on triplet states and radical ions in pure and molecularly doped polymers
[DE95-002681] p 1570 N95-20916

POLYMETHYL METHACRYLATE
Topography of neutron scattering from diblock copolymer film
[DE95-001457] p 1229 N95-20840
Influence of fatigue crack closure on the growth rate of surface flaws
[AD-A279130] p 1387 N95-21967

POLYNOMIALS
K(1,3)-free and W(4)-free graphs
[PB95-110573] p 1456 N95-19889
Graded dual of the non-commutative universal Leibniz Hopf algebra zeta
[PB95-134532] p 1494 N95-21955
Balanced 0, + or - matrices. Part 2: Recognition algorithm
[AD-A279156] p 1470 N95-21974
Local connectivity of some Julia sets containing a circle with an irrational rotation
[PB95-109070] p 1496 N95-22353
FORTRAN subroutine for column reduction of polynomial matrices
[PB95-134987] p 1497 N95-22379

POLYNUCLEOTIDES
The molecular mechanics program DUPLEX: Computing structures of carcinogen modified DNA by surveying the potential energy surface
[DE94-019153] p 1439 N95-21606

POLYPHENYL ETHER
Lubricant evaluation and performance, 2
[AD-A279144] p 1278 N95-21969

POLYPHENYLS
The preparation of all para-polyphenyls with increased solubility and enhanced third order NLO activity
[AD-A284301] p 1266 N95-20251

POLYPROPYLENE
Orientation studies of polyolefins by IR-dichroism
[PB95-104386] p 1236 N95-20256
Fibre-reinforced high-strength concrete
[PB95-131942] p 1232 N95-22158

POLYPYRROLES
Synthesis of polymeric microcapsule arrays and their use for enzyme immobilization
[AD-A279125] p 1277 N95-21876

POLYSILANES
The electronic properties of polysilanes
[DE94-006464] p 1265 N95-20121

POLYSTYRENE
Topography of neutron scattering from diblock copolymer film
[DE95-001457] p 1229 N95-20840
Investigation on research for degradable plastics
[DE94-796550] p 1277 N95-21714
Neutron reflectivity study of adsorbed diblock copolymers
[DE95-002740] p 1281 N95-22434

POLYTETRAFLUOROETHYLENE
Characterization of poly(tetrafluoroethylene) surfaces by atomic force microscopy: Results and artifacts
[DE95-000742] p 1242 N95-21309

POLYURETHANE RESINS
Polyurethane-epoxy interpenetrating polymer network acoustic damping material
[AD-D016567] p 1266 N95-20293
Microbial degradation of polymers used in electronics
[AD-A286526] p 1273 N95-21011
Polyurethane self-priming topcoats
[AD-D016204] p 1274 N95-21154
Polyurethane self-priming topcoats
[AD-D016205] p 1274 N95-21155

POLYVINYL CHLORIDE
Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy
[DE94-629992] p 1239 N95-20736

POMERONS
New strong interactions above the electroweak scale
[DE94-018385] p 1506 N95-20025
Hard diffraction and rapidity gaps
[DE95-000565] p 1507 N95-20111
Antishadowing contribution to the pomeron structure function
[PB95-127478] p 1518 N95-21221

PONDS
Aquatic plant control research program. Ecological assessment of Kirk Pond
[AD-A279090] p 1409 N95-21914

PONTRYAGIN PRINCIPLE
Optimal control of a two wheeled mobile robot
[AD-A286130] p 1485 N95-22233

POPULATION THEORY
Environmental Hazards Assessment Program
[DE94-019075] p 1406 N95-21565

POPULATIONS
Environmental cleanup: Too many high priority sites impede DOD's program. Report to the Chairman, Committee on Governmental Affairs, US Senate
[AD-A279511] p 1407 N95-21683

POROSITY
An investigation of the applicability of the new ion exchange resin, Reillex(TM)-HPQ, in ATW separations
[DE94-016576] p 1274 N95-21234
Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790
Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials
[AD-A286418] p 1357 N95-22206
Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

POROUS MATERIALS
Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials
[AD-A286418] p 1357 N95-22206
Separation of proteins by convective electrophoresis through a porous membrane
[PB95-127130] p 1248 N95-22373

PORPHINES
Calculation of atom-centered partial charges for heme
[DE94-014447] p 1520 N95-21375

PORTABLE EQUIPMENT
A portable and independent edge fluctuation diagnostic
[DE94-018254] p 1554 N95-20681

Electromagnetic interference testing and electrical subsystem: Non-communication
[AD-A286591] p 1292 N95-20858
Advanced concepts for gamma ray isotopic analysis and instrumentation
[DE94-016610] p 1517 N95-21174

POSITION (LOCATION)
SAR image registration in absolute coordinates using GPS carrier phase position and velocity information
[DE94-018738] p 1204 N95-20195
The GPS Burst Detector W-Sensor
[DE94-017406] p 1204 N95-20269
Emitter location via Kalman filtering of signal time difference of arrival
[AD-A285972] p 1291 N95-20666
Muon beamline at ISIS
[PB95-130324] p 1518 N95-21224
Localization phenomenon in some random classical systems
[AD-A286514] p 1309 N95-22215
Layered path planning for an autonomous mobile robot
[AD-A286138] p 1485 N95-22244
Inverse and control problems in electromagnetics
[AD-A286438] p 1310 N95-22250
Large-scale fields and flows in the magnetosphere-ionosphere system
[PB95-134664] p 1427 N95-22368

POSITION ERRORS
Orbit determination of highly elliptical Earth orbiters using improved Doppler data-processing modes
p 1218 N95-21533

POSITION SENSING
Unknown-terrains navigation of a mobile robot using an array of sonars
[DE94-017902] p 1482 N95-21385

POSITIONING
Impact of propagation mechanisms on global navigation satellite system performance p 1298 N95-20950

POSITRON ANNIHILATION
Positron annihilation studies of organic superconductivity
[DE94-018371] p 1564 N95-20017
Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy
[DE94-629992] p 1239 N95-20736
Universality of particle multiplicities
[DE95-000727] p 1515 N95-20879
Where are we going with Bose-Einstein: A mini review
[PB95-130308] p 1518 N95-21222
Muon beamline at ISIS
[PB95-130324] p 1518 N95-21224
The role of point defects and defect complexes in silicon device processing
[DE94-011876] p 1279 N95-22091

POSITRONS
Positron annihilation studies of organic superconductivity
[DE94-018371] p 1564 N95-20017
Calculation of the total and total ionization cross sections for positron scattering on atomic hydrogen
[DE94-631341] p 1508 N95-20197
Positron implantation profiles in elemental and multilayer systems
[DE94-014876] p 1566 N95-20382
Search for right-handed currents in the decay chain of K(+) yields muon(+)nu(sub muon), muon(+) yields e(+)nu(sub e)nu(bar)(sub muon)
[DE94-770606] p 1514 N95-20756
Muon beamline at ISIS
[PB95-130324] p 1518 N95-21224
Measuring A(sub b) with polarized beams at SLC
[DE95-002865] p 1519 N95-21248
1994 Nonneutral Plasma Workshop
[AD-A285656] p 1559 N95-21404
On the theory of strong electromagnetic waves propagation in an electron-positron-ion plasma
[DE94-628964] p 1561 N95-21850

POSTFLIGHT ANALYSIS
Post-flight investigation programmes of recently retrieved solar generators p 1321 N95-20531

POSTURE
Helicopter crewseat cushion program
[AD-A286654] p 1452 N95-20973
Quantitative evaluation of wrist posture and typing performance: A comparative study of 4 computer keyboards
[DE95-002392] p 1452 N95-21358

POTASSIUM
Recent photoabsorption measurements in the rare gases and alkalis in the 3 to 15 keV photon energy region
[DE94-019278] p 1521 N95-21406
Ion charge-state production and photoionization near the K edge in argon and potassium
[DE95-001443] p 1522 N95-21502
Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818

POTASSIUM HYDROXIDES
The application of electrodialysis to extend the lifetime of commercial electroplating baths
[DE95-000868] p 1246 N95-22012

POTASSIUM OXIDES
Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712

POTENTIAL ENERGY
Modeling of high efficiency solar cells under laser pulse for power beaming applications p 1318 N95-20516
Calculated heats of formation of some predicted stable C, N, O, F molecules
[AD-A285957] p 1517 N95-21127
Consequences of oscillatory potentials and angular forces in transition metals and their aluminides
[DE94-019127] p 1258 N95-21600
The molecular mechanics program DUPLEX: Computing structures of carcinogen modified DNA by surveying the potential energy surface
[DE94-019153] p 1439 N95-21606
Electronic structure and energies of alkaline earth oxides: MgO, CaO and SrO
[DE94-628990] p 1575 N95-21853
Ab initio potential energy surface for H + OCS reactions: Extended basis sets and correlation treatment
[AD-A286420] p 1247 N95-22207
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292
A multisite interaction expansion of the total energy in metals
[DE94-017175] p 1262 N95-22313

POTENTIAL FLOW
Mixing and dynamics of the Mediterranean outflow
[AD-A279803] p 1434 N95-21306
Potential flow downstream of the heliospheric terminal shock: A non-spherical shock
[NASA-TM-110493] p 1426 N95-21874

POTENTIAL THEORY
Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084
Image solution for poisson's equation in wedge geometry
[PB95-127171] p 1310 N95-22311

POWDER (PARTICLES)
Method of making copper-titanium nitride alloy
[AD-D016582] p 1252 N95-20201
Molecularly Designed Ultrafine/Nanostructured Materials, volume 351
[AD-A285370] p 1568 N95-20552
Reactive nanophase oxide additions to melt-processed high-T(sub c) superconductors
[DE95-001470] p 1570 N95-20841
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407
Investigation on research for degradable plastics
[DE94-796550] p 1277 N95-21714

POWDER METALLURGY
The mechanical property data base from an Air Force/Industry cooperative test program on advanced aluminum alloys
[AD-A280038] p 1386 N95-20615
The development of a super-alpha2 titanium aluminide alloy consolidated by rapid omnidirectional compaction
[AD-A279254] p 1260 N95-21986
Surface technology programme
[PB95-132866] p 1262 N95-22174
Processing of intermetallic materials by reaction synthesis
[DE94-017710] p 1263 N95-22345

POWDERED ALUMINUM
The processing and mechanical properties of high temperature/high performance composites. Processing/property correlations, book 4
[AD-A279739] p 1228 N95-20802
Oxidation behavior of aluminum nanopowders
[DE95-002721] p 1260 N95-21926

POWER AMPLIFIERS
Hybrid high power amplifier
[AD-D016534] p 1326 N95-20730
Solid state frequency conversion technology for remote sensing
[DE94-019102] p 1389 N95-21433

POWER BEAMING
Transition-energy crossing with a gamma(sub t)(-)jump
[DE94-017315] p 1531 N95-20021
Modeling of high efficiency solar cells under laser pulse for power beaming applications p 1318 N95-20516
Shot-to-shot comparison of the first Li-beam driven Hohlraum experiments
[DE94-016558] p 1558 N95-21247

POWER CONDITIONING
Space power facility readiness for Space Station power system testing
[NASA-TM-106829] p 1218 N95-21384

POWER CONVERTERS
Trimode Power Converter optimizes PV, diesel and battery energy sources
[DE94-015014] p 1313 N95-20262
P/N In(Al) GaAs multijunction laser power converters
p 1323 N95-20539

POWER EFFICIENCY
P/N In(Al) GaAs multijunction laser power converters
p 1323 N95-20539
Hybrid high power amplifier
[AD-D016534] p 1326 N95-20730
EAGLES 1.1: A microcomputer software package for analyzing fuel efficiency of electric and gasoline vehicles
[DE95-001119] p 1469 N95-21829

POWER FACTOR CONTROLLERS
Communications and control for electric power systems: Power system stability applications of artificial neural networks
[NASA-CR-197594] p 1483 N95-21613

POWER LIMITERS
Optical power limiting liquid crystal composites
[AD-A286605] p 1569 N95-20767

POWER LINES
Fault detection techniques for complex cable shield topologies
[AD-A286632] p 1291 N95-20771
TIM-SCT cable testing protocol
[AD-A286633] p 1207 N95-20772

POWER LOSS
Nickel hydroxide electrodes in reduced-alkalinity electrolytes
[DE95-002333] p 1326 N95-20814
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292

POWER PLANTS
Trimode Power Converter optimizes PV, diesel and battery energy sources
[DE94-015014] p 1313 N95-20262
Analyses of grounded and ungrounded photovoltaic power systems
[DE94-015015] p 1391 N95-20263
Performance and cost analysis of monolithic solid oxide fuel cells
[DE95-002511] p 1394 N95-20896
Economic feasibility analysis of distributed electric power generation based upon the natural gas-fired fuel cell
[DE94-012277] p 1396 N95-22033

POWER SERIES
Six-dimensional modeling of coherent bunch instabilities and related feedback systems in storage rings with power-series maps for the lattice
[DE94-017965] p 1532 N95-20494
Graded dual of the non-commutative universal Leibniz Hopf algebra zeta
[PB95-134532] p 1494 N95-21955

POWER SPECTRA
Pressure and higher-order spectra for homogeneous isotropic turbulence p 1343 N95-21045
BASIC program for power spectrum estimation
[DE95-002228] p 1468 N95-21515
A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659
Derived gust spectra for the Macchi MB326H
[ARL-TN-3] p 1202 N95-21892
1/f noise in two-dimensional fluids
[DE95-002617] p 1358 N95-22307

POWER SUPPLIES
Analyses of grounded and ungrounded photovoltaic power systems
[DE94-015015] p 1391 N95-20263
Design and construction of the HSX experiment
[DE94-018657] p 1552 N95-20348
Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953
Radiation tests on service electronics for future multi TeV detectors
[DE94-632822] p 1335 N95-22184

POWER SUPPLY CIRCUITS
Design of power electronics for TVC and EMA systems
[NASA-CR-196540] p 1312 N95-19909

PREAMPLIFIERS

Analysis of direct detection lightwave systems with optical amplifiers
[AD-A284077] p 1542 N95-20467

Monolithic low noise preamplifier for piezoelectric sensors
[AD-D016524] p 1333 N95-21865

Pre-amplifier with multi-stage feedback
[AD-D016254] p 1336 N95-22418

PRECAMBRIAN PERIOD

Volatiles in the Earth: All shallow and all recycled
p 1416 N95-21779

PRECESSION

Luminosity polarization correlation in the SLC
[DE95-002889] p 1536 N95-21335

PRECIPITATES

A direct process for preparing semi-crystalline polyimides
[NASA-CASE-LAR-15020-1] p 1268 N95-20407

Zirconia precipitates and zirconia: GeO2 interphase in mullite matrix-SiC woven fabrics composites prepared through a sol-gel route
[PB95-133427] p 1275 N95-21272

PRECISION

Test reliability and experimental power
[AD-A279607] p 1448 N95-19957

Virtual reality in precision engineering research
[AD-A286528] p 1465 N95-21012

PRECONDITIONING

Preconditioning via asymptotically-defined domain decomposition
[DE94-019046] p 1493 N95-21564

PREDICTION ANALYSIS TECHNIQUES

Atlas of SSM/I satellite ice concentration interpolated to operational ice model domains of the Arctic for 1993
[AD-A280183] p 1432 N95-20012

Application of an energy-based life prediction model to bithermal and thermomechanical fatigue
[NASA-TM-106684] p 1385 N95-20179

Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea
[AD-A280095] p 1433 N95-21018

Gate oxide shorts in nMOS transistors: Electrical properties and lifetime prediction method
[DE94-018904] p 1330 N95-21545

Forecasting aircraft mishaps using monthly maintenance reports
[AD-A286049] p 1203 N95-22417

Large-eddy simulation of a boundary layer with concave streamwise curvature p 1360 N95-22450

PREDICTIONS

Residual stresses in material processing
[DE94-017868] p 1385 N95-20374

Geometric moire method of strain analysis with displacement discontinuities
[DE95-001114] p 1386 N95-20833

Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513

Fluid dynamics of the freeboard in a fluidized bed reactor
[PB95-134029] p 1357 N95-22160

PREDICTOR-CORRECTOR METHODS

Explicit parallel two-step Runge-Kutta-Nystroem methods
[PB95-135752] p 1489 N95-20423

Parallelism across the steps in iterated Runge-Kutta methods for stiff initial value problems
[PB95-135760] p 1490 N95-20424

Parallel predictor-corrector methods
[PB95-135711] p 1493 N95-21434

PRELAUNCH TESTS

Military standard: Test requirements for launch, upper-stage, and space vehicles
[AD-A286627] p 1218 N95-20770

PREMIXED FLAMES

Direct numerical simulations of turbulent non-premixed methane-air flames modeled with reduced kinetics
p 1249 N95-21038

Turbulent transport in premixed flames
p 1249 N95-21040

The coupling between flame surface dynamics and species mass conservation in premixed turbulent combustion p 1249 N95-21041

Pdf modeling for premixed turbulent combustion based on the properties of iso-concentration surfaces
p 1249 N95-21042

Passive turbulent flamelet propagation
p 1249 N95-21043

Simulation of a turbulent flame in a channel
p 1249 N95-21044

Direct numerical simulation for premixed turbulent combustion modelling p 1249 N95-21082

Conditional statistics in a turbulent premixed flame derived from direct numerical simulation
p 1249 N95-22438

Lewis number and Damkohler number effects in vort ex-flame interactions p 1249 N95-22439

Fundamental mechanisms in premixed flame propagation via vortex-flame interactions: Numerical simulations p 1249 N95-22440

Triple flames and flame stabilization
p 1249 N95-22441

Flame propagation under partially-premixed conditions
p 1250 N95-22442

PREPROCESSING

State of the art in CFD pre- and postprocessing
[PB95-110391] p 1356 N95-22017

PRESENTATION

Rate monotonic analysis for real-time systems: Instructors guide
[AD-A286083] p 1463 N95-20810

PRESERVING

Issues in multi-bunch emittance preservation in the NLC
[DE95-002894] p 1534 N95-21253

PRESSURE DEPENDENCE

Overview of the Institute of Geophysics and Planetary Physics and Lawrence Livermore National Laboratory collaborative efforts
[DE94-017300] p 1599 N95-20145

Properties of molecular solids and fluids at high pressure and temperature
[DE94-017594] p 1565 N95-20243

Solubilities of nitrogen and helium in water and blood at 37 C and pressures of up to 11 ATA
[AD-A286269] p 1446 N95-22003

PRESSURE DISTRIBUTION

Fluctuations in high Beta(sub p) plasmas in D3-D
[DE94-017510] p 1550 N95-20146

Model-based inversion for a shallow ocean application
[DE94-016968] p 1433 N95-20420

Application of pressure sensitive paint in hypersonic flows
[NASA-TM-106824] p 1201 N95-20794

Statistics of pressure and pressure gradient in homogeneous isotropic turbulence p 1343 N95-21046

Effects of turbulence compressibility and unsteadiness in compression corner flow p 1344 N95-21052

Improved broadband waveguide pressure window
[AD-D016487] p 1306 N95-21834

Derivation of a wavenumber filter design for the measurement of turbulent wall pressure fluctuations
[AD-A286421] p 1357 N95-22208

PRESSURE DROP

Liquid-metal pin-fin pressure drop by correlation in cross flow
[DE94-017086] p 1338 N95-19923

PRESSURE EFFECTS

High pressure windowed chamber burned rate determination of liquid propellant XM46
[AD-A283770] p 1282 N95-19920

Influence of primary boundary conditions on the buckling of shallow cylindrical shells
[PB94-208352] p 1384 N95-20003

The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers
[DE94-015742] p 1268 N95-20396

Wake measurements in a strong adverse pressure gradient
[NASA-CR-197272] p 1201 N95-21031

Role of pressure diffusion in non-homogeneous shear flows p 1345 N95-21053

Effect of atmospheric pressure on measured aircraft noise levels
[PB95-130423] p 1207 N95-21425

Extrudate swell and extrudate distortion of HDPE as a result of different deformation mechanisms during extrusion through capillary dies
[PB95-110227] p 1288 N95-21651

Stability of pressure and velocity computations for heterogeneous reservoirs
[PB95-110284] p 1354 N95-21656

A visual cell for measuring the solubility of prograde soluble salts in water at high temperatures and pressures
[DE95-002058] p 1245 N95-21732

Atomic velocity distributions in a hydrogen beam effusing out of an RF discharge dissociator
[AD-A279253] p 1307 N95-21985

PRESSURE GAGES

Dynamic response of pressure measuring systems
[ARL-TR-32] p 1365 N95-20759

PRESSURE GRADIENTS

Wake measurements in a strong adverse pressure gradient
[NASA-CR-197272] p 1201 N95-21031

Statistics of pressure and pressure gradient in homogeneous isotropic turbulence p 1343 N95-21046

Numerical study of realistic perturbations in three-dimensional boundary layers p 1351 N95-21091

Spatial direct numerical simulation of boundary layer transition under strong adverse pressure gradient
p 1351 N95-21093

Extended theory of main ion and impurity rotation and bootstrap current in a shear layer
[DE94-015857] p 1555 N95-21141

Acoustic receptivity due to weak surface inhomogeneities in adverse pressure gradient boundary layers
[NASA-TM-4577] p 1353 N95-21258

Large-eddy simulation of flow through a plane, asymmetric diffuser p 1360 N95-22449

PRESSURE MEASUREMENT

Hydrostatic force sensor
[DE94-018923] p 1364 N95-20321

Dynamic response of pressure measuring systems
[ARL-TR-32] p 1365 N95-20759

Acoustic calibration apparatus for calibrating plethysmographic acoustic pressure sensors
[NASA-CASE-LAR-14977-1] p 1443 N95-20763

Application of pressure sensitive paint in hypersonic flows
[NASA-TM-106824] p 1201 N95-20794

Inert gas purification and measuring oxygen partial pressure in gas mixtures with EMF method based on solid electrolyte cell
[PB95-127767] p 1240 N95-21110

Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 4, part 1: Buffet cross spectral densities
[AD-A285593] p 1215 N95-21214

Ohmsett test of NOFI Vee-Sweep and NOFI 600S Oilboom
[AD-A279525] p 1408 N95-21685

Optical fiber pressure sensor for liquid level monitoring
[AD-D016246] p 1547 N95-22089

Wave journal bearing. Part 2: Experimental pressure measurements and fractional frequency whirl threshold for wave and plain journal bearings
[NASA-TM-106848-PT-2] p 1382 N95-22405

PRESSURE OSCILLATIONS

Derivation of a wavenumber filter design for the measurement of turbulent wall pressure fluctuations
[AD-A286421] p 1357 N95-22208

PRESSURE REDUCTION

A comparison of decision making behaviour in a static and a dynamic task environment as a function of time pressure
[AD-A285389] p 1449 N95-20609

MHD-flow in slotted channels with conducting walls
[DE94-018370] p 1559 N95-21388

PRESSURE SENSORS

Improved die castings through plasma surface modification, improved sensors and die soldering prevention
[DE95-002238] p 1253 N95-20417

Dynamic response of pressure measuring systems
[ARL-TR-32] p 1365 N95-20759

Acoustic calibration apparatus for calibrating plethysmographic acoustic pressure sensors
[NASA-CASE-LAR-14977-1] p 1443 N95-20763

Laser anemometry and viscous computation of the flow through an annular turbine cascade
[AD-A280070] p 1341 N95-20968

Response of the B-1B air data sensor to simulated dust cloud environments
[AD-A286134] p 1213 N95-22036

Fiber optic pressure sensing array
[AD-D016245] p 1506 N95-22088

Optical fiber pressure sensor for liquid level monitoring
[AD-D016246] p 1547 N95-22089

PRESSURE VESSEL DESIGN

The ITER in-vessel system
[DE94-018053] p 1560 N95-21665

PRESSURE VESSELS

An overview of the HSST Full-Thickness Shallow-Crack Clad Beam Testing Program
[DE94-018940] p 1385 N95-20322

Effect of neutron irradiation on the impact properties of A533B steel
[DE95-001834] p 1256 N95-21286

Joining dissimilar stainless steels for pressure vessel components
[PB95-133005] p 1380 N95-21446

PRESSURIZING

Transport phenomena in the micropores of plug-type phase separators
[NASA-TM-108479] p 1340 N95-20561

PRETREATMENT

Mercury capture in bench-scale absorbers
[DE94-016910] p 1234 N95-20107

PREVENTION

Acute radiation sickness amelioration analysis
[AD-A279084] p 1445 N95-21629

Advanced Materials and Process Technology for Mechanical Failure Prevention (proceedings of the 48th Meeting of the Mechanical Failures Prevention Group
[AD-A285785] p 1233 N95-22399

PRIMERS (COATINGS)

VOC compliant wash primer
[AD-A286034] p 1273 N95-21000

PRINTED CIRCUITS

Ultra-Reliable Digital Avionics (URDA) processor
p 1209 N95-20638

An automatic placement tool for rapid prototyping of printed circuit boards
[AD-A286029] p 1328 N95-20997

Integration of thin film decoupling capacitors
[DE95-001609] p 1333 N95-21881

PRIORITIES

Cell loss analysis of two-class priority generalized knockout switch
[PB95-127742] p 1301 N95-21109

PROBABILITY DENSITY FUNCTIONS

Mapping closures for turbulent combustion
[AD-A279995] p 1238 N95-20597

Error probabilities of FFH/BFSK with noise normalization and soft decision viterbi decoding in a fading channel with partial-band jamming
[AD-A280041] p 1498 N95-20620

Pdf modeling for premixed turbulent combustion based on the properties of iso-concentration surfaces
p 1249 N95-21042

Statistics of pressure and pressure gradient in homogeneous isotropic turbulence p 1343 N95-21046

On Markov Chain Monte Carlo acceleration
[AD-A279393] p 1499 N95-21945

Bayesian analysis of semiparametric proportional hazards models
[AD-A279394] p 1499 N95-21946

Remote-sensing based technique to account for sub-grid scale variability of land surface properties
[NASA-TM-110501] p 1390 N95-22110

PROBABILITY DISTRIBUTION FUNCTIONS

Resolution requirements for velocity gradients in turbulence p 1363 N95-22462

PROBABILITY THEORY

Application of Markov decision processes to search problems
[PB95-110813] p 1497 N95-19914

Qualification of the dependence in the generalized extreme value choice model
[PB95-110946] p 1497 N95-19936

Frequent sampling in discrete choice
[PB95-110961] p 1497 N95-19938

Cavity-QED enhancement of fluorescence yields in microdroplets
[DE94-018662] p 1506 N95-20030

An object-oriented optimization systems
[DE94-016190] p 1459 N95-20165

Mapping closures for turbulent combustion
[AD-A279995] p 1238 N95-20597

Universal features of multiplicity distributions
[DE94-012854] p 1498 N95-20779

Modelling of microwave propagation and clutter in a maritime environment p 1295 N95-20938

Dynamics of volatile delivery from outer to inner solar system p 1420 N95-21798

Minimax optimal stop rule in reliability checking
[PB95-134557] p 1383 N95-21961

LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134

Threshold detection in the presence of atmospheric turbulence
[AD-A286175] p 1427 N95-22249

Probability of detection for a GO CFAR radar processor using envelope detection approximation
[AD-A286211] p 1310 N95-22251

PROBLEM SOLVING

Eta%-Superconvergence of Finite Element Approximations in the Interior of General Meshes of Triangles
[AD-A279903] p 1490 N95-20565

Design and implementation of visual object-oriented LOGO using Prograph
[AD-A285977] p 1461 N95-20687

Computing methods for the approximate solution of time dependent problems
[AD-A286007] p 1491 N95-20719

Knowledge refinement in a reflective architecture
[AD-A286027] p 1589 N95-21002

A new Krylov-subspace method for symmetric indefinite linear systems
[DE95-001826] p 1355 N95-21726

PROCEDURES

Possible global environmental impacts of solid waste practices
[DE95-000830] p 1406 N95-21487

Environmental Compliance Assessment System (ECAS): Oregon supplement
[AD-A279565] p 1408 N95-21696

PROCESS CONTROL (INDUSTRY)

Magnetically controlled deposition of metals using gas plasma
[DE94-018654] p 1251 N95-20128

Design principles for real-time process control systems
[PB95-132890] p 1585 N95-21414

Generic architecture for knowledge-based control of processes in dynamic environments
[PB95-132676] p 1483 N95-21981

PROCESSING

A syncopated leap-frog algorithm for orbit consistent plasma simulation of materials processing reactors
[DE95-000954] p 1561 N95-21922

PROCUREMENT

The Photovolatic Manufacturing Technology project (PVMaT) after three years
[DE94-011877] p 1392 N95-20473

The Advanced Avionics Subsystem Technology Demonstration Program p 1209 N95-20636

A new process for acquiring software architecture
[AD-A286012] p 1462 N95-20721

The advantages of cost plus award fee contracts
p 1584 N95-20745

PROCUREMENT MANAGEMENT

Improving cost efficiency in large programs
p 1584 N95-20743

PRODUCT DEVELOPMENT

A construct for describing software development risks
[AD-A284923] p 1457 N95-19999

Human force exertion in user-product interaction. Backgrounds for design
[PB95-132858] p 1452 N95-21283

Structuring design requirements using YMIR
[PB95-132742] p 1471 N95-22081

PRODUCTION COSTS

An analysis of cost overruns on defense acquisition contracts p 1584 N95-20749

Analysis of cost: Combustion flame CVD diamond deposition
[AD-A279153] p 1278 N95-21973

Producing liquid fuels from biomass
[DE95-717458] p 1398 N95-22425

PRODUCTION MANAGEMENT

Solar collector manufacturing activity 1993
[DE94-017340] p 1398 N95-22429

PRODUCTIVITY

A Cost and Performance System (CAPS) in a Federal agency p 1584 N95-20746

Advanced robotic technologies for transfer at Sandia National Laboratories
[DE95-001617] p 1481 N95-20884

PROFILES

Test and evaluation report for the Manual Domestic Passive Profiling System (MDPPS)
[AD-A286312] p 1202 N95-20093

PROGRAM VERIFICATION (COMPUTERS)

Software fault tree analysis of concurrent Ada processes
[AD-A284979] p 1457 N95-20042

An empirical approach to logical clustering of software failure regions
[AD-A279863] p 1462 N95-20776

A tabular interface for automated verification of event-based dialogs
[AD-A286065] p 1463 N95-20847

Environment for Test and Analysis of Distributed Software (ETADS)
[AD-A285776] p 1463 N95-20877

Proceedings of the Fourth International Workshop on Inductive Logic Programming (ILP-94)
[PB95-135273] p 1464 N95-21003

Compositional proof theory for fault tolerant real-time distributed systems
[PB95-127601] p 1465 N95-21025

The iMAPS: General information
[AD-A285421] p 1465 N95-21176

Analysis of a disk-on-rod surface wave element inside a corrugated horn using the mode-matching technique
p 1305 N95-21543

The application of a statistical analysis software package to explosive testing
[MRL-TR-93-42] p 1284 N95-21658

Verification of knowledge-based reasoning modules
[PB95-132692] p 1470 N95-21983

Top-down non-correcting error recovery in LLgen
[PB95-132718] p 1471 N95-22031

Verification of a timestamp-based sliding-window protocol
[PB95-132759] p 1455 N95-22082

Abstract interpretation of reactive systems: Abstractions preserving Universal CTL(*), Existential CTL(*) and CTL(*)
[PB95-110557] p 1472 N95-22305

Formal specification and compositional verification of an atomic broadcast protocol
[PB95-110508] p 1472 N95-22351

PROGRAMMERS

Foundations of functional programming: A programmer's point of view
[PB95-132932] p 1471 N95-22094

Scalable programming environment
[AD-A286390] p 1472 N95-22201

PROGRAMMING ENVIRONMENTS

Evaluation of Borland Turbo Vision
[AD-A279873] p 1459 N95-20184

Model formality in human/computer collaboration
[AD-A286001] p 1462 N95-20718

Environment for Test and Analysis of Distributed Software (ETADS)
[AD-A285776] p 1463 N95-20877

Advanced computing systems: Usability of knowledge-based planning systems
[AD-A279573] p 1477 N95-21698

Scalable programming environment
[AD-A286390] p 1472 N95-22201

PROGRAMMING LANGUAGES

The design and implementation of the functional/daplex data interface for the multimodel and multilingual database system
[AD-A280131] p 1587 N95-20039

ILIAS: A sequential language for parallel matrix computations
[PB95-110631] p 1473 N95-20056

Software merge: Semantics of combining changes to programs
[AD-A279657] p 1459 N95-20304

Design and implementation of visual object-oriented LOGO using Prograph
[AD-A285977] p 1461 N95- 0687

Compositional proof theory for fault tolerant real-time distributed systems
[PB95-127601] p 1465 N95-21025

GRONICs-1994. Proceedings of the 1994 Groningen Student Conference on Computer Science
[PB95-135620] p 1468 N95-21455

DBASE 4 basics
[DE94-018323] p 1469 N95-21713

A Davis-Putnam program and its application to finite-order model search: Quasigroup existence problems
[DE95-003014] p 1471 N95-22077

Databases post-processing in Tensoral
p 1363 N95-22465

PROJECT MANAGEMENT

A construct for describing software development risks
[AD-A284923] p 1457 N95-19999

Readings in program control
[NASA-SP-6103] p 1583 N95-20739

Program control in NASA: Needs and opportunities
p 1583 N95-20740

A Cost and Performance System (CAPS) in a Federal agency p 1584 N95-20746

Planning and scheduling for success
p 1584 N95-20747

Performance measurement: A tool for program control
p 1585 N95-20752

Program control for mission success
p 1585 N95-20753

The impact of partnering on construction contracts
[AD-A286588] p 1585 N95-20855

Electric and Hybrid Vehicle Program: Site Operator Program
[DE95-001925] p 1332 N95-21731

ANSTO: Mission statement, significant events and achievements
[DE94-631123] p 1605 N95-21830

Electric and Hybrid Vehicle Program Site Operator Program
[DE95-002042] p 1333 N95-21960

Intelligent interactive project management system
[PB95-132684] p 1586 N95-21982

Directives for the participation in MiTS forum. V3.0
[PB95-110342] p 1484 N95-22015

Information Management Architecture for an Integrated Computing Environment for the Environmental Restoration Program. Volume 2: Interim business systems guidance
[DE95-001385] p 1591 N95-22061

PROJECT PLANNING

Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0
[DE94-019214] p 1458 N95-20073

Readings in program control [NASA-SP-6103] p 1583 N95-20739
Program control in NASA: Needs and opportunities p 1583 N95-20740
Performance measurement: A tool for program control p 1585 N95-20752
Program control for mission success p 1585 N95-20753
ITER EDA Newsletter. Volume 3, no. 2 [DE94-628980] p 1561 N95-21852

PROJECTILES
Comparison of meteorological data with fitted values extracted from projectile trajectory [AD-A285921] p 1428 N95-19989
A computational study of projectile shape dependence on phase change phenomena with comparisons to experimental data [DE95-000740] p 1384 N95-20077
A computational study of projectile melt in impact with typical Whipple shields [DE94-016454] p 1365 N95-20237
Aluminium oxide targets after ballistic impact; fragmentation of the ceramic and the projectile [PB95-133625] p 1388 N95-22097

PROLOG (PROGRAMMING LANGUAGE)
Logic programming and negation: A survey [PB95-110730] p 1472 N95-22302

PROPAGATION
Electron propagator theory and application [AD-A279761] p 1507 N95-20097

PROPAGATION MODES
Passive monitoring for automated MMPP communication systems p 1293 N95-20927
The relative importance of meteor burst and other distance polar cap propagation modes in the low VHF band p 1293 N95-20928
Study of the fast and slow variations of the power received at VHF links by tropospheric diffusion p 1293 N95-20929
Methods for evaluating the effects of conduits at the surface of the sea p 1294 N95-20932
Identification of the propagation modes and paths on HF links using a goniopolarimeter p 1299 N95-20956

PROPAGATION VELOCITY
Velocity analysis for transversely isotropic media [DE95-000643] p 1411 N95-19981
Numerical study of realistic perturbations in three-dimensional boundary layers p 1351 N95-21091

PROPANE
Effect of propane-air on NGVs and vehicle fueling stations [PB94-210085] p 1282 N95-20253
Development and demonstration of advanced technologies for direct electrochemical oxidation of hydrocarbons (methanol, methane, propane) [AD-A285094] p 1224 N95-22474

PROPELLANT CHEMISTRY
Density functional studies of decomposition processes of energetic molecules [AD-A286185] p 1510 N95-20327

PROPELLANT COMBUSTION
High pressure windowed chamber burned rate determination of liquid propellant XM46 [AD-A283770] p 1282 N95-19920

PROPELLANT DECOMPOSITION
Density functional studies of decomposition processes of energetic molecules [AD-A286185] p 1510 N95-20327

PROPELLANT GRAINS
The 1993 JANNAF Propulsion Meeting, volume 2 [AD-A279569] p 1221 N95-20708

PROPELLANT TESTS
Investigation of rocket motors 3 inch number 1 Mk 4 [AD-A284278] p 1221 N95-19962
The hot fragment conductive ignition test for screening LOVA propellants [AD-A284259] p 1282 N95-20187

PROPELLANTS
The hot fragment conductive ignition test for screening LOVA propellants [AD-A284259] p 1282 N95-20187
Compatibility testing of explosives and paints by chemiluminescence techniques [PB95-133609] p 1275 N95-21275
Evaluation of state-of-the-art high speed deluge systems presently in service at various US Army ammunition plants [AD-A279102] p 1287 N95-21598
Launch safety, toxicity, and environmental effects of the high performance oxidizer ClF(5) [AD-A286095] p 1284 N95-22227

PROPULSION
Propulsion research on the variable tandem mirror plasma rocket [NASA-CR-196310] p 1221 N95-20059
T-45A High Angle of Attack Testing: US Naval Test Pilot School 46th Annual Reunion and Symposium [AD-A284000] p 1207 N95-20466
Space fundamentals for the war fighter [AD-A279703] p 1217 N95-20690
The 1993 JANNAF Propulsion Meeting, volume 2 [AD-A279569] p 1221 N95-20708
Electric and Hybrid Vehicles Program [DE95-001711] p 1332 N95-21738

PROPULSION SYSTEM PERFORMANCE
Computer program for calculation of complex chemical equilibrium compositions and applications. Part 1: Analysis [NASA-RP-1311] p 1235 N95-20180

PROTECTIVE CLOTHING
Evaluation of stress experienced by soldiers wearing chemical protective clothing during varying work loads in desert or tropical environments [AD-A280113] p 1452 N95-20625
Advanced robotic technologies for transfer at Sandia National Laboratories [DE95-001617] p 1481 N95-20884
Microclimate cooling effect on perceived exertion in four heat/exercise scenarios [AD-A285549] p 1444 N95-21160
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 399) [NASA-SP-7011(399)] p 1446 N95-21947
Fuzzy clustering of facial form for prototyping environmental protection equipment [DE94-014657] p 1454 N95-22466

PROTECTIVE COATINGS
Evaluation of PS 212 coatings under boundary lubrication conditions with an Ester-based oil to 300 C [NASA-TM-106763] p 1223 N95-19901
Novel reagents for chemical vapor deposition of intermetallic alloys [AD-A286562] p 1271 N95-20815
Polyurethane self-priming topcoats [AD-D016204] p 1274 N95-21154
Polyurethane self-priming topcoats [AD-D016205] p 1274 N95-21155
B4C-SiC reaction-sintered coatings on graphite plasma facing components [DE94-019105] p 1230 N95-21553
Protective organic coatings on steel: Accelerated corrosion test method for paint/coatings exposed to water with low conductivity. Nordtest project no. 1010-92. Degradation of organic coatings in fresh water [PB95-134185] p 1277 N95-21873
Epoxy lining for shipboard piping systems [AD-A286228] p 1279 N95-22022
Demonstration of multifunctional DNBM corrosion inhibitors in protective coatings for Naval air/weapon systems [AD-A285869] p 1279 N95-22136
Embedded optical fibres as strain sensors in polymer matrix fibre composites: The influence of adhesion in strain transfer [PB95-133617] p 1547 N95-22140

PROTEIN METABOLISM
USAF cellular mechanism of turnover of the stress induced protein HSP70 [AD-A285618] p 1441 N95-19898

PROTEIN SYNTHESIS
USAF cellular mechanism of turnover of the stress induced protein HSP70 [AD-A285618] p 1441 N95-19898
Calculation of atom-centered partial charges for heme [DE94-014447] p 1520 N95-21375

PROTEINS
USAF cellular mechanism of turnover of the stress induced protein HSP70 [AD-A285618] p 1441 N95-19898
Skeletal muscle ischemia and heat shock proteins [AD-A285364] p 1442 N95-20549
Biomolecular Materials by Design, volume 330 [AD-A285369] p 1269 N95-20551
Electrostatic basis for molecular recognition in photosynthesis [DE95-002979] p 1440 N95-22075
Separation of proteins by convective electrophoresis through a porous membrane [PB95-127130] p 1248 N95-22373

PROTOCOL (COMPUTERS)
A database for analyzing sequential behavioral data and their associated cognitive models [AD-A280061] p 1448 N95-19887
Process algebra with partial choice [PB95-110714] p 1487 N95-19907
A group communication approach for mobile computing mobile channel: An ISIS tool for mobile services [AD-A279785] p 1290 N95-20306
High performance backplane components for modular avionics p 1212 N95-20653
An object-oriented implementation of the Xpress transfor protocol [DE95-001506] p 1301 N95-21277
GRONICs-1994. Proceedings of the 1994 Groningen Student Conference on Computer Science [PB95-135620] p 1468 N95-21455
A simulation study of TCP performance in ATM networks [DE94-016622] p 1477 N95-21505
Compositional approach to sequential consistency and lazy caching [PB95-134110] p 1455 N95-21871
Verification of a timestamp-based sliding-window protocol [PB95-132759] p 1455 N95-22082
Formal specification and compositional verification of an atomic broadcast protocol [PB95-110508] p 1472 N95-22351

PROTON BEAMS
Search for right-handed currents in the decay chain of K(+) yields muon(+)nu(sub muon), muon(+) yields e(+)nu(sub e)nu(bar)(sub muon) [DE94-770606] p 1514 N95-20756
Intense proton beam source for ITER neutral-beam spectroscopy diagnostics [DE94-018092] p 1560 N95-21668
The 12-GeV/c beam transfer and absorber lines for the Superconducting Super Collider [DE95-002100] p 1538 N95-21733
Experience at the Los Alamos Meson Physics Facility with the use of alloy Inconel 718 as an enclosure for a beam degrader and as a proton beam entry window [DE94-018289] p 1538 N95-22050

PROTON ENERGY
Performance of Ga(0.47)In(0.53)As cells over a range of proton energies [NASA-TM-106819] p 1334 N95-22112

PROTON IRRADIATION
Proton irradiation effects on advanced digital and microwave III-V components [DE94-018742] p 1314 N95-20338
Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522

PROTON RESONANCE
Two-band model description of electroabsorption and third-harmonic generation in 1-D MX linear chains [DE95-000932] p 1526 N95-21934

PROTON-PROTON REACTIONS
Complementarity of e(+)e(-) and pp colliders for the exploration of electroweak symmetry breaking [DE94-017397] p 1507 N95-20034
D0 quantum chromodynamics: A compilation of results presented at DPF 1994 [DE95-000838] p 1510 N95-20344
Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section [DE95-002524] p 1515 N95-20897
Charmonium production, b quark and B meson production and b(bar b) correlations at CDF [DE95-002525] p 1515 N95-20898
Antishadowing contribution to the pomeron structure function [PB95-127478] p 1518 N95-21221
Spin dependence of diffractive processes and implications for the small x behaviour of g1 and the spin content of the nucleon [PB95-130332] p 1518 N95-21225
Multiple hard interactions in HERWIG [PB95-130548] p 1518 N95-21233
The diphoton production rate in (bar p)p collisions at the square root of s = 1800 GeV [DE95-000559] p 1522 N95-21497
Tests of structure functions using lepton pairs: W-charge asymmetry at CDF [DE95-000560] p 1527 N95-22122
Electroweak boson pair production in p(-p) collisions at the square root of s = 1.8 TeV [DE95-000725] p 1527 N95-22194
Inclusive B production at CDF and D0 [DE95-000728] p 1528 N95-22196

PROTONS
Particle beam fusion [DE95-000711] p 1549 N95-20075
Performance, defect behavior and carrier enhancement in low energy, proton irradiated p+nn+ InP solar cells p 1319 N95-20518
A neutron beam polarizer for study of parity violation in neutron-nucleus interactions [DE95-002743] p 1519 N95-21237
Comparison of calculated with measured dynamic aperture [DE95-002863] p 1534 N95-21246
Search for new particles decaying to dijets in p(bar p) collisions at (radical)s = 1.8 TeV [DE94-018994] p 1523 N95-21563

Chemistry and electrochemistry in Lewis acid and superacid ionic liquids
[AD-A279396] p 1246 N95-21931
Proton and produced particle distributions from Au+Au collisions at 11.6 A GeV/c
[DE94-018634] p 1530 N95-22392

PROTOPLANETS
Experimental hypervelocity impact effects on simulated planetesimal materials
[DE94-017290] p 1599 N95-20144
Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790
Dynamics of volatile delivery from outer to inner solar system p 1420 N95-21798
Comets, impacts, and atmospheres
p 1422 N95-21810

PROTOSTARS
Twentysixth YERAC
[PB95-127437] p 1599 N95-21347

PROTOTYPES
Advanced Standard Electronic Modules format-E (SEM-E) processes for rapid prototyping
p 1210 N95-20642
Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817
A tabular interface for automated verification of event-based dialogs
[AD-A286065] p 1463 N95-20847
Preclinical investigation of lyophilized platelet preparations
[AD-A286079] p 1443 N95-20851
Polymer based all-optic reconfigurable interconnects
[AD-A279976] p 1272 N95-20962
Prototype rule-based reliability analysis for VLSI circuit design
[AD-A280065] p 1327 N95-20967
An automatic placement tool for rapid prototyping of printed circuit boards
[AD-A286029] p 1328 N95-20997
Next generation solid modellers for electronic prototyping
[AD-A286525] p 1464 N95-21010
Vertex detectors at linear colliders: Present and future
[PB95-134656] p 1540 N95-22364
Fuzzy clustering of facial form for prototyping environmental protection equipment
[DE94-014657] p 1454 N95-22466

PROVING
Abstract reduction and topology
[PB95-110615] p 1488 N95-20054
A tabular interface for automated verification of event-based dialogs
[AD-A286065] p 1463 N95-20847
Correctness of some algorithms to generate finite automata for regular expressions
[PB95-127551] p 1465 N95-21022
Compositional proof theory for fault tolerant real-time distributed systems
[PB95-127601] p 1465 N95-21025
Adjunctions
[PB95-134078] p 1494 N95-21868
Compositional approach to sequential consistency and lazy caching
[PB95-134110] p 1455 N95-21871
Proof of a conjecture of Narayana on dominance refinements of the Smirnov two-sample test
[PB95-132650] p 1499 N95-21979

PSYCHOLOGICAL EFFECTS
Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species
[AD-A285055] p 1442 N95-20485

PSYCHOLOGICAL FACTORS
Neural models of motion perception
[AD-A286560] p 1449 N95-20845

PSYCHOLOGICAL SETS
Test reliability and experimental power
[AD-A279607] p 1448 N95-19957

PSYCHOLOGICAL TESTS
Test reliability and experimental power
[AD-A279607] p 1448 N95-19957

PSYCHOMETRICS
Test reliability and experimental power
[AD-A279607] p 1448 N95-19957

PUBLIC HEALTH
Definition report on target and related steering variables of radiation as a part of the environmental balance and environmental outlook investigation
[PB95-135471] p 1409 N95-21846
Initial assessment of the hazards and risks of new chemicals to man and the environment, part 2
[PB95-106407] p 1410 N95-22124
The mechanisms and effects off the plant-activations of chemicals in the environment
[AD-A279388] p 1356 N95-22145

PULSE COMMUNICATION
A MMPP communications system for the frequency range 2-200MHz p 1293 N95-20924
Numerical and symbolic algorithms for application and specific signal processing
[AD-A279902] p 1305 N95-21576
Data sampling for a burst mode communications system
[AD-A286098] p 1309 N95-22229

PULSE COMPRESSION
Frequency-coded monopulse MTI
[AD-D016495] p 1307 N95-21904

PULSE DURATION
Self-starting femtosecond pulse generation from a Ti:sapphire laser synchronously pumped by a pointing-stabilized mode-locked Nd:YAG laser
[DE94-019319] p 1374 N95-21480
A 500 MW annular beam relativistic klystron
[DE95-000867] p 1334 N95-22011

PULSE GENERATORS
A wideband EMP test system
[DE94-015283] p 1290 N95-20474
LIF standoff research
[DE94-018744] p 1535 N95-21328
Optical, electronic and optoelectronic material and device research
[AD-A280111] p 1374 N95-21630

PULSE HEATING
Ion heat pulse after sawtooth crash in the JFT-2M tokamak
[DE94-770685] p 1555 N95-20988

PULSE RATE
A wideband EMP test system
[DE94-015283] p 1290 N95-20474
Detection efficiency and dark pulse rate of Rockwell (SSPM) single photon counters
[DE94-016872] p 1524 N95-21646

PULSED LASER DEPOSITION
Effects of ambient conditions on the adhesion of cubic boron nitride films on silicon substrates
[DE94-016779] p 1266 N95-20281
Thin-film cadmium telluride photovoltaic cells
[DE94-011886] p 1395 N95-21508

PULSED LASERS
Modeling of high efficiency solar cells under laser pulse for power beaming applications p 1318 N95-20516
Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538
Computational model of drilling with high radiance pulsed lasers
[DE94-018548] p 1371 N95-20783
Research studies on short wavelength lasers by selective Auger processes
[AD-A285620] p 1372 N95-21144
Mechanisms and diagnostics of ultrashort pulse laser ocular effects
[AD-A285610] p 1373 N95-21195
Large facilities pilot programme. Access to the VULCAN High Power Laser Facilities at Rutherford Appleton Laboratory
[PB95-130340] p 1373 N95-21226
Tribology and surface mechanical properties of excimer laser nitrided titanium
[DE95-002751] p 1255 N95-21238
NEO-LISP: Deflecting near-Earth objects using high average power, repetitively pulsed lasers
[DE95-000863] p 1599 N95-21367
Submicrosecond, synchronizable x-ray source
[AD-D016497] p 1546 N95-21905
The final status of a metal surface after multipulse laser irradiation in an ambient gas
[DE94-629000] p 1562 N95-22377

PULSED RADIATION
Design trade-off study for a large volume short pulse neutron assembly
[DE94-019175] p 1509 N95-20206
Muon beamline at ISIS
[PB95-130324] p 1518 N95-21224
Radio-frequency techniques at the ISIS pulsed muon source
[PB95-129854] p 1529 N95-22303
Study of pulsed laser effects on living tissues
[PB95-131330] p 1447 N95-22361

PURIFICATION
Inert gas purification and measuring oxygen partial pressure in gas mixtures with EMF method based on solid electrolyte cell
[PB95-127767] p 1240 N95-21110
Disinfection of purified waste water with ultra violet light on a technical scale
[PB95-131926] p 1405 N95-21330
Removal of CO2 in closed loop off-gas treatment systems
[DE94-019259] p 1407 N95-21617
The application of electrodialysis to extend the lifetime of commercial electroplating baths
[DE95-000868] p 1246 N95-22012
Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330

PYRAMIDS
HIRAS: High-resolution IRAS images
p 1593 N95-21758
Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769

PYRIDINES
Photochemistry of intermolecular C-H bond activation reactions
[DE94-018417] p 1239 N95-20682
Vibrational overtone spectroscopy of pyridine and related compounds
[AD-A280105] p 1224 N95-21911

PYRIMIDINES
New chiral pyrimidino-crown ether ligands
[AD-A279892] p 1223 N95-20590

PYROLYSIS
Direct aromatization of methane
[DE94-017131] p 1233 N95-19924
Global equivalence ratio concept and the prediction of carbon monoxide formation in enclosure fires
[PB94-207511] p 1234 N95-20100
Assessment of liquefaction and pyrolysis systems
[PB95-129797] p 1236 N95-20290
Ceramics formed by pyrolysis of either linear or thermosetting carborane (siloxane or silane) acetylene based precursor polymers
[AD-D016563] p 1266 N95-20291
Restricted mass transport effects on free radical reactions
[DE94-018136] p 1217 N95-21706

PYROLYTIC GRAPHITE
Optical properties of silicon clusters deposited on the basal plane of graphite
[DE94-017529] p 1542 N95-20450

PYROTECHNICS
Evaluation of state-of-the-art high speed deluge systems presently in service at various US Army ammunition plants
[AD-A279102] p 1287 N95-21598
Air pollution caused by fireworks during the turn of the year 1992-1993
[PB95-135265] p 1409 N95-21718

PYROXENES
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813

PYRROLES
Mechanism of the amperometric response of a proposed glucose sensor based on a polypyrrole-tubule-impregnated membrane
[AD-A279836] p 1365 N95-20431

Q

Q SWITCHED LASERS
High power spectral and spatial beam control using self-phase modulation and a multisegment monochromator
[DE94-016604] p 1531 N95-20120
GaAs optical circuits
[AD-A285859] p 1369 N95-20389
Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-000862] p 1373 N95-21312

Q VALUES
Measurements of shielding effectiveness and cavity characteristics of airplanes
[PB94-210051] p 1289 N95-20191

QUADRATIC EQUATIONS
Quadratic forms in design theory
[PB95-111019] p 1487 N95-19940

QUADRATURES
Atomic orbital basis sets for molecular interactions
[AD-A279609] p 1506 N95-19959
Probability of detection for a GO CFAR radar processor using envelope detection approximation
[AD-A286211] p 1310 N95-22251

QUADRUPOLES
Ion-molecular spiraling collisions and termolecular recombination
[AD-A285633] p 1517 N95-21151
Sources of amplitude-dependent tune shift in the PEP-2 design and their compensation with octupoles
[DE94-018198] p 1519 N95-21262
An 8-meter-long coupled cavity RFQ linac
[DE94-018077] p 1331 N95-21667
Proposed emittance upgrade for the SLC damping rings
[DE95-002887] p 1538 N95-22155

QUALIFICATIONS

Qualification of the dependence in the generalized extreme value choice model
[PB95-110946] p 1497 N95-19936

Qualification test results for blue-red reflecting solar covers p 1320 N95-20525

Advanced Standard Electronic Modules format-E (SEM-E) processes for rapid prototyping p 1210 N95-20642

QUALITATIVE ANALYSIS

Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy
[DE94-009757] p 1237 N95-20470

QUALITY CONTROL

Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0
[DE94-019214] p 1458 N95-20073

Towards better quality and reliability in the software reuse library environment
[AD-A280013] p 1460 N95-20313

Use of an integrated design tool for weld quality enhancement
[DE94-018135] p 1379 N95-20723

Ozone quality control measurements in the Dutch National Air Quality Monitoring Network
[PB95-131900] p 1405 N95-21329

Benefits of CMM-based software process improvement: Executive summary of initial results
[AD-A286444] p 1468 N95-21567

Interim profile: Development and trial of a method to rapidly measure software engineering maturity status
[AD-A279074] p 1468 N95-21627

Consortia for Known Good Die (KGD), phase 1
[AD-A279407] p 1383 N95-21933

A graded approach to ISO 9000 implementation for records managers
[DE94-017409] p 1591 N95-22167

Quality characteristics and metrics for reusable software
[PB94-203437] p 1473 N95-22390

QUANTITATIVE ANALYSIS

Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy
[DE94-009757] p 1237 N95-20470

Enhancements in the Livermore spectrum analysis package PIXEF
[DE95-002487] p 1272 N95-20895

The formation of reaction bonded Si3N4 at low temperatures and in short times
[DE95-001990] p 1275 N95-21289

The energetics and dynamics of free radicals, ions, and clusters
[DE94-018101] p 1244 N95-21701

QUANTUM CHEMISTRY

Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 1: Transition properties in HCl
[AD-A285988] p 1239 N95-20613

Quantum simulation of heterogeneous electron transfer free energies at the water-metal interface
[AD-A279279] p 1522 N95-21492

Use of quantum chemically derived descriptors for QSAR modeling of reductive dehalogenation of aromatic compounds
[PB95-132783] p 1224 N95-22333

QUANTUM CHROMODYNAMICS

New strong interactions above the electroweak scale
[DE94-018385] p 1506 N95-20025

D0 quantum chromodynamics: A compilation of results presented at DPF 1994
[DE95-000838] p 1510 N95-20344

Semi-leptonic form-factors from lattice QCD
[DE95-000871] p 1510 N95-20367

High energy photon-photon collisions
[DE94-017494] p 1532 N95-20388

Production of J/(psi) in 800 GeV/c p-Si interactions
[DE94-017982] p 1513 N95-20496

Strange particle and antiproton production in S + nucleus collisions at 200 GeV/nucleon
[DE95-002348] p 1513 N95-20575

Kinematical evidence for top pairs at the Tevatron
[DE95-000729] p 1515 N95-20880

Theoretical particle physics
[DE95-002447] p 1515 N95-20893

Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section
[DE95-002524] p 1515 N95-20897

Charmonium production, b quark and B meson production and b(bar b) correlations at CDF
[DE95-002525] p 1515 N95-20898

Recent results from E665
[DE95-002523] p 1516 N95-20914

Anomalous vector-boson couplings in Majorana neutrino models
[PB95-127460] p 1518 N95-21220

Antishadowing contribution to the pomeron structure function
[PB95-127478] p 1518 N95-21221

Spin dependence of diffractive processes and implications for the small x behaviour of g1 and the spin content of the nucleon
[PB95-130332] p 1518 N95-21225

Calculation of Z plus four jet production at the Tevatron
[PB95-130472] p 1580 N95-21230

The theory of relativistic heavy ion collisions
[DE95-001805] p 1519 N95-21302

Nonperturbative aspects of the quark-photon vertex
[DE94-012846] p 1520 N95-21315

Exclusive processes: Tests of coherent QCD phenomena and nucleon substructure at CEBAF
[DE95-002892] p 1520 N95-21336

Monopoles and quark confinement: Introduction and overview
[DE94-019348] p 1522 N95-21485

QCD corrections to Higgs boson production: An update
[DE95-000626] p 1522 N95-21506

Polarization of charmonium in pion-nucleus collisions
[DE95-002783] p 1523 N95-21525

Lattice results for heavy light matrix elements
[DE94-019101] p 1523 N95-21551

Structure functions and structure function ratio F2(n)/F2(p) at low X(Bj) and Q2 in inelastic muon scattering
[DE94-018979] p 1573 N95-21561

Measurement of the B meson differential cross-sections in p(bar p) collisions at (radical)s = 1.8 TeV using the exclusive decays B(sup (+-)) (yields) J/(psi)K(sup (+-)) and B(sup 0) (yields) J/(psi)K*(sup 0)
[DE94-018993] p 1523 N95-21562

Search for new particles decaying to dijets in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-018994] p 1523 N95-21563

Summary of heavy ion theory
[DE95-002177] p 1523 N95-21588

Measurement of the B cross section at CDF via B semileptonic decays
[DE95-002217] p 1524 N95-21597

The method of evaluating quantum partition function for the Hubbard model
[DE94-628991] p 1581 N95-21639

Dynamics of the chiral transition
[DE94-016813] p 1524 N95-21641

Status of the DO top search
[DE95-002214] p 1525 N95-21715

Strong interactions studies with medium energy probes
[DE95-001800] p 1245 N95-21745

Nuclear research with the electromagnetic probe
[DE95-001812] p 1525 N95-21747

Constraints on T-odd and P-even hadronic interactions from nucleon, nuclear, and atomic electric dipole moments
[DE94-012845] p 1526 N95-21920

There might be two kinds of dibaryon
[DE94-014417] p 1526 N95-22058

QUANTUM EFFICIENCY

High-efficiency, deep-junction, epitaxial InP solar cells on (100) and (111)B InP substrates
p 1316 N95-20507

Detection efficiency and dark pulse rate of Rockwell (SSPM) single photon counters
[DE94-016872] p 1524 N95-21646

Non-H2Se, ultra-thin CuInSe2 devices
[DE94-011894] p 1395 N95-21844

Photocathodes for free electron lasers
[DE94-018305] p 1376 N95-22242

Fabrication and characterization of cesium telluride photocathodes: A promising electron source for the Los Alamos Advanced FEL
[DE94-018303] p 1377 N95-22348

QUANTUM ELECTRONICS

Solid state research
[AD-A279662] p 1567 N95-20426

Temperature dependence of magnetopolarons in a parabolic quantum dot in arbitrary magnetic fields
[DE94-629033] p 1528 N95-22218

QUANTUM MECHANICS

Semiquantum chaos and the large N expansion
[DE94-016196] p 1488 N95-20169

On the differential representations of quantum Lie superalgebras
[DE94-629874] p 1491 N95-20734

Quantization in curvilinear coordinates
[DE94-770603] p 1514 N95-20737

Quantum diffusion
[DE95-001015] p 1580 N95-21264

Second order approximation for optical polaron in the strong coupling case
[DE94-628997] p 1525 N95-21856

The development of science during this century
[DE94-632964] p 1582 N95-22185

On the conductance sum rule for the hierarchical edge states of the Fractional Quantum Hall Effect
[DE94-629030] p 1582 N95-22198

Theory of the excitonic lineshape in low-dimensional structures with rough interfaces
[DE95-003434] p 1582 N95-22237

Constraints on the left-right symmetric model from b yields s gamma
[DE95-003469] p 1528 N95-22239

The two-electron problem and prospects for atomic collision theory on a numerical lattice
[DE94-017856] p 1528 N95-22265

QUANTUM NUMBERS

D(sup 0)-(anti-D)(sup 0) mixing and doubly Cabibbo-suppressed decays of the D(+)
[DE94-015540] p 1512 N95-20476

QUANTUM STATISTICS

Where are we going with Bose-Einstein: A mini review
[PB95-130308] p 1518 N95-21222

The dynamic structure function of Bose liquids in the deep inelastic regime
[DE94-629077] p 1527 N95-22182

Universal spectral correlations at the mobility edge
[DE94-629031] p 1528 N95-22217

QUANTUM THEORY

Electron propagator theory and application
[AD-A279761] p 1507 N95-20097

Predictions from quantum cosmology
[PB95-111126] p 1599 N95-20173

Von Neumann algebra automorphisms and time-thermodynamics relation in general covariant quantum theories
[PB95-111084] p 1580 N95-20324

Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A285946] p 1315 N95-20394

Computational evaluation of the feasibility of nitrating precursors to C12N12O12
[AD-A285976] p 1239 N95-20668

Temporal rearrangement of electronic densities in slow atomic collisions
[AD-A279725] p 1516 N95-20994

Electron-nuclear dynamics of molecular systems
[AD-A279649] p 1516 N95-21120

New improved derivative expansion for field theories with spontaneous symmetry breaking
[DE94-019349] p 1580 N95-21486

Proceedings of the School for Young High Energy Physicists
[PB95-108114] p 1537 N95-21647

Vibrational overtone spectroscopy of pyridine and related compounds
[AD-A280105] p 1224 N95-21911

QUANTUM WELL LASERS

GaAs optical circuits
[AD-A285859] p 1369 N95-20389

QUANTUM WELLS

Physics and applications of defects in advanced semiconductors, volume 325
[AD-A280059] p 1563 N95-19886

International Conference on Optical Computing: Technical digest
[AD-A284293] p 1541 N95-20249

Resonant tunneling quantum well integrated optical waveguide modulator/switch
[AD-A285142] p 1542 N95-20501

Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679

Ultrafast magnetoexciton dynamics in GaAs
[DE94-018175] p 1514 N95-20732

Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892

Excitons in semiconducting superlattices, quantum wells, and ternary alloys
[DE95-001867] p 1572 N95-21287

Resonant generation of nonequilibrium phonons in GaAs/AlAs quantum wells via intersubband scattering
[DE95-002338] p 1581 N95-21604

Optical, electronic and optoelectronic material and device research
[AD-A280111] p 1374 N95-21630

Effect of the electron-SO-phonon on the impurity state energies in a semiconductor quantum well
[DE94-628993] p 1581 N95-21887

Growth and electrical and far-infrared properties of wide electron wells in semiconductors
[AD-A279409] p 1333 N95-21917

Heterostructure quantum confined Stark effect electrooptic modulators operating at 938 nm
[AD-A279342] p 1581 N95-21928

Carrier dynamics in InGaAs: Quantum wells versus bulk
[DE94-018205] p 1577 N95-22168
Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

QUARK MODELS
Status of the DO top search
[DE95-002214] p 1525 N95-21715
There might be two kinds of dibaryon
[DE94-014417] p 1526 N95-22058

QUARK PARTON MODEL
Antishadowing contribution to the pomeron structure function
[PB95-127478] p 1518 N95-21221

QUARKS
New strong interactions above the electroweak scale
[DE94-018385] p 1506 N95-20025
J/psi,psi(prime) yields mu(+)mu(-) and B yields J/psi,psi(prime) cross sections
[DE94-017184] p 1507 N95-20108
Search for top in DO using the electron + jets channel with soft muon tagging
[DE95-001284] p 1509 N95-20217
CDF top results in the dilepton channel
[DE95-000837] p 1510 N95-20343
Higgs decay to bottom quarks at the Tevatron
[DE94-016715] p 1511 N95-20404
Universal parametrization for quark and lepton substructure
[DE94-770604] p 1514 N95-20738
Properties of strange-matter stars
[DE95-002329] p 1599 N95-20873
Kinematical evidence for top pairs at the Tevatron
[DE95-000729] p 1515 N95-20880
Charmonium production, b quark and B meson production and b(bar b) correlations at CDF
[DE95-002525] p 1515 N95-20898
Antishadowing contribution to the pomeron structure function
[PB95-127478] p 1518 N95-21221
Calculation of Z plus four jet production at the Tevatron
[PB95-130472] p 1580 N95-21230
Signals for top quark anomalous chromomagnetic moments at colliders
[DE95-002896] p 1535 N95-21254
Nonperturbative aspects of the quark-photon vertex
[DE94-012846] p 1520 N95-21315
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Strange hadronic matter
[DE94-019345] p 1521 N95-21484
Monopoles and quark confinement: Introduction and overview
[DE94-019348] p 1522 N95-21485
Search for the top quark using multivariate analysis techniques
[DE95-000561] p 1522 N95-21498
Search for new particles decaying to dijets in p(bar p) collisions at (radical)s = 1.8 TeV
[DE94-018994] p 1523 N95-21563
Summary of heavy ion theory
[DE95-002177] p 1523 N95-21588
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704
Status of the DO top search
[DE95-002214] p 1525 N95-21715
There might be two kinds of dibaryon
[DE94-014417] p 1526 N95-22058
Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064
Physics at the Fermilab Collider
[DE95-000726] p 1539 N95-22195
Inclusive B production at CDF and D0
[DE95-000728] p 1528 N95-22196
Search for squarks and gluinos in D0
[DE95-000730] p 1528 N95-22197
Search for top with DO detector in dilepton channel
[DE95-000731] p 1529 N95-22314

QUARTZ
Quartz resonator fluid monitors for vehicle applications
[DE94-018910] p 1367 N95-21546
Radio-frequency techniques at the ISIS pulsed muon source
[PB95-129854] p 1529 N95-22303

QUARTZ TRANSDUCERS
Generation of micro-domains in AT-cut quartz by thermal processing and the effect on resonator modes
[DE94-017344] p 1564 N95-20087

QUATERNARY ALLOYS
Application of quaternary phase diagrams to compound semiconductor processing
[DE95-001813] p 1277 N95-21748

QUENCHING (ATOMIC PHYSICS)
Correlations for the OH A(sup 2)(Sigma)(sup +)(v(prime)=0) electronic quenching cross-section
[DE95-002591] p 1244 N95-21524

QUERY LANGUAGES
Translation of the data flow query language for the multimodel, multibackend database system
[AD-A285978] p 1588 N95-20617
GOLD: A Graph Oriented Language for Databases
[PB95-127544] p 1465 N95-21021
Logic programming and negation: A survey
[PB95-110730] p 1472 N95-22302
A conceptual approach to object-oriented data modeling
[AD-A286048] p 1592 N95-22416

QUEUEING THEORY
High-performance packet switching architecture for ATM: Conventional solution and neural network solution
[PB95-110920] p 1312 N95-19935
Stochastic network processes
[AD-A279905] p 1475 N95-20566
Compositional approach to sequential consistency and lazy caching
[PB95-134110] p 1455 N95-21871

R

RABBITS
Biological and theoretical studies of adaptive networks: The conditioned response
[AD-A284781] p 1479 N95-20061

RADAR
Adaptive detection in stationary and nonstationary noise environments
[AD-A279581] p 1300 N95-21099

RADAR ANTENNAS
General purpose sidelobe canceller system
[AD-D016560] p 1289 N95-20270
Inband scattering from arrays with series feed networks
[AD-A286209] p 1307 N95-21883
Millimeter wave front-end figure of merit, part 1
[AD-A279093] p 1307 N95-21915

RADAR BEACONS
GPS-Squitter capacity analysis
[AD-A280037] p 1291 N95-20599
Recommendation on transition from primary/secondary radar to secondary-only radar capability
[AD-A286279] p 1308 N95-22005

RADAR CROSS SECTIONS
RCS calculation capability
[AD-A286329] p 1289 N95-20211
Inband scattering from arrays with series feed networks
[AD-A286209] p 1307 N95-21883
Design and construction of a Ka-band scatterometer
[AD-A286296] p 1368 N95-22322

RADAR DATA
Emitter location via Kalman filtering of signal time difference of arrival
[AD-A285972] p 1291 N95-20666
Real-data tests of a single-Doppler radar assimilation system
[AD-A286638] p 1292 N95-20904
AN/APS-137 Forward Looking Airborne Radar (FLAR) evaluation, Fall 1992 experiment
[AD-A279526] p 1306 N95-21686
The applicability of neural networks to ionospheric modeling in support of relocatable Over-the-Horizon radar
[AD-A286114] p 1309 N95-22230

RADAR DETECTION
BACKSCAT lidar simulation version 4.0: Technical documentation and users guide
[AD-A285851] p 1290 N95-20376
LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134
Probability of detection for a GO CFAR radar processor using envelope detection approximation
[AD-A286211] p 1310 N95-22251

RADAR IMAGERY
Experimental proof-of-concept of phase derivative based range profile enhancement ATR
[AD-A284921] p 1289 N95-19997
SAR image registration in absolute coordinates using GPS carrier phase position and velocity information
[DE94-018738] p 1204 N95-20195
Three-dimensional ground penetrating radar imaging using multi-frequency diffraction tomography
[DE94-016687] p 1301 N95-21205
Polar volatiles on Mercury and the Moon
p 1422 N95-21811

RADAR MEASUREMENT
Boundary layer cloud studies in support of ASTEX
[AD-A285947] p 1429 N95-20395
Measurements of radar backscatter from the ocean surface at 94 GHz as a function of wind speed, direction and the modulation by the ocean waves during the SAXON-FPN experiment p 1299 N95-20960

RADAR NAVIGATION
Recommendation on transition from primary/secondary radar to secondary-only radar capability
[AD-A286279] p 1308 N95-22005

RADAR RANGE
Probability of detection for a GO CFAR radar processor using envelope detection approximation
[AD-A286211] p 1310 N95-22251

RADAR RECEIVERS
Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A285611] p 1312 N95-19894

RADAR SCATTERING
Sounder calibration with backscattering from Losquet Island in the presence of multipaths
p 1300 N95-20961
Inband scattering from arrays with series feed networks
[AD-A286209] p 1307 N95-21883

RADAR TARGETS
Experimental proof-of-concept of phase derivative based range profile enhancement ATR
[AD-A284921] p 1289 N95-19997
RCS calculation capability
[AD-A286329] p 1289 N95-20211
Adaptive detection in stationary and nonstationary noise environments
[AD-A279581] p 1300 N95-21099
Method and apparatus for classifying targets
[AD-D016519] p 1303 N95-21464

RADAR TRACKING
Experimental proof-of-concept of phase derivative based range profile enhancement ATR
[AD-A284921] p 1289 N95-19997
Location and characteristics of the reconnection X-line deduced from low-altitude satellite and radar observations
[NASA-TM-110114] p 1413 N95-20453
An integrated cloud observation and modeling investigation in support of the ARM Program
[DE95-002798] p 1430 N95-21527
Noncoherent transponder standards
[AD-A279512] p 1306 N95-21684
Frequency-coded monopulse MTI
[AD-D016495] p 1307 N95-21904

RADIAL DISTRIBUTION
Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320

RADIANCE
Radiance of the ocean horizon
[AD-A285613] p 1431 N95-19896

RADIANT HEATING
Site Scientific Mission Plan for the Southern Great Plains CART site, July - December 1994
[DE94-017289] p 1401 N95-20193
Ion heating perpendicular to the magnetic field
[AD-A286635] p 1501 N95-20773

RADIATION ABSORPTION
Broadband thermal optical limiter for the protection of eyes and sensors
[AD-D016493] p 1377 N95-22304

RADIATION COUNTERS
D0 quantum chromodynamics: A compilation of results presented at DPF 1994
[DE95-000838] p 1510 N95-20344
Mechanical design of the DO silicon detector
[DE95-002532] p 1365 N95-20902
New shower maximum trigger for electrons and photons at CDF
[DE95-000563] p 1522 N95-21499
Detection efficiency and dark pulse rate of Rockwell (SSPM) single photon counters
[DE94-016872] p 1524 N95-21646
Design of the readout IC for the CDF SVX-2 silicon strip detector
[DE95-000562] p 1539 N95-22193

RADIATION DAMAGE
Post-irradiation deformation characteristics of heavy-ion irradiated 304L SS
[DE94-017462] p 1251 N95-20088
Light output and radiation damage in a lead tungstate crystal
[DE94-016814] p 1565 N95-20265
Electron-irradiated two-terminal, monolithic InP/Ga0.47In0.53As tandem solar cells and annealing of radiation damage p 1319 N95-20519

The use of displacement damage dose to correlate degradation in solar cells exposed to different radiations
p 1320 N95-20523

Plasma model for charging damage
[DE95-000788] p 1558 N95-21310

Light output and radiation damage in a YAlO3:Ce crystal
[DE94-016815] p 1545 N95-21643

Optical radiation: Health based exposure limits for electromagnetic radiation in the wavelength range from 1 nanometer to 1 millimeter
[PB95-132767] p 1447 N95-22083

RADIATION DETECTORS

Radioactive check sources for alpha and beta sensitive radiological instrumentation
[DE94-016477] p 1366 N95-21138

Reentry vehicle on-site inspection technology study
[AD-A285960] p 1220 N95-21634

Electromagnetic radiation detector utilizing an electromagnetic radiation absorbing element in a mach-zehnder interferometer arrangement
[AD-D016507] p 1306 N95-21835

RADIATION DISTRIBUTION

Solar Radiation Resource Assessment Project
[DE94-000286] p 1392 N95-20778

Azimuthally averaged radial S(sub 100 microns)/S(sub 60 microns) dust color temperatures in spiral galaxies
p 1593 N95-21760

RADIATION DOSAGE

Post-irradiation deformation characteristics of heavy-ion irradiated 304L SS
[DE94-017462] p 1251 N95-20088

The use of displacement damage dose to correlate degradation in solar cells exposed to different radiations
p 1320 N95-20523

Advanced robotic technologies for transfer at Sandia National Laboratories
[DE95-001617] p 1481 N95-20884

Optical radiation: Health based exposure limits for electromagnetic radiation in the wavelength range from 100 nanometer to 1 millimeter
[PB95-132767] p 1447 N95-22083

RADIATION EFFECTS

Light output and radiation damage in a lead tungstate crystal
[DE94-016814] p 1565 N95-20265

Proton irradiation effects on advanced digital and microwave III-V components
[DE94-018742] p 1314 N95-20338

A mechanistic model for radiation-induced crystallization and amorphization in U3Si
[DE94-015028] p 1566 N95-20419

Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A279694] p 1268 N95-20428

A wideband EMP test system
[DE94-015283] p 1290 N95-20474

Proceedings of the 13th Space Photovoltaic Research and Technology Conference (SPRAT 13)
[NASA-CP-3278] p 1316 N95-20502

Radiation effects on p+n InP junctions grown by MOCVD p 1319 N95-20520

PRS scoping study 1: Scaling law estimates for K-shell radiation yields on JUPITER-class generators
[AD-A279716] p 1533 N95-20672

Reactor pumped laser research at the Sandia National Laboratories pulsed reactor facilities
[DE95-002181] p 1371 N95-20867

Influence of oxidation on radiation hardness of silicon detectors
[DE95-002466] p 1272 N95-20894

Effect of neutron irradiation on the impact properties of A533B steel
[DE95-001834] p 1256 N95-21286

Effects of neutron irradiation on the London penetration depth for polycrystalline Bi(1.8)Pb(0.3)Sr2Ca2Cu3O10 superconductor
[DE94-019335] p 1573 N95-21483

Effects of increased UV-B radiation on phytoplankton: A preliminary study and research programme
[PB95-133732] p 1439 N95-21884

Compilation of 1993 annual reports of the Navy ELF Communications System Ecological Monitoring Program. Volume 2: Tabs C-F
[AD-A279770] p 1308 N95-21988

Effect of laser radiation on carbon fibre/epoxy composites
[PB95-133526] p 1232 N95-22096

Performance of Ga(0.47)In(0.53)As cells over a range of proton energies
[NASA-TM-106819] p 1334 N95-22112

Radiation characterization report for the GPS Receiver microcontroller chip
[DE94-019169] p 1335 N95-22165

Study of pulsed laser effects on living tissues
[PB95-131330] p 1447 N95-22361

RADIATION HARDENING

Target area acquisition and control system survivability for the National Ignition Facility
[DE94-016549] p 1550 N95-20190

Design of high-efficiency, radiation-hard, GaInP/GaAs solar cells p 1319 N95-20521

Influence of oxidation on radiation hardness of silicon detectors
[DE95-002466] p 1272 N95-20894

Polymer based all-optic reconfigurable interconnects
[AD-A279976] p 1272 N95-20962

SEU and SEL response of the Westinghouse 64K E-2PROM, analog devices AD7876 12-bit ADC, and the Intel 82527 Serial Communications Controller
[DE95-003349] p 1334 N95-22086

RADIATION HAZARDS

Definition report on target and related steering variables of radiation as a part of the environmental balance and environmental outlook investigation
[PB95-135471] p 1409 N95-21846

Optical radiation: Health based exposure limits for electromagnetic radiation in the wavelength range from 100 nanometer to 1 millimeter
[PB95-132767] p 1447 N95-22083

RADIATION MEASUREMENT

Site Scientific Mission Plan for the Southern Great Plains CART site, July - December 1994
[DE94-017289] p 1401 N95-20193

Solar Radiation Resource Assessment Project
[DE94-000286] p 1392 N95-20778

RADIATION PROTECTION

MCNP (trademark) directions
[DE94-016216] p 1509 N95-20254

RADIATION SHIELDING

Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21208

RADIATION SICKNESS

Acute radiation sickness amelioration analysis
[AD-A279084] p 1445 N95-21629

RADIATION SOURCES

Free electron laser program
[AD-A285906] p 1368 N95-19987

PRS scoping study 1: Scaling law estimates for K-shell radiation yields on JUPITER-class generators
[AD-A279716] p 1533 N95-20672

Radioactive check sources for alpha and beta sensitive radiological instrumentation
[DE94-016477] p 1366 N95-21138

PRS scoping study. 2: ZPIMP predictions for radiation yields on a JUPITER-class generator
[AD-A279823] p 1537 N95-21494

Definition report on target and related steering variables of radiation as a part of the environmental balance and environmental outlook investigation
[PB95-135471] p 1409 N95-21846

RADIATION TOLERANCE

Status of diffused junction p+n InP solar cells for space applications p 1317 N95-20509

High quality InP-on-Si for solar cell applications
p 1317 N95-20510

Performance, defect behavior and carrier enhancement in low energy, proton irradiated p+nn+ InP solar cells
p 1319 N95-20518

Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522

RADIATION TRANSPORT

Unified GUI for the Los Alamos Radiation Transport Code System
[DE94-016088] p 1458 N95-20154

A practical guide to using MCNP with PVM
[DE94-016162] p 1474 N95-20158

Data analysis and visualization in MCNP (trademark)
[DE94-016164] p 1508 N95-20159

MCNP (trademark) ENDF/B-VI iron benchmark calculations
[DE94-016165] p 1508 N95-20160

New data for MCNP (trademark)
[DE94-016296] p 1509 N95-20236

MCNP (trademark) directions
[DE94-016216] p 1509 N95-20254

RADIATIVE LIFETIME

A preliminary, precise measurement of the average B hadron lifetime
[DE95-001848] p 1525 N95-21727

Measurement of the average lifetime of B hadrons at SLD
[DE95-002121] p 1527 N95-22152

RADIATIVE TRANSFER

Radiation from advanced solid rocket motor plumes
[NASA-CR-196554] p 1221 N95-20124

Radiative forcing calculations for CH3Cl
[DE94-019018] p 1402 N95-20355

Effects of microphysics and radiation on mesoscale processes of a midlatitude squall line
[DE94-014732] p 1429 N95-20381

Meso-scale cooling effects of high albedo surfaces: Analysis of meteorological data from White Sands National Monument and White Sands Missile Range
[DE94-018535] p 1429 N95-20782

RADICALS

Intrinsic barriers for H-atom transfer reactions
[DE94-018914] p 1507 N95-20049

Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621

Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2)
[AD-A279792] p 1224 N95-20660

Photophysical processes on triplet states and radical ions in pure and molecularly doped polymers
[DE95-002681] p 1570 N95-20916

Application of IRIS to semiconductor plasma processing
[DE95-003591] p 1562 N95-22225

RADII

The variation of the dust temperature within late-type spiral galaxies p 1593 N95-21766

RADIO ASTRONOMY

Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713

Twentysixth YERAC
[PB95-127437] p 1599 N95-21347

Science with High Spatial Resolution Far-Infrared Data
[NASA-CR-197353] p 1595 N95-21749

Luminous radio-quiet sources in the W3(MAIN) cloud core p 1594 N95-21773

Low noise 22 GHz receiver for the radioastron satellite, part 2: Space qualification tests
[PB95-127197] p 1598 N95-22376

RADIO COMMUNICATION

An abstract model of rogue code insertion into radio frequency wireless networks. The effects of computer viruses on the Program Management Office
[AD-A285759] p 1288 N95-19932

Modular CNI avionics system p 1213 N95-20659

A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934

Simulation of the impact of atmospheric turbulences on millimeter-wave communications systems
p 1295 N95-20939

Routing of unidirectional packet radio for wide-area paging network control and maintenance
[PB95-104428] p 1300 N95-20980

Small antennas for communication over sea ice
[AD-D016206] p 1301 N95-21156

RADIO ELECTRONICS

Low noise 22 GHz receiver for the radioastron satellite, part 2: Space qualification tests
[PB95-127197] p 1598 N95-22376

RADIO EMISSION

Correlation of far-infrared emission and radio continuum emission along the major axis of edge-on spiral galaxies
p 1593 N95-21762

Two-dimensional maps of the infrared-to-radio ratio in spiral galaxies p 1593 N95-21765

Luminous radio-quiet sources in the W3(MAIN) cloud core p 1594 N95-21773

RADIO EQUIPMENT

Low-cost conical ultra-wideband antenna
[AD-A286569] p 1292 N95-20825

Radio-science performance analysis software
p 1305 N95-21540

RADIO FREQUENCIES

Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495

Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538

Photoelectrons beam measurement from a magnesium cathode in a RF electron gun
[DE94-017994] p 1533 N95-20573

The impact of advanced packaging technology on modular avionics architectures p 1208 N95-20632

High density monolithic packaging technology for digital/microwave avionics p 1211 N95-20646

Field-emitter arrays for RF vacuum microelectronics
[AD-A279959] p 1325 N95-20661

Innovative use of DSP technology in space: FORTE event classifier
[DE94-016086] p 1291 N95-20697

An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation
[DE95-001078] p 1515 N95-20911

Development of a fast sampling system for estimation of impulse responses of mobile radio channels p 1296 N95-20943
Study on the reaction kinetics in pulsed RF discharges under RIE conditions [PB95-107868] p 1300 N95-21029
Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation [DE95-002450] p 1536 N95-21418
Three-dimensional effects for radio frequency antenna modeling [DE94-019125] p 1303 N95-21459
Radio-science performance analysis software p 1305 N95-21540
An 8-meter-long coupled cavity RFQ linac [DE94-018077] p 1331 N95-21667
Broadband pressure barrier for circular waveguide [AD-D016503] p 1306 N95-21672
RF vacuum microelectronics based on thin film edge-emitter technology [AD-A279539] p 1331 N95-21690
High temperature superconducting films and multilayers for electronics [AD-A279545] p 1331 N95-21693
RF beam control for the AGS Booster [DE95-001485] p 1538 N95-21720
Improved broadband waveguide pressure window [AD-D016487] p 1306 N95-21834
Atomic velocity distributions in a hydrogen beam effusing out of an RF discharge dissociator [AD-A279253] p 1307 N95-21985
Radio-frequency techniques at the ISIS pulsed muon source [PB95-129854] p 1529 N95-22303
Low-level RF control for the AFEL [DE94-018295] p 1540 N95-22410

RADIO FREQUENCY HEATING
ALT-2 armor tile design for upgraded TEXTOR operation [DE94-015749] p 1549 N95-20143
Experimental measurements of ICRF and edge plasma interactions on Tore Supra [DE94-019154] p 1551 N95-20205
Microwave sintering of ZrO2-12 mol% CeO2 [DE94-018709] p 1265 N95-20226
Radiofrequency hyperthermia systems: Experimental and clinical assessment of the feasibility of radiofrequency hyperthermia systems for loco-regional deep heating [PB94-206885] p 1444 N95-21016
Applied mathematical problems in modern electromagnetics [AD-A286448] p 1303 N95-21462
Comparison of properties of sintered and sintered reaction-bonded silicon nitride fabricated by microwave and conventional heating [DE95-001426] p 1275 N95-21501

RADIO FREQUENCY INTERFERENCE
CDMA with interference cancellation for multiprobe missions p 1304 N95-21536
Cochannel and adjacent-channel interference in nonlinear minimum-shift-keyed satellite system [NASA-TM-106834] p 1307 N95-21890

RADIO RECEIVERS
Low noise 22 GHz receiver for the radioastron satellite. Part 1: Requirements, design and reliability analysis [PB95-104410] p 1300 N95-20972
Design and implementation of a dual-beam printed antenna for a reception in angular diversity on a Hertzien cluster (or bundle) [PB95-131603] p 1302 N95-21431
Low noise 22 GHz receiver for the radioastron satellite, part 2: Space qualification tests [PB95-127197] p 1598 N95-22376

RADIO RELAY SYSTEMS
Design and implementation of a dual-beam printed antenna for a reception in angular diversity on a Hertzien cluster (or bundle) [PB95-131603] p 1302 N95-21431

RADIO SIGNALS
Passive monitoring for automated MMPP communication systems p 1293 N95-20927
Small antennas for communication over sea ice [AD-D016206] p 1301 N95-21156
The Deep Space Network as an instrument for radio science research [NASA-CR-197341] p 1302 N95-21456

RADIO SOURCES (ASTRONOMY)
Luminous radio-quiet sources in the W3(MAIN) cloud core p 1594 N95-21773

RADIO SPECTRA
Passive monitoring for automated MMPP communication systems p 1293 N95-20927
Arcmimute scale HI and IRAS observations toward high latitude cloud G86.5+59.6 p 1594 N95-21771

RADIO TELEMETRY
The Deep Space Network as an instrument for radio science research [NASA-CR-197341] p 1302 N95-21456

RADIO TELESCOPES
Low noise 22 GHz receiver for the radioastron satellite. Part 1: Requirements, design and reliability analysis [PB95-104410] p 1300 N95-20972
Low noise 22 GHz receiver for the radioastron satellite, part 2: Space qualification tests [PB95-127197] p 1598 N95-22376

RADIO TRANSMISSION
Adaptive error-control scheme for 2-200 MHz Multiple-Mechanism Propagation Paths p 1293 N95-20926
Study of the fast and slow variations of the power received at VHF links by tropospheric diffusion p 1293 N95-20929
Problems of coding in multipath channels p 1294 N95-20930
Methods for evaluating the effects of conduits at the surface of the sea p 1294 N95-20932
Propagation of high frequency waves in urban and road tunnel environments p 1294 N95-20933
Combined effects of atmosphere and terrain on UHF/microwave paths p 1295 N95-20935
Propagation measurements on a troposcatter link in the Canadian High Arctic p 1295 N95-20940
The effects of multihop HF propagation on the performance of OTH backscatter radars p 1298 N95-20953
Identification of the propagation modes and paths on HF links using a goniopolarimeter p 1299 N95-20956
Measurements of angles of elevation of HF by a high resolution method using polarization diversity p 1299 N95-20959
Routing of unidirectional packet radio for wide-area paging network control and maintenance [PB95-104428] p 1300 N95-20980
The Deep Space Network as an instrument for radio science research [NASA-CR-197341] p 1302 N95-21456

RADIO WAVES
Combined effects of atmosphere and terrain on UHF/microwave paths p 1295 N95-20935
The effects of multihop HF propagation on the performance of OTH backscatter radars p 1298 N95-20953

RADIOACTIVE DECAY
High efficiency GaP power conversion for Betavoltaic applications p 1323 N95-20540
Laser trapping of Na-21 atoms [DE95-002354] p 1513 N95-20629
Measurement of the polarization in the decay B(sup 0) (yields) J/(psi)K*(sup 0) in (bar p)p collisions at (radical)s = 1.8 TeV [DE95-002521] p 1520 N95-21313

RADIOACTIVE ISOTOPES
Thorium-232 in human tissues: Metabolic parameters and radiation doses [DE94-019275] p 1441 N95-20074
Parity nonconservation in radioactive atoms: An experimental perspective [DE95-002737] p 1518 N95-21235
ANSTO: Mission statement, significant events and achievements [DE94-631123] p 1605 N95-21830

RADIOACTIVE MATERIALS
Selection of substances to be considered in the environmental balance/environmental outlook in relation to the dissemination theme [PB95-132197] p 1407 N95-21635

RADIOACTIVE WASTES
Geometric moire method of strain analysis with displacement discontinuities [DE95-001114] p 1386 N95-20833
Conceptual design analyses for Hanford Site deployable remote spectroscopy systems [DE95-002078] p 1243 N95-21473

RADIOACTIVITY
Parity nonconservation in radioactive atoms: An experimental perspective [DE95-002737] p 1518 N95-21235
Selection of RIB targets using ion implantation [DE95-000951] p 1538 N95-21938

RADIOBIOLOGY
Life Sciences Division and Center for Human Genome Studies [DE94-017796] p 1440 N95-22065

RADIOCHEMISTRY
In vivo distribution of liposome encapsulated hemoglobin studied with imaging radiotracers [AD-A279774] p 1438 N95-20806
Radiopharmaceuticals for diagnosis [DE95-002200] p 1445 N95-21595

RADIOGENIC MATERIALS
Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787
Degassing history and evolution of volcanic activity of terrestrial planets based on radiogenic noble gas degassing models p 1424 N95-21816
Is xenon eldest? p 1425 N95-21823

RADIOGONIOMETERS
Identification of the propagation modes and paths on HF links using a goniopolarimeter p 1299 N95-20956

RADIOISOTOPE BATTERIES
High efficiency GaP power conversion for Betavoltaic applications p 1323 N95-20540
Conceptual design of an RTG Facility Transportation System [DE94-014443] p 1379 N95-20627
GPHS-RTGs in support of the Cassini Mission [DE95-001492] p 1222 N95-20853

RADIOMETERS
Final results of the advanced photovoltaic experiment p 1321 N95-20528

RAIN
Rainfall rates and the vertical distribution of diabatic heating components over tropical oceans [NASA-CR-197603] p 1428 N95-19948
Program control on the Tropical Rainfall Measuring Mission p 1584 N95-20750
Applicability of the ECMWF rain height and rainfall rate data to the prediction of low-availability rain attenuation in Europe [PB95-127684] p 1430 N95-21413

RAINDROPS
The initiation of lightning and the growth of electric fields in thunderstorms [AD-A280033] p 1428 N95-20008
Aircraft corrosion study [AD-A279527] p 1259 N95-21687

RAMAN SPECTRA
Daytime Raman lidar profiling of atmospheric water vapor [DE94-015747] p 1413 N95-20397
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames [AD-A279945] p 1238 N95-20581
Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films [DE94-018964] p 1244 N95-21549
Resonant generation of nonequilibrium phonons in GaAs/AlAs quantum wells via intersubband scattering [DE95-002338] p 1581 N95-21604

RAMAN SPECTROSCOPY
Resonance Raman spectroscopy of volatile organics: Carbon tetrachloride [DE95-000627] p 1233 N95-19980
Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy [DE94-009757] p 1237 N95-20470
Detection of environmental deterioration in fiber reinforced composites by FT-Raman spectroscopy, phase 1 [AD-A279763] p 1228 N95-20805

RAMJET ENGINES
Integral rocket ramjets [AD-A285135] p 1222 N95-20906

RANDOM NOISE
Higher order crossings [AD-A279597] p 1504 N95-20300
Adaptive detection in stationary and nonstationary noise environments [AD-A279581] p 1300 N95-21099
In search of random noise p 1592 N95-21753

RANDOM PROCESSES
Almost kappa-wise independent random permutation of the cube [PB95-108098] p 1495 N95-22147

RANDOM SAMPLING
Latin hypercube sampling in sensitivity analysis [AD-A285867] p 1499 N95-22135

RANDOM VARIABLES
Brief tutorial on the Kalman filter [AD-A286571] p 1326 N95-20827
Duality and equivalencies in closed tandem queueing networks [PB95-132502] p 1482 N95-21271

RANGEFINDING
Multipath impact on ground-based global positioning system range measurements: Aspects of measurement, modeling, and mitigation p 1297 N95-20949
Passive range measurement system [AD-D016222] p 1544 N95-21100

RANGES (FACILITIES)
Proceedings of the 4th Annual Major Range and TestFacility Base (MRTFB) Environmental Workshop [AD-A285779] p 1411 N95-22414

RANK TESTS
A multivariate multisample rank test for stochastic simulation validation
[AD-A285922] p 1498 N95-19990
RANKING
Evaluation of scanners for C-scan imaging for nondestructive inspection of aircraft
[AD-A286398] p 1383 N95-22202
Vertex ranking for permutation and other graphs
[PB95-127569] p 1496 N95-22327
RAPID QUENCHING (METALLURGY)
Processing and characterization of Ni-Al-Fe-B shape-memory alloy wires produced by rapid solidification
[DE94-017702] p 1250 N95-20020
RARE EARTH ALLOYS
Methods and opportunities in the recycling of rare Earth based materials
[DE95-001680] p 1259 N95-21737
RARE EARTH COMPOUNDS
Methods and opportunities in the recycling of rare Earth based materials
[DE95-001680] p 1259 N95-21737
The low temperature properties of (Dy(1-x)Er(x))Ni2 alloys
[DE95-001657] p 1260 N95-21923
RARE GASES
Identification of resonant, two-electron, and inter-atomic features in K and L23 NEXAFS spectra
[AD-A285374] p 1513 N95-20554
Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 1: Transition properties in HCl
[AD-A285988] p 1239 N95-20613
Inert gas purification and measuring oxygen partial pressure in gas mixtures with EMF method based on solid electrolyte cell
[PB95-127767] p 1240 N95-21110
Molecular-based study of solutions in supercritical solvents
[DE94-019326] p 1580 N95-21420
Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777
Rare gases systematics and mantle structure
p 1416 N95-21778
Impact degassing of water and noble gases from silicates p 1416 N95-21780
Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784
Origin and loss of the volatiles of the terrestrial planets p 1417 N95-21785
Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787
Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796
The ratios of carbon and non-radiogenic helium and argon isotopes in the mantle and crustal rocks
p 1421 N95-21805
Solubilities of nitrogen and noble gases in basalt melt
p 1422 N95-21807
Rates of Earth degassing p 1422 N95-21809
Mantle rare gas relative abundances in a steady-state mass transport model p 1423 N95-21812
Degassing history and evolution of volcanic activity of terrestrial planets based on radiogenic noble gas degassing models p 1424 N95-21816
Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819
Is xenon eldest? p 1425 N95-21823
Degassing mechanisms of noble gases from carbonado diamonds p 1425 N95-21824
Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 2: The interaction of hydrogen chloride with the rare gas xenon
[AD-A286385] p 1248 N95-22321
RAREFIED GAS DYNAMICS
Continuum transient and frozen startup behavior of conventional and gas-loaded heat pipes
[AD-A284297] p 1339 N95-20250
Simulated rarefied entry of the Galileo probe into the atmosphere of Jupiter
[NASA-TM-110507] p 1601 N95-21621
RAREFIED GASES
Low density gas and foam targets for ICF long scale length plasma experiments: Fabrication and characterization
[DE95-000935] p 1558 N95-21368
RATES (PER TIME)
Polymer based all-optic reconfigurable interconnects
[AD-A279976] p 1272 N95-20962
High speed optical storage technology
[AD-A285788] p 1456 N95-22400
RAY TRACING
Time behavior and frequency response of the microwave propagation channel during multipath propagation
p 1296 N95-20942
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A286435] p 1436 N95-22209
3-D TECATE/BREW: Thermal, stress, and birefringent ray-tracing codes for solid-state laser design
[DE95-000330] p 1376 N95-22301
RAYLEIGH EQUATIONS
The Combustive Sound Source
[ARL-TR-94-9] p 1503 N95-19911
RAYLEIGH SCATTERING
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A279945] p 1238 N95-20581
RAYLEIGH WAVES
Source contributions at far-regional distances
[AD-A279405] p 1426 N95-21932
RDX
The hot fragment conductive ignition test for screening LOVA propellants
[AD-A284259] p 1282 N95-20187
Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513
REACTANCE
A colocated magnetic loop, electric dipole array antenna (preliminary results)
[AD-A285381] p 1290 N95-20556
REACTING FLOW
Explicit methods for stiff ODEs from atmospheric Chemistry
[PB95-135794] p 1404 N95-21034
Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037
Direct numerical simulations of turbulent non-premixed methane-air flames modeled with reduced kinetics
p 1249 N95-21038
One-dimensional reactive Euler equations
[PB95-135430] p 1244 N95-21573
REACTION BONDING
Comparison of properties of sintered and sintered reaction-bonded silicon nitride fabricated by microwave and conventional heating
[DE95-001426] p 1275 N95-21501
Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
[DE94-018184] p 1259 N95-21707
Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712
Electric-field effects on shallow donor impurity in a harmonic quantum dot
[DE94-629034] p 1577 N95-22176
REACTION KINETICS
Safe conditions for contacting nitric acid or nitrates with Tri-n-Butyl Phosphate (TBP)
[DE95-001243] p 1235 N95-20215
Density functional studies of decomposition processes of energetic molecules
[AD-A286185] p 1510 N95-20327
The dynamics of formation and evaporation of mixed alkali halide nanocrystals: A case of comparable lattice energies
[AD-A285052] p 1567 N95-20483
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621
Ion scattering and deposition: The role of energetic particles in thin film growth
[AD-A285975] p 1514 N95-20667
The effect of oxide inclusions on the kinetics of the austenite to ferrite transformation in low alloy steel weld metal
[DE94-018131] p 1253 N95-20676
Photochemistry of intermolecular C-H bond activation reactions
[DE94-018417] p 1239 N95-20682
Time-resolved analytical methods for liquid/solid interfaces
[DE95-002255] p 1240 N95-20780
Ion-molecule chemistry related to plasma deposition and etching of silicon
[AD-A279749] p 1514 N95-20804
Chemical Structure and Dynamics program
[DE95-001117] p 1403 N95-20834
Study on the reaction kinetics in pulsed RF discharges under RIE conditions
[PB95-107868] p 1300 N95-21029
Direct numerical simulations of turbulent non-premixed methane-air flames modeled with reduced kinetics
p 1249 N95-21038
Direct numerical simulation for premixed turbulent combustion modelling p 1249 N95-21082
Attempt to interpret the self-organizing mapping physiologically
[PB95-127783] p 1438 N95-21112
The formation of reaction bonded Si3N4 at low temperatures and in short times
[DE95-001990] p 1275 N95-21289
Simulations of metal dissolution and corrosion
[DE94-019295] p 1257 N95-21476
The energetics and dynamics of free radicals, ions, and clusters
[DE94-018101] p 1244 N95-21701
Oxidation behavior of aluminum nanopowders
[DE95-002721] p 1260 N95-21926
Catalyzed reduction of nitrate in aqueous solutions
[DE94-017660] p 1247 N95-22049
Electrostatic basis for molecular recognition in photosynthesis
[DE95-002979] p 1440 N95-22075
Numerical study of contaminant effects on combustion of hydrogen, ethane, and methane in air
[NASA-TM-106844] p 1284 N95-22114
Natural gas combustion chemistry mechanisms research
[PB95-111670] p 1247 N95-22150
Catalytic reactions of synthesis gas. Part 3. Determination of reaction kinetics
[PB95-127759] p 1248 N95-22329
Use of quantum chemically derived descriptors for QSAR modeling of reductive dehalogenation of aromatic compounds
[PB95-132783] p 1224 N95-22333
Applications of sonochemistry
[AD-A286388] p 1506 N95-22360
REACTION PRODUCTS
An overview of the Evaluation of Oxygen Interactions with Materials 3 Experiment: Space Shuttle Mission 46; July-August, 1992
[NASA-TM-110129] p 1412 N95-20278
Production of S2F10, S2OF10 and S2O2F10 by spark discharges in SF6*
[DE95-001421] p 1243 N95-21500
REACTIVITY
Laboratory evaluation of a reactive baffle approach to NOx control
[AD-A283802] p 1400 N95-19921
An overview of the Evaluation of Oxygen Interactions with Materials 3 Experiment: Space Shuttle Mission 46; July-August, 1992
[NASA-TM-110129] p 1412 N95-20278
Reactive nanophase oxide additions to melt-processed high-T(sub c) superconductors
[DE95-001470] p 1570 N95-20841
Numerical wave speed for one-dimensional scalar hyperbolic conservation laws with source terms
[PB95-127536] p 1492 N95-21371
Deposition and properties of novel nitride superlattice coatings
[DE95-002945] p 1230 N95-21445
One-dimensional reactive Euler equations
[PB95-135430] p 1244 N95-21573
Towards tailored interphase formation utilizing surface-bound benzylsulfonium salts as cationic initiators
[AD-A286461] p 1280 N95-22259
REACTOR DESIGN
Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891
Use of the National Ignition Facility for the development of inertial fusion energy
[DE94-016696] p 1557 N95-21206
Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702
REACTOR MATERIALS
Assessment of database for interaction of tritium with ITER plasma facing materials
[DE95-002038] p 1558 N95-21290
Welding tritium exposed stainless steel
[DE95-003208] p 1382 N95-22356
REACTOR TECHNOLOGY
A low energy continuous reactor separator for the production of ethanol from corn grits/starch and biomass streams
[DE95-002256] p 1283 N95-21356
REACTORS
SPACE-R thermionic space nuclear power system: Design and technology demonstration
[DE95-000713] p 1221 N95-20076
READING
Evaluation of the Haworth-Newman avionics Display Readability Scale
[AD-A286127] p 1214 N95-22232

READOUT
Design of the readout IC for the CDF SVX-2 silicon strip detector [DE95-000562] p 1539 N95-22193
REAGENTS
Novel reagents for chemical vapor deposition of intermetallic alloys [AD-A286562] p 1271 N95-20815
REAL TIME OPERATION
Algebraic semantics of message sequence charts [PB95-110581] p 1288 N95-19890
General conservative extension theorem in process algebra [PB95-110656] p 1487 N95-19902
Real time process algebra with infinitesimals [PB95-110623] p 1488 N95-20055
Enhanced vehicle and event typing software, phase 1 [AD-A284862] p 1458 N95-20070
System level fault tolerance in parallel and distributed computing systems [AD-A279664] p 1474 N95-20305
Time domain spectral hole-burning storage [AD-A279912] p 1587 N95-20309
Digital filtering for data compression in telemetry systems [DE94-016611] p 1219 N95-20567
Fault-tolerance in distributed and multiprocessor real-time systems [AD-A279896] p 1461 N95-20595
The impact of advanced packaging technology on modular avionics architectures p 1208 N95-20632
Rate monotonic analysis for real-time systems: Instructors guide [AD-A286083] p 1463 N95-20810
Computer based analysis and synthesis of retinal function [AD-A286084] p 1443 N95-20811
Chemical Structure and Dynamics program [DE95-001117] p 1403 N95-20834
Environment for Test and Analysis of Distributed Software (ETADS) [AD-A285776] p 1463 N95-20877
Real-time reconfiguration study [AD-A286060] p 1464 N95-20910
Compositional proof theory for fault tolerant real-time distributed systems [PB95-127601] p 1465 N95-21025
Real-time dynamic simulator for the Topaz II reactor power system [DE95-001604] p 1535 N95-21278
Design principles for real-time process control systems [PB95-132890] p 1585 N95-21414
EXPERT system expert: Program description [PB95-131561] p 1482 N95-21429
EXPERT system expert: Users manual [PB95-131579] p 1482 N95-21430
A real-time algorithm for integrating differential satellite and inertial navigation information during helicopter approach [NASA-CR-197409] p 1205 N95-21891
Using the CoRE requirements method with ADARTS. Version 01.00.05 [AD-A279151] p 1470 N95-21972
Verification of a timestamp-based sliding-window protocol [PB95-132759] p 1455 N95-22082
Real time system for practical acoustic monitoring of global ocean temperature [AD-A286435] p 1436 N95-22209
Usable, real-time, interactive spoken language systems [AD-A286349] p 1310 N95-22253
RECEIVERS
Recent reflux receiver developments under the US DOE program [DE95-001622] p 1393 N95-20861
An overview: Component development for solar thermal systems [DE95-001623] p 1393 N95-20862
Geographical diversity combining to exploit multi-mechanism propagation p 1299 N95-20957
Design and implementation of a dual-beam printed antenna for a reception in angular diversity on a Hertzien cluster (or bundle) [PB95-131603] p 1302 N95-21431
Assessment of a non-dedicated GPS receiver system for precise airborne attitude determination [DE94-019309] p 1205 N95-21520
The determination of static and time varying dipole source. Sensor geometry during sea trials using differential global positioning system [MRL-TN-631] p 1205 N95-21642
Performance of a fast frequency-hopped noncoherent MFSK receiver over Rician fading channels with either partial-band interference or multi-tone interference [AD-A286168] p 1310 N95-22246
Effect of cell size on elliptically polarized radar clutter statistics [AD-A285789] p 1311 N95-22401
RECEPTION DIVERSITY
Design and implementation of a dual-beam printed antenna for a reception in angular diversity on a Hertzien cluster (or bundle) [PB95-131603] p 1302 N95-21431
Performance of a fast frequency-hopped noncoherent MFSK receiver over Rician fading channels with either partial-band interference or multi-tone interference [AD-A286168] p 1310 N95-22246
RECIPROCITY THEOREM
The Lorentz reciprocity theorem as a consistency test for propagation models p 1295 N95-20937
RECIRCULATIVE FLUID FLOW
Application of Direct and Large Eddy Simulation to Transition and Turbulence [AGARD-CP-551] p 1346 N95-21061
RECOMBINATION REACTIONS
Ion-molecular spiraling collisions and termolecular recombination [AD-A285633] p 1517 N95-21151
RECONNAISSANCE
Information security for unmanned systems [AD-A286511] p 1485 N95-22214
RECONNAISSANCE AIRCRAFT
Unmanned aerial vehicles [AD-A286190] p 1206 N95-20329
Passive range measurement system [AD-D016222] p 1544 N95-21100
RECORDING INSTRUMENTS
A simple ocean bottom hydrophone with 200 megabyte data capacity [AD-A279478] p 1434 N95-21677
RECORDS MANAGEMENT
A graded approach to ISO 9000 implementation for records managers [DE94-017409] p 1591 N95-22167
University library document circulation system specified in LCM [PB95-127957] p 1592 N95-22331
RECRYSTALLIZATION
A mechanistic model for radiation-induced crystallization and amorphization in U3Si [DE94-015028] p 1566 N95-20419
RECTANGLES
A convergence analysis of an h-version finite element method with high order elements for two dimensional elasto-plasticity problems [AD-A279975] p 1491 N95-20920
RECURSIVE FUNCTIONS
S-D hybridization and anisotropy of the optical second harmonic at low frequencies [AD-A279449] p 1544 N95-20876
Foundations of functional programming: A programmer's point of view [PB95-132932] p 1471 N95-22094
RECYCLING
Mercury usage and alternatives in the electrical and electronics industries [PB94-165362] p 1312 N95-19966
Anaerobic Treatment of Municipal Solid Waste and Sludge for Energy Production and Recycling of Nutrients [DE95-700217] p 1315 N95-20369
Progress in the development of recycling processes for electric vehicle batteries [DE94-015894] p 1324 N95-20626
Fusion power production in TFTR [DE95-002756] p 1557 N95-21240
Methods and opportunities in the recycling of rare Earth based materials [DE95-001680] p 1259 N95-21737
Volatiles in the Earth: All shallow and all recycled p 1416 N95-21779
Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787
Subduction and volatile recycling in Earth's mantle p 1421 N95-21802
Subduction of hydrated basalt of the oceanic crust: Implications for recycling of water into the upper mantle and continental growth p 1423 N95-21814
Storage and recycling of water and carbon dioxide in the earth p 1425 N95-21822
REDUCTION
Semantics for a fine lambda-calculus with de Bruijn indices [PB95-127577] p 1492 N95-21372
REDUCTION (CHEMISTRY)
Catalyzed reduction of nitrate in aqueous solutions [DE94-017660] p 1247 N95-22049
Use of quantum chemically derived descriptors for QSAR modeling of reductive dehalogenation of aromatic compounds [PB95-132783] p 1224 N95-22333
REDUNDANT COMPONENTS
Backward error recovery in redundant disk arrays [AD-A286064] p 1463 N95-20846
REED-SOLOMON CODES
Adaptive error-control scheme for 2-200 MHz Multiple-Mechanism Propagation Paths p 1293 N95-20926
REENTRY SHIELDING
A computational study of projectile melt in impact with typical Whipple shields [DE94-016454] p 1385 N95-20237
REENTRY VEHICLES
Reentry vehicle on-site inspection technology study [AD-A285960] p 1220 N95-21634
REFINING
Degassing mechanisms of noble gases from carbonado diamonds p 1425 N95-21824
REFLECTANCE
Qualification test results for blue-red reflecting solar covers p 1320 N95-20525
Electromagnetic wave reflection from irregular plasma layers p 1298 N95-20952
Beryllium based multilayers for normal incidence extreme ultraviolet reflectivity [DE94-015560] p 1274 N95-21175
Surface inspection using Fourier Transform Infrared Spectroscopy [DE95-001699] p 1244 N95-21571
Recent progress of the compact AFEL at Los Alamos [DE95-002728] p 1376 N95-22154
Laboratory characterization of Woelter x ray optics [DE94-016969] p 1562 N95-22191
Reflective masks for extreme ultraviolet lithography [DE95-003427] p 1336 N95-22236
Neutron reflectivity study of adsorbed diblock copolymers [DE95-002740] p 1281 N95-22434
REFLECTED WAVES
Experimental and theoretical evaluation of elastic waves in curved layered media [AD-A286578] p 1504 N95-20918
REFLECTION
Radiance of the ocean horizon [AD-A285613] p 1431 N95-19896
Studies of the n-alkane/water interface by total internal reflection second harmonic generation [AD-A279473] p 1245 N95-21827
REFLECTOR ANTENNAS
A method using focal plane analysis to determine the performance of reflector antennas p 1304 N95-21538
Analysis of a microstrip reflectarray antenna for microspacecraft applications p 1305 N95-21541
REFLECTORS
Optical multilayers with an amorphous fluoropolymer [DE94-017693] p 1541 N95-20218
Electromagnetic wave reflection from irregular plasma layers p 1298 N95-20952
Diffuse reflectance spectra of energetic material [DSTO-TR-0065] p 1284 N95-21951
REFRACTION
Modeling tropospheric ducting effects on satellite-to-ground paths p 1295 N95-20936
REFRACTIVITY
Refractive index change in dissociating shocked benzene [DE94-019015] p 1541 N95-20352
Terrain and refractivity effects on non-optical paths p 1294 N95-20931
Macromolecular and materials design using polyphosphazenes [AD-A279781] p 1273 N95-20978
Gradient index lenses from sol-gel layering [AD-A285649] p 1242 N95-21402
Lead-indium phosphate glasses for optical applications [DE94-019333] p 1275 N95-21482
Factors that determine visual acuity through night vision goggles for emmetropes [AD-A279339] p 1450 N95-21927
REFRACTORIES
He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles p 1425 N95-21821
REFRACTORY MATERIALS
Materials/manufacturing element of the Advanced Turbine System Program [DE94-017299] p 1378 N95-20085
Selection of RIB targets using ion implantation [DE95-000951] p 1538 N95-21938

REFRACTORY METALS
Plasma-induced-damage of GaAs during etching of refractory metal contacts
[DE95-001525] p 1259 N95-21838
REFRIGERANTS
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparisons and verification of methods
[DE95-000743] p 1264 N95-20078
New concepts for refrigerant leak detection and mixture measurement
[DE94-018967] p 1287 N95-21559
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-018414] p 1287 N95-21631
Thermophysical properties of HFC-143a and HFC-152a
[DE95-002199] p 1582 N95-22153
REFRIGERATING
Proceedings of the 1993 Non-Fluorocarbon Insulation, Refrigeration and Air Conditioning Technology Workshop
[DE94-018333] p 1285 N95-20194
REFUELING
Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702
Demonstration of zinc/air fuel battery to enhance the range and mission of fleet electric vehicles: Preliminary results in the refueling of a multicell module
[DE95-004206] p 1337 N95-22421
REGIONS
Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787
Subduction and volatile recycling in Earth's mantle
p 1421 N95-21802
REGRESSION ANALYSIS
Comparison of a back propagation artificial neural network model with a linear regression model for personnel selection
[AD-A280023] p 1479 N95-20005
Learning algorithms for feedforward networks based on finite samples
[DE95-001739] p 1483 N95-21741
Latin hypercube sampling in sensitivity analysis
[AD-A285867] p 1499 N95-22135
REGULARITY
Regularity of BPa-systems is decidable
[PB95-135489] p 1468 N95-21619
REGULATIONS
Analyses of grounded and ungrounded photovoltaic power systems
[DE94-015015] p 1391 N95-20263
Environmental Compliance Assessment and Management Program
[AD-A279605] p 1402 N95-20441
Environmental Compliance Assessment Protocol - Centers for Disease Control and Prevention (ECAP-CDC), West Virginia supplement
[AD-A286009] p 1403 N95-20720
Environmental Compliance Assessment and Management Program (ECAMP), South Carolina supplement
[AD-A279533] p 1408 N95-21689
Environmental Compliance Assessment System (ECAS): Oregon supplement
[AD-A279565] p 1408 N95-21696
Environmental Compliance Assessment System (ECAS): Japan settlement
[AD-A279328] p 1410 N95-22142
REGULATORY MECHANISMS (BIOLOGY)
Structures and functions of oligosaccharins
[DE95-003195] p 1440 N95-22220
REINFORCED PLASTICS
Low temperature tensile and fracture mechanical strength in mode 1 and mode 2 of fiber reinforced plastics following various irradiation conditions
[DE94-019269] p 1232 N95-22130
REINFORCING FIBERS
Third Intermetallic Matrix Composites Symposium, volume 350
[NASA-TM-110059] p 1225 N95-20001
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
Low temperature tensile and fracture mechanical strength in mode 1 and mode 2 of fiber reinforced plastics following various irradiation conditions
[DE94-019269] p 1232 N95-22130
RELATIVISTIC EFFECTS
Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704
Electromagnetic waves in an ultrarelativistically hot and strongly magnetized electron-positron plasma
[DE94-628963] p 1307 N95-21849
RELATIVISTIC ELECTRON BEAMS
Development of an annular electron beam HPM amplifier
[AD-A286646] p 1327 N95-20905
Development status of an intense beam klystron
[DE95-000745] p 1329 N95-21395
On the influence of electromagnetic wave and relativistic electron beam on a plasma
[DE94-628962] p 1561 N95-21848
Very high-power electron-beam transport in long gas cells from 10(exp -3) to 10(exp 3) Torr N2
[DE95-002611] p 1539 N95-22306
RELATIVISTIC PARTICLES
Transition-energy crossing with a gamma(sub t)(-)jump
[DE94-017315] p 1531 N95-20021
An impedance model of the Relativistic Heavy Ion Collider (RHIC)
[DE94-016784] p 1532 N95-20406
Quantization in curvilinear coordinates
[DE94-770603] p 1514 N95-20737
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380
RELATIVISTIC PLASMAS
Quasi-linear equation for magnetoplasma oscillations in the weakly relativistic approximation
[DE94-628932] p 1560 N95-21593
Large amplitude localized structures in a relativistic electron-positron ion plasma
[DE94-628965] p 1561 N95-21851
RELATIVISTIC THEORY
The theory of relativistic heavy ion collisions
[DE95-001805] p 1519 N95-21302
Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479
Summary of heavy ion theory
[DE95-002177] p 1523 N95-21588
RELATIVITY
Quantization in curvilinear coordinates
[DE94-770603] p 1514 N95-20737
The development of science during this century
[DE94-632964] p 1582 N95-22185
RELIABILITY
Test reliability and experimental power
[AD-A279607] p 1448 N95-19957
A new mini Ball Grid Array (mBGA) multichip module technology
[DE94-018897] p 1480 N95-20342
Standard Hardware Acquisition and Reliability Program (SHARP) advanced SEM-E packaging
p 1208 N95-20633
Improving Multichip Module (MCM) design and reliability using the Intelligent MCM Analyzer
p 1209 N95-20637
The demise of plastic encapsulated microcircuit myths
p 1209 N95-20640
Advanced Standard Electronic Modules format-E (SEM-E) processes for rapid prototyping
p 1210 N95-20642
Reliability assessment of Multichip Module technologies via the Triservice/NASA RELTECH program
p 1210 N95-20643
Assuring Known Good Die (KGD) for reliable, cost effective MCMs p 1210 N95-20644
Method of fabricating a microelectronic photomultiplier device with integrated circuitry
[AD-D016530] p 1325 N95-20726
Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881
Prototype rule-based reliability analysis for VLSI circuit design
[AD-A280065] p 1327 N95-20967
A cheap DNS tool for turbulence models testing
p 1348 N95-21072
Minimax optimal stop rule in reliability checking
[PB95-134557] p 1383 N95-21961
RELIABILITY ANALYSIS
Reliability analysis of uniaxially ground brittle materials
[NASA-TM-106852] p 1386 N95-20790
Prototype rule-based reliability analysis for VLSI circuit design
[AD-A280065] p 1327 N95-20967
Low noise 22 GHz receiver for the radioastron satellite. Part 1: Requirements, design and reliability analysis
[PB95-104410] p 1300 N95-20972
Space power facility readiness for Space Station power system testing
[NASA-TM-106829] p 1218 N95-21384
Radio-science performance analysis software
p 1305 N95-21540
RELIEF MAPS
PRSPLOT6 manual
[PB95-110862] p 1456 N95-19928
RELUCTANCE
Mitigation of the effects of F layer regularities by using multiple paths p 1298 N95-20951
REMOTE CONTROL
Human performance studies for control of multiple remote systems
[AD-A286623] p 1452 N95-20768
Advanced robotic technologies for transfer at Sandia National Laboratories
[DE95-001617] p 1481 N95-20884
Conceptual design analyses for Hanford Site deployable remote spectroscopy systems
[DE95-002078] p 1243 N95-21473
REMOTE SENSING
Tests of an improved oceanographic expert system
[AD-A280123] p 1431 N95-19888
Theoretical prediction of vibrational circular dichroism spectra of R-glyceraldehyde, R-erythrose, and R-threose. Part 2: Development of a procedure to scale the force constant matrix expressed in terms of internal coordinates
[AD-A284305] p 1437 N95-20252
Boundary layer cloud studies in support of ASTEX
[AD-A285947] p 1429 N95-20395
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545
Airborne Multisensor Pod System (AMPS) data access concept
[DE95-002586] p 1389 N95-20903
Measurements of radar backscatter from the ocean surface at 94 GHz as a function of wind speed, direction and the modulation by the ocean waves during the SAXON-FPN experiment p 1299 N95-20960
Investigation on the backscattering properties of Finnish boreal forests at C- and X-band: A semi-empirical modeling approach
[PB95-127692] p 1389 N95-21105
Monitoring the response of the upper troposphere/lower stratosphere to a greenhouse gas scenario
[DE95-000982] p 1406 N95-21410
Solid state frequency conversion technology for remote sensing
[DE94-019102] p 1389 N95-21433
An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478
Visible fluorescence of weathered lead
[DE95-002454] p 1244 N95-21523
Overview of remote sensing laser development and semiconductor laser technology
[DE94-019103] p 1389 N95-21552
European Workshop on Optical Ground Truth Instrumentation for the Validation of Space-Borne Optical Remote Sensing Data of the Marine Environment
[PB95-134144] p 1390 N95-21872
High resolution properties of the equatorial Pacific marine atmospheric boundary layer from lidar and radiosonde observations
[DE95-001028] p 1426 N95-21875
Remote-sensing based technique to account for sub-grid scale variability of land surface properties
[NASA-TM-110501] p 1390 N95-22110
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
Climatological data for clouds over the globe from surface observations, 1982-1991: The total cloud edition
[DE95-002537] p 1431 N95-22288
REMOTE SENSORS
Human performance studies for control of multiple remote systems
[AD-A286623] p 1452 N95-20768
REMOTELY PILOTED VEHICLES
Unmanned aerial vehicles
[AD-A286190] p 1206 N95-20329
RENDEZVOUS SPACECRAFT
STS 63 flight day 4 highlights/MIR-Shuttle rendezvous
[NASA-TM-110512] p 1219 N95-21113
RENORMALIZATION GROUP METHODS
Rigorous spin-spin correlation function of Ising model on a special kind of Sierpinski Carpets
[DE94-628995] p 1575 N95-21854
Topics in gauge theories and the unification of elementary particle interactions
[DE94-013485] p 1529 N95-22279
REPLACING
Mercury usage and alternatives in the electrical and electronics industries
[PB94-165362] p 1312 N95-19966

Proposed emittance upgrade for the SLC damping rings
[DE95-002887] p 1538 N95-22155

REPORTS

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 31: The technical communications practices of US aerospace engineers and scientists: Results of the phase 1 SME mail survey
[NASA-TM-109169] p 1587 N95-20163
NASA Langley scientific and technical information output: 1994, volume 1
[NASA-TM-109170-VOL-1] p 1589 N95-21189

RESCUE OPERATIONS

Analysis of test criteria for specifying foam firefighting agents for aircraft rescue and firefighting
[AD-A286381] p 1203 N95-22352

RESEARCH

Overview of the Institute of Geophysics and Planetary Physics and Lawrence Livermore National Laboratory collaborative efforts
[DE94-017300] p 1599 N95-20145
NRL review, 1994
[AD-A279832] p 1605 N95-20182
Applications of ICP magnetic sector multicollector mass spectrometry to basic energy research
[DE95-002600] p 1246 N95-21886

RESEARCH AND DEVELOPMENT

Recent DIII-D results
[DE94-017519] p 1549 N95-20038
Energy and Technology Review
[DE94-017686] p 1219 N95-20148
NRL review, 1994
[AD-A279832] p 1605 N95-20182
Acoustic emission: The first half century
[DE94-017176] p 1503 N95-20267
Hydrostatic force sensor
[DE94-018923] p 1364 N95-20321
An update on the Department of Energy's photovoltaic program p 1316 N95-20505
The Energy Science and Technology Database on a local library system: A case study at the Los Alamos National Research Library
[DE95-001009] p 1589 N95-20818
Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982
VOC compliant wash primer
[AD-A286034] p 1273 N95-21000
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 27: The technical communication practices of engineering and science students: Results of the phase 3 academic surveys
[NASA-TM-109122] p 1589 N95-21015
Development status of an intense beam klystron
[DE95-000745] p 1329 N95-21395
Policies concerning military and civilian research and technology applications
[PB95-131355] p 1585 N95-21427
Investigation on research for degradable plastics
[DE94-796550] p 1277 N95-21714
ANSTO: Program of research, 1993-1994
[DE94-631122] p 1605 N95-21828
ANSTO: Mission statement, significant events and achievements
[DE94-631123] p 1605 N95-21830
Spinoff, 1994
[NASA-NP-214] p 1594 N95-21893
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 48: Valuing information in an interactive environment
[NASA-TM-110448] p 1590 N95-21977

Advanced energy systems and technologies research programme
[DE95-717486] p 1397 N95-22337
Technology transfer: Improving the use of cooperative R/D agreement at DOE's contractor-operated laboratories. Report to Congressional requesters
[GAO/RCED-94-91] p 1586 N95-22403

RESEARCH FACILITIES

Environmental cleanup technology transfer initiatives
[AD-A285059] p 1403 N95-20487
NASA Langley scientific and technical information output: 1994, volume 1
[NASA-TM-109170-VOL-1] p 1589 N95-21189
Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21206
Laser design basis for the National Ignition Facility
[DE94-016700] p 1534 N95-21209
The Photovoltaic Higher Education National Exemplar Facility (PHENEF)
[DE94-015641] p 1395 N95-21409

RESEARCH MANAGEMENT

Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982
Annual program analysis of the NASA Space Life Sciences Research and Education Support Program
[NASA-CR-197298] p 1439 N95-21529
Directives for the participation in MiTS forum. V3.0
[PB95-110342] p 1484 N95-22015
An assessment of European parallel software research
[AD-A286357] p 1479 N95-22257

RESEARCH PROJECTS

Research in the chemical sciences: Summaries of FY 1994
[DE94-015427] p 1223 N95-20264
Acoustic emission: The first half century
[DE94-017176] p 1503 N95-20267
Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982
Recent National Solar Thermal Test Facility activities, in partnership with industry
[DE95-001828] p 1394 N95-21353
ITER EDA Newsletter. Volume 3, no. 2
[DE94-628980] p 1561 N95-21852

RESERVOIRS

FTIR spectroscopy for the determination of water in corrosive gases
[DE94-014658] p 1235 N95-20139
Stability of pressure and velocity computations for heterogeneous reservoirs
[PB95-110284] p 1354 N95-21656
Rare gases systematics and mantle structure
p 1416 N95-21778
D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781
Noble gas isotopes and halogens in volatile-rich inclusions in diamonds p 1417 N95-21784
Mantle devolatilization and rheology in the framework of planetary evolution p 1418 N95-21788
The ratios of carbon and non-radiogenic helium and argon isotopes in the mantle and crustal rocks
p 1421 N95-21805
Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819

RESIDUAL GAS

Emittance dilution by ions in the SLC arcs
[DE95-002871] p 1536 N95-21332

RESIDUAL STRESS

The effect of fiber coating thickness on the interfacial properties of a continuous fiber ceramic matrix composite
[DE94-017886] p 1267 N95-20373
Residual stresses in material processing
[DE94-017888] p 1385 N95-20374
The processing and mechanical properties of high temperature/high performance composites. Book 7: In-situ measurements of stress and damage
[AD-A279814] p 1227 N95-20583
The numerical integration and 3-D finite element formulation of a viscoelastic model of glass
[DE95-002588] p 1271 N95-20788
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
Time-dependent deformation of titanium metal matrix composites
[NASA-CR-195030] p 1230 N95-21363
The mechanical behavior of surface-modified ceramics
[DE95-001704] p 1276 N95-21572
A study of mechanical processing damage in brittle materials
[DE95-002126] p 1276 N95-21585
Measurement of residual stresses on ceramic materials with high spatial resolution
[DE94-017889] p 1280 N95-22270
Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320

RESISTANCE HEATING

Joule heating of the ITER TF cold structure: Effects of vertical control coil currents and ELMS
[DE95-001817] p 1560 N95-21724
Welding tritium exposed stainless steel
[DE95-003208] p 1382 N95-22356

RESISTORS

Evaluation of superconducting quantum interference devices interfaced with digital signal processing electronics for biomagnetic applications
[DE94-016186] p 1289 N95-20164
Monolithic low noise preamplifier for piezoelectric sensors
[AD-D016524] p 1333 N95-21865

RESOLUTION

HIRAS images of fossil dust shells around AGB stars
p 1593 N95-21768

RESONANCE

Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170
A neutron beam polarizer for study of parity violation in neutron-nucleus interactions
[DE95-002743] p 1519 N95-21237
Comparison of calculated with measured dynamic aperture
[DE95-002863] p 1534 N95-21246
Hamiltonian structure of the reversible nonsemisimple 1:1 resonance
[PB95-127528] p 1495 N95-22151
Determination of the complex elastic moduli of materials using a free-free bar technique
[AD-A279861] p 1281 N95-22387

RESONANCE SCATTERING

Resonant generation of nonequilibrium phonons in GaAs/AlAs quantum wells via intersubband scattering
[DE95-002338] p 1581 N95-21604

RESONANT FREQUENCIES

Generation of micro-domains in AT-cut quartz by thermal processing and the effect on resonator modes
[DE94-017344] p 1564 N95-20087
Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695
Radio-frequency techniques at the ISIS pulsed muon source
[PB95-129854] p 1529 N95-22303
Determination of the complex elastic moduli of materials using a free-free bar technique
[AD-A279861] p 1281 N95-22387

RESONANT TUNNELING

Resonant tunneling quantum well integrated optical waveguide modulator/switch
[AD-A285142] p 1542 N95-20501

RESONANT VIBRATION

Acoustic and vibration attenuation composite material
[AD-D016585] p 1233 N95-22467

RESONATORS

Generation of micro-domains in AT-cut quartz by thermal processing and the effect on resonator modes
[DE94-017344] p 1564 N95-20087
Evaluating impedances in a Sacherer integral equation
[DE94-016823] p 1489 N95-20266
Quartz resonator fluid monitors for vehicle applications
[DE94-018910] p 1367 N95-21546

RESOURCES MANAGEMENT

Public-sector aviation issues: Graduate research award papers, 1992-1993
[PB94-217478] p 1199 N95-19967

RESPIRATORS

Method and apparatus for non-invasive evaluation of diaphragmatic function
[NASA-CASE-LAR-13888-1] p 1441 N95-20408

RESPIRATORY SYSTEM

Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species
[AD-A285055] p 1442 N95-20485

RETENTION (PSYCHOLOGY)

Command history, 1993
[AD-A279775] p 1446 N95-21989

RETINA

Computer based analysis and synthesis of retinal function
[AD-A286084] p 1443 N95-20811
Investigation of laser-induced retinal damage: Wavelength and pulsewidth dependent mechanisms
[AD-A286066] p 1443 N95-20848
Mechanisms and diagnostics of ultrashort pulse laser ocular effects
[AD-A285610] p 1373 N95-21195

RETIREMENT

Age 60 study. Part 1: Bibliographic database
[AD-A286245] p 1446 N95-22027
Age 60 study. Part 2: Airline pilot age and performance. A review of the scientific literature
[AD-A286246] p 1447 N95-22040

RETRAINING

The MSFC Program Control Development Program
p 1585 N95-20754

REVERSE ENGINEERING

VHDL modeling of PRC-70 radio ASICs for reverse engineering
[AD-A285740] p 1457 N95-19929
Project Whitefeather
[DE94-016575] p 1415 N95-21184

REVERSE FIELD PINCH
Analysis methods for fast impurity ion dynamics data
[DE95-000589] p 1549 N95-20112
Fluctuations and transport in the reversed field pinch: Characterization and reduction
[DE95-000590] p 1549 N95-20113
Magnetic fluctuation induced transport and edge dynamo measurements in the MST reversed-field pinch
[DE95-000591] p 1549 N95-20114

REYNOLDS EQUATION
Numerical investigation of supersonic turbulent boundary layers with high wall temperature
p 1344 N95-21050
Modelling anisotropy and backscatter effects in the subgrid scale stress tensor p 1349 N95-21077
Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106

REYNOLDS NUMBER
Research on bluff body vortex wakes
[AD-A286319] p 1200 N95-20177
Statistics of pressure and pressure gradient in homogeneous isotropic turbulence p 1343 N95-21046
Simulation of separated flows p 1347 N95-21068
Large eddy simulation of turbulent flow over a cavity
p 1347 N95-21069
A cheap DNS tool for turbulence models testing
p 1348 N95-21072
Direct simulation of turbulent flow in a square duct: Reynolds-stress budgets p 1348 N95-21073
Simulation of pipe flow p 1349 N95-21078
Direct numerical determination of the minimum bypass Reynolds number in boundary layers
p 1349 N95-21080
Direct simulation of a self-similar plane wake
p 1350 N95-21084
The effect of initial conditions on the development of temporally evolving planar three dimensional incompressible wakes p 1350 N95-21085
Rib vortices in round jets: Direct and large eddy simulation p 1351 N95-21088
Acoustic receptivity due to weak surface inhomogeneities in adverse pressure gradient boundary layers
[NASA-TM-4577] p 1353 N95-21258
Experiments on the flow field physics of confluent boundary layers for high-lift systems
[NASA-CR-197318] p 1201 N95-21343
Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames
[DE95-002481] p 1243 N95-21512
Resolution requirements for velocity gradients in turbulence p 1363 N95-22462

REYNOLDS STRESS
Evaluation of Reynolds stress turbulence closures in compressible homogeneous shear flow
[NASA-CR-194892] p 1338 N95-20009
Turbulent transport in premixed flames
p 1249 N95-21040
Modeling near wall effects in second moment closures by elliptic relaxation p 1345 N95-21054
Homogeneous turbulence subjected to mean flow with elliptic streamlines p 1345 N95-21056
Direct simulation of turbulent flow in a square duct: Reynolds-stress budgets p 1348 N95-21073
Modelling anisotropy and backscatter effects in the subgrid scale stress tensor p 1349 N95-21077
Direct simulation of a self-similar plane wake
p 1350 N95-21084

RHENIUM ALLOYS
Cr2Nb development
[DE94-018697] p 1250 N95-20043

RHENIUM COMPOUNDS
Photochemistry of intermolecular C-H bond activation reactions
[DE94-018417] p 1239 N95-20682

RHEOLOGY
Technical Summary for 1993 fall MRS Symposium O, Complex Fluids
[AD-A283722] p 1264 N95-19972
Proceedings of the 4th International Conference on Electrorheological Fluids
[AD-A286341] p 1266 N95-20227
Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777
Modeling the effect of water on mantle rheology
p 1417 N95-21783
Structure and stability of hydrous minerals at high pressure p 1417 N95-21786
Mantle devolatilization and rheology in the framework of planetary evolution p 1418 N95-21788
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801
Subduction and volatile recycling in Earth's mantle
p 1421 N95-21802

RHEOMETERS
Responsive copolymers for enhanced petroleum recovery
[DE94-018822] p 1267 N95-20350

RHO-MESONS
Where are we going with Bose-Einstein: A mini review
[PB95-130308] p 1518 N95-21222

RHODAMINE
Cavity-QED enhancement of fluorescence yields in microdroplets
[DE94-018662] p 1506 N95-20030
Liquid xenon as a potential laser host medium
[AD-A285365] p 1370 N95-20550

RHODIUM ALLOYS
Natural gas converter performance and durability
[PB95-135554] p 1284 N95-21966

RHODIUM COMPOUNDS
Photochemistry of intermolecular C-H bond activation reactions
[DE94-018417] p 1239 N95-20682

RHYTHM (BIOLOGY)
Diffusible driving and coupling signals of the biological clock
[AD-A285353] p 1447 N95-22475

RICCATI EQUATION
Riccati equation theory for Pritchard-Salamon systems: A Popov function approach
[PB95-137089] p 1491 N95-20830
Design of robust optimal control systems and stability analysis of real structured uncertainties
[AD-A279089] p 1483 N95-21913
Discrete algebraic Riccati equation and linear matrix inequality
[PB95-133575] p 1484 N95-22139
Quadratic optimal control of a delay equation II: The unstable case
[PB95-127064] p 1486 N95-22366
Quadratic optimal control of a delay equation I: The stable case
[PB95-127072] p 1486 N95-22367

RIGGING
Corrosion evaluation of fuel canister crusher rigging
[DE95-002962] p 1257 N95-21452

RIGID STRUCTURES
Computer graphics tools for visualizing gravity gradient torques on a rigid spacecraft
[AD-A285971] p 1461 N95-20665
Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 1: Main lectures
[AD-A286062] p 1380 N95-21171
Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 2: Contributed papers
[AD-A286063] p 1381 N95-21488
The dynamic structure function of Bose liquids in the deep inelastic regime
[DE94-629077] p 1527 N95-22182
Nonlinear dynamics of the planar pitch attitude motion for a gravity-gradient satellite
[AD-A286407] p 1220 N95-22204

RING LASERS
Fiber laser amplifiers and oscillators
[AD-A285835] p 1368 N95-20035
Optical processing and control
[AD-A279157] p 1546 N95-21975

RING STRUCTURES
Dynamic measurement of the hoop modulus of a composite cylinder
[DE94-018958] p 1385 N95-20416

RINGS
Abrasive wear by diesel engine coal-fuel and related particles
[PB95-104915] p 1379 N95-20984

RINGS (MATHEMATICS)
Elliptic genera for Z/K-manifolds I
[PB95-109096] p 1496 N95-22355

RISK
A construct for describing software development risks
[AD-A284923] p 1457 N95-19999
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422
Definition report on target and related steering variables of radiation as a part of the environmental balance and environmental outlook investigation
[PB95-135471] p 1409 N95-21846
Initial assessment of the hazards and risks of new chemicals to man and the environment, part 2
[PB95-106407] p 1410 N95-22124

RIVETING
Damage tolerant repair techniques for pressurized aircraft fuselages
[AD-A286298] p 1199 N95-22046

ROBOT ARMS
Sensor based fine motion control
[PB95-108007] p 1483 N95-21669

ROBOT CONTROL
Robust agent control of an autonomous robot with many sensors and actuators
[AD-A280148] p 1479 N95-20011
Force based motion control of a walking machine
[PB95-129672] p 1451 N95-20276
Adaptive path planning for flexible manufacturing
[DE94-016561] p 1459 N95-20284
Legged vehicle for underwater mobile operations
[AD-A285043] p 1480 N95-20482
Automatic generation of fuzzy rules for the sensor-based navigation of a mobile robot
[DE95-001428] p 1481 N95-20837
Heterogeneous multi-robot cooperation
[AD-A279839] p 1481 N95-21185
Elements of deliberative robot control
[PB95-107595] p 1482 N95-21412
Sensor based fine motion control
[PB95-108007] p 1483 N95-21669
Optimal control of a two wheeled mobile robot
[AD-A286130] p 1485 N95-22233

ROBOT DYNAMICS
Force based motion control of a walking machine
[PB95-129672] p 1451 N95-20276
Legged vehicle for underwater mobile operations
[AD-A285043] p 1480 N95-20482
Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695
Unknown-terrains navigation of a mobile robot using an array of sonars
[DE94-017902] p 1482 N95-21385
Sensor based fine motion control
[PB95-108007] p 1483 N95-21669
Tom Thumb algorithm for planning simple vehicle motions
[PB95-107553] p 1484 N95-22156

ROBOTICS
Adaptive path planning for flexible manufacturing
[DE94-016561] p 1459 N95-20284
Advanced robotic technologies for transfer at Sandia National Laboratories
[DE95-001617] p 1481 N95-20884
Heterogeneous multi-robot cooperation
[AD-A279839] p 1481 N95-21185
Unknown-terrains navigation of a mobile robot using an array of sonars
[DE94-017902] p 1482 N95-21385
Sensor based fine motion control
[PB95-108007] p 1483 N95-21669
Robotic paint stripping cell
[AD-A279158] p 1279 N95-21976
Manufacturing Technology Bulletin, July 1994
[DE94-017775] p 1605 N95-22262

ROBOTS
Robust agent control of an autonomous robot with many sensors and actuators
[AD-A280148] p 1479 N95-20011
Force based motion control of a walking machine
[PB95-129672] p 1451 N95-20276
Adaptive path planning for flexible manufacturing
[DE94-016561] p 1459 N95-20284
Legged vehicle for underwater mobile operations
[AD-A285043] p 1480 N95-20482
Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695
Automatic generation of fuzzy rules for the sensor-based navigation of a mobile robot
[DE95-001428] p 1481 N95-20837
Proceedings of the Fourth International Workshop on Inductive Logic Programming (ILP-94)
[PB95-135273] p 1464 N95-21003
Unknown-terrains navigation of a mobile robot using an array of sonars
[DE94-017902] p 1482 N95-21385
Sensor based fine motion control
[PB95-108007] p 1483 N95-21669
Robotic paint stripping cell
[AD-A279158] p 1279 N95-21976
Optimal control of a two wheeled mobile robot
[AD-A286130] p 1485 N95-22233
Layered path planning for an autonomous mobile robot
[AD-A286138] p 1485 N95-22244
Learning maneuvers using neural network models
[AD-A286470] p 1486 N95-22267

ROBUSTNESS (MATHEMATICS)
Measuring software dependability by robustness benchmarking
[AD-A280053] p 1461 N95-20622
VLUGR3: A vectorizable adaptive grid solver for PDEs in 3D. 1: Algorithmic aspects and applications
[PB95-135729] p 1467 N95-21435

ROCKET ENGINES
Investigation of rocket motors 3 inch number 1 Mk 4
[AD-A284278] p 1221 N95-19962
Computer program for calculation of complex chemical equilibrium compositions and applications. Part 1: Analysis
[NASA-RP-1311] p 1235 N95-20180
The problem of space travel: The rocket motor
[NASA-SP-4026] p 1217 N95-21894

ROCKET EXHAUST
Radiation from advanced solid rocket motor plumes
[NASA-CR-196554] p 1221 N95-20124
Computer model predictions of the local effects of large, solid-fuel rocket motors on stratospheric ozone
[AD-A285632] p 1404 N95-21150

ROCKET PROPELLANTS
Investigation of rocket motors 3 inch number 1 Mk 4
[AD-A284278] p 1221 N95-19962

ROCKS
Geometric moire method of strain analysis with displacement discontinuities
[DE95-001114] p 1386 N95-20833
Atmospheres of the Moon and Mercury
p 1419 N95-21794

RODS
Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695
Magnetostrictive motor system
[AD-D016484] p 1333 N95-21901

ROLL
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295

ROLLER BEARINGS
Modeling of rolling element bearing mechanics. Computer program user's manual
[NASA-CR-196557] p 1381 N95-21692
Modeling of rolling element bearing mechanics. Theoretical manual
[NASA-CR-196556] p 1381 N95-21705

ROLLING CONTACT LOADS
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292

ROOM TEMPERATURE
The thermal conductivity of carbon coated silicon carbide fibers embedded in a silicon carbide matrix
[DE94-017758] p 1225 N95-20023
Properties of whisker-reinforced ceramics
[DE94-017759] p 1264 N95-20024
Elastic anisotropy in hot-pressed Si3N4 composites: Role of in situ (beta)-Si3N4 grains and added (beta)-Si3N4 whiskers
[DE94-018387] p 1226 N95-20027
Enhanced ionic conduction at the film/substrate interface in LiI thin films grown on sapphire(0001)
[DE94-017884] p 1565 N95-20371
Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors
[DE95-001073] p 1570 N95-20820
Interlayer magnetic coupling in epitaxial Fe/Cr(211) and (100) superlattices
[DE95-002906] p 1571 N95-21256
High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254

ROTARY WINGS
Prediction of rotor-blade deformations due to unsteady airloads
[AD-A286593] p 1207 N95-20860
Simulation of rotor blade element turbulence
[NASA-TM-108862] p 1207 N95-21186

ROTATING BODIES
Mathematical modeling of a class of multibody flexible spacecraft structures
[NASA-TM-109166] p 1219 N95-20800
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422
Robust fixed-structure control
[AD-A286515] p 1485 N95-22216
Notes on rotating turbulence p 1359 N95-22444

ROTATING FLUIDS
On the transition towards slow manifold in shallow-water and 3D Euler equations in a rotating frame
p 1345 N95-21057
On the asymptotic similarity of rotating homogeneous turbulence p 1345 N95-21058

ROTATING PLASMAS
Coupled tearing modes in plasmas with differential rotation
[DE94-631422] p 1548 N95-19977
Wall stabilization effects in D3-D high beta discharges
[DE94-017509] p 1554 N95-20446

ROTATION
Anisotropic structure of homogeneous turbulence subjected to uniform rotation p 1346 N95-21059
Single point modeling of rotating turbulent flows
p 1346 N95-21060
In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236
Luminosity polarization correlation in the SLC
[DE95-002889] p 1536 N95-21335
Dynamic NMR studies of restricted arene rotation in the chromiu tricarbonyl thiophene and selenophene complexes
[DE95-001656] p 1257 N95-21399
Stellarator transport optimization with self-consistent electric fields
[DE94-019151] p 1559 N95-21581

ROTATIONAL STATES
Current diffusive ballooning mode in second stability region of tokamaks
[DE94-770690] p 1554 N95-20683
Changes in the behavior of magnetic materials undergoing processing in electrical rotating machines
[PB95-104493] p 1325 N95-20702
Large-eddy simulation of rotating channel flows using a localized dynamic model p 1346 N95-21064
The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers
p 1347 N95-21065
Electron attachment to excited molecules
[DE94-019124] p 1522 N95-21519
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292

ROTOR AERODYNAMICS
The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758

ROTOR BLADES (TURBOMACHINERY)
Prediction of rotor-blade deformations due to unsteady airloads
[AD-A286593] p 1207 N95-20860

ROTOR DYNAMICS
The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758

ROTORS
Variations observed in the AC generator signal period of a Sea King helicopter
[AD-A284280] p 1206 N95-19963
Scale-up and modeling of forced chemical vapor infiltration
[DE94-017769] p 1340 N95-20781
Advanced wind turbine design studies: Advanced conceptual study
[DE93-000031] p 1394 N95-20985

ROUTES
Routing of unidirectional packet radio for wide-area paging network control and maintenance
[PB95-104428] p 1300 N95-20980

RUBIDIUM
Recent photoabsorption measurements in the rare gases and alkalis in the 3 to 15 keV photon energy region
[DE94-019278] p 1521 N95-21406

RUN TIME (COMPUTERS)
ILIAS: A sequential language for parallel matrix computations
[PB95-110631] p 1473 N95-20056
Finding all minimal separators of a graph
[PB95-127585] p 1491 N95-21023

RUNGE-KUTTA METHOD
Explicit parallel two-step Runge-Kutta-Nystroem methods
[PB95-135752] p 1489 N95-20423
Parallelism across the steps in iterated Runge-Kutta methods for stiff initial value problems
[PB95-135760] p 1490 N95-20424
Navier-Stokes simulations of the effects of suction holes on a flat plate boundary layer p 1352 N95-21094
Error committed by stopping the Newton iteration in Runge-Kutta methods and linear multistep methods
[PB95-106324] p 1492 N95-21421
Parallel predictor-corrector methods
[PB95-135711] p 1493 N95-21434
Numerical study of boundary layer interaction with shocks: Method and code validation
p 1362 N95-22461

RUNWAYS
Super-heavy aircraft study
[AD-A279602] p 1215 N95-19955

RYDBERG SERIES
Observation of strong emission from NeIX and NeX transitions in a laser-driven plasma
[DE95-002265] p 1555 N95-20813

S

S WAVES
Computer programs for analysis of geophysical data
[DE95-002472] p 1415 N95-21511
Collisional drift waves in the H-mode edge
[DE94-628950] p 1561 N95-21847
Source contributions at far-regional distances
[AD-A279405] p 1426 N95-21932

SACCADIC EYE MOVEMENTS
A physiological neural network for saccadic eye movement control
[AD-A279599] p 1441 N95-20301

SADDLE POINTS
Saddle-node dynamics for edge detection
[DE94-017415] p 1473 N95-22426

SAFETY
GPHS-RTGs in support of the Cassini Mission
[DE95-001492] p 1222 N95-20853
Launch safety, toxicity, and environmental effects of the high performance oxidizer CIF(5)
[AD-A286095] p 1284 N95-22227

SAFETY FACTORS
Analyses of grounded and ungrounded photovoltaic power systems
[DE94-015015] p 1391 N95-20263
Progress in the development of recycling processes for electric vehicle batteries
[DE94-015894] p 1324 N95-20626
The personal aircraft: Status and issues
[NASA-TM-109174] p 1200 N95-20688
The Materials Corrosion and Environmental Effects Laboratory (MCEL)
[DE94-018268] p 1254 N95-20816
Safety issues in high speed machining
[PB95-127411] p 1287 N95-21422
Comparison of HFC-134a and the ternary blend, Suva MP39, as replacements for the refrigerant, CGC-12
[MRL-GD-0051] p 1287 N95-21625
Analysis of test criteria for specifying foam firefighting agents for aircraft rescue and firefighting
[AD-A286381] p 1203 N95-22352

SALTS
Structure of ionic interfaces from an absolutely convergent solution of the Madelung problem
[DE94-019268] p 1573 N95-21474
A visual cell for measuring the solubility of prograde soluble salts in water at high temperatures and pressures
[DE95-002058] p 1245 N95-21732
Demonstration of multifunctional DNBM corrosion inhibitors in protective coatings for Naval air/weapon systems
[AD-A285869] p 1279 N95-22136

SAMARIUM COMPOUNDS
Magnetic field dependence of the correlation gap in SmB6
[DE95-001684] p 1574 N95-21570

SAMPLING
Frequent sampling in discrete choice
[PB95-110961] p 1497 N95-19938
Development of a fast sampling system for estimation of impulse responses of mobile radio channels
p 1296 N95-20943
Subsampling methods for image sequence coding
[PB95-107991] p 1305 N95-21579

SANDWICH STRUCTURES
Carbon fiber reinforced superconductor composites
[DE95-002504] p 1229 N95-20913

SANITATION
Personal hygiene body wipe
[AD-A286092] p 1454 N95-22274

SAPPHIRE
Amorphization of sapphire during ion beam mixing
[DE94-018713] p 1510 N95-20337
Enhanced ionic conduction at the film/substrate interface in LiI thin films grown on sapphire(0001)
[DE94-017884] p 1565 N95-20371
Liquid xenon as a potential laser host medium
[AD-A285365] p 1370 N95-20550
The processing and mechanical properties of high temperature/high performance composites. Book 7: In-situ measurements of stress and damage
[AD-A279814] p 1227 N95-20583
The processing and mechanical properties of high temperature/high performance composites. Book 5: Interface effects
[AD-A279815] p 1228 N95-20584
Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727

SATELLITE ATMOSPHERES
Studies of the gas tori of Titan and Triton
[NASA-CR-197377] p 1601 N95-20797

SATELLITE COMMUNICATION
Facsimile transmission standards
[AD-A279911] p 1290 N95-20308
Preliminary study of HUTSAT microsatellite
[PB95-127619] p 1220 N95-21026
Cochannel and adjacent-channel interference in nonlinear minimum-shift-keyed satellite system
[NASA-TM-106834] p 1307 N95-21890
SATELLITE DESIGN
Preliminary study of HUTSAT microsatellite
[PB95-127619] p 1220 N95-21026
SATELLITE IMAGERY
A Clementine collection: Moonglow
[AD-A286360] p 1217 N95-20228
Analysis of mesospheric winds and waves
[AD-A279956] p 1414 N95-20591
Hires and beyond p 1592 N95-21750
MEM application to IRAS CPC images
p 1592 N95-21751
An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752
Remote-sensing based technique to account for sub-grid scale variability of land surface properties
[NASA-TM-110501] p 1390 N95-22110
Imaging design of the wide field x-ray monitor onboard the HETE satellite
[DE95-002750] p 1221 N95-22436
SATELLITE INSTRUMENTS
Imaging design of the wide field x-ray monitor onboard the HETE satellite
[DE95-002750] p 1221 N95-22436
SATELLITE OBSERVATION
Mariners Weather Log, volume 38, number 3, summer 1994
[PB94-209541] p 1428 N95-20099
Location and characteristics of the reconnection X-line deduced from low-altitude satellite and radar observations
[NASA-TM-110114] p 1413 N95-20453
Program control on the Tropical Rainfall Measuring Mission p 1584 N95-20750
Surface ices in the outer solar system
p 1423 N95-21815
SATELLITE POWER TRANSMISSION
Scaling of solid state lasers for satellite power beaming applications
[DE94-016366] p 1368 N95-19986
SATELLITE SOLAR ENERGY CONVERSION
Review of solar cell temperature coefficients for space
p 1323 N95-20541
SATELLITE-BORNE INSTRUMENTS
Program control on the Tropical Rainfall Measuring Mission p 1584 N95-20750
SATELLITE-BORNE PHOTOGRAPHY
A Clementine collection: Moonglow
[AD-A286360] p 1217 N95-20228
SATELLITE-BORNE RADAR
Investigation on the backscattering properties of Finnish boreal forests at C- and X-band: A semi-empirical modeling approach
[PB95-127692] p 1389 N95-21105
SATURATION (CHEMISTRY)
Collisional redistribution effects on x ray laser saturation behavior
[DE94-017308] p 1374 N95-21663
SAWTOOTH WAVEFORMS
Ion heat pulse after sawtooth crash in the JFT-2M tokamak
[DE94-770685] p 1555 N95-20988
SCALARS
Transport and dynamics in toroidal fusion systems
[DE94-018653] p 1548 N95-20029
Classification of bianisotropic media
[PB95-127635] p 1502 N95-21102
Numerical wave speed for one-dimensional scalar hyperbolic conservation laws with source terms
[PB95-127536] p 1492 N95-21371
On the Aharonov-Bohm effect with neutrons
[DE95-002985] p 1521 N95-21454
Fully developed turbulent flows
[AD-A286496] p 1358 N95-22294
SCALE EFFECT
Universality of particle multiplicities
[DE95-000727] p 1515 N95-20879
SCALE MODELS
Geometric moire method of strain analysis with displacement discontinuities
[DE95-001114] p 1386 N95-20833
Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063
Comparison of DNS and LES of transitional and turbulent compressible flow: Flat plate and mixing layer
p 1347 N95-21066
Modelling anisotropy and backscatter effects in the subgrid scale stress tensor p 1349 N95-21077
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
SCALING LAWS
PRS scoping study 1: Scaling law estimates for K-shell radiation yields on JUPITER-class generators
[AD-A279716] p 1533 N95-20672
Fractal nature and scaling of normal faults, Rio Grande rift, NM: Implications for growth and strain
[DE94-018261] p 1414 N95-20990
SCANNERS
Ice Processing System software support documentation
[AD-A280030] p 1388 N95-20006
MEM application to IRAS CPC images
p 1592 N95-21751
High resolution descriptions of IRAS 12 and 25 microns confused regions
[AD-A285847] p 1545 N95-21832
Evaluation of scanners for C-scan imaging for nondestructive inspection of aircraft
[AD-A286398] p 1383 N95-22202
Test and Evaluation Plan (TEP) for Improvised Explosive Device Screening Systems (IEDSS)
[AD-A286382] p 1203 N95-22319
SCANNING ELECTRON MICROSCOPY
Effect of heat treatment temperature on creep-rupture properties of Fe3Al-based alloys
[DE94-017904] p 1253 N95-20375
Advanced Standard Electronic Modules format-E (SEM-E) processes for rapid prototyping
p 1210 N95-20642
SCANNING TUNNELING MICROSCOPY
A low temperature, ultrahigh vacuum, microwave-frequency-compatible scanning tunneling microscope
[AD-A279869] p 1365 N95-20413
Optical properties of silicon clusters deposited on the basal plane of graphite
[DE94-017529] p 1542 N95-20450
Scanning tunneling microscopy studies of self-assembled monolayers of alkanethiols on gold
[AD-A279910] p 1253 N95-20577
Gordon Research Conference on Physical Electrochemistry
[AD-A286545] p 1240 N95-20842
Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964
Linear and nonlinear spectroscopy with the tunable AC scanning tunneling microscope
[AD-A285751] p 1241 N95-21217
Small cavity nonresonant tunable microwave-frequency alternating current scanning tunneling microscope
[AD-A285752] p 1328 N95-21218
Progress in ultrafast scanning probe microscopy
[DE94-018179] p 1373 N95-21261
Surface x-ray scattering and scanning tunneling microscopy studies at the Au(111) electrode
[DE95-002409] p 1573 N95-21516
Bridging the pressure gap: In situ atomic-level investigations of model platinum catalyst surfaces under reaction conditions by scanning tunneling microscopy
[DE95-002346] p 1246 N95-21990
SCATTER PROPAGATION
An experimental determination of meteor daily arrival rate variation
[AD-A279484] p 1600 N95-21679
X-band microwave backscattering from ocean waves
[DE94-016719] p 1309 N95-22241
SCATTERING
The ANL X6B beamline at NSLS: A versatile facility
[DE94-018379] p 1540 N95-19968
Calculation of the total and total ionization cross sections for positron scattering on atomic hydrogen
[DE94-631341] p 1508 N95-20197
Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407
Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084
Structure functions and structure function ratio F(sup n)2/F(sup p)2 at small x(sub Bj) and Q2 in muon-nucleon scattering
[DE94-017981] p 1530 N95-22340
Effect of cell size on elliptically polarized radar clutter statistics
[AD-A285789] p 1311 N95-22401
SCATTERING AMPLITUDE
The status of molecules
[DE95-000952] p 1526 N95-21939
SCATTERING CROSS SECTIONS
Measurements of scattering processes in negative ion: Atom collisions
[DE95-000664] p 1519 N95-21276
Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280
SCATTEROMETERS
Design and construction of a Ka-band scatterometer
[AD-A286296] p 1368 N95-22322
SCENE ANALYSIS
Tracking a dynamic set of feature points
[AD-A285124] p 1313 N95-20257
SCHEDULES
The advantages of cost plus award fee contracts
p 1584 N95-20745
Computing near-optimal schedules
[PB95-132072] p 1466 N95-21269
SCHEDULING
Planning and scheduling for success
p 1584 N95-20747
Scheduling: A guide for program managers
p 1584 N95-20748
Computing near-optimal schedules
[PB95-132072] p 1466 N95-21269
Intelligent interactive project management system
[PB95-132684] p 1586 N95-21982
A periodic scheduling heuristic for mapping iterative task graphs onto distributed memory multiprocessors
[AD-A286047] p 1311 N95-22415
SCHOOLS
Layered path planning for an autonomous mobile robot
[AD-A286138] p 1485 N95-22244
SCHROEDINGER EQUATION
Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084
SCIENTIFIC VISUALIZATION
A Hyperspectral Image Data Exploration Workbench for environmental science applications
[DE94-016373] p 1412 N95-20171
Computer graphics tools for visualizing gravity gradient torques on a rigid spacecraft
[AD-A285971] p 1461 N95-20665
Design and implementation of visual object-oriented LOGO using Prograph
[AD-A285977] p 1461 N95-20687
SCINTILLATION
Simulation of the impact of atmospheric turbulences on millimeter-wave communications systems
p 1295 N95-20939
SCINTILLATION COUNTERS
Light output and radiation damage in a lead tungstate crystal
[DE94-016814] p 1565 N95-20265
The ORNL Neutron-Capture Cross Section Facility
[DE94-019146] p 1537 N95-21460
SCRUBBERS
Mercury capture in bench-scale absorbers
[DE94-016910] p 1234 N95-20107
SEA BREEZE
Real-data tests of a single-Doppler radar assimilation system
[AD-A286638] p 1292 N95-20904
SEA ICE
Ice Processing System software support documentation
[AD-A280030] p 1388 N95-20006
Atlas of SSM/I satellite ice concentration interpolated to operational ice model domains of the Arctic for 1993
[AD-A280183] p 1432 N95-20012
Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea
[AD-A280095] p 1433 N95-21018
Small antennas for communication over sea ice
[AD-D016206] p 1301 N95-21156
SEA SURFACE TEMPERATURE
An at-sea evaluation of an infrared/resistance temperature device for air/sea-surface temperature measurements
[AD-A279672] p 1365 N95-20604
SEA WATER
Small antennas for communication over sea ice
[AD-D016206] p 1301 N95-21156
Seawater test results of Open-Cycle Ocean Thermal Energy Conversion (OC-OTEC) components
[DE94-019254] p 1396 N95-21897
Superconducting electromagnetic thruster
[AD-D016485] p 1355 N95-21902
SEALS (STOPPERS)
Frame and edge seal technology: A state of the art survey
[PB95-110334] p 1288 N95-22014
SEARCH PROFILES
Application of Markov decision processes to search problems
[PB95-110813] p 1497 N95-19914

Efficient caption-based retrieval of multimedia information
[AD-A279604] p 1586 N95-19956

SEARCH RADAR
Vibration analysis of the AN/SPS-67(V)3 surface search radar
[AD-A286050] p 1302 N95-21324

SEAS
Mississippi State University Center for Air Sea Technology FY 1993 and FY 1994 research program in Navy ocean modeling and prediction
[AD-A286322] p 1432 N95-20209
Terrain and refractivity effects on non-optical paths
p 1294 N95-20931
The determination of static and time varying dipole source. Sensor geometry during sea trials using differential global positioning system
[MRL-TN-631] p 1205 N95-21642

SEATS
Helicopter crewseat cushion program
[AD-A286654] p 1452 N95-20973

SECONDARY FLOW
Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063
Direct simulation of turbulent flow in a square duct: Reynolds-stress budgets p 1348 N95-21073
Simulations of bypass transition for spatially evolving disturbances p 1349 N95-21079

SECRETIONS
Effect of increased venous backflow on the release of cardiac hormone. Fine structural, immunohistochemical, and biochemical study
[PB95-130399] p 1445 N95-21424

SECURITY
Utilizing artificial neural networks in network flow analysis: An annotated bibiliography
[DE95-002453] p 1482 N95-21522
Information security for unmanned systems
[AD-A286511] p 1485 N95-22214
A survey of artificial neural network applications in flow analysis of energy networks
[DE95-002452] p 1486 N95-22430

SEDIMENT TRANSPORT
Data report: Stress measurements in the bottom boundary layer with BASS tripods STRESS 2 1990-1991
[AD-A279875] p 1433 N95-20433
Seismic anisothropy and large-scale porosity inthe ocean floor
[AD-A286580] p 1436 N95-22187

SEDIMENTS
Multiple scatter theory of ocean sediments
[AD-A286033] p 1433 N95-20999
Volatiles in the Earth: All shallow and all recycled
p 1416 N95-21779
Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792
Descriptions of WHOI sediment cores, volume 8
[AD-A279444] p 1436 N95-22073
Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381

SEGMENTS
A framework for segmentation using physical models of image formation
[AD-A279900] p 1543 N95-20564

SEISMIC WAVES
Infrasonic observations of the Northridge, California, earthquake
[DE94-018095] p 1413 N95-20289
The Novaya Zemlya Event of 31 December 1992 and Seismic Identification Issues: 15th Annual Seismic Research Symposium
[AD-A279847] p 1414 N95-20760
EPSCoR supplemental grant for an application of neural networks to seismic signal discrimination
[AD-A285846] p 1414 N95-20878
Application of neural networks to seismic signal discrimination research findings
[AD-A285848] p 1415 N95-21308

SEISMOGRAMS
Source contributions at far-regional distances
[AD-A279405] p 1426 N95-21932

SEISMOGRAPHS
The Novaya Zemlya Event of 31 December 1992 and Seismic Identification Issues: 15th Annual Seismic Research Symposium
[AD-A279847] p 1414 N95-20760

SEISMOLOGY
Velocity analysis for transversely isotropic media
[DE95-000643] p 1411 N95-19981
P-wave signatures and parameterization of transversely isotropic media: An overview
[DE95-000644] p 1411 N95-19982
The Novaya Zemlya Event of 31 December 1992 and Seismic Identification Issues: 15th Annual Seismic Research Symposium
[AD-A279847] p 1414 N95-20760
EPSCoR supplemental grant for an application of neural networks to seismic signal discrimination
[AD-A285846] p 1414 N95-20878
Application of neural networks to seismic signal discrimination research findings
[AD-A285848] p 1415 N95-21308
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477
Seismic evidence for volatiles at large depth in the Earth p 1422 N95-21808

SELECTION
Frequent sampling in discrete choice
[PB95-110961] p 1497 N95-19938
Molecularly Designed Ultrafine/Nanostructured Materials, volume 351
[AD-A285370] p 1568 N95-20552
MCMs for avionics: Technology selection and intermodule interconnection p 1210 N95-20641

SELECTIVE FADING
Experimental study of the helicopter-mobile radioelectrical channel and possible extension to the satellite-mobile channel p 1296 N95-20945

SELENIUM
Collisional redistribution effects on x ray laser saturation behavior
[DE94-017308] p 1374 N95-21663
Studies of selenium and xenon in inductively coupled plasma mass spectrometry
[DE95-001676] p 1245 N95-21734

SELENIUM COMPOUNDS
Dynamic NMR studies of restricted arene rotation in the chromiu tricarbonyl thiophene and selenophene complexes
[DE95-001656] p 1257 N95-21399

SELF ADAPTIVE CONTROL SYSTEMS
A neural expert approach to self designing flight control systems
[AD-A279965] p 1215 N95-21122

SELF CONSISTENT FIELDS
Stellarator transport optimization with self-consistent electric fields
[DE94-019151] p 1559 N95-21581

SELF ERECTING DEVICES
High-performance, flexible, deployable array development for space applications
p 1322 N95-20532
An introduction to the Astro Edge solar array
p 1322 N95-20535

SELF EXCITATION
Charge density of fractional charged quasiparticles in the composite fermion picture
[DE94-018122] p 1524 N95-21703

SELF LUBRICATING MATERIALS
Evaluation of PS 212 coatings under boundary lubrication conditions with an Ester-based oil to 300 C
[NASA-TM-106763] p 1223 N95-19901

SELF ORGANIZING SYSTEMS
Attempt to interpret the self-organizing mapping physiologically
[PB95-127783] p 1438 N95-21112
Exponents in lifetime and power spectral density forms in self-organized critical systems
[AD-A286242] p 1495 N95-22026

SEMANTICS
Algebraic semantics of message sequence charts
[PB95-110581] p 1288 N95-19890
Non interleaving process algebra
[PB95-110607] p 1486 N95-19892
General conservative extension theorem in process algebra
[PB95-110656] p 1487 N95-19902
Process algebra with partial choice
[PB95-110714] p 1487 N95-19907
Real time process algebra with infinitesimals
[PB95-110623] p 1488 N95-20055
Comparison of Ward and Mellor's transformation schema with State- and Activitycharts
[PB95-110698] p 1459 N95-20258
Software merge: Semantics of combining changes to programs
[AD-A279657] p 1459 N95-20304
Multi-dimensional Petri nets
[PB95-127593] p 1491 N95-21024
Formal model for the dynamics of compositional reasoning systems
[PB95-132056] p 1482 N95-21267
Semantics for a fine lambda-calculus with de Bruijn indices
[PB95-127577] p 1492 N95-21372
Performance analysis and true concurrency semantics
[PB95-134086] p 1478 N95-21869

SEMICONDUCTOR DEVICES
Semiconductor cold electron emission device
[AD-D016577] p 1314 N95-20298
A new mini Ball Grid Array (mBGA) multichip module technology
[DE94-018897] p 1480 N95-20342
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A285946] p 1315 N95-20394
Ultrafast magnetoexciton dynamics in GaAs
[DE94-018175] p 1514 N95-20732
Spectroscopic, morphological, and electrical characterization of PdGe ohmic contacts to n-GaAs
[DE95-000738] p 1329 N95-21394
InTISb for long-wavelength infrared photodetectors and arrays
[AD-A280109] p 1331 N95-21660
Plastic encapsulated parts
[DE95-001876] p 1332 N95-21729
Method of making a semiconductor device by forming a nanochannel mask
[AD-D016515] p 1576 N95-22059
Sub-millimeterwave semiconductor signal sources
[AD-A279375] p 1335 N95-22144

SEMICONDUCTOR JUNCTIONS
Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE95-001548] p 1574 N95-21839
Method of forming a high voltage silicon-on-sapphire photocell array
[AD-D016479] p 1396 N95-21899
Equilibrium and shot noise in mesoscopic systems
[DE95-000855] p 1576 N95-22008

SEMICONDUCTOR LASERS
Program of the 1993 9th Interdisciplinary Laser Science Conference (ILS-9)
[AD-A285131] p 1369 N95-20082
Application of diode lasers to the isotopically selective determination of uranium in oxides by optogalvanic spectroscopy
[DE94-018045] p 1370 N95-20698
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A280098] p 1372 N95-21019
Overview of remote sensing laser development and semiconductor laser technology
[DE94-019103] p 1389 N95-21552
Optical, electronic and optoelectronic material and device research
[AD-A280111] p 1374 N95-21630
High average power diode pumped solid state lasers for CALIOPE
[DE94-019248] p 1376 N95-22121
International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

SEMICONDUCTOR PLASMAS
Application of IRIS to semiconductor plasma processing
[DE95-003591] p 1562 N95-22225

SEMICONDUCTORS (MATERIALS)
Physics and applications of defects in advanced semiconductors, volume 325
[AD-A280059] p 1563 N95-19886
Low temperature synthesis of semiconductor materials
[AD-A285120] p 1226 N95-20081
FTIR spectroscopy for the determination of water in corrosive gases
[DE94-014658] p 1235 N95-20139
Kondo insulators
[DE95-001156] p 1237 N95-20368
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A285946] p 1315 N95-20394
Development of solid state moisture sensors for semiconductor fabrication applications
[DE94-015771] p 1364 N95-20398
Solid state research
[AD-A279662] p 1567 N95-20426
Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514
P/N In(Al) GaAs multijunction laser power converters
p 1323 N95-20539
Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543
Microscopy of stress-induced morphological development and dislocation nucleation during semiconductor epitaxy
[DE94-017869] p 1568 N95-20674
Instantaneous frequency dynamics of coherent emission from magnetoexcitons in gallium arsenide
[DE94-018182] p 1569 N95-20677
Temporal and spectral investigation of multi-Landau level quantum beats in GaAs
[DE94-018189] p 1569 N95-20678

Ultrafast magnetoexciton dynamics in GaAs
[DE94-018175] p 1514 N95-20732

Photoinduced charge transfer between fullerenes and TiO2 semiconductor colloids
[DE95-001447] p 1570 N95-20838

Certain physical properties of lanthanum digermanide
[AD-A286592] p 1229 N95-20859

Study of small carbon and semiconductor clusters using negative ion threshold photodetachment spectroscopy
[DE95-002327] p 1515 N95-20872

Mechanical design of the DO silicon detector
[DE95-002532] p 1365 N95-20902

Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964

IR materials producibility
[AD-A280094] p 1328 N95-21017

Fiber-optic control of current filaments in high gain photoconductive semiconductor switches
[DE94-015804] p 1328 N95-21139

X-ray studies of microstructures in semiconductor and superconducting materials
[DE95-001802] p 1572 N95-21279

Excitons in semiconducting superlattices, quantum wells, and ternary alloys
[DE95-001867] p 1572 N95-21287

Defect production and recombination during low-energy ion processing
[DE95-001827] p 1572 N95-21304

Photoemission and ferromagnetism
[DE95-002419] p 1520 N95-21362

Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398

Gradient index lenses from sol-gel layering
[AD-A285649] p 1242 N95-21402

Translational-energy-resolved studies of photographed carrier-induced reactions on semiconductor surfaces
[DE95-002944] p 1573 N95-21444

Thin-film cadmium telluride photovoltaic cells
[DE94-011886] p 1395 N95-21508

Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712

Quantum dynamical phenomena of independent electrons in semiconductor superlattices subject to a uniform electric field
[DE95-001655] p 1574 N95-21723

Plastic encapsulated parts
[DE95-001876] p 1332 N95-21729

Application of quaternary phase diagrams to compound semiconductor processing
[DE95-001813] p 1277 N95-21748

Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE95-001548] p 1574 N95-21839

Acoustoelectric effect in semiconductor superlattice
[DE94-628994] p 1575 N95-21859

Effect of the electron-SO-phonon on the impurity state energies in a semiconductor quantum well
[DE94-628993] p 1581 N95-21887

Growth and electrical and far-infrared properties of wide electron wells in semiconductors
[AD-A279409] p 1333 N95-21917

Method of making a semiconductor device by forming a nanochannel mask
[AD-D016515] p 1576 N95-22059

Surfaces and thin films studied by picosecond ultrasonics
[DE95-001866] p 1506 N95-22071

Application of optical second harmonic generation to surface analysis
[AD-A279445] p 1547 N95-22074

Electric-field effects on shallow donor impurity in a harmonic quantum dot
[DE94-629034] p 1577 N95-22176

Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177

Research on the power generation system with thermoelectric conversion elements
[DE95-714804] p 1397 N95-22309

Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

SENSITIVITY

Light-scattering fluctuations and noise in nonlinear optical processing
[AD-A279748] p 1544 N95-20803

Triggers for a high sensitivity charm experiment
[DE95-002251] p 1515 N95-20868

Eigenmode method for electromagnetic synthesis of diffractive elements with three-dimensional profiles
[PB95-127726] p 1301 N95-21107

Emittance dilution by ions in the SLC arcs
[DE95-002871] p 1536 N95-21332

SENSORS

A charge distribution analysis instrument for catalysis and material science applications
[DE94-016489] p 1364 N95-20233

SENSORY DEPRIVATION

Command history, 1993
[AD-A279775] p 1446 N95-21989

SEPARATED FLOW

Effects of turbulence compressibility and unsteadiness in compression corner flow p 1344 N95-21052

Single point modeling of rotating turbulent flows
p 1346 N95-21060

Simulation of separated flows p 1347 N95-21068

Large-eddy simulation of separated flow in a ribbed duct p 1347 N95-21070

Application of Navier-Stokes code PAB3D with kappa-epsilon turbulence model to attached and separated flows
[NASA-TP-3480] p 1201 N95-21338

Turbulence modeling for separated flow
p 1359 N95-22443

SEPARATION

Separation of proteins by convective electrophoresis through a porous membrane
[PB95-127130] p 1248 N95-22373

SEPARATORS

Low flow fluid separator
[AD-D016575] p 1339 N95-20297

Transport phenomena in the micropores of plug-type phase separators
[NASA-TM-108479] p 1340 N95-20561

Molten carbonate fuel cell product development test
[DE95-000005] p 1324 N95-20574

Finding all minimal separators of a graph
[PB95-127585] p 1491 N95-21023

A low energy continuous reactor separator for the production of ethanol from corn grits/starch and biomass streams
[DE95-002256] p 1283 N95-21356

SEPTUM

Atom wave interferometer
[AD-A279532] p 1524 N95-21688

SEQUENCING

Algebraic semantics of message sequence charts
[PB95-110581] p 1288 N95-19890

Process algebra with partial choice
[PB95-110714] p 1487 N95-19907

Long sequence correlation coprocessor
[AD-D016558] p 1313 N95-20280

Accuracy problems in the generation of discrete time stochastic processes
[PB95-131397] p 1386 N95-21133

Proposal for a tutorial on Minimal Length Encoding (MLE) in molecular biology
[DE94-015076] p 1438 N95-21376

Uninterrupted, enhanced-rate event sequencer with mixed-speed counter modules
[AD-D016255] p 1334 N95-22030

Sequential shock induced switch tests for Eglin Air Force Base
[DE95-001786] p 1334 N95-22062

Discovering related DNA sequences via mutual information
[DE95-001101] p 1440 N95-22067

Almost kappa-wise independent random permutation of the cube
[PB95-108098] p 1495 N95-22147

SEQUENTIAL ANALYSIS

O(log2 n) time efficient parallel factorization of dense, sparse separable, and banded matrices
[NASA-CR-197356] p 1473 N95-19885

In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236

SEQUENTIAL CONTROL

A database for analyzing sequential behavioral data and their associated cognitive models
[AD-A280061] p 1448 N95-19887

Multi-port tester interface
[AD-D016240] p 1332 N95-21775

Time and the order of abstract events in distributed computations
[PB95-110482] p 1496 N95-22349

SERIES (MATHEMATICS)

Growth series for the commutator subgroup
[PB95-111092] p 1490 N95-20452

SERIES EXPANSION

Semiquantum chaos and the large N expansion
[DE94-016196] p 1488 N95-20169

New improved derivative expansion for field theories with spontaneous symmetry breaking
[DE94-019349] p 1580 N95-21486

SERPENTINE

Impact degassing of water and noble gases from silicates p 1416 N95-21780

SERUMS

Studies of selenium and xenon in inductively coupled plasma mass spectrometry
[DE95-001676] p 1245 N95-21734

SERVICE LIFE

A test of the Arrhenius extrapolation assumption for a nitrile rubber
[DE94-017337] p 1263 N95-19926

Crack closure and sequential effects in fatigue: A literature survey
[PB95-131637] p 1387 N95-21557

Cathode Life Test Facility
[AD-A286232] p 1334 N95-22023

Effects of cyclic stress distribution models on fatigue life predictions
[DE95-001619] p 1388 N95-22070

SERVOMECHANISMS

Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695

SET THEORY

Ups and downs of type theory
[PB95-110664] p 1487 N95-19903

Abstract reduction and topology
[PB95-110615] p 1488 N95-20054

Duality beyond sober spaces: Topological spaces and observation frames
[PB95-134565] p 1494 N95-21962

Computing symmetries and stubborn sets
[PB95-127700] p 1472 N95-22328

Local connectivity of some Julia sets containing a circle with an irrational rotation
[PB95-109070] p 1496 N95-22353

SETTLING

Hindered settling computations using a parallel boundary element method
[DE94-014286] p 1339 N95-20137

SEWAGE TREATMENT

Disinfection of purified waste water with ultra violet light on a technical scale
[PB95-131926] p 1405 N95-21330

SEYFERT GALAXIES

Extended far-infrared emission and star formation in Seyfert galaxies p 1593 N95-21764

SH-3 HELICOPTER

Variations observed in the AC generator signal period of a Sea King helicopter
[AD-A284280] p 1206 N95-19963

SHAFTS (MACHINE ELEMENTS)

Bevel gear driver and method having torque limit selection
[NASA-CASE-MSC-22384-1] p 1378 N95-20151

Fire smoke ventilation through shafts: Experiments
[PB95-132247] p 1288 N95-21978

SHALLOW SHELLS

Influence of primary boundary conditions on the buckling of shallow cylindrical shells
[PB94-208352] p 1384 N95-20003

SHALLOW WATER

Model-based inversion for a shallow ocean application
[DE94-016968] p 1433 N95-20420

On the transition towards slow manifold in shallow-water and 3D Euler equations in a rotating frame
p 1345 N95-21057

SHAPE CONTROL

Toward a design for the ITER plasma shape and stability control system
[DE94-017516] p 1548 N95-20037

SHAPE MEMORY ALLOYS

Mixed-sputter deposition of Ni-Ti-Cu shape memory films
[DE94-017296] p 1250 N95-19900

Processing and characterization of Ni-Al-Fe-B shape-memory alloy wires produced by rapid solidification
[DE94-017702] p 1250 N95-20020

High-performance, flexible, deployable array development for space applications
p 1322 N95-20532

Feasibility study of power generation system with shape memory alloys
[DE95-714802] p 1254 N95-20890

Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398

SHAPES

A computational study of projectile shape dependence on phase change phenomena with comparisons to experimental data
[DE95-000740] p 1384 N95-20077

Plasma shape experiments for an optimized tokamak
[DE94-017508] p 1553 N95-20445

Identification of resonant, two-electron, and inter-atomic features in K and L23 NEXAFS spectra
[AD-A285374] p 1513 N95-20554

Ohmsett test of NOFI Vee-Sweep and NOFI 600S Oilboom [AD-A279525] p 1408 N95-21685

SHEAR FLOW

Evaluation of Reynolds stress turbulence closures in compressible homogeneous shear flow [NASA-CR-194892] p 1338 N95-20009

Role of pressure diffusion in non-homogeneous shear flows p 1345 N95-21053

Modeling the two-point correlation of the vector stream function p 1345 N95-21055

Direct simulation of a self-similar plane wake p 1350 N95-21084

Investigation of shear layer transition using various turbulence models p 1352 N95-21096

Fourth International Symposium on Stratified Flows, volume 1 [AD-A286450] p 1354 N95-21583

Nonlinear interaction between a pair of oblique modes in a supersonic mixing layer: Long-wave limit [NASA-CR-197380] p 1357 N95-22173

Local dynamic subgrid-scale models in channel flow p 1360 N95-22447

Small-scale behavior in distorted turbulent boundary layers at low Reynolds number p 1362 N95-22456

A method for obtaining a statistically stationary turbulent free shear flow p 1363 N95-22463

Direct numerical simulation of incompressible axisymmetric flows p 1363 N95-22464

SHEAR LAYERS

Free shear layers, base pressure and bluff-body drag [AD-A286316] p 1200 N95-20175

Instability of streamwise vortices in plane channel flows p 1344 N95-21049

Role of pressure diffusion in non-homogeneous shear flows p 1345 N95-21053

Direct numerical simulation of turbulent flow in a sudden pipe expansion p 1347 N95-21067

Spatial direct numerical simulation of boundary layer transition under strong adverse pressure gradient p 1351 N95-21093

Investigation of shear layer transition using various turbulence models p 1352 N95-21096

Extended theory of main ion and impurity rotation and bootstrap current in a shear layer [DE94-015857] p 1555 N95-21141

Forced free-shear layer measurements p 1362 N95-22460

SHEAR PROPERTIES

Extrudate swell and extrudate distortion of HDPE as a result of different deformation mechanisms during extrusion through capillary dies [PB95-110227] p 1288 N95-21651

SHEAR STRAIN

Micromechanical approach to transformation toughening in ceramics [PB95-135422] p 1273 N95-20976

SHEAR STRENGTH

Role of internal stresses in fracture behavior of engineering composites [DE95-001106] p 1229 N95-20912

Electrorheology for smart automotive suspensions [AD-A285543] p 1380 N95-21157

Determination of the complex elastic moduli of materials using a free-free bar technique [AD-A279861] p 1281 N95-22387

SHEAR STRESS

The influence of ply waviness with nonlinear shear on the stiffness and strength reduction of composite laminates [AD-A285736] p 1224 N95-19899

Evaluation of Reynolds stress turbulence closures in compressible homogeneous shear flow [NASA-CR-194892] p 1338 N95-20009

Turbulence descriptors for scaling fatigue loading spectra of wind turbine structural components [DE94-011833] p 1384 N95-20109

Direct simulation of turbulent flow in a square duct: Reynolds-stress budgets p 1348 N95-21073

SHELLS (STRUCTURAL FORMS)

Effects of plasma physics on capsule implosions in gas-filled hohlraums [DE95-000923] p 1371 N95-20786

SHIELDING

MCNP (trademark) ENDF/B-VI iron benchmark calculations [DE94-016165] p 1508 N95-20160

SHIFT REGISTERS

Long sequence correlation coprocessor [AD-D016558] p 1313 N95-20280

SHOCK LAYERS

Numerical study of boundary layer interaction with shocks: Method and code validation p 1362 N95-22461

SHOCK LOADS

Ductile-brittle transition behavior of tungsten under shock loading [DE94-009913] p 1251 N95-20122

Analysis of experimentally shocked minerals by NMR spectroscopy [DE95-002955] p 1573 N95-21449

SHOCK TESTS

Sequential shock induced switch tests for Eglin Air Force Base [DE95-001786] p 1334 N95-22062

SHOCK TUBES

Approximate Riemann solver for magnetohydrodynamics (that works in more than one dimension) [PB95-135802] p 1553 N95-20425

SHOCK WAVE INTERACTION

Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10 [NASA-TP-3476] p 1340 N95-20619

Shock wave interactions in hypervelocity flow [AD-A286507] p 1357 N95-22212

On the dynamics of a shock-bubble interaction [NASA-CR-194978] p 1495 N95-22325

Numerical study of boundary layer interaction with shocks: Method and code validation p 1362 N95-22461

SHOCK WAVES

A computational study of projectile shape dependence on phase change phenomena with comparisons to experimental data [DE95-000740] p 1384 N95-20077

Ductile-brittle transition behavior of tungsten under shock loading [DE94-009913] p 1251 N95-20122

Infrasonic observations of the Northridge, California, earthquake [DE94-018095] p 1413 N95-20289

Proceedings of the Zel'Dovich Memorial International Conference on Combustion, Detonation, Shock Waves, volume 2 [AD-A286626] p 1239 N95-20769

Potential flow downstream of the heliospheric terminal shock: A non-spherical shock [NASA-TM-110493] p 1426 N95-21874

Sequential shock induced switch tests for Eglin Air Force Base [DE95-001786] p 1334 N95-22062

Shock wave interactions in hypervelocity flow [AD-A286507] p 1357 N95-22212

SHORT CIRCUIT CURRENTS

Electron-irradiated two-terminal, monolithic InP/Ga0.47In0.53As tandem solar cells and annealing of radiation damage p 1319 N95-20519

Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells [DE94-629082] p 1397 N95-22183

SHOT NOISE

Equilibrium and shot noise in mesoscopic systems [DE95-000855] p 1576 N95-22008

SHRINKAGE

Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials [AD-A286418] p 1357 N95-22206

SIDEBANDS

Time-resolved study of sideband generation and transition to chaos on an infrared FEL [DE95-002336] p 1374 N95-21528

Recent progress of the compact AFEL at Los Alamos [DE95-002728] p 1376 N95-22154

SIDELOBE REDUCTION

General purpose sidelobe canceller system [AD-D016560] p 1289 N95-20270

Directive optimization of coherent sidelobe canceller systems [AD-D016513] p 1307 N95-21908

SIDESLIP

Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 1: Wind tunnel test summary [AD-A279126] p 1202 N95-21877

Effect of juncture fillets on double-delta wings undergoing sideslip at high angles of attack [AD-A286165] p 1207 N95-22039

SIGNAL ANALYSIS

Infrasonic observations of the Northridge, California, earthquake [DE94-018095] p 1413 N95-20289

A portable and independent edge fluctuation diagnostic [DE94-018254] p 1554 N95-20681

SIGNAL ANALYZERS

Evaluation of superconducting quantum interference devices interfaced with digital signal processing electronics for biomagnetic applications [DE94-016186] p 1289 N95-20164

The impact of advanced packaging technology on modular avionics architectures p 1208 N95-20632

Innovative use of DSP technology in space: FORTE event classifier [DE94-016086] p 1291 N95-20697

Propagation measurements on a troposcatter link in the Canadian High Arctic p 1295 N95-20940

An evaluation of the Gear Averaging Signal Processor (GASP) [DSTO-TR-0067] p 1470 N95-21950

SIGNAL DETECTION

EPSCoR supplemental grant for an application of neural networks to seismic signal discrimination [AD-A285846] p 1414 N95-20878

Application of neural networks to seismic signal discrimination research findings [AD-A285848] p 1415 N95-21308

Signal processing in the linear statistical model [AD-A286255] p 1308 N95-22041

Threshold detection in the presence of atmospheric turbulence [AD-A286175] p 1427 N95-22249

SIGNAL DETECTORS

Data report: Stress measurements in the bottom boundary layer with BASS tripods STRESS 2 1990-1991 [AD-A279875] p 1433 N95-20433

SIGNAL ENCODING

Problems of coding in multipath channels p 1294 N95-20930

SIGNAL FADING

Error probabilities of FFH/BFSK with noise normalization and soft decision viterbi decoding in a fading channel with partial-band jamming [AD-A280041] p 1498 N95-20620

Problems of coding in multipath channels p 1294 N95-20930

The effects of magnetic storm phases on F-layer irregularities from auroral to equatorial latitudes [AD-A286173] p 1427 N95-22423

SIGNAL GENERATORS

On commonalities in signal design for non-Gaussian channels [AD-A285385] p 1498 N95-20608

Apparatus and method for determining the mass density of a filament [NASA-CASE-LAR-14879-1-CU] p 1383 N95-20616

Sub-millimeterwave semiconductor signal sources [AD-A279375] p 1335 N95-22144

SIGNAL MIXING

D(sup 0)-(anti-D)(sup 0) mixing and doubly Cabibbo-suppressed decays of the D(+) [DE94-015540] p 1512 N95-20476

Light-scattering fluctuations and noise in nonlinear optical processing [AD-A279748] p 1544 N95-20803

Seamless data-range change using punctured convolutional codes for time-varying signal-to-noise ratios p 1304 N95-21534

SIGNAL PROCESSING

Variations observed in the AC generator signal period of a Sea King helicopter [AD-A284280] p 1206 N95-19963

Wavelet-based acoustic recognition of aircraft [DE94-017701] p 1503 N95-20019

Determining the usability of Digital Video Interactive (DVI) technology in computer-based instruction [AD-A284717] p 1457 N95-20060

Signal-to-noise gain from adaptive matched-field beamforming of multidimensional acoustic arrays [AD-A285671] p 1503 N95-20084

Evaluation of superconducting quantum interference devices interfaced with digital signal processing electronics for biomagnetic applications [DE94-016186] p 1289 N95-20164

DSP control of superconducting quantum interference devices [DE94-016193] p 1313 N95-20168

The GPS Burst Detector W-Sensor [DE94-017406] p 1204 N95-20269

Method and system of mapping acoustic near field [AD-D016574] p 1504 N95-20296

Applications of wavelets to radar, imaging and related problems [AD-A279909] p 1290 N95-20545

The impact of advanced packaging technology on modular avionics architectures p 1208 N95-20632

Packaging the MAMA module p 1209 N95-20639

Innovative use of DSP technology in space: FORTE event classifier [DE94-016086] p 1291 N95-20697

Propagation measurements on a troposcatter link in the Canadian High Arctic p 1295 N95-20940

Wavelet transformations for helicopter identification via acoustic signatures [AD-A279980] p 1504 N95-20963

Monolithic circuits for lead-glass calorimetry
[DE94-019112] p 1330 N95-21554
Numerical and symbolic algorithms for application and specific signal processing
[AD-A279902] p 1305 N95-21576
Subsampling methods for image sequence coding
[PB95-107991] p 1305 N95-21579
Multi-port tester interface
[AD-D016240] p 1332 N95-21775
An evaluation of the Gear Averaging Signal Processor (GASP)
[DSTO-TR-0067] p 1470 N95-21950
Signal processing in the linear statistical model
[AD-A286255] p 1308 N95-22041
Image and video coding using a wavelet decomposition
[PB95-135067] p 1311 N95-22358
TDX: A high-bandwidth crossbar-switched communication paradigm
[DE94-017187] p 1311 N95-22407
A periodic scheduling heuristic for mapping iterative task graphs onto distributed memory multiprocessors
[AD-A286047] p 1311 N95-22415

SIGNAL REFLECTION
Development of a portable ice-thickness measuring instrument
[AD-A279472] p 1433 N95-21291

SIGNAL TO NOISE RATIOS
Signal-to-noise gain from adaptive matched-field beamforming of multidimensional acoustic arrays
[AD-A285671] p 1503 N95-20084
Global change integrating factors: Tropical tropopause trends
[DE95-001121] p 1404 N95-20835
Seamless data-range change using punctured convolutional codes for time-varying signal-to-noise ratios p 1304 N95-21534
Signal to noise improvements with a new Far-IR rapid-scan Michelson Interferometer
[DE95-002416] p 1367 N95-21638
Threshold detection in the presence of atmospheric turbulence
[AD-A286175] p 1427 N95-22249

SIGNAL TRANSMISSION
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545
Scattering of an FM signal from an array of spheres
[AD-A285587] p 1505 N95-21213

SIGNATURES
P-wave signatures and parameterization of transversely isotropic media: An overview
[DE95-000644] p 1411 N95-19982
Application of wavelet-filtering techniques to intermittent turbulent and wall pressure events. Part 1: Exploratory results
[AD-A286077] p 1341 N95-20849
Preclinical investigation of lyophilized platelet preparations
[AD-A286079] p 1443 N95-20851

SIGNS AND SYMPTOMS
Conservative smoothing versus artificial viscosity
[DE95-001108] p 1341 N95-20831
Assessing post traumatic stress disorder and PTSD symptomatology in US Army personnel
[AD-A285941] p 1451 N95-22324

SILANES
An atomically-resolved STM study of the thermal decomposition of disilane on Si(001)
[AD-A279818] p 1567 N95-20544
Antiphase boundaries as nucleation centers in low-temperature epitaxial growth
[AD-A279895] p 1568 N95-20594
Preparation and x-ray structure of Cp2Ti(PH2SiH2)(PMe3)
[AD-A286197] p 1246 N95-21879
A catalytic method for the conversion of silanes to stannanes
[AD-A286214] p 1247 N95-22020

SILICATES
Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047
Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777
Impact degassing of water and noble gases from silicates p 1416 N95-21780
Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782
Mantle devolatilization and rheology in the framework of planetary evolution p 1418 N95-21788
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813

SILICON
High precision trace neutron transmutation doping of detector-grade high resistance zone-refined silicon mono-crystal
[DE94-631463] p 1563 N95-19978
Computational modeling of physical processes during laser ablation
[DE94-017699] p 1369 N95-20221
Simulations of the dislocation array at Ge/Si interfaces
[DE94-017680] p 1565 N95-20244
Effects of ambient conditions on the adhesion of cubic boron nitride films on silicon substrates
[DE94-016779] p 1266 N95-20281
Fabrication and testing of a silicon immersion grating for infrared spectroscopy
[DE94-017173] p 1237 N95-20386
Optical properties of silicon clusters deposited on the basal plane of graphite
[DE94-017529] p 1542 N95-20450
High quality InP-on-Si for solar cell applications
p 1317 N95-20510
Final results of the advanced photovoltaic experiment
p 1321 N95-20528
An atomically-resolved STM study of the thermal decomposition of disilane on Si(001)
[AD-A279818] p 1567 N95-20544
An atomically-resolved STM study of the interaction of phosphine (PH3) with the silicon (001) surface
[AD-A279819] p 1513 N95-20585
Atomically resolved structure and bonding of delta-doped boron layers on Si(001)
[AD-A279820] p 1513 N95-20586
Antiphase boundaries as nucleation centers in low-temperature epitaxial growth
[AD-A279895] p 1568 N95-20594
The design and manufacturing development of an active silicon substrate MCM p 1211 N95-20645
Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727
Ion-molecule chemistry related to plasma deposition and etching of silicon
[AD-A279749] p 1514 N95-20804
Mechanical design of the DO silicon detector
[DE95-002532] p 1365 N95-20902
Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964
Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A285621] p 1571 N95-21145
HTS Josephson technology on silicon with application to high speed digital microelectronics
[AD-A285964] p 1328 N95-21178
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507
Non-linear A/D converters for integrated silicon smart sensors
[PB94-208402] p 1330 N95-21590
Forming of superplastic ceramics
[DE94-017306] p 1276 N95-21662
Surface second harmonic studies of Si(111)/electrolyte and Si(111)/SiO2/electrolyte interfaces
[AD-A279450] p 1245 N95-21826
Method of forming a high voltage silicon-on-sapphire photocell array
[AD-D016479] p 1396 N95-21899
Method for laser-assisted silicon etching using halocarbon ambients
[AD-D016494] p 1375 N95-21903
Application of optical second harmonic generation to surface analysis
[AD-A279445] p 1547 N95-22074
The role of point defects and defect complexes in silicon device processing
[DE94-011876] p 1279 N95-22091
Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183
Reflective masks for extreme ultraviolet lithography
[DE95-003427] p 1336 N95-22236
Parallel nanometer scale fabrication
[DE95-002122] p 1336 N95-22284
Vertex detectors at linear colliders: Present and future
[PB95-134656] p 1540 N95-22364
Multi signal-domain modeling of solid-state transducers: A theoretical framework based on irreversible thermodynamics mixed finite elements and multigrid
[PB95-134995] p 1336 N95-22382

SILICON ALLOYS
Surface stress, morphological development, and dislocation nucleation during strained-layer epitaxy
[DE94-017682] p 1565 N95-20245
Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522
Microscopy of stress-induced morphological development and dislocation nucleation during semiconductor epitaxy
[DE94-017869] p 1568 N95-20674
Changes in the behavior of magnetic materials undergoing processing in electrical rotating machines
[PB95-104493] p 1325 N95-20702
Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398
Surface micromachined capacitive tactile image sensor
[PB95-108031] p 1288 N95-21633
Relationship between dendrite coherency and castability of some commercial foundry alloys
[PB95-110243] p 1258 N95-21652

SILICON CARBIDES
Comparison of the dynamic fatigue behavior of two monolithic SiC and an Al2O3/SiC composite
[DE94-017751] p 1225 N95-20022
The thermal conductivity of carbon coated silicon carbide fibers embedded in a silicon carbide matrix
[DE94-017758] p 1225 N95-20023
Synthesis and studies of organometallic precursors for CVD of thin film electronic materials
[AD-A285834] p 1223 N95-20033
The in-situ fracture and Auger analysis of Nicalon fibers
[DE94-017771] p 1226 N95-20357
Reliability analysis of uniaxially ground brittle materials
[NASA-TM-106852] p 1386 N95-20790
B4C-SiC reaction-sintered coatings on graphite plasma facing components
[DE94-019105] p 1230 N95-21553
A transmission electron microscope characterization of sodium sulfate hot corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composite
[AD-A286164] p 1231 N95-22038
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 4: Silicon carbide particulate reinforced alumina ceramic
[AD-A286299] p 1279 N95-22047
High temperature corrosion and crack growth of SiC/SiC at variable oxygen partial pressures
[DE94-018715] p 1232 N95-22115
Materials support for the development of High Temperature Advanced Furnaces (HITAF): A comparison of selected mechanical properties for three SiC-based ceramics
[DE94-017752] p 1280 N95-22258
The Modified Embedded Atom Method
[DE94-017958] p 1248 N95-22273
Fracture behavior of laminated discontinuously reinforced aluminum material
[DE94-017307] p 1263 N95-22408

SILICON COMPOUNDS
Physical Si(1-x)Ge(x)/Si heterojunction bipolar transistor model for device and circuit simulation
[PB95-110896] p 1312 N95-19934
A mechanistic model for radiation-induced crystallization and amorphization in U3Si
[DE94-015028] p 1566 N95-20419

SILICON DIOXIDE
Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Time-resolved analytical methods for liquid/solid interfaces
[DE95-002255] p 1240 N95-20780
Restricted mass transport effects on free radical reactions
[DE94-018136] p 1217 N95-21706
Surface second harmonic studies of Si(111)/electrolyte and Si(111)/SiO2/electrolyte interfaces
[AD-A279450] p 1245 N95-21826

SILICON FILMS
Amorphous silicon thin films: The ultimate lightweight space solar cell p 1318 N95-20515

SILICON ISOTOPES
Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047

SILICON NITRIDES
Elastic anisotropy in hot-pressed Si3N4 composites: Role of in situ (beta)-Si3N4 grains and added (beta)-Si3N4 whiskers
[DE94-018387] p 1226 N95-20027

Enhancement of creep resistance of a sintered S3N4 ceramic by microwave annealing
[DE94-017698] p 1265 N95-20220
Microstructural contributions to the fracture resistance of silicon nitride ceramics
[DE94-018955] p 1267 N95-20323
Characterization and electrical properties of copper films grown via direct liquid coinjection of (hfac)Cu(TMVS) and TMVS
[DE95-002957] p 1272 N95-20889
Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912
The formation of reaction bonded Si3N4 at low temperatures and in short times
[DE95-001990] p 1275 N95-21289
Comparison of properties of sintered and sintered reaction-bonded silicon nitride fabricated by microwave and conventional heating
[DE95-001426] p 1275 N95-21501
The thermal conductivity of silicon nitride with molybdenum disilicide additions
[DE94-017757] p 1247 N95-22260
Strength testing of Ti-vapor-coated silicon nitride braze joints
[DE94-017858] p 1280 N95-22266
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 3: Sintered reaction bonded silicon nitride ceramic
[AD-A285773] p 1388 N95-22411

SILICON POLYMERS
Ceramics formed by pyrolysis of either linear or thermosetting carborane (siloxane or silane) acetylene based precursor polymers
[AD-D016563] p 1266 N95-20291

SILICONE RUBBER
Elastomeric electrical connector
[AD-D016559] p 1325 N95-20663

SILOXANES
Siloxanes with strong hydrogen bond donating functionalities
[AD-D016499] p 1279 N95-22057

SILVER
Materials research for GHz multi-chip modules
[AD-A279661] p 1227 N95-20412
The reliability of laser reflowed Sn-Ag solder joints
[AD-A279787] p 1315 N95-20443
Study of improved critical currents and mechanical properties in the Y-Ba-Cu-O superconductor with silver or Y2BaCuO3 or 211 dispersions
[AD-A285609] p 1502 N95-21194
Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398
High performance YBCO films
[AD-A279560] p 1276 N95-21695
How to improve J(c(T)) in Ag/(BiPb)2Sr2Ca2Cu3O10 tapes
[PB95-110326] p 1575 N95-21949
The enhancement of metallic silver monomer evaporation by the adhesion of polar molecules to silver nanocluster ions
[AD-A284936] p 1281 N95-22470

SILVER ALLOYS
First principles simulation of materials properties
[DE94-016781] p 1566 N95-20405

SIMD (COMPUTERS)
Design of a massively parallel computer using bit serial processing elements
[NASA-CR-197365] p 1479 N95-22406

SIMULATED ANNEALING
Rapid determination of geoacoustic properties of the sea floor by simulated annealing
[AD-A286297] p 1436 N95-22028

SIMULATION
Truly distribution-independent algorithms for the N-body problem
[DE94-014238] p 1458 N95-20136
Monsoons: AMIP simulations of the 1987 and 1988 drought and flood regimes
[DE94-014789] p 1428 N95-20140
Characterization and simulation of an acoustic source moving through an oceanic waveguide
[AD-A285688] p 1503 N95-20272
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
[DE94-016447] p 1551 N95-20315
EPICS simulation tools for control system development
[DE94-018082] p 1462 N95-20699
A tabular interface for automated verification of event-based dialogs
[AD-A286065] p 1463 N95-20847
Modelling and simulation of HF/VHF MMPPs
p 1293 N95-20925
Simulation of the impact of atmospheric turbulences on millimeter-wave communications systems
p 1295 N95-20939
Large eddy simulation of turbulent flow over a cavity
p 1347 N95-21069
Large-eddy simulation of separated flow in a ribbed duct p 1347 N95-21070
Analysis of subgrid models using direct and large-eddy simulations of isotropic turbulence p 1348 N95-21071
A cheap DNS tool for turbulence models testing
p 1348 N95-21072
Direct simulation of turbulent flow in a square duct: Reynolds-stress budgets p 1348 N95-21073
Numerical simulation of supersonic boundary layer transition p 1348 N95-21074
Large eddy simulation of channel flow using a vorticity transport subgrid model p 1348 N95-21076
Direct simulation of a self-similar plane wake
p 1350 N95-21084
Navier-Stokes simulations of the effects of suction holes on a flat plate boundary layer p 1352 N95-21094
Project Whitefeather
[DE94-016575] p 1415 N95-21184
Comparison of calculated with measured dynamic aperture
[DE95-002863] p 1534 N95-21246
Conference proceedings. Defense Modeling and Simulation Office Information/Data Base (I/DB) Task Group Meetings, and notes from the previous two I/DB meetings
[AD-A279097] p 1591 N95-22069
Interpretation of HRTEM images by image simulation: An introduction to theory and practice
[DE95-003422] p 1591 N95-22235
Fast parallel tree codes for gravitational and fluid dynamical N-body problems
[AD-A286480] p 1358 N95-22290
Maximum weighted matching for high index differential algebraic equations
[PB95-135075] p 1496 N95-22359
Multi signal-domain modeling of solid-state transducers: A theoretical framework based on irreversible thermodynamics mixed finite elements and multigrid
[PB95-134995] p 1336 N95-22382
Effect of cell size on elliptically polarized radar clutter statistics
[AD-A285789] p 1311 N95-22401
Large-eddy simulation of a plane wake
p 1360 N95-22446

SIMULATORS
A tabular interface for automated verification of event-based dialogs
[AD-A286065] p 1463 N95-20847
A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934
Color control in a multichannel simulator display: The display for advanced research and training
[AD-A279717] p 1216 N95-20992
An evaluation of Automatic Terminal Information Service (ATIS) flight deck display presentation options
[AD-A280100] p 1204 N95-21020
Real-time dynamic simulator for the Topaz II reactor power system
[DE95-001604] p 1535 N95-21278
Effect of lags on human performance with head-coupled simulators
[AD-A279577] p 1453 N95-21700

SINE WAVES
Hybrid high power amplifier
[AD-D016534] p 1326 N95-20730

SINGLE CRYSTALS
High precision trace neutron transmutation doping of detector-grade high resistance zone-refined silicon mono-crystal
[DE94-631463] p 1563 N95-19978
Carrier doping and interlayer coupling in HTSC single crystals
[DE94-018637] p 1564 N95-20127
Rare earth garnet selective emitter
p 1322 N95-20536
Growth, characterization and device development in monocrystalline diamond films
[AD-A285991] p 1568 N95-20614
Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2)
[AD-A279792] p 1224 N95-20660
Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664
Gas-phase generation of zinc sulfide particles using a single-source precursor
[AD-A279700] p 1239 N95-20712
Synthesis and characterization of (Zn(SEt)Et)10, formed via insertion of sulfur into Zn-C bonds: A new class of Wurtzite-like cluster framework
[AD-A279701] p 1569 N95-20714
Magnetic excitations in modulated PrNi2Si2
[DE95-001077] p 1254 N95-20822
Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167
Diffraction applications using the energy dispersive beamline, X6A, at NSLS
[DE94-019287] p 1572 N95-21408
Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films
[DE94-018964] p 1244 N95-21549
High temperature superconducting films and multilayers for electronics
[AD-A279545] p 1331 N95-21693
Anisotropic transport properties of BSCCO single crystals and Ag-clad tapes in high magnetic fields
[DE95-000938] p 1575 N95-21936
Growing and releasing diamonds
[AD-D016489] p 1577 N95-22103
AC magnetic response of YBa2CuO7 with Y2BaCuO5 inclusions and of single-crystal YBa2Cu3O7: A comparative study
[PB94-207917] p 1577 N95-22166
Gravitational effects on the development of weld-pool and solidification microstructures
[DE94-017772] p 1285 N95-22261
Introduction to the structures determination methods using X-ray diffraction in monocrystals: Application to some lanthanides and transition metals complexes with organic ligands
[DE94-629002] p 1579 N95-22380
Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385

SINGLE EVENT UPSETS
SEU and SEL response of the Westinghouse 64K E-2PROM, analog devices AD7876 12-bit ADC, and the Intel 82527 Serial Communications Controller
[DE95-003349] p 1334 N95-22086
Radiation characterization report for the GPS Receiver microcontroller chip
[DE94-019169] p 1335 N95-22165

SINGULARITY (MATHEMATICS)
The method of auxiliary mapping for the finite element solutions of elasticity problems containing singularities
[AD-A285689] p 1489 N95-20274
Energy gap structure of layered superconductors
[DE94-017885] p 1566 N95-20372
Growth series for the commutator subgroup
[PB95-111092] p 1490 N95-20452

SINKS
Surface ices in the outer solar system
p 1423 N95-21815

SINTERING
Comparison of the dynamic fatigue behavior of two monolithic SiC and an Al2O3/SiC composite
[DE94-017751] p 1225 N95-20022
Enhancement of creep resistance of a sintered S3N4 ceramic by microwave annealing
[DE94-017698] p 1265 N95-20220
Microwave sintering of ZrO2-12 mol% CeO2
[DE94-018709] p 1265 N95-20226
Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4
[DE94-631462] p 1255 N95-20909
Comparison of properties of sintered and sintered reaction-bonded silicon nitride fabricated by microwave and conventional heating
[DE95-001426] p 1275 N95-21501
B4C-SiC reaction-sintered coatings on graphite plasma facing components
[DE94-019105] p 1230 N95-21553
Collocated tunable wavenumber sensor/actuators for smart structures
[AD-A279066] p 1258 N95-21575
Tailoring suspension flow for the gelcasting of oxide and nonoxide ceramics
[DE95-001351] p 1277 N95-21861
The thermal conductivity of silicon nitride with molybdenum disilicide additions
[DE94-017757] p 1247 N95-22260
Overview of rapid prototyping technologies in manufacturing
[PB95-127122] p 1472 N95-22372
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 3: Sintered reaction bonded silicon nitride ceramic
[AD-A285773] p 1388 N95-22411

SISO (CONTROL SYSTEMS)
Modeling and identification of parallel and feedback nonlinear systems
[DE95-001006] p 1481 N95-20812

SITE SELECTION
Acoustic Thermometry of Ocean Climate (ATOC): Selection of California source site
[AD-A279295] p 1436 N95-21987
SIZE (DIMENSIONS)
Scale-up and modeling of forced chemical vapor infiltration
[DE94-017769] p 1340 N95-20781
SIZE DISTRIBUTION
Mean field analysis of orientation selective grain growth driven by interface-energy anisotropy
[DE94-015797] p 1566 N95-20399
SKEWNESS
Fully developed turbulent flows
[AD-A286496] p 1358 N95-22294
SKIN FRICTION
Application of Navier-Stokes code PAB3D with kappa-epsilon turbulence model to attached and separated flows
[NASA-TP-3480] p 1201 N95-21338
Drag reduction strategies p 1361 N95-22453
SKIN TEMPERATURE (BIOLOGY)
Thermal resistance of the cheek in cold air
[AD-A286257] p 1446 N95-22001
SKY SURVEYS (ASTRONOMY)
PRSPLOT6 manual
[PB95-110862] p 1456 N95-19928
Twentysixth YERAC
[PB95-127437] p 1599 N95-21347
MEM application to IRAS CPC images
p 1592 N95-21751
In search of random noise p 1592 N95-21753
SLABS
Analytic models for beam propagation and far-field patterns in slab and bow-tie x ray lasers
[DE94-016607] p 1372 N95-21173
Error analysis of the quadratic nodal expansion method in slab geometry
[DE95-001352] p 1492 N95-21285
Loss of solar He and Ne from IDPS in subducting sediment: Diffusion and the effect of phase changes
p 1419 N95-21792
Seismic evidence for volatiles at large depth in the Earth p 1422 N95-21808
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813
SLAGS
Theoretical-experimental study on the electroslag remelting technology of high quality steels
[DE94-629216] p 1256 N95-21270
SLEEP DEPRIVATION
Behavioral effects of tyrosine during sustained wakefulness
[AD-A279789] p 1441 N95-20307
SLEWING
Input shaping for vibration-damped slewing of a flexible beam using a heavy-lift hydraulic robot
[DE94-015803] p 1379 N95-20695
SLIDING
Overview on superplasticity research on small-grained materials
[DE94-016550] p 1266 N95-20316
The processing and mechanical properties of high temperature/high performance composites. Stress redistribution and notch properties, book 2
[AD-A279737] p 1227 N95-20429
Test fixture for determination of energy absorbing capabilities of composite materials
[NASA-CASE-LAR-15212-1-CU] p 1229 N95-21008
Creep behavior in SiC whisker-reinforced alumina composite
[DE95-001071] p 1231 N95-21776
The role of grain boundary sliding on creep deformation characteristics of discontinuous reinforced composites
[DE95-001671] p 1231 N95-21924
SLIDING FRICTION
Wear resistant composite structure of vitreous carbon containing convoluted fibers
[DE95-002254] p 1228 N95-20787
Friction and wear properties of as-deposited and carbon ion-implanted diamond films
[NASA-TM-106759] p 1274 N95-21252
On the origins and modeling of frictional behavior in interfacially-complex sliding contacts
[DE94-019129] p 1381 N95-21601
SLUDGE
Anaerobic Treatment of Municipal Solid Waste and Sludge for Energy Production and Recycling of Nutrients
[DE95-700217] p 1315 N95-20369
Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456
SLURRIES
Tailoring suspension flow for the gelcasting of oxide and nonoxide ceramics
[DE95-001351] p 1277 N95-21861
SMART STRUCTURES
Collocated tunable wavenumber sensor/actuators for smart structures
[AD-A279608] p 1312 N95-19958
Collected papers of the Soar/IFOR project, Spring 1994
[AD-A280063] p 1216 N95-20624
Launch vehicle flight control augmentation using smart materials and advanced composites (CDDF Project 93-05)
[NASA-TP-3535] p 1218 N95-21346
Collocated tunable wavenumber sensor/actuators for smart structures
[AD-A279066] p 1258 N95-21575
Non-linear A/D converters for integrated silicon smart sensors
[PB94-208402] p 1330 N95-21590
Materials for adaptive structural acoustic controls
[AD-A279255] p 1505 N95-21863
SMEAR
Conservative smoothing versus artificial viscosity
[DE95-001108] p 1341 N95-20831
SMELTING
Flow and heat transfer simulation in a flash smelting furnace
[PB95-108197] p 1354 N95-21649
SMOG
Analysis of invalid emission testing in the California smog check program
[PB95-128922] p 1406 N95-21373
Assessment of the atmospheric hazards and risks of new chemicals: Procedures to estimate hazard potentials
[PB95-107488] p 1410 N95-22186
Urban air carcinogens and their effects on health
[DE95-002259] p 1447 N95-22285
SMOKE
Fire smoke ventilation through shafts: Experiments
[PB95-132247] p 1288 N95-21978
SMOKE DETECTORS
Evaluation of state-of-the-art high speed deluge systems presently in service at various US Army ammunition plants
[AD-A279102] p 1287 N95-21598
SMOOTHING
Conservative smoothing versus artificial viscosity
[DE95-001108] p 1341 N95-20831
SOBOLEV SPACE
Squeezing and flow of energy for non linear wave equations
[PB95-111100] p 1489 N95-20172
Right inverse for the divergence operator in spaces of continuous piecewise polynomials
[PB95-127080] p 1496 N95-22369
Locking of the finite element method in thermoelasticity
[PB95-127098] p 1496 N95-22370
SOCIAL FACTORS
Beyond telecommuting: A new paradigm for the effect of telecommunications on travel
[DE95-001224] p 1289 N95-20214
SODAR
An evaluation of 915-MHz radar wind profiler/RASS by tower and sodar measurements
[DE94-018913] p 1364 N95-20320
SODIUM
Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268
Tests of dielectric model descriptions of chemical charge displacements in water
[DE94-007530] p 1236 N95-20277
Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818
SODIUM COMPOUNDS
NMR relaxation behavior of the head group of SHBS in lamellar liquid crystals
[AD-A279124] p 1574 N95-21599
SODIUM HYDROXIDES
An investigation of the applicability of the new ion exchange resin, Reillex(TM)-HPQ, in ATW separations
[DE94-016576] p 1274 N95-21234
Catalyzed reduction of nitrate in aqueous solutions
[DE94-017660] p 1247 N95-22049
SODIUM ISOTOPES
Laser trapping of Na-21 atoms
[DE95-002354] p 1513 N95-20629
SODIUM NITRATES
An investigation of the applicability of the new ion exchange resin, Reillex(TM)-HPQ, in ATW separations
[DE94-016576] p 1274 N95-21234
SODIUM SULFATES
The application of electrodialysis to extend the lifetime of commercial electroplating baths
[DE95-000868] p 1246 N95-22012
A transmission electron microscope characterization of sodium sulfate hot corrosion of silicon carbide fiber-reinforced lithium aluminosilicate glass-ceramic matrix composite
[AD-A286164] p 1231 N95-22038
SODIUM SULFUR BATTERIES
Progress in the development of recycling processes for electric vehicle batteries
[DE94-015894] p 1324 N95-20626
SODIUM 22
Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy
[DE94-629992] p 1239 N95-20736
SOFTWARE ENGINEERING
A construct for describing software development risks
[AD-A284923] p 1457 N95-19999
Software fault tree analysis of concurrent Ada processes
[AD-A284979] p 1457 N95-20042
Evaluation of Borland Turbo Vision
[AD-A279873] p 1459 N95-20184
Comparison of Ward and Mellor's transformation schema with State- and Activitycharts
[PB95-110698] p 1459 N95-20258
Software merge: Semantics of combining changes to programs
[AD-A279657] p 1459 N95-20304
Towards better quality and reliability in the software reuse library environment
[AD-A280013] p 1460 N95-20313
Proceedings of the 4th Systems Reengineering Technology Workshop
[AD-A285357] p 1460 N95-20546
Automation support for concurrent software engineering
[AD-A279691] p 1461 N95-20579
The design of a parallel, dense linear algebra software library: Reduction to Hessenberg, tridiagonal, and bidiagonal form
[DE94-018123] p 1491 N95-20701
A new process for acquiring software architecture
[AD-A286012] p 1462 N95-20721
A software process framework for the Software Engineering Institute's (SEI) capability maturity model
[AD-A286595] p 1462 N95-20765
Software Capability Evaluation (SCE), version 2.0 team members guide
[AD-A286082] p 1462 N95-20809
Rate monotonic analysis for real-time systems: Instructors guide
[AD-A286083] p 1463 N95-20810
Backward error recovery in redundant disk arrays
[AD-A286064] p 1463 N95-20846
Real-time reconfiguration study
[AD-A286060] p 1464 N95-20910
User interface software tools
[AD-A286056] p 1466 N95-21325
Support to the development of high-level graphics software
[PB95-131686] p 1466 N95-21349
Generalised approach to software structure metrics
[PB95-107561] p 1467 N95-21411
Design and implementation of a dual-beam printed antenna for a reception in angular diversity on a Hertzien cluster (or bundle)
[PB95-131603] p 1302 N95-21431
Benefits of CMM-based software process improvement: Executive summary of initial results
[AD-A286444] p 1468 N95-21567
Interim profile: Development and trial of a method to rapidly measure software engineering maturity status
[AD-A279074] p 1468 N95-21627
CAiSE 1994 Doctoral Consortium
[PB95-135182] p 1469 N95-21711
Proceedings of the 5th Workshop on the Next Generation of CASE Tools
[PB95-135208] p 1469 N95-21716
Using the CoRE requirements method with ADARTS. Version 01.00.05
[AD-A279151] p 1470 N95-21972
Artificial Intelligence (AI) and Ada: Integrating AI with mainstream software engineering
[AD-A286093] p 1485 N95-22226
An assessment of European parallel software research
[AD-A286357] p 1479 N95-22257
Incremental rederivation of software artifacts: FY 1993
[AD-A285790] p 1473 N95-22402

SOFTWARE RELIABILITY
Measuring software dependability by robustness benchmarking
[AD-A280053] p 1461 N95-20622
An empirical approach to logical clustering of software failure regions
[AD-A279863] p 1462 N95-20776
Environment for Test and Analysis of Distributed Software (ETADS)
[AD-A285776] p 1463 N95-20877
The iMAPS: General information
[AD-A285421] p 1465 N95-21176
Radio-science performance analysis software
p 1305 N95-21540
A method to determine the kinematics of the lower limbs of a subject pedaling a bicycle using encoders and accelerometers
[NASA-CR-197401] p 1453 N95-21866

SOFTWARE REUSE
Towards better quality and reliability in the software reuse library environment
[AD-A280013] p 1460 N95-20313
Proceedings of the 5th Workshop on the Next Generation of CASE Tools
[PB95-135208] p 1469 N95-21716

SOFTWARE TOOLS
Introduction to the FIRE engine: A C++ toolkit for Finite automata and Regular Expressions
[PB95-110599] p 1456 N95-19891
Facsimile transmission standards
[AD-A279911] p 1290 N95-20308
RALPAR-RAL mesh partitioning program version 1.1
[PB95-129847] p 1475 N95-20435
Improving Multichip Module (MCM) design and reliability using the Intelligent MCM Analyzer
p 1209 N95-20637
Computer graphics tools for visualizing gravity gradient torques on a rigid spacecraft
[AD-A285971] p 1461 N95-20665
TBell: A mathematical tool for analyzing decision tables
[NASA-CR-195027] p 1462 N95-20691
HASSP and HEAVY: Tools for automated heavy atom searches and refinement
[DE94-016071] p 1569 N95-20696
A new process for acquiring software architecture
[AD-A286012] p 1462 N95-20721
The iMAPS: General information
[AD-A285421] p 1465 N95-21176
User interface software tools
[AD-A286056] p 1466 N95-21325
Support to the development of high-level graphics software
[PB95-131686] p 1466 N95-21349
Design and implementation of the FIRE engine: A c++ toolkit for finite automata and regular expressions
[PB95-132924] p 1467 N95-21415
GRONICs-1994. Proceedings of the 1994 Groningen Student Conference on Computer Science
[PB95-135620] p 1468 N95-21455
Monomer mapping: A PC-based software tool facilitating the determination of monomer compositions from mass spectrometric molecular weight data
[PB95-132155] p 1275 N95-21470
An MCM concurrent engineering software tool market study
[AD-A279257] p 1468 N95-21489
Radio-science performance analysis software
p 1305 N95-21540
DBASE 4 basics
[DE94-018323] p 1469 N95-21713
Proceedings of the 5th Workshop on the Next Generation of CASE Tools
[PB95-135208] p 1469 N95-21716
Verification of knowledge-based reasoning modules
[PB95-132692] p 1470 N95-21983
The navigation toolkit
[NASA-CR-197290] p 1205 N95-22161
Quality characteristics and metrics for reusable software
[PB94-203437] p 1473 N95-22390

SOIL EROSION
A multispectral scanner survey of the Idaho National Engineering Laboratory and the Hanford Reservation
[DE95-003922] p 1391 N95-22398

SOIL MAPPING
A multispectral scanner survey of the Idaho National Engineering Laboratory and the Hanford Reservation
[DE95-003922] p 1391 N95-22398

SOIL MECHANICS
Geomaterial models and numerical analysis of softening
[PB95-135380] p 1386 N95-21006

SOIL MOISTURE
The effect of regional-scale soil-moisture deficits on mesoscale atmospheric dynamics that influence fire severity
[DE95-002682] p 1413 N95-20455

SOIL SCIENCE
Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596

SOILS
Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456
Geomaterial models and numerical analysis of softening
[PB95-135380] p 1386 N95-21006
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507
Fiber-optic sensors for rapid, inexpensive characterization of soil and ground water contamination
[DE95-002471] p 1545 N95-21510
Descriptions of WHOI sediment cores, volume 8
[AD-A279444] p 1436 N95-22073
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
Micrometeorological methods for measurements of mercury emissions over contaminated soils
[DE94-017679] p 1411 N95-22342
Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381

SOL-GEL PROCESSES
Design, synthesis and characterization of novel nonlinear optical materials
[AD-A285617] p 1540 N95-19897
Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047
Novel electrochemical materials prepared by sol-gel chemistry
[AD-A286310] p 1226 N95-20092
International collaboration program on innovative chemical processing of superior electronic and optical materials
[AD-A285122] p 1226 N95-20105
Zirconia precipitates and zirconia: GeO2 interphase in mullite matrix-SiC woven fabrics composites prepared through a sol-gel route
[PB95-133427] p 1275 N95-21272
Gradient index lenses from sol-gel layering
[AD-A285649] p 1242 N95-21402

SOLAR ACTIVITY EFFECTS
Variability of total electron content in the high-altitude ionosphere following solar maximum
[AD-A285849] p 1425 N95-21833

SOLAR ARRAYS
Proceedings of the 13th Space Photovoltaic Research and Technology Conference (SPRAT 13)
[NASA-CP-3278] p 1316 N95-20502
Goddard Space Flight Center solar array missions, requirements and directions p 1316 N95-20503
BMDO photovoltaics program overview
p 1316 N95-20504
Europe's space photovoltaics programme
p 1316 N95-20506
Parasitic current collection by solar arrays in LEO
p 1321 N95-20527
Preliminary results from the flight of the Solar Array Module Plasma Interactions Experiment (SAMPIE)
p 1321 N95-20529
Post-flight investigation programmes of recently retrieved solar generators p 1321 N95-20531
High-performance, flexible, deployable array development for space applications
p 1322 N95-20532
Static stability of a three-dimensional space truss
p 1220 N95-20533
An update on the development of a line-focus refractive concentrator array p 1322 N95-20534
An introduction to the Astro Edge solar array
p 1322 N95-20535
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-197339] p 1397 N95-22336

SOLAR CELLS
Polycrystalline thin film cadmium telluride solar cells fabricated by electrodeposition
[DE94-011848] p 1391 N95-20118
The First NREL Conference on Thermophotovoltaic Generation of Electricity: Proceedings
[DE94-011831] p 1391 N95-20332
Polycrystalline CuInSe2 and CdTe solar cells
[DE94-011875] p 1392 N95-20333
Novel thin-film CuInSe2 fabrication
[DE94-011874] p 1268 N95-20472
Proceedings of the 13th Space Photovoltaic Research and Technology Conference (SPRAT 13)
[NASA-CP-3278] p 1316 N95-20502
Goddard Space Flight Center solar array missions, requirements and directions p 1316 N95-20503
BMDO photovoltaics program overview
p 1316 N95-20504
Europe's space photovoltaics programme
p 1316 N95-20506
High-efficiency, deep-junction, epitaxial InP solar cells on (100) and (111)B InP substrates
p 1316 N95-20507
Chemical beam epitaxy for high efficiency photovoltaic devices p 1316 N95-20508
Status of diffused junction p+n InP solar cells for space applications p 1317 N95-20509
High quality InP-on-Si for solar cell applications
p 1317 N95-20510
P/N InP solar cells on Ge wafers
p 1317 N95-20511
Status of flexible CIS research at ISET
p 1317 N95-20512
Development of a lightweight, light-trapped, thin GaAs solar cell for spacecraft applications
p 1318 N95-20513
Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514
Amorphous silicon thin films: The ultimate lightweight space solar cell p 1318 N95-20515
Modeling of high efficiency solar cells under laser pulse for power beaming applications p 1318 N95-20516
Calculation of near optimum design of InP/In(0.53)Ga(0.47)As monolithic tandem solar cells
p 1318 N95-20517
Performance, defect behavior and carrier enhancement in low energy, proton irradiated p+nn+ InP solar cells
p 1319 N95-20518
Electron-irradiated two-terminal, monolithic InP/Ga0.47In0.53As tandem solar cells and annealing of radiation damage p 1319 N95-20519
Design of high-efficiency, radiation-hard, GaInP/GaAs solar cells p 1319 N95-20521
Investigation of the stability and 1.0 MeV proton radiation resistance of commercially produced hydrogenated amorphous silicon alloy solar cells p 1320 N95-20522
The use of displacement damage dose to correlate degradation in solar cells exposed to different radiations
p 1320 N95-20523
Annealing of irradiated n+p InP buried homojunctions
p 1320 N95-20524
Qualification test results for blue-red reflecting solar covers p 1320 N95-20525
UV testing of INTELSAT-7, 7A, and 8 solar cells
p 1320 N95-20526
Parasitic current collection by solar arrays in LEO
p 1321 N95-20527
Final results of the advanced photovoltaic experiment
p 1321 N95-20528
Preliminary results from the flight of the Solar Array Module Plasma Interactions Experiment (SAMPIE)
p 1321 N95-20529
Photovoltaic electric power applied to Unmanned Aerial Vehicles (UAV) p 1321 N95-20530
Post-flight investigation programmes of recently retrieved solar generators p 1321 N95-20531
Review of solar cell temperature coefficients for space
p 1323 N95-20541
Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs
p 1323 N95-20542
Si concentrator solar cell development
[DE95-002314] p 1393 N95-20870
Development of concentrator solar cells
[DE95-002316] p 1394 N95-20871
Processing and modeling issues for thin-film solar cell devices
[DE94-011895] p 1394 N95-21294
Non-H2Se, ultra-thin CuInSe2 devices
[DE94-011894] p 1395 N95-21844
Transient photoluminescence measurements on GaAs and AlGaAs double heterostructures
[AD-A279408] p 1575 N95-21916
The role of point defects and defect complexes in silicon device processing
[DE94-011876] p 1279 N95-22091
Performance of Ga(0.47)In(0.53)As cells over a range of proton energies
[NASA-TM-106819] p 1334 N95-22112
Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-197339] p 1397 N95-22336

Advanced energy systems and technologies research programme
[DE95-717486] p 1397 N95-22337

SOLAR COLLECTORS

An update on the development of a line-focus refractive concentrator array p 1322 N95-20534

An introduction to the Astro Edge solar array
p 1322 N95-20535

An overview: Component development for solar thermal systems
[DE95-001623] p 1393 N95-20862

Accelerated life testing of solar energy materials: Case study of some selective solar absorber coating materials for DHW systems. A report of task 10 solar materials research and development
[PB95-132411] p 1397 N95-22362

Solar collector manufacturing activity 1993
[DE94-017340] p 1398 N95-22429

SOLAR CORONA

Coronagraphic observations and analyses of the ultraviolet solar corona
[NASA-CR-197370] p 1602 N95-20558

SOLAR DYNAMIC POWER SYSTEMS

Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952

Mars power system concept definition study. Volume 1: Study results
[NASA-CR-195420-VOL-1] p 1396 N95-21952

Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953

SOLAR ELECTRIC PROPULSION

CALIOPE and TAISIR airborne experiment platform
[DE94-018328] p 1310 N95-22299

SOLAR ELECTRONS

Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377

SOLAR ENERGY

A photophysical control mechanism for zeaxanthin-associated radiationless energy dissipation in photosynthesis
[DE94-018383] p 1437 N95-19969

Research in the chemical sciences: Summaries of FY 1994
[DE94-015427] p 1223 N95-20264

Recent National Solar Thermal Test Facility activities, in partnership with industry
[DE95-001828] p 1394 N95-21353

Advanced energy systems and technologies research programme
[DE95-717486] p 1397 N95-22337

Indian Academy of Sciences. Volume 105, number 6, December 1993. Proceedings of the 2nd International Conference on Solar Energy Storage Applied Photochemistry
[AD-A286481] p 1605 N95-22394

SOLAR ENERGY ABSORBERS

Accelerated life testing of solar energy materials: Case study of some selective solar absorber coating materials for DHW systems. A report of task 10 solar materials research and development
[PB95-132411] p 1397 N95-22362

SOLAR ENERGY CONVERSION

An update on the development of a line-focus refractive concentrator array p 1322 N95-20534

Translational-energy-resolved studies of photographed carrier-induced reactions on semiconductor surfaces
[DE95-002944] p 1573 N95-21444

Electrostatic basis for molecular recognition in photosynthesis
[DE95-002979] p 1440 N95-22075

SOLAR FLARES

Solar flare MDH
[AD-A279894] p 1602 N95-20593

Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713

Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722

Solar-geophysical data number 601, September 1994. Part 2: (Comprehensive reports). Data for March 1994, and miscellaneous
[PB95-136735] p 1603 N95-20829

Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919

Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377

SOLAR FLUX

The solar neutrino problem: Neither astrophysics nor oscillations?
[DE94-012850] p 1603 N95-21316

Boron neutrino flux and the MSW solution of the solar neutrino problem
[DE95-001861] p 1521 N95-21443

The solar flux of thermal neutrinos and antineutrinos of all flavors
[DE95-003204] p 1604 N95-22085

SOLAR GENERATORS

Research on the promotion measures to introduce new energy and energy-saving technologies with a leasing system
[DE95-714801] p 1375 N95-22079

Solar collector manufacturing activity 1993
[DE94-017340] p 1398 N95-22429

SOLAR GRAVITATION

Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064

SOLAR HEATING

Accelerated life testing of solar energy materials: Case study of some selective solar absorber coating materials for DHW systems. A report of task 10 solar materials research and development
[PB95-132411] p 1397 N95-22362

SOLAR MAGNETIC FIELD

Neutrino magnetic moments and the solar neutrino problem
[DE94-017579] p 1602 N95-20147

Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713

Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919

Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377

SOLAR NEUTRINOS

Neutrino magnetic moments and the solar neutrino problem
[DE94-017579] p 1602 N95-20147

The solar neutrino problem: Neither astrophysics nor oscillations?
[DE94-012850] p 1603 N95-21316

Boron neutrino flux and the MSW solution of the solar neutrino problem
[DE95-001861] p 1521 N95-21443

The 9th INS scientific computational programs
[DE94-770780] p 1526 N95-22051

Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064

The solar flux of thermal neutrinos and antineutrinos of all flavors
[DE95-003204] p 1604 N95-22085

SOLAR OSCILLATIONS

The solar neutrino problem: Neither astrophysics nor oscillations?
[DE94-012850] p 1603 N95-21316

SOLAR PHYSICS

Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713

Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722

Solar-geophysical data number 601, September 1994. Part 2: (Comprehensive reports). Data for March 1994, and miscellaneous
[PB95-136735] p 1603 N95-20829

Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919

Twentysixth YERAC
[PB95-127437] p 1599 N95-21347

The solar flux of thermal neutrinos and antineutrinos of all flavors
[DE95-003204] p 1604 N95-22085

SOLAR PROPULSION

The 1993 JANNAF Propulsion Meeting, volume 2
[AD-A279569] p 1221 N95-20708

SOLAR PROTONS

Coronagraphic observations and analyses of the ultraviolet solar corona
[NASA-CR-197370] p 1602 N95-20558

SOLAR RADIATION

Radiance of the ocean horizon
[AD-A285613] p 1431 N95-19896

Solar Radiation Resource Assessment Project
[DE94-000286] p 1392 N95-20778

The solar neutrino problem: Neither astrophysics nor oscillations?
[DE94-012850] p 1603 N95-21316

Absolute, Extreme-ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A279345] p 1603 N95-21929

Solar wind composition
[NASA-TM-197364] p 1604 N95-22384

SOLAR RADIO BURSTS

Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722

Solar-geophysical data number 601, September 1994. Part 2: (Comprehensive reports). Data for March 1994, and miscellaneous
[PB95-136735] p 1603 N95-20829

SOLAR RADIO EMISSION

Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713

Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919

SOLAR REFLECTORS

Qualification test results for blue-red reflecting solar covers p 1320 N95-20525

SOLAR SIMULATORS

The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-197339] p 1397 N95-22336

SOLAR SPECTRA

Absolute, Extreme-ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A279345] p 1603 N95-21929

SOLAR SYSTEM

Impact degassing of water and noble gases from silicates p 1416 N95-21780

Dynamics of volatile delivery from outer to inner solar system p 1420 N95-21798

Nitrogen isotopic components in the early solar system p 1420 N95-21800

Solar system formation and the distribution of volatile species p 1421 N95-21806

Comets, impacts, and atmospheres
p 1422 N95-21810

Surface ices in the outer solar system
p 1423 N95-21815

SOLAR THERMAL ELECTRIC POWER PLANTS

Bridging worlds/charting new courses
[DE95-003808] p 1397 N95-22335

SOLAR WIND

Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377

Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796

Potential flow downstream of the heliospheric terminal shock: A non-spherical shock
[NASA-TM-110493] p 1426 N95-21874

Solar wind composition
[NASA-TM-197364] p 1604 N95-22384

SOLAR X-RAYS

Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722

Solar-geophysical data number 601, September 1994. Part 2: (Comprehensive reports). Data for March 1994, and miscellaneous
[PB95-136735] p 1603 N95-20829

Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919

SOLDERED JOINTS

Survivability of soldered leadless chip carriers after temperature cycling
[DE95-001497] p 1329 N95-21301

Strength testing of Ti-vapor-coated silicon nitride braze joints
[DE94-017858] p 1280 N95-22266

SOLDERING

Survivability of soldered leadless chip carriers after temperature cycling
[DE95-001497] p 1329 N95-21301

SOLDERS

The reliability of laser reflowed Sn-Ag solder joints
[AD-A279787] p 1315 N95-20443

Survivability of soldered leadless chip carriers after temperature cycling
[DE95-001497] p 1329 N95-21301

SOLID CRYOGENS
Two-center, two electron excitations identified in NEXAFS for solid Ne
[AD-A285373] p 1568 N95-20553
Hydrogen and related materials at high density: Physics, chemistry and planetary implications
p 1418 N95-21791
SOLID ELECTROLYTES
Inert gas purification and measuring oxygen partial pressure in gas mixtures with EMF method based on solid electrolyte cell
[PB95-127767] p 1240 N95-21110
The development of a new plasticizer for poly(ethylene oxide) based polymer electrolyte and the investigation of their ion-pair dissociation effect
[DE94-016821] p 1276 N95-21644
SOLID LUBRICANTS
Evaluation of PS 212 coatings under boundary lubrication conditions with an Ester-based oil to 300 C
[NASA-TM-106763] p 1223 N95-19901
SOLID MECHANICS
Parallel solid mechanics codes at Sandia National Laboratories
[DE94-015770] p 1474 N95-20152
Transactions of the Eleventh Army Conference on Applied Mathematics and Computing
[AD-A279884] p 1497 N95-22389
SOLID PHASES
Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy
[DE94-009757] p 1237 N95-20470
Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513
SOLID PROPELLANT ROCKET ENGINES
Radiation from advanced solid rocket motor plumes
[NASA-CR-196554] p 1221 N95-20124
Computer model predictions of the local effects of large, solid-fuel rocket motors on stratospheric ozone
[AD-A285632] p 1404 N95-21150
Nonlinear acoustic processes in a solid rocket engine
[AD-A285606] p 1222 N95-21193
SOLID PROPELLANTS
Integral rocket ramjets
[AD-A285135] p 1222 N95-20906
SOLID ROCKET PROPELLANTS
The 1993 JANNAF Propulsion Meeting, volume 2
[AD-A279569] p 1221 N95-20708
SOLID SOLUTIONS
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126
New thermodynamic description of the Cu-Zr system
[PB95-127189] p 1263 N95-22374
SOLID STATE
Israel Physical Society Annual Meeting 1994
[DE94-630140] p 1565 N95-20261
Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268
Development of solid state moisture sensors for semiconductor fabrication applications
[DE94-015771] p 1364 N95-20398
Applied physics research for innovation in pulsed power
[AD-A285392] p 1324 N95-20610
Solid state frequency conversion technology for remote sensing
[DE94-019102] p 1389 N95-21433
Solid-state NMR characterization of C- and N-labelled phthalimides: Model compounds for studying polyimides
[AD-A286479] p 1578 N95-22286
Multi signal-domain modeling of solid-state transducers: A theoretical framework based on irreversible thermodynamics mixed finite elements and multigrid
[PB95-134995] p 1336 N95-22382
SOLID STATE DEVICES
Solid-state dynamics and quantum transport in novel semiconductor nanostructures
[AD-A285946] p 1315 N95-20394
Equilibrium and shot noise in mesoscopic systems
[DE95-000855] p 1576 N95-22008
SOLID STATE LASERS
Scaling of solid state lasers for satellite power beaming applications
[DE94-016366] p 1368 N95-19986
Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG
[AD-A285857] p 1369 N95-20378
Solid state frequency conversion technology for remote sensing
[DE94-019102] p 1389 N95-21433
High average power diode pumped solid state lasers for CALIOPE
[DE94-019248] p 1376 N95-22121
3-D TECATE/BREW: Thermal, stress, and birefringent ray-tracing codes for solid-state laser design
[DE95-000330] p 1376 N95-22301
SOLID WASTES
Anaerobic Treatment of Municipal Solid Waste and Sludge for Energy Production and Recycling of Nutrients
[DE95-700217] p 1315 N95-20369
Possible global environmental impacts of solid waste practices
[DE95-000830] p 1406 N95-21487
Investigation on research for degradable plastics
[DE94-796550] p 1277 N95-21714
SOLID-SOLID INTERFACES
Energetics, bonding mechanism and electronic structure of ceramic/ceramic and metal/ceramic interfaces
[DE95-000601] p 1265 N95-20115
Nonlinear optical studies of polymer interfaces
[DE94-018199] p 1274 N95-21263
SOLIDIFICATION
Processing and characterization of Ni-Al-Fe-B shape-memory alloy wires produced by rapid solidification
[DE94-017702] p 1250 N95-20020
Solidification modeling of a spiral casting to determine material fluidity
[DE94-018930] p 1285 N95-20050
X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798
Metastable bcc phase formation in the Nb-Cr-Ti system
[DE94-016212] p 1255 N95-21137
Weld pool phenomena
[DE94-018965] p 1381 N95-21550
Relationship between dendrite coherency and castability of some commercial foundry alloys
[PB95-110243] p 1258 N95-21652
A new metallographic procedure for edge retention of enclosed surfaces
[DE94-017549] p 1261 N95-22048
Gravitational effects on the development of weld-pool and solidification microstructures
[DE94-017772] p 1285 N95-22261
SOLIDIFIED GASES
Two-center, two electron excitations identified in NEXAFS for solid Ne
[AD-A285373] p 1568 N95-20553
Identification of resonant, two-electron, and inter-atomic features in K and L23 NEXAFS spectra
[AD-A285374] p 1513 N95-20554
SOLIDS
Properties of molecular solids and fluids at high pressure and temperature
[DE94-017594] p 1565 N95-20243
Photoemission and ferromagnetism
[DE95-002419] p 1520 N95-21362
The role of microcracking on the crack growth resistance of brittle solids and composites
[DE95-001678] p 1231 N95-21736
The low temperature properties of (Dy(1-x)Er(x))Ni2 alloys
[DE95-001657] p 1260 N95-21923
Variational Monte Carlo study of He-4 in two dimensions
[DE94-629078] p 1576 N95-21998
Surfaces and thin films studied by picosecond ultrasonics
[DE95-001866] p 1506 N95-22071
Fluid dynamics of the freeboard in a fluidized bed reactor
[PB95-134029] p 1357 N95-22160
SOLIDUS
Fusion welding of advanced borated stainless steels
[DE94-019037] p 1378 N95-20053
SOLITARY WAVES
Understanding the mechanisms of length scale competition: The sine-Gordan soliton case
[DE94-016201] p 1500 N95-21136
New improved derivative expansion for field theories with spontaneous symmetry breaking
[DE94-019349] p 1580 N95-21486
On the influence of electromagnetic wave and relativistic electron beam on a plasma
[DE94-628962] p 1561 N95-21848
Electromagnetic waves in an ultrarelativistically hot and strongly magnetized electron-positron plasma
[DE94-628963] p 1307 N95-21849
SOLUBILITY
The preparation of all para-polyphenyls with increased solubility and enhanced third order NLO activity
[AD-A284301] p 1266 N95-20251
Water-soluble polyphosphazenes and their hydrogels
[AD-A279695] p 1269 N95-20580
Assessment of database for interaction of tritium with ITER plasma facing materials
[DE95-002038] p 1558 N95-21290
A visual cell for measuring the solubility of prograde soluble salts in water at high temperatures and pressures
[DE95-002058] p 1245 N95-21732
Rare gases systematics and mantle structure
p 1416 N95-21778
Solubilities of nitrogen and noble gases in basalt melt
p 1422 N95-21807
Is xenon eldest? p 1425 N95-21823
Solubilities of nitrogen and helium in water and blood at 37 C and pressures of up to 11 ATA
[AD-A286269] p 1446 N95-22003
SOLUTIONS
Control of continuous phase PH using visible light to activate PH-dependent fibers and gels in a controlled and reversible manner
[AD-D016532] p 1543 N95-20728
Molecular-based study of solutions in supercritical solvents
[DE94-019326] p 1580 N95-21420
SOLVATION
Tests of dielectric model descriptions of chemical charge displacements in water
[DE94-007530] p 1236 N95-20277
SOLVENTS
Theoretical and experimental study of mixed solvent electrolytes
[DE94-017605] p 1237 N95-20384
Thermodynamic and NMR studies of solvent effect on enantiomeric recognition for a chiral organiz ammonium cation by chiral diketopyridino-18-Crown-6 type ligands at 25.0 C
[AD-A279893] p 1223 N95-20592
Molecular-based study of solutions in supercritical solvents
[DE94-019326] p 1580 N95-21420
SONAR
Transducers with improved signal transfer field of the invention
[AD-D016228] p 1328 N95-21118
Unknown-terrains navigation of a mobile robot using an array of sonars
[DE94-017902] p 1482 N95-21385
SOOT
Aromatics oxidation and soot formation in flames
[DE95-001803] p 1241 N95-21280
SORBENTS
Laboratory evaluation of a reactive baffle approach to NOx control
[AD-A283802] p 1400 N95-19921
SORPTION
An investigation of the applicability of the new ion exchange resin, Reillex(TM)-HPQ, in ATW separations
[DE94-016576] p 1274 N95-21234
Siloxanes with strong hydrogen bond donating functionalities
[AD-D016499] p 1279 N95-22057
SOS (SEMICONDUCTORS)
Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727
Method of forming a high voltage silicon-on-sapphire photocell array
[AD-D016479] p 1396 N95-21899
SOUND DETECTING AND RANGING
Josephson acoustic radiation in superfluid helium
[AD-A279809] p 1503 N95-20098
Vacuum holding fixture and method for fabricating piezoelectric polymer acoustic sensors
[NASA-CASE-LAR-14240-1] p 1268 N95-20410
Mandrel based embedded planar fiber-optic interferometric acoustic sensor
[AD-D016229] p 1504 N95-21119
Evaluation of simple spherical spreading model for near vertical acoustical propagation
[AD-A286284] p 1505 N95-22042
SOUND FIELDS
Method and system of mapping acoustic near field
[AD-D016574] p 1504 N95-20296
Fiber optic pressure sensing array
[AD-D016245] p 1506 N95-22088
SOUND GENERATORS
The Combustive Sound Source
[ARL-TR-94-9] p 1503 N95-19911
Characterization and simulation of an acoustic source moving through an oceanic waveguide
[AD-A285688] p 1503 N95-20272
Underwater Acoustic Generator Phase 2: Sea trial, March 1992
[MRL-TN-640] p 1434 N95-21657
Acoustic Thermometry of Ocean Climate (ATOC): Selection of California source site
[AD-A279295] p 1436 N95-21987
Annual research briefs, 1994
[NASA-CR-197352] p 1358 N95-22437

SOUND INTENSITY
Measurement of sound intensity and sound power
[AD-A279246] p 1505 N95-21984

SOUND PRESSURE
Measurement of sound intensity and sound power
[AD-A279246] p 1505 N95-21984
Temporary threshold shifts produced by high intensity freefield impulse noise in humans wearing hearing protection
[AD-A286289] p 1454 N95-22045
Fiber optic pressure sensing array
[AD-D016245] p 1506 N95-22088

SOUND PROPAGATION
Low frequency sound radiation from finite stiffened plates
[AD-A279395] p 1505 N95-21930
Surfaces and thin films studied by picosecond ultrasonics
[DE95-001866] p 1506 N95-22071

SOUND TRANSMISSION
Oceanographic analysis of the acoustic mid-ocean dynamics experiment
[AD-A285907] p 1432 N95-19988
Evaluation of simple spherical spreading model for near vertical acoustical propagation
[AD-A286284] p 1505 N95-22042

SOUND WAVES
Development of solid state moisture sensors for semiconductor fabrication applications
[DE94-015771] p 1364 N95-20398
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545
Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170
Nonlinear acoustic processes in a solid rocket engine
[AD-A285606] p 1222 N95-21193
Scattering of an FM signal from an array of spheres
[AD-A285587] p 1505 N95-21213
Acoustic receptivity due to weak surface inhomogeneities in adverse pressure gradient boundary layers
[NASA-TM-4577] p 1353 N95-21258
Effect of atmospheric pressure on measured aircraft noise levels
[PB95-130423] p 1207 N95-21425
Acoustoelectric effect in semiconductor superlattice
[DE94-628994] p 1575 N95-21859
Low frequency sound radiation from finite stiffened plates
[AD-A279395] p 1505 N95-21930
Surfaces and thin films studied by picosecond ultrasonics
[DE95-001866] p 1506 N95-22071
Localization phenomenon in some random classical systems
[AD-A286514] p 1309 N95-22215
Determination of the complex elastic moduli of materials using a free-free bar technique
[AD-A279861] p 1281 N95-22387

SOURCE PROGRAMS
SCOPE 1.5: A Source-Code Optimization PackagEfor REDUCE 3.5: User's manual
[PB95-107579] p 1472 N95-22159

SPACE BASED RADAR
Classical analysis methods for designing and developing downlooking radars
[AD-A285760] p 1302 N95-21405

SPACE CHARGE
Effect of space charge tune shift on transverse instabilities
[DE94-016790] p 1531 N95-20282
Enhanced ionic conduction at the film/substrate interface in LiI thin films grown on sapphire(0001)
[DE94-017884] p 1565 N95-20371
Emittance growth due to negative-mass instability above transition
[DE95-002527] p 1534 N95-20900
Behaviour of space-charge dominated ion beams in storage rings
[DE94-015845] p 1517 N95-21140

SPACE COMMERCIALIZATION
Space technology: Force multiplier or false sense of security
[AD-A279726] p 1217 N95-20995

SPACE COMMUNICATION
Seamless data-range change using punctured convolutional codes for time-varying signal-to-noise ratios p 1304 N95-21534
Turbo codes for deep-space communications
p 1304 N95-21535
CDMA with interference cancellation for multiprobe missions p 1304 N95-21536

SPACE ERECTABLE STRUCTURES
High-performance, flexible, deployable array development for space applications
p 1322 N95-20532
An introduction to the Astro Edge solar array
p 1322 N95-20535

SPACE EXPLORATION
Estimating the costs of human space exploration
p 1584 N95-20744
NASA's attack on costs p 1585 N95-20755

SPACE FLIGHT
The problem of space travel: The rocket motor
[NASA-SP-4026] p 1217 N95-21894

SPACE MISSIONS
A Clementine collection: Moonglow
[AD-A286360] p 1217 N95-20228

SPACE NAVIGATION
Orbit determination of highly elliptical Earth orbiters using improved Doppler data-processing modes
p 1218 N95-21533

SPACE PERCEPTION
Space constancy on video display terminals
[AD-A280015] p 1449 N95-20314

SPACE PLASMAS
Propulsion research on the variable tandem mirror plasma rocket
[NASA-CR-196310] p 1221 N95-20059
Preliminary results from the flight of the Solar Array Module Plasma Interactions Experiment (SAMPIE)
p 1321 N95-20529
Source mechanisms and radio effects of ionospheric plasma disturbances
[AD-A286529] p 1555 N95-21013
Electrostatic noise in the plasma environment around the shuttle
[NASA-TM-106856] p 1415 N95-21188
Magnetospheric Plasma Analyzer (MPA): Plasma observations from geosynchronous orbit
[DE95-002739] p 1427 N95-22477

SPACE POWER REACTORS
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530
Issues in the flight qualification of a space power reactor
[DE95-001606] p 1223 N95-21840
Mars power system concept definition study. Volume 1: Study results
[NASA-CR-195420-VOL-1] p 1396 N95-21952
Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953

SPACE PROGRAMS
NASA's attack on costs p 1585 N95-20755
Spinoff, 1994
[NASA-NP-214] p 1594 N95-21893

SPACE SHUTTLE MAIN ENGINE
SSME HPOTP post-test diagnostic system enhancement project
[NASA-CR-4643] p 1222 N95-21458

SPACE SHUTTLE MISSIONS
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558
Tethered satellite: Forces and motion
[NASA-TM-110518] p 1220 N95-21858
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295

SPACE SHUTTLE PAYLOADS
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295

SPACE SHUTTLES
STS 63 flight day 4 highlights/MIR-Shuttle rendezvous
[NASA-TM-110512] p 1219 N95-21113
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558

SPACE STATION POWER SUPPLIES
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530
Power systems for future missions
[NASA-CR-195320] p 1222 N95-21531
Mars power system concept definition study. Volume 1: Study results
[NASA-CR-195420-VOL-1] p 1396 N95-21952
Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953

SPACE STATION STRUCTURES
Static stability of a three-dimensional space truss
p 1220 N95-20533
Space power facility readiness for Space Station power system testing
[NASA-TM-106829] p 1218 N95-21384

SPACE TRANSPORTATION SYSTEM
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295

SPACE TRANSPORTATION SYSTEM FLIGHTS
STS 63 flight day 4 highlights/MIR-Shuttle rendezvous
[NASA-TM-110512] p 1219 N95-21113

SPACE VEHICLE CHECKOUT PROGRAM
Military standard: Test requirements for launch, upper-stage, and space vehicles
[AD-A286627] p 1218 N95-20770

SPACEBORNE ASTRONOMY
Solar-geophysical data number 601, September 1994. Part 2: (Comprehensive reports). Data for March 1994, and miscellaneous
[PB95-136735] p 1603 N95-20829
Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919
Science with High Spatial Resolution Far-Infrared Data
[NASA-CR-197353] p 1595 N95-21749
MEM application to IRAS CPC images
p 1592 N95-21751
An assessment of image reconstruction from balloon-borne and the IRAS data p 1592 N95-21752
In search of random noise p 1592 N95-21753
Far-infrared sources and diffuse emission in M31
p 1593 N95-21761

SPACEBORNE EXPERIMENTS
PRSPLOT6 manual
[PB95-110862] p 1456 N95-19928
Effect of microgravity on material undergoing melting and freezing: The TES Experiment
[NASA-TM-106845] p 1338 N95-19952
Challenger's night flight
[NASA-TM-110503] p 1217 N95-19995
An overview of the Evaluation of Oxygen Interactions with Materials 3 Experiment: Space Shuttle Mission 46; July-August, 1992
[NASA-TM-110129] p 1412 N95-20278
Final results of the advanced photovoltaic experiment
p 1321 N95-20528
Preliminary results from the flight of the Solar Array Module Plasma Interactions Experiment (SAMPIE)
p 1321 N95-20529
Microgravity: Teacher's guide with activities for physical science
[NASA-EG-103] p 1285 N95-21322
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507
STS 63: Post flight presentation
[NASA-TM-110514] p 1219 N95-21558
Tethered satellite: Forces and motion
[NASA-TM-110518] p 1220 N95-21858
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295
The Double Eagle Space Experiment (DESE) beamline design
[DE94-018319] p 1601 N95-22419

SPACEBORNE TELESCOPES
Low noise 22 GHz receiver for the radioastron satellite, part 2: Space qualification tests
[PB95-127197] p 1598 N95-22376

SPACECRAFT
Computer graphics tools for visualizing gravity gradient torques on a rigid spacecraft
[AD-A285971] p 1461 N95-20665
Issues in the flight qualification of a space power reactor
[DE95-001606] p 1223 N95-21840

SPACECRAFT ANTENNAS
Analysis of a microstrip reflectarray antenna for microspacecraft applications p 1305 N95-21541
The efficiency calibration of the DSS-24 34-meter beam-waveguide antenna p 1305 N95-21542

SPACECRAFT COMMUNICATION
Innovative use of DSP technology in space: FORTE event classifier
[DE94-016086] p 1291 N95-20697
STS 63 flight day 4 highlights/MIR-Shuttle rendezvous
[NASA-TM-110512] p 1219 N95-21113
The Deep Space Network as an instrument for radio science research
[NASA-CR-197341] p 1302 N95-21456
The Telecommunications and Data Acquisition Report
[NASA-CR-197390] p 1303 N95-21532

SPACECRAFT CONSTRUCTION MATERIALS
Preliminary results from the flight of the Solar Array Module Plasma Interactions Experiment (SAMPIE)
p 1321 N95-20529
Launch vehicle flight control augmentation using smart materials and advanced composites (CDDF Project 93-05)
[NASA-TP-3535] p 1218 N95-21346

Recent developments in low cost stable structures for space
[DE95-000857] p 1231 N95-22009

SPACECRAFT CONTROL
Control of complex multibody spacecraft
[AD-A285623] p 1220 N95-21147

SPACECRAFT DESIGN
Launch vehicle flight control augmentation using smart materials and advanced composites (CDDF Project 93-05)
[NASA-TP-3535] p 1218 N95-21346

SPACECRAFT GUIDANCE
The Telecommunications and Data Acquisition Report
[NASA-CR-197390] p 1303 N95-21532
Multiple burn fuel-optimal orbit transfers: Numerical trajectory computation and neighboring optimal feedback guidance
[NASA-CR-197317] p 1222 N95-21616

SPACECRAFT INSTRUMENTS
The Deep Space Network as an instrument for radio science research
[NASA-CR-197341] p 1302 N95-21456

SPACECRAFT LANDING
Challenger's night flight
[NASA-TM-110503] p 1217 N95-19995
STS Flight 64 mission highlights
[NASA-TM-110515] p 1219 N95-22295

SPACECRAFT MOTION
Mathematical modeling of a class of multibody flexible spacecraft structures
[NASA-TM-109166] p 1219 N95-20800

SPACECRAFT POWER SUPPLIES
Proceedings of the 13th Space Photovoltaic Research and Technology Conference (SPRAT 13)
[NASA-CP-3278] p 1316 N95-20502
Goddard Space Flight Center solar array missions, requirements and directions p 1316 N95-20503
BMDO photovoltaics program overview
p 1316 N95-20504
Development of a lightweight, light-trapped, thin GaAs solar cell for spacecraft applications
p 1318 N95-20513
Final results of the advanced photovoltaic experiment
p 1321 N95-20528
Preliminary results from the flight of the Solar Array Module Plasma Interactions Experiment (SAMPIE)
p 1321 N95-20529
High-performance, flexible, deployable array development for space applications
p 1322 N95-20532
An update on the development of a line-focus refractive concentrator array p 1322 N95-20534
An introduction to the Astro Edge solar array
p 1322 N95-20535
Review of solar cell temperature coefficients for space
p 1323 N95-20541
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530
Power systems for future missions
[NASA-CR-195320] p 1222 N95-21531

SPACECRAFT STRUCTURES
Mathematical modeling of a class of multibody flexible spacecraft structures
[NASA-TM-109166] p 1219 N95-20800
Control of complex multibody spacecraft
[AD-A285623] p 1220 N95-21147
Recent developments in low cost stable structures for space
[DE95-000857] p 1231 N95-22009

SPACECRAFT TRACKING
The Telecommunications and Data Acquisition Report
[NASA-CR-197390] p 1303 N95-21532

SPACECRAFT TRAJECTORIES
Multiple burn fuel-optimal orbit transfers: Numerical trajectory computation and neighboring optimal feedback guidance
[NASA-CR-197317] p 1222 N95-21616

SPALLING
Methods of measuring adhesion for thermally grown oxide scales
[DE94-018177] p 1256 N95-21260
Aircraft corrosion study
[AD-A279527] p 1259 N95-21687

SPARK GAPS
Investigations into alternate spark gap switching techniques
[AD-A286225] p 1308 N95-22021

SPARTAN SATELLITES
Coronagraphic observations and analyses of the ultraviolet solar corona
[NASA-CR-197370] p 1602 N95-20558

SPATIAL DEPENDENCIES
Qualification of the dependence in the generalized extreme value choice model
[PB95-110946] p 1497 N95-19936
Acoustoelectric effect in semiconductor superlattice
[DE94-628994] p 1575 N95-21859

SPATIAL DISTRIBUTION
Fitting stochastic partial differential equations to spatial data
[AD-A279870] p 1490 N95-20432
Simulations of bypass transition for spatially evolving disturbances p 1349 N95-21079
Spatial variation of primordial 3-He in crustal fluids along the East-African Rift system (the Ethiopian and the Kenya Rift section) p 1418 N95-21789
Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289
Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

SPATIAL RESOLUTION
LLNL/Lion Precision LVDT amplifier
[DE95-001504] p 1327 N95-20854
Progress in ultrafast scanning probe microscopy
[DE94-018179] p 1373 N95-21261
Science with High Spatial Resolution Far-Infrared Data
[NASA-CR-197353] p 1595 N95-21749
Pushing the limits of spatial resolution with the Kuiper Airborne observatory p 1593 N95-21754
A high resolution atlas of the galactic plane at 12 microns and 25 microns p 1593 N95-21755
Two-dimensional maps of the infrared-to-radio ratio in spiral galaxies p 1593 N95-21765
Laboratory characterization of Woelter x ray optics
[DE94-016969] p 1562 N95-22191
Measurement of residual stresses on ceramic materials with high spatial resolution
[DE94-017889] p 1280 N95-22270

SPECIFICATIONS
The advanced technology crew station: Development and validation of a workload assessment technique for cockpit function allocation
[AD-A279544] p 1453 N95-21691
Incremental rederivation of software artifacts: FY 1993
[AD-A285790] p 1473 N95-22402

SPECKLE HOLOGRAPHY
Simulation of stellar speckle imaging
[DE94-016606] p 1412 N95-19985

SPECKLE PATTERNS
Simulation of stellar speckle imaging
[DE94-016606] p 1412 N95-19985

SPECTRA
Graphs cospectral with distance-regular graphs
[PB95-111050] p 1488 N95-19943
Time domain spectral hole-burning storage
[AD-A279912] p 1587 N95-20309
Nonparametric estimation of the cyclic cross-spectrum
[AD-A285756] p 1498 N95-21219
Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818
Minimal square spectral factors
[PB95-132726] p 1495 N95-22032
Derivation of a wavenumber filter design for the measurement of turbulent wall pressure fluctuations
[AD-A286421] p 1357 N95-22208

SPECTRAL BANDS
Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418
Ultraviolet emission from rocket motor plumes
[DSTO-TR-0002] p 1222 N95-21661

SPECTRAL CORRELATION
Universal spectral correlations at the mobility edge
[DE94-629031] p 1528 N95-22217

SPECTRAL EMISSION
Rare earth garnet selective emitter
p 1322 N95-20536

SPECTRAL ENERGY DISTRIBUTION
Signal to noise improvements with a new Far-IR rapid-scan Michelson Interferometer
[DE95-002416] p 1367 N95-21638

SPECTRAL LINE WIDTH
Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

SPECTRAL METHODS
Direct simulation of tridimensional wake of NACA 0012 profile p 1350 N95-21086
Direct numerical simulation of transition to turbulence from a high-symmetry initial condition
p 1351 N95-21089
Derived gust spectra for the Macchi MB326H
[ARL-TN-3] p 1202 N95-21892

SPECTRAL REFLECTANCE
Diffuse reflectance spectra of energetic material
[DSTO-TR-0065] p 1284 N95-21951

SPECTRAL RESOLUTION
Temporal and spectral investigation of multi-Landau level quantum beats in GaAs
[DE94-018189] p 1569 N95-20678
Neutron molelcular spectroscopy: Future prospects
[PB95-130357] p 1518 N95-21227

SPECTRAL SENSITIVITY
Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE95-002257] p 1406 N95-21379
New concepts for refrigerant leak detection and mixture measurement
[DE94-018967] p 1287 N95-21559

SPECTRAL SIGNATURES
Ultraviolet emission from rocket motor plumes
[DSTO-TR-0002] p 1222 N95-21661

SPECTROGRAPHS
Characterization of nova plasmas using an x-ray spectrometer with temporal and spatial resolution
[DE94-016970] p 1553 N95-20363

SPECTROMETERS
Analysis methods for fast impurity ion dynamics data
[DE95-000589] p 1549 N95-20112
Production of J/(psi) in 800 GeV/c p-Si interactions
[DE94-017982] p 1513 N95-20496
Development, fabrication, and metrology of the electro-optical breadboard model for the reflection grating array of the XMM grating spectrometer
[DE94-016605] p 1543 N95-20612
MARI mini-manual
[PB95-134649] p 1526 N95-21965
Radiation tests on service electronics for future multi TeV detectors
[DE94-632822] p 1335 N95-22184

SPECTRORADIOMETERS
Completion of spectral rotating shadowband radiometers and analysis of ARM spectral short-wave data
[DE95-000602] p 1412 N95-20116

SPECTROSCOPIC ANALYSIS
An application of wavelet transform for decomposition of millimeter-wave spectroscopic signals
[DE94-018366] p 1402 N95-20247
An overview of the Evaluation of Oxygen Interactions with Materials 3 Experiment: Space Shuttle Mission 46; July-August, 1992
[NASA-TM-110129] p 1412 N95-20278
Electrochemical impedance pattern recognition for detection of hidden chemical corrosion on aircraft components
[AD-A284998] p 1253 N95-20481
Surface characterization and contamination analysis
[NASA-CR-197374] p 1238 N95-20557
Ultrafast magnetoexciton dynamics in GaAs
[DE94-018175] p 1514 N95-20732
Time-resolved analytical methods for liquid/solid interfaces
[DE95-002255] p 1240 N95-20780
Spectroscopic, morphological, and electrical characterization of PdGe ohmic contacts to n-GaAs
[DE95-000738] p 1329 N95-21394
Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596
Diffuse reflectance spectra of energetic material
[DSTO-TR-0065] p 1284 N95-21951

SPECTROSCOPY
Spectroscopic studies of glass structure
[DE94-016551] p 1268 N95-20468
Atomic-resolution characterization of interface structure and chemistry in the STEM
[DE94-017753] p 1567 N95-20492
Visible and near-IR spectroscopic studies of UC1(4) in a basic ambient temperature melt: The observation of a possible geometric distorted UC1(6)(exp 2-) species and the evidence for the hydrogen-bond in the melt
[DE94-017764] p 1237 N95-20493
Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors
[DE95-001073] p 1570 N95-20820
Study of small carbon and semiconductor clusters using negative ion threshold photodetachment spectroscopy
[DE95-002327] p 1515 N95-20872
Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881
Electrochemical impedance spectroscopy of trivalent chromium pre-treated aluminum alloy
[AD-A280093] p 1240 N95-20970
Advanced concepts for gamma ray isotopic analysis and instrumentation
[DE94-016610] p 1517 N95-21174
Linear and nonlinear spectroscopy with the tunable AC scanning tunneling microscope
[AD-A285751] p 1241 N95-21217
Analysis of experimentally shocked minerals by NMR spectroscopy
[DE95-002955] p 1573 N95-21449
Conceptual design analyses for Hanford Site deployable remote spectroscopy systems
[DE95-002078] p 1243 N95-21473

Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
[DE94-018092] p 1560 N95-21668

SPECTRUM ANALYSIS
Sharp determinants
[PB95-111068] p 1488 N95-19944
Higher order crossings
[AD-A279597] p 1504 N95-20300
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679
Enhancements in the Livermore spectrum analysis package PIXEF
[DE95-002487] p 1272 N95-20895
Chemical lasers emitting in the visible spectrum: Metastable oxygen reactions and YOSHIDA laser
[PB95-104485] p 1372 N95-20983
Friction and wear properties of as-deposited and carbon ion-implanted diamond films
[NASA-TM-106759] p 1274 N95-21252
Application of neural networks to seismic signal discrimination research findings
[AD-A285848] p 1415 N95-21308
Time-resolved study of sideband generation and transition to chaos on an infrared FEL
[DE95-002336] p 1374 N95-21528
The solar flux of thermal neutrinos and antineutrinos of all flavors
[DE95-003204] p 1604 N95-22085

SPEECH
Usable, real-time, interactive spoken language systems
[AD-A286349] p 1310 N95-22253

SPEECH RECOGNITION
Usable, real-time, interactive spoken language systems
[AD-A286349] p 1310 N95-22253

SPEED CONTROL
Brushless Doubly-Fed Machine system development program, phase 3
[DE94-013095] p 1315 N95-20380

SPHERES
Magnetoelectric properties of reciprocal bianisotropic materials with focus on the polarizability of chiro-omega spheres
[PB95-127650] p 1544 N95-21103
Low-frequency image theory for a current dipole in front of a permeable sphere
[PB95-127676] p 1300 N95-21104
Scattering of an FM signal from an array of spheres
[AD-A285587] p 1505 N95-21213
Novel materials and devices from self-assembled periodic structures
[AD-A286499] p 1232 N95-22211

SPHERICAL COORDINATES
Quantization in curvilinear coordinates
[DE94-770603] p 1514 N95-20737

SPHERICAL PLASMAS
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345

SPHEROMAKS
Heat loss by helicity injection in spheromaks
[DE95-003473] p 1562 N95-22221

SPILLING
Ohmsett test of NOFI Vee-Sweep and NOFI 600S Oilboom
[AD-A279525] p 1408 N95-21685

SPIN DYNAMICS
Theory of spin dynamics in the classical two-dimensional heisenberg magnet
[PB95-133559] p 1502 N95-22138
The doping effect on spin-Peierls instability
[DE94-629046] p 1577 N95-22178

SPIN GLASS
The doping effect on spin-Peierls instability
[DE94-629046] p 1577 N95-22178

SPIN-LATTICE RELAXATION
Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors
[DE95-001073] p 1570 N95-20820

SPIN-ORBIT INTERACTIONS
A model for electron nuclear dynamics of a monatomic chain
[AD-A279652] p 1506 N95-19960
Constraints on T-odd and P-even hadronic interactions from nucleon, nuclear, and atomic electric dipole moments
[DE94-012845] p 1526 N95-21920

SPIN-SPIN COUPLING
Rigorous spin-spin correlation function of Ising model on a special kind of Sierpinski Carpets
[DE94-628995] p 1575 N95-21854

SPIRAL GALAXIES
Azimuthally averaged radial S(sub 100 microns)/S(sub 60 microns) dust color temperatures in spiral galaxies
p 1593 N95-21760
Correlation of far-infrared emission and radio continuum emission along the major axis of edge-on spiral galaxies
p 1593 N95-21762
Two-dimensional maps of the infrared-to-radio ratio in spiral galaxies p 1593 N95-21765
The variation of the dust temperature within late-type spiral galaxies p 1593 N95-21766

SPLINE FUNCTIONS
Direct numerical simulation of incompressible axisymmetric flows p 1363 N95-22464

SPLINES
Adaptive capture of expert behavior
[DE94-018285] p 1483 N95-21710
Simulation of structural response using a recurrent radial basis function network
[DE94-017342] p 1486 N95-22409

SPORADIC E LAYER
Modelling and simulation of HF/VHF MMPPs
p 1293 N95-20925
The relative importance of meteor burst and other distance polar cap propagation modes in the low VHF band p 1293 N95-20928

SPRAY NOZZLES
Training simulant for Halon 1211 portable extinguishers
[AD-A285403] p 1286 N95-20611

SPRAYERS
Training simulant for Halon 1211 portable extinguishers
[AD-A285403] p 1286 N95-20611

SPRAYING
A review of water mist technology for fire suppression
[AD-A285738] p 1202 N95-20071

SPREAD SPECTRUM TRANSMISSION
A wideband propagation simulator for high speed mobile radio communications p 1295 N95-20934
Performance of a fast frequency-hopped noncoherent MFSK receiver over Rician fading channels with either partial-band interference or multi-tone interference
[AD-A286168] p 1310 N95-22246

SPUTTERING
Mixed-sputter deposition of Ni-Ti-Cu shape memory films
[DE94-017296] p 1250 N95-19900
Enhancement of corrosion resistance and mechanical properties of light-weight metals through the use of graded nonequilibrium microstructures
[AD-A286320] p 1251 N95-20178
Rate controlled synthesis of composition modulated, metal-oxide thin films
[DE94-016596] p 1267 N95-20317
Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707
On the sputtering of metals and insulators: A nonlinear evolution problem with nonlinear boundary condition
[DE95-001456] p 1254 N95-20792
Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881
Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892
Copper metallization of stainless steels
[DE95-001496] p 1256 N95-21300
Deposition and properties of novel nitride superlattice coatings
[DE95-002945] p 1230 N95-21445
Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796
High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254

SQUALLS
Effects of microphysics and radiation on mesoscale processes of a midlatitude squall line
[DE94-014732] p 1429 N95-20381

SQUARE WAVES
Ambient noise and surface wave dissipation in the ocean
[AD-A279650] p 1432 N95-20303
Hybrid high power amplifier
[AD-D016534] p 1326 N95-20730

SQUID (DETECTORS)
Evaluation of superconducting quantum interference devices interfaced with digital signal processing electronics for biomagnetic applications
[DE94-016186] p 1289 N95-20164
DSP control of superconducting quantum interference devices
[DE94-016193] p 1313 N95-20168

STABILITY
Six-dimensional modeling of coherent bunch instabilities and related feedback systems in storage rings with power-series maps for the lattice
[DE94-017965] p 1532 N95-20494
Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514
Hydrodynamic instabilities in inertial fusion
[DE94-018079] p 1554 N95-20675
Current diffusive ballooning mode in second stability region of tokamaks
[DE94-770690] p 1554 N95-20683
Magnetron power supply at high stability and its application in plasma excitation for the production of ultraviolet radiation
[DE94-629656] p 1326 N95-20733
Conservative smoothing versus artificial viscosity
[DE95-001108] p 1341 N95-20831
Geometric moire method of strain analysis with displacement discontinuities
[DE95-001114] p 1386 N95-20833
Confinement and stability of crystalline beams in storage rings
[DE95-002515] p 1533 N95-20886
Numerical simulation of supersonic boundary layer transition p 1348 N95-21074
Thermodynamic analysis of stable and metastable equilibrium diagrams of the Cu-Cr system
[PB95-127775] p 1255 N95-21111
Calculated heats of formation of some predicted stable C, N, O, F molecules
[AD-A285957] p 1517 N95-21127
Understanding the mechanisms of length scale competition: The sine-Gordan soliton case
[DE94-016201] p 1500 N95-21136
Atmospheric stability and its influence on air quality in small communities in northern Sweden
[PB95-131652] p 1405 N95-21181
Transient behaviour and stability points of the Poiseuille flow of a KBKZ-fluid
[PB95-132064] p 1353 N95-21268
Atom wave interferometer
[AD-A279532] p 1524 N95-21688
Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777
Structure and stability of hydrous minerals at high pressure p 1417 N95-21786
Phase E in a water-saturated peridotite system at 9.3 GPa p 1420 N95-21799
Volatiles in the deep Earth: An experimental study using the laser-heated diamond cell p 1421 N95-21803
Solar system formation and the distribution of volatile species p 1421 N95-21806
Polar volatiles on Mercury and the Moon
p 1422 N95-21811
Storage and recycling of water and carbon dioxide in the earth p 1425 N95-21822
Is xenon eldest? p 1425 N95-21823
Ab initio potential energy surface for H + OCS reactions: Extended basis sets and correlation treatment
[AD-A286420] p 1247 N95-22207
Robust fixed-structure control
[AD-A286515] p 1485 N95-22216
Bunched beam instability with frequency spread
[DE94-018632] p 1539 N95-22357
Maximum weighted matching for high index differential algebraic equations
[PB95-135075] p 1496 N95-22359
Quadratic optimal control of a delay equation II: The unstable case
[PB95-127064] p 1486 N95-22366
Quadratic optimal control of a delay equation I: The stable case
[PB95-127072] p 1486 N95-22367

STABILITY AUGMENTATION
Low-level RF control for the AFEL
[DE94-018295] p 1540 N95-22410

STABILITY TESTS
Stability of pressure and velocity computations for heterogeneous reservoirs
[PB95-110284] p 1354 N95-21656
Design of robust optimal control systems and stability analysis of real structured uncertainties
[AD-A279089] p 1483 N95-21913
Wave journal bearing. Part 1: Analysis
[NASA-CR-195431-PT-1] p 1382 N95-22404
Wave journal bearing. Part 2: Experimental pressure measurements and fractional frequency whirl threshold for wave and plain journal bearings
[NASA-TM-106848-PT-2] p 1382 N95-22405

STABILIZATION
Stabilization and control problems in structural dynamics
[AD-A279996] p 1340 N95-20312
Wall stabilization effects in D3-D high beta discharges
[DE94-017509] p 1554 N95-20446

Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames
[DE95-002481] p 1243 N95-21512
Semi-global stabilization of linear discrete-time systems subject to input saturation via linear feedback: An ARE-based approach
[PB95-135463] p 1483 N95-21618
Communications and control for electric power systems: Power system stability applications of artificial neural networks
[NASA-CR-197333] p 1484 N95-22171
Robust fixed-structure control
[AD-A286515] p 1485 N95-22216

STABILIZERS (FLUID DYNAMICS)
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 4, part 1: Buffet cross spectral densities
[AD-A285593] p 1215 N95-21214
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 1: Wind tunnel test summary
[AD-A279126] p 1202 N95-21877

STABLE OSCILLATIONS
Radio-science performance analysis software
p 1305 N95-21540

STACKS
Synthesis and structure of a novel bis-stibole
[AD-A286345] p 1224 N95-22252

STAGNATION POINT
Turbulence modeling for separated flow
p 1359 N95-22443

STAINLESS STEELS
Fusion welding of advanced borated stainless steels
[DE94-019037] p 1378 N95-20053
Fracture toughness properties of welded stainless steels for tritium service
[DE95-000755] p 1251 N95-20079
Post-irradiation deformation characteristics of heavy-ion irradiated 304L SS
[DE94-017462] p 1251 N95-20088
Copper metallization of stainless steels
[DE95-001496] p 1256 N95-21300
Analysis of welds on helium-containing restraint test plates
[DE95-001809] p 1257 N95-21303
Corrosion evaluation of fuel canister crusher rigging
[DE95-002962] p 1257 N95-21452
Finite element modelling of creep crack growth in 316 stainless and 9Cr-1Mo steels
[DE94-018977] p 1258 N95-21560
Corrosion resistance and behavior of construction materials exposed to dilute sulfuric acid at elevated temperatures under static conditions
[DE95-001723] p 1259 N95-21739
Atom probe field ion microscopy of type 308 CRE stainless steel welds
[DE94-019162] p 1261 N95-22127
Welding tritium exposed stainless steel
[DE95-003208] p 1382 N95-22356

STANDARD MODEL (PARTICLE PHYSICS)
Search for top in DO using the electron + jets channel with soft muon tagging
[DE95-001284] p 1509 N95-20217
Top ten models constrained by b (yields) s(gamma)
[DE95-002870] p 1519 N95-21250
A high-rate fixed-target charm experiment
[DE95-001767] p 1521 N95-21378
Proceedings of the School for Young High Energy Physicists
[PB95-108114] p 1537 N95-21647
Search for squarks and gluinos in D0
[DE95-000730] p 1528 N95-22197

STANDARDIZATION
Algebraic semantics of message sequence charts
[PB95-110581] p 1288 N95-19890
Military standard: Test requirements for launch, upper-stage, and space vehicles
[AD-A286627] p 1218 N95-20770
TIM-SCT cable testing protocol
[AD-A286633] p 1207 N95-20772

STANDARDS
Standard data formats for simulation
[PB95-110367] p 1470 N95-22016
A graded approach to ISO 9000 implementation for records managers
[DE94-017409] p 1591 N95-22167

STAR CLUSTERS
An IRAS Hires study of low mass star formation in the Taurus molecular ring p 1593 N95-21767

STAR FORMATION
Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479
Extended far-infrared emission and star formation in Seyfert galaxies p 1593 N95-21764
The variation of the dust temperature within late-type spiral galaxies p 1593 N95-21766
An IRAS Hires study of low mass star formation in the Taurus molecular ring p 1593 N95-21767

STARCHES
A low energy continuous reactor separator for the production of ethanol from corn grits/starch and biomass streams
[DE95-002256] p 1283 N95-21356
Investigation on research for degradable plastics
[DE94-796550] p 1277 N95-21714

STARK EFFECT
Heterostructure quantum confined Stark effect electrooptic modulators operating at 938 nm
[AD-A279342] p 1581 N95-21928

STARS
Simulation of stellar speckle imaging
[DE94-016606] p 1412 N95-19985
Twentysixth YERAC
[PB95-127437] p 1599 N95-21347

STATIC CHARACTERISTICS
The determination of static and time varying dipole source. Sensor geometry during sea trials using differential global positioning system
[MRL-TN-631] p 1205 N95-21642
Microscopic theory of normal liquid He-3
[DE94-629047] p 1527 N95-22179
The dynamic structure function of Bose liquids in the deep inelastic regime
[DE94-629077] p 1527 N95-22182

STATIC FIRING
Investigation of rocket motors 3 inch number 1 Mk 4
[AD-A284278] p 1221 N95-19962

STATIC PRESSURE
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 1: Isostatically pressed alumina ceramic
[AD-A279669] p 1270 N95-20603

STATIC TESTS
Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle
[NASA-TM-4574] p 1199 N95-19913
Portable static test facility for small, expendable, turbojet engines, phase 1
[AD-A286337] p 1216 N95-21719

STATISTICAL ANALYSIS
Ice Processing System software support documentation
[AD-A280030] p 1388 N95-20006
Hindered settling computations using a parallel boundary element method
[DE94-014286] p 1339 N95-20137
The 29th MIL-HDBK-17 Polymer Matrix Composites Coordination Group Meeting
[AD-A279917] p 1269 N95-20578
Analysis of mesospheric winds and waves
[AD-A279956] p 1414 N95-20591
Evidence for t(bar t) production at the Tevatron: Statistical significance and cross section
[DE95-002524] p 1515 N95-20897
Statistical analysis of Turbine Engine Diagnostic (TED) field test data
[AD-A286032] p 1379 N95-20998
Large-eddy simulation of rotating channel flows using a localized dynamic model p 1346 N95-21064
Adaptive detection in stationary and nonstationary noise environments
[AD-A279581] p 1300 N95-21099
Geometric characterization of electromigration voids (A statistical analysis of electromigration voids)
[AD-A286494] p 1328 N95-21169
Ozone quality control measurements in the Dutch National Air Quality Monitoring Network
[PB95-131900] p 1405 N95-21329
Potential-of-mean-force description of ionic interactions and structural hydration in biomolecular systems
[DE95-000859] p 1438 N95-21366
Heuristic genetic algorithms for constrained problems. Part 1: Principles
[PB95-132031] p 1467 N95-21374
Exponential deconvolution: Two asymptotically equivalent estimators
[PB95-132122] p 1499 N95-21469
Simulations of metal dissolution and corrosion
[DE94-019295] p 1257 N95-21476
BASIC program for power spectrum estimation
[DE95-002228] p 1468 N95-21515
The application of a statistical analysis software package to explosive testing
[MRL-TR-93-42] p 1284 N95-21658
The energetics and dynamics of free radicals, ions, and clusters
[DE94-018101] p 1244 N95-21701
LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134
Pollution error in the H-version of the finite element method and the local quality of A-posteriori error estimators
[AD-A279868] p 1497 N95-22388
Conditional statistics in a turbulent premixed flame derived from direct numerical simulation
p 1249 N95-22438

STATISTICAL CORRELATION
Rigorous spin-spin correlation function of Ising model on a special kind of Sierpinski Carpets
[DE94-628995] p 1575 N95-21854

STATISTICAL DISTRIBUTIONS
Universal features of multiplicity distributions
[DE94-012854] p 1498 N95-20779
Statistical properties of geologic fractals
[DE94-019272] p 1414 N95-20908
Collisional redistribution effects on x ray laser saturation behavior
[DE94-017308] p 1374 N95-21663
Counting methods for the analysis of load time histories
[PB95-132916] p 1388 N95-22093
Proton and produced particle distributions from Au+Au collisions at 11.6 A GeV/c
[DE94-018634] p 1530 N95-22392

STATISTICAL MECHANICS
Coupled analytic maps
[PB95-111076] p 1498 N95-19945
Rigorous spin-spin correlation function of Ising model on a special kind of Sierpinski Carpets
[DE94-628995] p 1575 N95-21854

STATISTICAL TESTS
Proof of a conjecture of Narayana on dominance refinements of the Smirnov two-sample test
[PB95-132650] p 1499 N95-21979
Precedence tests and confidence bounds for complete data: An overview and some results
[PB95-132668] p 1499 N95-21980
Learning maneuvers using neural network models
[AD-A286470] p 1486 N95-22267

STEADY FLOW
Transient behaviour and stability points of the Poiseuille flow of a KBKZ-fluid
[PB95-132064] p 1353 N95-21268
Multiwire thermocouples: Frequency response
[NASA-TM-110510] p 1367 N95-21889
Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212

STEADY STATE
Properties of whisker-reinforced ceramics
[DE94-017759] p 1264 N95-20024
Mantle rare gas relative abundances in a steady-state mass transport model p 1423 N95-21812
He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821

STEAM
Technical and economic evaluation of natural gas based synthesis gas production technologies
[PB95-130597] p 1242 N95-21426

STEELS
A review of Microbially Induced Corrosion (MIC) of steel and a preliminary investigation to determine its occurrence in naval vessels
[MRL-GD-0048] p 1250 N95-19910
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparisons and verification of methods
[DE95-000743] p 1264 N95-20078
Fracture toughness properties of welded stainless steels for tritium service
[DE95-000755] p 1251 N95-20079
Inelastic torsion of steel I-beams
[PB94-208360] p 1384 N95-20101
The production of calibration specimens for impact testing of subsize Charpy specimens
[DE94-018125] p 1386 N95-20703
Nitrogen alloyed martensitic steels
[PB95-127791] p 1255 N95-21128
Effect of neutron irradiation on the impact properties of A533B steel
[DE95-001834] p 1256 N95-21286
Damage tolerance of carbon fibre polyetheretherketone laminates
[PB95-131611] p 1230 N95-21432
Protective organic coatings on steel: Accelerated corrosion test method for paint/coatings exposed to water with low conductivity. Nordtest project no. 1010-92. Degradation of organic coatings in fresh water
[PB95-134185] p 1277 N95-21873
Corrosion behavior of landing gear steels
[AD-A285862] p 1261 N95-22132
Fibre-reinforced high-strength concrete
[PB95-131942] p 1232 N95-22158

Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320
An update of corrosion inhibitors for mild steel exposed to 32-0-0 UAN solution
[DE95-001715] p 1263 N95-22396

STEERING
Two-micron Laser Atmospheric Wind Sounder (LAWS) pointing/tracking study
[NASA-CR-195012] p 1220 N95-21190
Definition report on target and related steering variables of radiation as a part of the environmental balance and environmental outlook investigation
[PB95-135471] p 1409 N95-21846

STELLAR ENVELOPES
HIRAS images of fossil dust shells around AGB stars
p 1593 N95-21768

STELLAR EVOLUTION
Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479
Physics of systems containing neutron stars
[NASA-CR-197304] p 1600 N95-21615
Extended far-infrared emission and star formation in Seyfert galaxies p 1593 N95-21764

STELLAR LUMINOSITY
Interacting galaxies resolved by IRAS
p 1593 N95-21759
Luminous radio-quiet sources in the W3(MAIN) cloud core p 1594 N95-21773

STELLAR MASS
The solar neutrino problem: Neither astrophysics nor oscillations?
[DE94-012850] p 1603 N95-21316

STELLAR MASS EJECTION
Solar-geophysical data number 601, September 1994. Part 2: (Comprehensive reports). Data for March 1994, and miscellaneous
[PB95-136735] p 1603 N95-20829
Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377

STELLAR MODELS
The solar neutrino problem: Neither astrophysics nor oscillations?
[DE94-012850] p 1603 N95-21316
Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479
Solar wind composition
[NASA-TM-197364] p 1604 N95-22384

STELLAR PHYSICS
Physics of systems containing neutron stars
[NASA-CR-197304] p 1600 N95-21615

STELLARATORS
Design and construction of the HSX experiment
[DE94-018657] p 1552 N95-20348
Stellarator transport optimization with self-consistent electric fields
[DE94-019151] p 1559 N95-21581

STEREOCHEMISTRY
Introduction to the structures determination methods using X-ray diffraction in monocrystals: Application to some lanthanides and transition metals complexes with organic ligands
[DE94-629002] p 1579 N95-22380

STEREOSCOPIC VISION
Intermediate levels of visual processing
[AD-A284922] p 1448 N95-19998
A scalable video rate camera interface
[AD-A286144] p 1474 N95-20325
Integration of segmentation and stereo matching
[PB95-107819] p 1444 N95-21028

STEREOSCOPY
Integration of segmentation and stereo matching
[PB95-107819] p 1444 N95-21028

STIFFNESS
The influence of ply waviness with nonlinear shear on the stiffness and strength reduction of composite laminates
[AD-A285736] p 1224 N95-19899
Fracture behavior of laminated discontinuously reinforced aluminum material
[DE94-017307] p 1263 N95-22408

STIMULATED EMISSION
Tunable CW blue, green, orange and red upconversion fiber lasers at room temperature
[DE95-000851] p 1375 N95-22007

STIRLING CYCLE
Proceedings of the 1993 Non-Fluorocarbon Insulation, Refrigeration and Air Conditioning Technology Workshop
[DE94-018333] p 1285 N95-20194

STIRLING ENGINES
Recent reflux receiver developments under the US DOE program
[DE95-001622] p 1393 N95-20861
Testing of the SAIC facets on the stretched-membrane dish
[DE95-001831] p 1393 N95-20864

STOCHASTIC PROCESSES
Frequent sampling in discrete choice
[PB95-110961] p 1497 N95-19938
A multivariate multisample rank test for stochastic simulation validation
[AD-A285922] p 1498 N95-19990
Analytic Perturbation Analysis of Discrete Event Dynamic Systems
[DE94-018635] p 1480 N95-20126
Higher order crossings
[AD-A279597] p 1504 N95-20300
Fitting stochastic partial differential equations to spatial data
[AD-A279870] p 1490 N95-20432
Structure and dynamics of turbulent wall layers
[AD-A285360] p 1340 N95-20547
Stochastic network processes
[AD-A279905] p 1475 N95-20566
Proceedings of the Fourth International Workshop on Inductive Logic Programming (ILP-94)
[PB95-135273] p 1464 N95-21003
Set functionals in stochastic geometry
[PB95-135372] p 1491 N95-21005
Analysis of subgrid models using direct and large-eddy simulations of isotropic turbulence p 1348 N95-21071
New methods for large scale local and global optimization
[AD-A285635] p 1517 N95-21126
Accuracy problems in the generation of discrete time stochastic processes
[PB95-131397] p 1386 N95-21133
Quantum diffusion
[DE95-001015] p 1580 N95-21264
Duality and equivalencies in closed tandem queueing networks
[PB95-132502] p 1482 N95-21271
Diffusion approximations in communication and stochastic theory
[AD-A286440] p 1302 N95-21438
Learning algorithms for feedforward networks based on finite samples
[DE95-001739] p 1483 N95-21741
Artificial neural network metamodels of stochastic computer simulations
[AD-A285951] p 1484 N95-22056
Counting methods for the analysis of load time histories
[PB95-132916] p 1388 N95-22093
Theory of the excitonic lineshape in low-dimensional structures with rough interfaces
[DE95-003434] p 1582 N95-22237
Optimal active control for Burgers equations
p 1361 N95-22454

STOICHIOMETRY
Reactive nanophase oxide additions to melt-processed high-T(sub c) superconductors
[DE95-001470] p 1570 N95-20841
Triple flame structure and diffusion flame stabilization
p 1249 N95-21039
Fire experiments in a two dimensional rack storage: BRANDFORSK-project 701-917
[PB95-131538] p 1241 N95-21179
Plastic deformation of ordered intermetallic alloys: Fundamental aspects
[DE95-001070] p 1256 N95-21265
Bulk and defect properties of ordered intermetallics
[DE94-017706] p 1262 N95-22344
New thermodynamic description of the Cu-Zr system
[PB95-127189] p 1263 N95-22374

STOKES FLOW
Hindered settling computations using a parallel boundary element method
[DE94-014286] p 1339 N95-20137
Mixed hp finite element methods for problems in elasticity and stokes flow
[PB95-104444] p 1341 N95-20981

STOKES THEOREM (VECTOR CALCULUS)
Solutions of D(sup n)D(sup m)f=0
[PB95-110839] p 1487 N95-19916

STORAGE BATTERIES
Demonstration of zinc/air fuel battery to enhance the range and mission of fleet electric vehicles: Preliminary results in the refueling of a multicell module
[DE95-004206] p 1337 N95-22421

STORAGE RINGS (PARTICLE ACCELERATORS)
Crystalline beam in a storage ring: How long can it last?
[DE94-017303] p 1563 N95-20014
A URI program for Ultraviolet/extreme ultraviolet research
[AD-A279159] p 1370 N95-20600
Crystalline beams: The horizontal zigzag
[DE95-002227] p 1533 N95-20766
Crystalline beams
[DE95-002656] p 1569 N95-20793
Confinement and stability of crystalline beams in storage rings
[DE95-002515] p 1533 N95-20886
Behaviour of space-charge dominated ion beams in storage rings
[DE94-015845] p 1517 N95-21140
Multiple hard interactions in HERWIG
[PB95-130548] p 1518 N95-21233
Sources of amplitude-dependent tune shift in the PEP-2 design and their compensation with octupoles
[DE94-018198] p 1519 N95-21262
Simulation of beam-beam lifetime for LEP
[DE95-002888] p 1536 N95-21334
Hadron beams and accelerators
[DE95-002932] p 1536 N95-21342
Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418
Beam instability studies at the APS
[DE95-001448] p 1537 N95-21503
Low emittance lattices for electron storage rings revisited
[DE94-017302] p 1540 N95-22391

STORAGE STABILITY
Beam instability studies at the APS
[DE95-001448] p 1537 N95-21503

STORMS (METEOROLOGY)
Radar studies of aviation hazards
[AD-A285845] p 1203 N95-21831

STRAIN GAGES
Vapor generator wand
[NASA-CASE-LAR-15058-1] p 1215 N95-20080
Evaluation of Pd-Cr wires for strain gage application
[NASA-TM-106857] p 1366 N95-21259

STRAIN MEASUREMENT
Evaluation of Pd-Cr wires for strain gage application
[NASA-TM-106857] p 1366 N95-21259
Strain measurement by diffraction at LANSCE
[DE94-018264] p 1387 N95-21386

STRAIN RATE
Development of superplasticity in 5083 aluminum with additions of Mn and Zr
[DE94-017474] p 1251 N95-20090
The reliability of laser reflowed Sn-Ag solder joints
[AD-A279787] p 1315 N95-20443
Fracture behavior of the Fe-8Al alloy FAP-Y
[DE95-000956] p 1258 N95-21676

STRANGE ATTRACTORS
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380

STRANGENESS
Strange particle and antiproton production in S + nucleus collisions at 200 GeV/nucleon
[DE95-002348] p 1513 N95-20575
Heavy ion collisions
[DE95-002712] p 1520 N95-21321
Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380
Strange hadronic matter
[DE94-019345] p 1521 N95-21484

STRATEGY
Bomber force 2000: Operational concepts for long-range combat aircraft
[AD-A279378] p 1206 N95-20181

STRATIFIED FLOW
Fourth International Symposium on Stratified Flows, volume 1
[AD-A286450] p 1354 N95-21583
Fourth International Symposium on Stratified Flows, volume 3
[AD-A286452] p 1354 N95-21584
Fourth International Symposium on Stratified Flows, volume 4
[AD-A286453] p 1358 N95-22424

STRATOCUMULUS CLOUDS
Balloon tracking for the ASTEX/MAGE Lagrangian experiment
[AD-A280078] p 1430 N95-20969

STRATOSPHERE
Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353
Radiative forcing calculations for CH3Cl
[DE94-019018] p 1402 N95-20355
The development and evaluation of water-mist fire extinguishing systems
[DE94-019019] p 1286 N95-20356
Computer model predictions of the local effects of large, solid-fuel rocket motors on stratospheric ozone
[AD-A285632] p 1404 N95-21150

Definition report on environmental indices in future environmental assessments environmental balance/environmental outlook
[PB95-131876] p 1405 N95-21350
Monitoring the response of the upper troposphere/lower stratosphere to a greenhouse gas scenario
[DE95-000982] p 1406 N95-21410
Transport, radiative, and dynamical effects of the Antarctic ozone hole: A GFDL SKYHI model experiment
[PB94-192754] p 1409 N95-22101

STRATUS CLOUDS
Boundary layer cloud studies in support of ASTEX
[AD-A285947] p 1429 N95-20395
Unified very low stratus cloud/subcloud microphysics model: User's guide
[AD-A286454] p 1430 N95-21586

STREAK CAMERAS
X-ray spectroscopy of xenon
[DE95-002132] p 1240 N95-20865

STREAM FUNCTIONS (FLUIDS)
Modeling the two-point correlation of the vector stream function p 1345 N95-21055

STRESS (PHYSIOLOGY)
USAF cellular mechanism of turnover of the stress induced protein HSP70
[AD-A285618] p 1441 N95-19898
Behavioral effects of tyrosine during sustained wakefulness
[AD-A279789] p 1441 N95-20307
Development and enhancement of a model of performance and decision making under stress in a real life setting
[AD-A285945] p 1449 N95-20393
Evaluation of stress experienced by soldiers wearing chemical protective clothing during varying work loads in desert or tropical environments
[AD-A280113] p 1452 N95-20625
Microclimate cooling effect on perceived exertion in four heat/exercise scenarios
[AD-A285549] p 1444 N95-21160
Psychosocial stress and mental health in a forward-deployed military community
[AD-A285940] p 1451 N95-22323
Assessing post traumatic stress disorder and PTSD symptomatology in US Army personnel
[AD-A285941] p 1451 N95-22324

STRESS (PSYCHOLOGY)
Behavioral effects of tyrosine during sustained wakefulness
[AD-A279789] p 1441 N95-20307
Development and enhancement of a model of performance and decision making under stress in a real life setting
[AD-A285945] p 1449 N95-20393
Evaluation of stress experienced by soldiers wearing chemical protective clothing during varying work loads in desert or tropical environments
[AD-A280113] p 1452 N95-20625
Psychosocial stress and mental health in a forward-deployed military community
[AD-A285940] p 1451 N95-22323
Assessing post traumatic stress disorder and PTSD symptomatology in US Army personnel
[AD-A285941] p 1451 N95-22324

STRESS ANALYSIS
Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
[DE94-016879] p 1500 N95-20106
Turbulence descriptors for scaling fatigue loading spectra of wind turbine structural components
[DE94-011833] p 1384 N95-20109
The processing and mechanical properties of high temperature/high performance composites. Book 5: Interface effects
[AD-A279815] p 1228 N95-20584
Geomaterial models and numerical analysis of softening
[PB95-135380] p 1386 N95-21006
Large-eddy simulation of rotating channel flows using a localized dynamic model p 1346 N95-21064
Determination of layer moduli from falling weight deflectometer measurements
[PB95-129748] p 1286 N95-21333
Crack closure and sequential effects in fatigue: A literature survey
[PB95-131637] p 1387 N95-21557
Sheet metal formability
[PB95-110250] p 1258 N95-21653
Effects of cyclic stress distribution models on fatigue life predictions
[DE95-001619] p 1388 N95-22070
Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320

STRESS CONCENTRATION
Microscopy of stress-induced morphological development and dislocation nucleation during semiconductor epitaxy
[DE94-017869] p 1568 N95-20674

STRESS CORROSION CRACKING
Corrosion behavior of landing gear steels
[AD-A285862] p 1261 N95-22132

STRESS DISTRIBUTION
The processing and mechanical properties of high temperature/high performance composites. Stress redistribution and notch properties, book 2
[AD-A279737] p 1227 N95-20429
Effects of cyclic stress distribution models on fatigue life predictions
[DE95-001619] p 1388 N95-22070
Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320

STRESS INTENSITY FACTORS
Analyses of some benchmark cases in fracture mechanics using boundary element method
[PB95-110888] p 1384 N95-19930

STRESS MEASUREMENT
Residual stresses in material processing
[DE94-017888] p 1385 N95-20374
Data report: Stress measurements in the bottom boundary layer with BASS tripods STRESS 2 1990-1991
[AD-A279875] p 1433 N95-20433
Measurement of residual stresses on ceramic materials with high spatial resolution
[DE94-017889] p 1280 N95-22270

STRESS TENSORS
Modelling anisotropy and backscatter effects in the subgrid scale stress tensor p 1349 N95-21077

STRESS-STRAIN RELATIONSHIPS
A model of an infinite length, axisymmetric, isotropic, forced thick shell
[AD-A285586] p 1386 N95-21212

STRESSES
The role of grain boundary sliding on creep deformation characteristics of discontinuous reinforced composites
[DE95-001671] p 1231 N95-21924

STRETCHING
Evaluation of Reynolds stress turbulence closures in compressible homogeneous shear flow
[NASA-CR-194892] p 1338 N95-20009

STRING THEORY
Construction of non-critical string field theory by transfer matrix formalism in dynamical triangulation
[DE94-770607] p 1516 N95-20986
Factorization in closed string field theory
[PB95-133542] p 1580 N95-21030
Cosmological string solutions by dimensional reduction
[DE95-002858] p 1599 N95-21245

STRINGS
Cosmological string solutions by dimensional reduction
[DE95-002858] p 1599 N95-21245

STRONG INTERACTIONS (FIELD THEORY)
Strong interactions studies with medium energy probes
[DE95-001800] p 1245 N95-21745
Uniform upper bounds in the Froehlich polaron theory
[DE94-628998] p 1525 N95-21860
Physics at the Fermilab Collider
[DE95-000726] p 1539 N95-22195

STRONTIUM
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361

STRONTIUM OXIDES
Carrier doping and interlayer coupling in HTSC single crystals
[DE94-018637] p 1564 N95-20127
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Effects of neutron irradiation on the London penetration depth for polycrystalline Bi(1.8)Pb(0.3)Sr2Ca2Cu3O10 superconductor
[DE94-019335] p 1573 N95-21483
Electronic structure and energies of alkaline earth oxides: MgO, CaO and SrO
[DE94-628990] p 1575 N95-21853

STRUCTURAL ANALYSIS
Testing paradigm applied to network structure (revised)
[PB95-110706] p 1487 N95-19906
Super-heavy aircraft study
[AD-A279602] p 1215 N95-19955
Inelastic torsion of steel I-beams
[PB94-208360] p 1384 N95-20101
Parallel solid mechanics codes at Sandia National Laboratories
[DE94-015770] p 1474 N95-20152
Simulation of large systems with neural networks
[DE94-018898] p 1428 N95-20319
Hierarchical structure in advanced polymers. Phase behaviour, orientation, properties
[AD-A285938] p 1268 N95-20392
Scanning tunneling microscopy studies of self-assembled monolayers of alkanethiols on gold
[AD-A279910] p 1253 N95-20577
The 29th MIL-HDBK-17 Polymer Matrix Composites Coordination Group Meeting
[AD-A279917] p 1269 N95-20578
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 1: Isostatically pressed alumina ceramic
[AD-A279669] p 1270 N95-20603
Bacterial luciferase: Determination of the structure by x-ray diffraction
[AD-A279699] p 1437 N95-20711
Military standard: Test requirements for launch, upper-stage, and space vehicles
[AD-A286627] p 1218 N95-20770
ALCHEMI of Fe-doped B2-ordered NiAl alloys with different doping levels
[DE94-017748] p 1255 N95-20907
Statistical properties of geologic fractals
[DE94-019272] p 1414 N95-20908
Moessbauer study of the sintered Mn(0.70)Zn(0.23)Fe(2.07)O4
[DE94-631462] p 1255 N95-20909
Recent results from E665
[DE95-002523] p 1516 N95-20914
Structure functions and structure function ratio F2(n)/F2(p) at low X(Bj) and Q2 in inelastic muon scattering
[DE94-018979] p 1573 N95-21561
Modeling of rolling element bearing mechanics. Computer program user's manual
[NASA-CR-196557] p 1381 N95-21692
Modeling of rolling element bearing mechanics. Theoretical manual
[NASA-CR-196556] p 1381 N95-21705
On the influence of electromagnetic wave and relativistic electron beam on a plasma
[DE94-628962] p 1561 N95-21848
Discovering related DNA sequences via mutual information
[DE95-001101] p 1440 N95-22067

STRUCTURAL BASINS
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477
Fourth International Symposium on Stratified Flows, volume 3
[AD-A286452] p 1354 N95-21584
Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818

STRUCTURAL DESIGN
Cr2Nb development
[DE94-018697] p 1250 N95-20043
Target Area Structural Support systems design to achieve the micron-level stability requirement of the National Ignition Facility (NIF)
[DE94-017696] p 1551 N95-20219
An introduction to the Astro Edge solar array p 1322 N95-20535
Mechanical design of the DO silicon detector
[DE95-002532] p 1365 N95-20902
Methodology for ESCA analysis of electromigration
[AD-A286229] p 1241 N95-21168
Micromachined silicon-based analytical microinstruments for space science and planetary exploration
[DE94-019306] p 1367 N95-21507
Ceramic technology for advanced heat engines
[DE95-000950] p 1278 N95-21937

STRUCTURAL DESIGN CRITERIA
An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478
Structuring design requirements using YMIR
[PB95-132742] p 1471 N95-22081

STRUCTURAL ENGINEERING
Computer-Aided Structural Engineering (CASE) project. User's guide: Computer-Aided Structural Modeling (CASM). Version 5.00
[AD-A279913] p 1459 N95-20310
The 29th MIL-HDBK-17 Polymer Matrix Composites Coordination Group Meeting
[AD-A279917] p 1269 N95-20578
Crack closure and sequential effects in fatigue: A literature survey
[PB95-131637] p 1387 N95-21557

STRUCTURAL FAILURE

Corrosion of aircraft materials: Correlation between nanometer scale and macroscopic structural damage parameters
[AD-A285930] p 1252 N95-20299

Strain measurement by diffraction at LANSCE
[DE94-018264] p 1387 N95-21386

Counting methods for the analysis of load time histories
[PB95-132916] p 1388 N95-22093

STRUCTURAL MEMBERS

Multi-layered translated rib-stiffened composite hollow cylinder assembly
[AD-D016566] p 1226 N95-20292

STRUCTURAL STABILITY

Static stability of a three-dimensional space truss
p 1220 N95-20533

Carbon fiber reinforced superconductor composites
[DE95-002504] p 1229 N95-20913

Electronic structure and energies of alkaline earth oxides: MgO, CaO and SrO
[DE94-628990] p 1575 N95-21853

Electronic structure and relative stability of icosahedral superatoms in Al-transition-metal alloys
[DE94-628996] p 1260 N95-21855

STRUCTURAL VIBRATION

Modeling the effect of shroud contact and friction dampers on the mistuned response of turbopumps
[NASA-CR-197285] p 1379 N95-20795

Two-micron Laser Atmospheric Wind Sounder (LAWS) pointing/tracking study
[NASA-CR-195012] p 1220 N95-21190

Low frequency sound radiation from finite stiffened plates
[AD-A279395] p 1505 N95-21930

STRUCTURED PROGRAMMING

Making structured graphics and constraints practical for large-scale applications
[AD-A280062] p 1461 N95-20623

STUDENTS

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 28: The technical communication practices of aerospace engineering and science students: Results of the phase 4 cross-national surveys
[NASA-TM-109123] p 1587 N95-20162

SUBCRITICAL FLOW

On subcritical instability of the attachment line boundary layer p 1351 N95-21092

SUBDUCTION (GEOLOGY)

Volatiles in the Earth: All shallow and all recycled
p 1416 N95-21779

D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781

Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782

Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787

Subduction and volatile recycling in Earth's mantle
p 1421 N95-21802

Seismic evidence for volatiles at large depth in the Earth p 1422 N95-21808

Subduction of hydrated basalt of the oceanic crust: Implications for recycling of water into the upper mantle and continental growth p 1423 N95-21814

He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821

SUBGROUPS

Growth series for the commutator subgroup
[PB95-111092] p 1490 N95-20452

A crystallographic model for hydrous wadsleyite (Beta-Mg2SiO4) p 1424 N95-21817

SUBLIMATION

Novel catalysts for methane activation
[DE95-002639] p 1237 N95-20438

SUBMERGED BODIES

Legged vehicle for underwater mobile operations
[AD-A285043] p 1480 N95-20482

SUBMERGING

Immersion/two phase cooling p 1211 N95-20648

The permeation of bis(2-fluoro-2,2-dinitroethyl) formal (FEFO), ethyl 4,4-dinitropentanoate (EDNP), ethyl 4-nitropentanoate (ENP), and 1,2,4-trichlorobenzene (TCB) through barrier membranes
[DE95-002492] p 1283 N95-21514

SUBMILLIMETER WAVES

Luminous radio-quiet sources in the W3(MAIN) cloud core p 1594 N95-21773

Sub-millimeterwave semiconductor signal sources
[AD-A279375] p 1335 N95-22144

SUBROUTINE LIBRARIES (COMPUTERS)

DONIO: Distributed object network I/O library
[DE94-019163] p 1477 N95-21602

Report of the Numerical Analysis Group
[PB95-108163] p 1494 N95-21648

DIFFPACK: Software for partial differential equations
[PB95-110268] p 1468 N95-21654

Status of CFDLIB performance tests on the T3D
[DE95-002708] p 1478 N95-21925

SUBROUTINES

PRSPLOT6 manual
[PB95-110862] p 1456 N95-19928

A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659

FORTRAN subroutine for column reduction of polynomial matrices
[PB95-134987] p 1497 N95-22379

SUBSTRATES

Effects of ambient conditions on the adhesion of cubic boron nitride films on silicon substrates
[DE94-016779] p 1266 N95-20281

Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285060] p 1315 N95-20488

Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs
p 1323 N95-20542

Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543

Growth, characterization and device development in monocrystalline diamond films
[AD-A285991] p 1568 N95-20614

The design and manufacturing development of an active silicon substrate MCM p 1211 N95-20645

Microdynamic devices fabricated on silicon-on-sapphire substrates
[AD-D016531] p 1325 N95-20727

Epitaxial liftoff technology onto processed silicon foundry wafers
[AD-A285621] p 1571 N95-21145

Calculation of atom-centered partial charges for heme
[DE94-014447] p 1520 N95-21375

Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films
[DE94-018964] p 1244 N95-21549

Development and applications of flat ceramic membranes
[PB95-110219] p 1276 N95-21650

Integration of thin film decoupling capacitors
[DE95-001609] p 1333 N95-21881

Method of making a semiconductor device by forming a nanochannel mask
[AD-D016515] p 1576 N95-22059

Growing and releasing diamonds
[AD-D016489] p 1577 N95-22103

Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285775] p 1336 N95-22412

Characterization and performance of DLC films synthesized by plasma and ion beam techniques
[DE94-018287] p 1281 N95-22428

SUBSTRUCTURES

Exclusive processes: Tests of coherent QCD phenomena and nucleon substructure at CEBAF
[DE95-002892] p 1520 N95-21336

SUCTION

Navier-Stokes simulations of the effects of suction holes on a flat plate boundary layer p 1352 N95-21094

SUGARS

Theoretical prediction of vibrational circular dichroism spectra of R-glyceraldehyde, R-erythrose, and R-threose. Part 2: Development of a procedure to scale the force constant matrix expressed in terms of internal coordinates
[AD-A284305] p 1437 N95-20252

SULFATES

A review of Microbially Induced Corrosion (MIC) of steel and a preliminary investigation to determine its occurrence in naval vessels
[MRL-GD-0048] p 1250 N95-19910

Quantitative and qualitative analysis of some inorganic compounds by Raman spectroscopy
[DE94-009757] p 1237 N95-20470

SULFIDATION

Processing and applications of iron aluminides
[DE94-017855] p 1253 N95-20673

SULFIDES

Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712

Applications of ICP magnetic sector multicollector mass spectrometry to basic energy research
[DE95-002600] p 1246 N95-21886

Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385

SULFONATES

NMR relaxation behavior of the head group of SHBS in lamellar liquid crystals
[AD-A279124] p 1574 N95-21599

SULFUR

Mercury capture in bench-scale absorbers
[DE94-016910] p 1234 N95-20107

Synthesis and characterization of (Zn(SEt)Et)10, formed via insertion of sulfur into Zn-C bonds: A new class of Wurtzite-like cluster framework
[AD-A279701] p 1569 N95-20714

Balloon tracking for the ASTEX/MAGE Lagrangian experiment
[AD-A280078] p 1430 N95-20969

Investigation of direct photon production in 200 A GeV S + Au reactions
[DE94-018129] p 1525 N95-21704

SULFUR DIOXIDES

Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576

Evaluation of the technical performance of the Dutch National Air Quality Monitoring Network in 1992
[PB95-131892] p 1405 N95-21327

Monitoring activities in the framework of the Dutch National Air Quality Monitoring Network in 1994
[PB95-131884] p 1406 N95-21351

SULFUR FLUORIDES

Effect of a solid insulator on the spark yield of S2F10 in SF6(*)
[DE95-001422] p 1326 N95-20791

Production of S2F10, S2OF10 and S2O2F10 by spark discharges in SF6*
[DE95-001421] p 1243 N95-21500

SULFUR HEXAFLUORIDE

Production of S2F10, S2OF10 and S2O2F10 by spark discharges in SF6*
[DE95-001421] p 1243 N95-21500

SULFURIC ACID

Corrosion resistance and behavior of construction materials exposed to dilute sulfuric acid at elevated temperatures under static conditions
[DE95-001723] p 1259 N95-21739

Corrosion resistance and behavioral characteristics of metals exposed to 70 percent by weight sulfuric acid at elevated temperatures
[DE95-001724] p 1259 N95-21740

SUM RULES

On the conductance sum rule for the hierarchical edge states of the Fractional Quantum Hall Effect
[DE94-629030] p 1582 N95-22198

SUN

Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722

Solar-geophysical data number 601, September 1994. Part 2: (Comprehensive reports). Data for March 1994, and miscellaneous
[PB95-136735] p 1603 N95-20829

Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377

Testing the principle of equivalence by solar neutrinos
[DE94-014972] p 1604 N95-22064

The solar flux of thermal neutrinos and antineutrinos of all flavors
[DE95-003204] p 1604 N95-22085

SUNLIGHT

Modeling of high efficiency solar cells under laser pulse for power beaming applications p 1318 N95-20516

Review of solar cell temperature coefficients for space
p 1323 N95-20541

SUPERCOMPUTERS

Design considerations for parallel graphics libraries
[NASA-CR-194935] p 1473 N95-20013

Performance issues for engineering analysis on MIMD parallel computers
[DE94-015769] p 1474 N95-20150

High performance computing for materials process modeling
[DE94-017860] p 1460 N95-20358

SUPERCONDUCTING DEVICES

Processing, fabrication, and demonstration of HTS integrated microwave circuits
[AD-A285611] p 1312 N95-19894

HTS Josephson technology on silicon with application to high speed digital microelectronics
[AD-A285964] p 1328 N95-21178

High temperature superconducting films and multilayers for electronics
[AD-A279545] p 1331 N95-21693
High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254
SUPERCONDUCTING FILMS
High performance YBCO films
[AD-A286567] p 1326 N95-20824
Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167
High temperature superconducting films and multilayers for electronics
[AD-A279545] p 1331 N95-21693
High performance YBCO films
[AD-A279560] p 1276 N95-21695
SUPERCONDUCTING MAGNETS
Theory and modelling of quench in cable-in-conduit superconducting magnets
[DE95-001819] p 1330 N95-21442
Current distribution in Cable-In-Conduit Conductors
[DE95-001820] p 1332 N95-21725
The superconducting magnet system for the Tokamak Physics Experiment
[DE94-018329] p 1562 N95-22300
SUPERCONDUCTING SUPER COLLIDER
Experiments at high energy hadron colliders and underground water Cerenkov detector experiment
[DE95-001804] p 1535 N95-21281
The 12-GeV/c beam transfer and absorber lines for the Superconducting Super Collider
[DE95-002100] p 1538 N95-21733
SUPERCONDUCTIVITY
Free electron laser program
[AD-A285906] p 1368 N95-19987
Positron annihilation studies of organic superconductivity
[DE94-018371] p 1564 N95-20017
Journal of Applied Physics, volume 76, number 10, part 2. Proceedings of the 6th Joint Magnetism and Magnetic Materials-INTERMAG Conference
[AD-A286364] p 1500 N95-20229
Energy gap structure of layered superconductors
[DE94-017885] p 1566 N95-20372
Superconducting thin film with fullerenes and method of making
[AD-D016580] p 1567 N95-20461
Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors
[DE95-001073] p 1570 N95-20820
Gordon Research Conference on Physical Electrochemistry
[AD-A286545] p 1240 N95-20842
Vortex dynamics in a ring-like irradiated Bi2Sr2CaCu2O8 crystal
[DE95-001682] p 1573 N95-21569
High temperature superconducting films and multilayers for electronics
[AD-A279545] p 1331 N95-21693
Superconducting electromagnetic thruster
[AD-D016485] p 1355 N95-21902
SUPERCONDUCTORS (MATERIALS)
Power-law resistivity, magnetic relaxation and ac susceptibility
[DE94-016893] p 1501 N95-20241
Energy gap structure of layered superconductors
[DE94-017885] p 1566 N95-20372
X-ray studies of microstructures in semiconductor and superconducting materials
[DE95-001802] p 1572 N95-21279
Method for determining the granular nature of superconductors using pulsed current
[AD-D016517] p 1577 N95-22137
High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254
The superconducting magnet system for the Tokamak Physics Experiment
[DE94-018329] p 1562 N95-22300
SUPERCRITICAL FLOW
HIVEL2D: A two-dimensional flow model for high-velocity channels
[AD-A286556] p 1341 N95-20843
SUPERCRITICAL FLUIDS
Heat transfer, fouling, and combustion of supercritical fuels
[AD-A279906] p 1281 N95-19884
Molecular-based study of solutions in supercritical solvents
[DE94-019326] p 1580 N95-21420
SUPERFLUIDITY
Josephson acoustic radiation in superfluid helium
[AD-A279809] p 1503 N95-20098
New theory of critical flow velocities in superfluid helium
[PB95-130365] p 1571 N95-21228
SUPERHIGH FREQUENCIES
Inverse Cerenkov laser acceleration experiment at ATF
[DE94-017990] p 1370 N95-20572
Large bistatic angle clutter depolarization study
p 1296 N95-20941
Comparative study of C- and K-band propagation mechanisms beyond the horizon p 1297 N95-20946
Mitigation of effects of multiple path nulls at super-high frequencies through diversity and networking
p 1297 N95-20948
Investigation on the backscattering properties of Finnish boreal forests at C- and X-band: A semi-empirical modeling approach
[PB95-127692] p 1389 N95-21105
X-band microwave backscattering from ocean waves
[DE94-016719] p 1309 N95-22241
SUPERLATTICES
Physics and applications of defects in advanced semiconductors, volume 325
[AD-A280059] p 1563 N95-19886
Optimization of InAsSb/InGaAs strained-layer superlattice growth by metal-organic chemical vapor deposition for use in infrared emitters
[DE94-016557] p 1563 N95-19954
Giant magnetoresistance calculated from first principles
[DE94-018658] p 1500 N95-20129
Interlayer magnetic coupling in epitaxial Fe/Cr(211) and (100) superlattices
[DE95-002906] p 1571 N95-21256
X-ray studies of microstructures in semiconductor and superconducting materials
[DE95-001802] p 1572 N95-21279
Excitons in semiconducting superlattices, quantum wells, and ternary alloys
[DE95-001867] p 1572 N95-21287
Deposition and properties of novel nitride superlattice coatings
[DE95-002945] p 1230 N95-21445
Quantum dynamical phenomena of independent electrons in semiconductor superlattices subject to a uniform electric field
[DE95-001655] p 1574 N95-21723
Acoustoelectric effect in semiconductor superlattice
[DE94-628994] p 1575 N95-21859
SUPERNOVA REMNANTS
A HIRES analysis of the FIR emission of supernova remnants p 1594 N95-21770
SUPERNOVAE
Neutrino-neutrino scattering and matter-enhanced neutrino flavor transformation in supernovae
[DE94-017577] p 1604 N95-20383
SUPERPLASTIC FORMING
Forming of superplastic ceramics
[DE94-017306] p 1276 N95-21662
SUPERPLASTICITY
Development of superplasticity in 5083 aluminum with additions of Mn and Zr
[DE94-017474] p 1251 N95-20090
Overview on superplasticity research on small-grained materials
[DE94-016550] p 1266 N95-20316
Forming of superplastic ceramics
[DE94-017306] p 1276 N95-21662
SUPERPRESSURE BALLOONS
Balloon tracking for the ASTEX/MAGE Lagrangian experiment
[AD-A280078] p 1430 N95-20969
SUPERSONIC BOUNDARY LAYERS
Numerical investigation of supersonic turbulent boundary layers with high wall temperature
p 1344 N95-21050
Numerical simulation of supersonic boundary layer transition p 1348 N95-21074
Supersonic laminar flow control research
[NASA-CR-196049] p 1353 N95-21340
SUPERSONIC COMBUSTION RAMJET ENGINES
Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10
[NASA-TP-3476] p 1340 N95-20619
SUPERSONIC FLOW
Free shear layers, base pressure and bluff-body drag
[AD-A286316] p 1200 N95-20175
Plasma chemistry of vibrationally nonequilibrium molecules
[AD-A279630] p 1553 N95-20411
Application of Navier-Stokes code PAB3D with kappa-epsilon turbulence model to attached and separated flows
[NASA-TP-3480] p 1201 N95-21338
Potential flow downstream of the heliospheric terminal shock: A non-spherical shock
[NASA-TM-110493] p 1426 N95-21874
Nonlinear interaction between a pair of oblique modes in a supersonic mixing layer: Long-wave limit
[NASA-CR-197380] p 1357 N95-22173
Shock wave interactions in hypervelocity flow
[AD-A286507] p 1357 N95-22212
Numerical study of boundary layer interaction with shocks: Method and code validation
p 1362 N95-22461
SUPERSONIC JET FLOW
Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170
SUPERSONIC NOZZLES
Development of quiet-flow supersonic wind tunnels for laminar-turbulent transition research
[NASA-CR-197286] p 1216 N95-21436
SUPERSONIC SPEED
Flow coefficient behavior for boundary layer bleed holes and slots
[NASA-TM-106846] p 1338 N95-19953
SUPERSONIC WAKES
Free shear layers, base pressure and bluff-body drag
[AD-A286316] p 1200 N95-20175
SUPERSONIC WIND TUNNELS
Supersonic laminar flow control research
[NASA-CR-196049] p 1353 N95-21340
Development of quiet-flow supersonic wind tunnels for laminar-turbulent transition research
[NASA-CR-197286] p 1216 N95-21436
SUPERSYMMETRY
Complementarity of e(+)e(-) and pp colliders for the exploration of electroweak symmetry breaking
[DE94-017397] p 1507 N95-20034
Constraints on SUSy-GUT unification from b yields s-gamma decay
[PB95-130373] p 1580 N95-21229
Search for squarks and gluinos in D0
[DE95-000730] p 1528 N95-22197
SUPPORT SYSTEMS
Application of Markov decision processes to search problems
[PB95-110813] p 1497 N95-19914
Target Area Structural Support systems design to achieve the micron-level stability requirement of the National Ignition Facility (NIF)
[DE94-017696] p 1551 N95-20219
Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982
Intelligent interactive project management system
[PB95-132684] p 1586 N95-21982
SUPPORTS
Joule heating of the ITER TF cold structure: Effects of vertical control coil currents and ELMS
[DE95-001817] p 1560 N95-21724
SURFACE CRACKS
Reliability analysis of uniaxially ground brittle materials
[NASA-TM-106852] p 1386 N95-20790
The mechanical behavior of surface-modified ceramics
[DE95-001704] p 1276 N95-21572
Influence of fatigue crack closure on the growth rate of surface flaws
[AD-A279130] p 1387 N95-21967
SURFACE DEFECTS
Reliability analysis of uniaxially ground brittle materials
[NASA-TM-106852] p 1386 N95-20790
SURFACE DIFFUSION
Simulations of metal dissolution and corrosion
[DE94-019295] p 1257 N95-21476
SURFACE EMITTING LASERS
Semiconductor laser joint study program with Rome Laboratory
[AD-A285858] p 1369 N95-20379
Technologies for highly parallel optoelectronic integrated circuits
[DE95-001607] p 1327 N95-20883
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A280098] p 1372 N95-21019
SURFACE FINISHING
Defect production and recombination during low-energy ion processing
[DE95-001827] p 1572 N95-21304
A new universal solution for the electrofinishing of metallic materials
[DE95-001681] p 1258 N95-21568
SURFACE LAYERS
Physical-chemical studies on rodlike polymer compositions
[AD-A285361] p 1269 N95-20548
Methods of measuring adhesion for thermally grown oxide scales
[DE94-018177] p 1256 N95-21260
Surface ices in the outer solar system
p 1423 N95-21815

Elastic micro-fabricated surface layer for reducing turbulence and drag on an object while it moves through a fluid medium
[AD-D016516] p 1356 N95-22060

SURFACE NAVIGATION
Navigation system in combat vehicle
[PB95-131629] p 1452 N95-21467

SURFACE PROPERTIES
Correlations between surface structure and catalytic activity/selectivity
[DE94-019023] p 1234 N95-20052
Surface characterization and contamination analysis
[NASA-CR-197374] p 1238 N95-20557
Time-resolved analytical methods for liquid/solid interfaces
[DE95-002255] p 1240 N95-20780
Stars or stripes: A comparative study of finite and transfinite techniques for surface modelling
[PB95-134979] p 1464 N95-20975
Pdf modeling for premixed turbulent combustion based on the properties of iso-concentration surfaces
p 1249 N95-21042
Tribology and surface mechanical properties of excimer laser nitrided titanium
[DE95-002751] p 1255 N95-21238
Nonlinear optical studies of polymer interfaces
[DE94-018199] p 1274 N95-21263
Characterization of poly(tetrafluoroethylene) surfaces by atomic force microscopy: Results and artifacts
[DE95-000742] p 1242 N95-21309
Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398
Simulations of metal dissolution and corrosion
[DE94-019295] p 1257 N95-21476
Surface x-ray scattering and scanning tunneling microscopy studies at the Au(111) electrode
[DE95-002409] p 1573 N95-21516
Surface inspection using Fourier Transform Infrared Spectroscopy
[DE95-001699] p 1244 N95-21571
Bridging the pressure gap: In situ atomic-level investigations of model platinum catalyst surfaces under reaction conditions by scanning tunneling microscopy
[DE95-002346] p 1246 N95-21990
Perimeter-yardstick technique for fracture surface fractal analysis
[AD-A286240] p 1387 N95-22025
Application of optical second harmonic generation to surface analysis
[AD-A279445] p 1547 N95-22074
Remote-sensing based technique to account for sub-grid scale variability of land surface properties
[NASA-TM-110501] p 1390 N95-22110
Acid-site characterization of water-oxidized alumina films by near-edge x-ray absorption and soft x-ray photoemission
[DE95-003355] p 1247 N95-22234
Studies of the microwave resistivity of kappa-(BEDT-TTF)2Cu(N(CN)2)Cl
[DE95-002980] p 1262 N95-22291

SURFACE REACTIONS
A review of Microbially Induced Corrosion (MIC) of steel and a preliminary investigation to determine its occurrence in naval vessels
[MRL-GD-0048] p 1250 N95-19910
Chemical and electrochemical interactions on corroding metal surfaces
[DE95-000624] p 1250 N95-19979
Method of making copper-titanium nitride alloy
[AD-D016582] p 1252 N95-20201
An atomically-resolved STM study of the interaction of phosphine (PH3) with the silicon (001) surface
[AD-A279819] p 1513 N95-20585
Microscopy of stress-induced morphological development and dislocation nucleation during semiconductor epitaxy
[DE94-017869] p 1568 N95-20674
Developments and applications of dynamic models for large eddy simulation of complex flows
p 1346 N95-21062
The formation of reaction bonded Si3N4 at low temperatures and in short times
[DE95-001990] p 1275 N95-21289
Plasma model for charging damage
[DE95-000788] p 1558 N95-21310
Quantum simulation of heterogeneous electron transfer free energies at the water-metal interface
[AD-A279279] p 1522 N95-21492
Ultrafast optical studies of surface reaction processes at semiconductor interfaces
[DE95-001548] p 1574 N95-21839
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
The interaction of localized solutions in a surface reaction
[DE95-002736] p 1248 N95-22433

SURFACE ROUGHNESS
Aircraft corrosion study
[AD-A279527] p 1259 N95-21687

SURFACE TEMPERATURE
Global change integrating factors: Tropical tropopause trends
[DE95-001121] p 1404 N95-20835

SURFACE TREATMENT
Aircraft corrosion study
[AD-A279527] p 1259 N95-21687

SURFACE WATER
Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456
Regional scale hydrology with a new land surface processes model
[NASA-TM-110500] p 1390 N95-22111
Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330

SURFACE WAVES
The Surface Wave Dynamics Experiment (SWADE): A retrospective look at the wave modeling activities
[AD-A285612] p 1431 N95-19895
Ambient noise and surface wave dissipation in the ocean
[AD-A279650] p 1432 N95-20303
SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL)
[AD-A286462] p 1431 N95-22393
PIC simulation of surface waves
[AD-A285358] p 1563 N95-22422

SURFACTANTS
Technical Summary for 1993 fall MRS Symposium O, Complex Fluids
[AD-A283722] p 1264 N95-19972
Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964
NMR relaxation behavior of the head group of SHBS in lamellar liquid crystals
[AD-A279124] p 1574 N95-21599
Chemical interactions between protein molecules and polymer membrane materials
[DE95-001808] p 1224 N95-21746

SURVEILLANCE
GPS-Squitter capacity analysis
[AD-A280037] p 1291 N95-20599

SURVEILLANCE RADAR
Recommendation on transition from primary/secondary radar to secondary-only radar capability
[AD-A286279] p 1308 N95-22005

SURVEYS
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 28: The technical communication practices of aerospace engineering and science students: Results of the phase 4 cross-national surveys
[NASA-TM-109123] p 1587 N95-20162
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 31: The technical communications practices of US aerospace engineers and scientists: Results of the phase 1 SME mail survey
[NASA-TM-109169] p 1587 N95-20163
Acoustic emission: The first half century
[DE94-017176] p 1503 N95-20267
Computing near-optimal schedules
[PB95-132072] p 1466 N95-21269
High resolution descriptions of IRAS 12 and 25 microns confused regions
[AD-A285847] p 1545 N95-21832
A survey of artificial neural network applications in flow analysis of energy networks
[DE95-002452] p 1486 N95-22430

SURVIVAL
Bayesian analysis of semiparametric proportional hazards models
[AD-A279394] p 1499 N95-21946

SUSPENSION SYSTEMS (VEHICLES)
Electrorheology for smart automotive suspensions
[AD-A285543] p 1380 N95-21157

SWEDEN
ICE BABY: Measurements of concentration fluctuations in a forest area in winter conditions
[PB95-133468] p 1405 N95-21274

SWELLING
Extrudate swell and extrudate distortion of HDPE as a result of different deformation mechanisms during extrusion through capillary dies
[PB95-110227] p 1288 N95-21651

SWEPT WINGS
Computational studies of laminar to turbulence transition
[AD-A285622] p 1353 N95-21146
Lift enhancement device
[AD-D016522] p 1201 N95-21864

SWITCHES
Applied physics research for innovation in pulsed power
[AD-A285392] p 1324 N95-20610
LLNL/Lion Precision LVDT amplifier
[DE95-001504] p 1327 N95-20854
Cell loss analysis of two-class priority generalized knockout switch
[PB95-127742] p 1301 N95-21109
Fiber-optic control of current filaments in high gain photoconductive semiconductor switches
[DE94-015804] p 1328 N95-21139
Plasma Electrode Pockels Cells for the Beamlet and NIF lasers
[DE94-016541] p 1557 N95-21166

SWITCHING
EPICS simulation tools for control system development
[DE94-018082] p 1462 N95-20699
High isolation electronic switch
[AD-D016533] p 1326 N95-20729
Highly survivable communications: Complementary media packet switched networks p 1292 N95-20922
QoS driven routing in packet switched networks of multiple transmission media p 1292 N95-20923
Investigations into alternate spark gap switching techniques
[AD-A286225] p 1308 N95-22021
Sequential shock induced switch tests for Eglin Air Force Base
[DE95-001786] p 1334 N95-22062

SWITCHING CIRCUITS
Design of power electronics for TVC and EMA systems
[NASA-CR-196540] p 1312 N95-19909
High-performance packet switching architecture for ATM: Conventional solution and neural network solution
[PB95-110920] p 1312 N95-19935
High isolation electronic switch
[AD-D016533] p 1326 N95-20729
Polymer based all-optic reconfigurable interconnects
[AD-A279976] p 1272 N95-20962
SPICE macro model of a spryton with MOSFET's in the avalanche mode
[DE94-015744] p 1555 N95-21134

SYMBOLIC PROGRAMMING
Numerical and symbolic algorithms for application and specific signal processing
[AD-A279902] p 1305 N95-21576
Abstract interpretation of reactive systems: Abstractions preserving Universal CTL(*), Existential CTL(*) and CTL(*)
[PB95-110557] p 1472 N95-22305

SYMBOLS
Production of J/(psi) in 800 GeV/c p-Si interactions
[DE94-017982] p 1513 N95-20496
A Monte Carlo study of the minus sign problem in the t-J model using an Intel iPSC/860 hypercube
[DE95-001072] p 1570 N95-20819
Interlayer magnetic coupling in epitaxial Fe/Cr(211) and (100) superlattices
[DE95-002906] p 1571 N95-21256
Pair production as a probe of colliding beam size
[DE95-002893] p 1536 N95-21337

SYMMETRY
Symmetry, Wigner functions and particle reactions
[DE94-629887] p 1514 N95-20735
A crystallographic model for hydrous wadsleyite (Beta-Mg2SiO4) p 1424 N95-21817
Second order approximation for optical polaron in the strong coupling case
[DE94-628997] p 1525 N95-21856
Computing symmetries and stubborn sets
[PB95-127700] p 1472 N95-22328

SYMPTOMOLOGY
Assessing post traumatic stress disorder and PTSD symptomatology in US Army personnel
[AD-A285941] p 1451 N95-22324

SYNCHRONISM
High-performance packet switching architecture for ATM: Conventional solution and neural network solution
[PB95-110920] p 1312 N95-19935
Time code interface
[AD-D016535] p 1501 N95-20731
Modelling the reassembly buffer in a connectionless server
[PB95-132908] p 1308 N95-22087

SYNCHROTRON RADIATION
An intensity interferometer for soft x-rays
[DE94-016370] p 1541 N95-20103

Six-dimensional modeling of coherent bunch instabilities and related feedback systems in storage rings with power-series maps for the lattice
[DE94-017965] p 1532 N95-20494

Gordon Research Conference on Physical Electrochemistry
[AD-A286545] p 1240 N95-20842

Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407

Diffraction applications using the energy dispersive beamline, X6A, at NSLS
[DE94-019287] p 1572 N95-21408

Effects of RF side-bands on spectral reproducibility for infrared synchrotron radiation
[DE95-002450] p 1536 N95-21418

Auger spectrometry of atoms and molecules
[DE94-018052] p 1524 N95-21664

Bunched beam instability with frequency spread
[DE94-018632] p 1539 N95-22357

SYNCHROTRONS

Effect of space charge tune shift on transverse instabilities
[DE94-016790] p 1531 N95-20282

A URI program for Ultraviolet/extreme ultraviolet research
[AD-A279159] p 1370 N95-20600

Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407

RF beam control for the AGS Booster
[DE95-001485] p 1538 N95-21720

Hydrogen and related materials at high density: Physics, chemistry and planetary implications
p 1418 N95-21791

SYNOPTIC METEOROLOGY

Climatological data for clouds over the globe from surface observations, 1982-1991: The total cloud edition
[DE95-002537] p 1431 N95-22288

SYNTAX

Comparison of Ward and Mellor's transformation schema with State- and Activitycharts
[PB95-110698] p 1459 N95-20258

GOLD: A Graph Oriented Language for Databases
[PB95-127544] p 1465 N95-21021

Compositional proof theory for fault tolerant real-time distributed systems
[PB95-127601] p 1465 N95-21025

Semantics for a fine lambda-calculus with de Bruijn indices
[PB95-127577] p 1492 N95-21372

Initial experience with noncorrecting syntax error handling
[PB95-132700] p 1471 N95-22029

SYNTHESIS (CHEMISTRY)

Low temperature synthesis of semiconductor materials
[AD-A285120] p 1226 N95-20081

Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188

Method of making copper-titanium nitride alloy
[AD-D016582] p 1252 N95-20201

Research in the chemical sciences: Summaries of FY 1994
[DE94-015427] p 1223 N95-20264

Novel materials
[AD-A279693] p 1227 N95-20427

The synthesis and characterization of small molecule and photo-cross-linkable high polymeric phosphazenes bearing cinnamate groups
[AD-A279782] p 1268 N95-20442

Biomolecular Materials by Design, volume 330
[AD-A285369] p 1269 N95-20551

Water-soluble polyphosphazenes and their hydrogels
[AD-A279695] p 1269 N95-20580

New chiral pyrimidino-crown ether ligands
[AD-A279892] p 1223 N95-20590

Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2)
[AD-A279792] p 1224 N95-20660

Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664

Inorganic-organic polymers and their role in materials science
[AD-A279715] p 1270 N95-20671

An improved and facile method for the synthesis of 1,1-bis(4-hydroxyphenyl) 2-phenylethylene and its derivatives
[DE95-001125] p 1240 N95-20836

Macromolecular and materials design using polyphosphazenes
[AD-A279781] p 1273 N95-20978

Aromatics oxidation and soot formation in flames
[DE95-001803] p 1241 N95-21280

Technical and economic evaluation of natural gas based synthesis gas production technologies
[PB95-130597] p 1242 N95-21426

Lead-indium phosphate glasses for optical applications
[DE94-019333] p 1275 N95-21482

An initial assessment of the properties of 2,5-dipicryl-1,3,4-oxadiazole: A secondary explosive with high thermal stability
[MRL-TR-93-16] p 1284 N95-21624

Investigation on research for degradable plastics
[DE94-796550] p 1277 N95-21714

Preparation and x-ray structure of Cp2Ti(PH2SiH2)(PMe3)
[AD-A286197] p 1246 N95-21879

Oxidation behavior of aluminum nanopowders
[DE95-002721] p 1260 N95-21926

Processing of intermetallic materials by reaction synthesis
[DE94-017710] p 1263 N95-22345

SYNTHESIZERS

SYNTH: A spectrum synthesizer
[DE94-015943] p 1458 N95-20153

SYNTHETIC APERTURE RADAR

Neural models of motion perception
[AD-A286560] p 1449 N95-20845

Investigation on the backscattering properties of Finnish boreal forests at C- and X-band: A semi-empirical modeling approach
[PB95-127692] p 1389 N95-21105

Synthetic aperture radar processing with polar formatted subapertures
[DE95-001830] p 1302 N95-21305

SYNTHETIC FUELS

Bioconversion of coal derived synthesis gas to liquid fuels
[DE94-017381] p 1282 N95-19927

Catalytic reactions of synthesis gas. Part 3. Determination of reaction kinetics
[PB95-127759] p 1248 N95-22329

SYNTHETIC RUBBERS

A test of the Arrhenius extrapolation assumption for a nitrile rubber
[DE94-017337] p 1263 N95-19926

SYSTEM IDENTIFICATION

Modular CNI avionics system p 1213 N95-20659

SYSTEMS ANALYSIS

Analytic Perturbation Analysis of Discrete Event Dynamic Systems
[DE94-018635] p 1480 N95-20126

System level fault tolerance in parallel and distributed computing systems
[AD-A279664] p 1474 N95-20305

Detection optimization using linear systems analysis of a coded aperture laser sensor system
[DE95-001112] p 1371 N95-20832

Systems Analysis Laboratory. Ten years of progress 1984-1994
[PB95-104451] p 1464 N95-20982

Multi-dimensional Petri nets
[PB95-127593] p 1491 N95-21024

Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 1: Main lectures
[AD-A286062] p 1380 N95-21171

The Photovoltaic Higher Education National Exemplar Facility (PHENEF)
[DE94-015641] p 1395 N95-21409

Proceedings of the NATO-Advanced Study Institute on Computer Aided Analysis of Rigid and Flexible Mechanical Systems. Volume 2: Contributed papers
[AD-A286063] p 1381 N95-21488

Mars power system concept definition study. Volume 2: Appendices
[NASA-CR-195420-VOL-2] p 1396 N95-21953

Mathematical theory of neural networks
[AD-A286508] p 1485 N95-22213

Low-level RF control for the AFEL
[DE94-018295] p 1540 N95-22410

SYSTEMS COMPATIBILITY

The Materials Corrosion and Environmental Effects Laboratory (MCEL)
[DE94-018268] p 1254 N95-20816

SYSTEMS ENGINEERING

Hierarchical diagrammatic representation of class structure
[PB95-110722] p 1456 N95-19908

SPACE-R thermionic space nuclear power system: Design and technology demonstration
[DE95-000713] p 1221 N95-20076

The First NREL Conference on Thermophotovoltaic Generation of Electricity: Proceedings
[DE94-011831] p 1391 N95-20332

Development of a lightweight, light-trapped, thin GaAs solar cell for spacecraft applications
p 1318 N95-20513

FASTPACK: Optimized solutions for modular avionics derived from a parametric study. Part 1: Platform features p 1208 N95-20634

EPICS simulation tools for control system development
[DE94-018082] p 1462 N95-20699

Highlights of recent balance of system research and evaluation
[DE95-001626] p 1393 N95-20863

Mechanical design of the DO silicon detector
[DE95-002532] p 1365 N95-20902

Exploratory Technology Research Program for electrochemical energy storage
[DE95-002652] p 1394 N95-20915

Multiple Mechanism Propagation Paths (MMPPs): Their Characterisation and Influence on System Design
[AGARD-CP-543] p 1292 N95-20921

A MMPP communications system for the frequency range 2-200MHz p 1293 N95-20924

Low noise 22 GHz receiver for the radioastron satellite. Part 1: Requirements, design and reliability analysis
[PB95-104410] p 1300 N95-20972

Routing of unidirectional packet radio for wide-area paging network control and maintenance
[PB95-104428] p 1300 N95-20980

Advanced wind turbine design studies: Advanced conceptual study
[DE93-000031] p 1394 N95-20985

Preliminary study of HUTSAT microsatellite
[PB95-127619] p 1220 N95-21026

Methodology for ESCA analysis of electromigration
[AD-A286229] p 1241 N95-21168

EXPERT system expert: Program description
[PB95-131561] p 1482 N95-21429

Crew-Centered Cockpit Design (CCCD) field demonstration program, volume 1
[AD-A286426] p 1453 N95-21566

Design model for open distributed processing systems
[PB95-135505] p 1477 N95-21620

Underwater Acoustic Generator Phase 2: Sea trial, March 1992
[MRL-TN-640] p 1434 N95-21657

An 8-meter-long coupled cavity RFQ linac
[DE94-018077] p 1331 N95-21667

Structuring design requirements using YMIR
[PB95-132742] p 1471 N95-22081

Bridging worlds/charting new courses
[DE95-003808] p 1397 N95-22335

SYSTEMS INTEGRATION

System design document U-AVLIS control system architecture
[DE94-017297] p 1460 N95-20387

FASTPACK: Optimized solutions for modular avionics derived from a parametric study. Part 1: Platform features p 1208 N95-20634

SYSTEMS MANAGEMENT

But what will it Cost? The history of NASA cost estimating p 1583 N95-20742

Defense Data Repository System (DDRS). End user manual
[AD-A286484] p 1592 N95-22293

SYSTEMS SIMULATION

A simulation study of TCP performance in ATM networks
[DE94-016622] p 1477 N95-21505

SYSTOLIC ARRAYS

Preliminary evaluation of a digital optical systolic processor implemented with acousto-optic cells
[AD-A286377] p 1541 N95-20231

T

TABLES (DATA)

The effects of three-dimensional graphs on decision making
[AD-A285034] p 1583 N95-20051

Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0
[DE94-019214] p 1458 N95-20073

TBell: A mathematical tool for analyzing decision tables
[NASA-CR-195027] p 1462 N95-20691

Solar-Geophysical Data number 600, August 1994. Part 1: (Prompt reports). Data for July, June 1994, and late data
[PB95-104923] p 1603 N95-20713

Solar-Geophysical Data number 600, August 1994. Part 2: (Comprehensive reports). Data for February 1994 and miscellaneous
[PB95-105060] p 1603 N95-20722

TACHOMETERS

Variations observed in the AC generator signal period of a Sea King helicopter
[AD-A284280] p 1206 N95-19963

TACTILE SENSORS (ROBOTICS)
Surface micromachined capacitive tactile image sensor
[PB95-108031] p 1288 N95-21633
TAIL ASSEMBLIES
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 4, part 1: Buffet cross spectral densities
[AD-A285593] p 1215 N95-21214
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 1: Wind tunnel test summary
[AD-A279126] p 1202 N95-21877
TAIL SURFACES
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 4, part 1: Buffet cross spectral densities
[AD-A285593] p 1215 N95-21214
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 1: Wind tunnel test summary
[AD-A279126] p 1202 N95-21877
TAKEOFF
F-15 resource tape
[NASA-TM-110502] p 1206 N95-19994
Wavelet-based acoustic recognition of aircraft
[DE94-017701] p 1503 N95-20019
TANDEM MIRRORS
Propulsion research on the variable tandem mirror plasma rocket
[NASA-CR-196310] p 1221 N95-20059
TANKS (COMBAT VEHICLES)
Navigation system in combat vehicle
[PB95-131629] p 1452 N95-21467
TANTALUM
Advanced concepts for gamma ray isotopic analysis and instrumentation
[DE94-016610] p 1517 N95-21174
Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289
TANTALUM ALLOYS
Plasma arc melting of titanium-tantalum alloys
[DE94-016291] p 1252 N95-20331
Corrosion resistance and behavior of construction materials exposed to dilute sulfuric acid at elevated temperatures under static conditions
[DE95-001723] p 1259 N95-21739
Plasma arc melting of a 80 weight percent tantalum -20 weight percent titanium alloy
[DE95-000846] p 1260 N95-22006
Effect of annealing temperature on the texture of rolled tantalum and tantalum-10 wt % tungsten
[DE95-002702] p 1262 N95-22308
TANTALUM OXIDES
Measurement of the thermal properties of electrically conducting fluids using coated transient hot wires
[DE94-017816] p 1357 N95-22264
TARGET ACQUISITION
Effects of bifocal and progressive-addition corrective lenses on aviator target-detection performance
[AD-A279698] p 1442 N95-20710
LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134
TARGET RECOGNITION
Experimental proof-of-concept of phase derivative based range profile enhancement ATR
[AD-A284921] p 1289 N95-19997
The spatiotemporal characteristics of visual motion priming
[AD-A284782] p 1449 N95-20062
Method and apparatus for classifying targets
[AD-D016519] p 1303 N95-21464
Definition report on target and related steering variables of radiation as a part of the environmental balance and environmental outlook investigation
[PB95-135471] p 1409 N95-21846
TARGETS
X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015
Enhanced vehicle and event typing software, phase 1
[AD-A284862] p 1458 N95-20070
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
[DE94-016447] p 1551 N95-20315
Rate controlled synthesis of composition modulated, metal-oxide thin films
[DE94-016596] p 1267 N95-20317
Production of J/(psi) in 800 GeV/c p-Si interactions
[DE94-017982] p 1513 N95-20496
Effects of bifocal and progressive-addition corrective lenses on aviator target-detection performance
[AD-A279698] p 1442 N95-20710
Radiation-driven targets for heavy-ion fusion
[DE95-002264] p 1533 N95-20784
In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236
A neutron beam polarizer for study of parity violation in neutron-nucleus interactions
[DE95-002743] p 1519 N95-21237
Shot-to-shot comparison of the first Li-beam driven Hohlraum experiments
[DE94-016558] p 1558 N95-21247
LIF standoff research
[DE94-018744] p 1535 N95-21328
Tungsten-uranium penetrator target interaction
[DE95-000847] p 1387 N95-21364
A high-rate fixed-target charm experiment
[DE95-001767] p 1521 N95-21378
Fiber-optic sensors for rapid, inexpensive characterization of soil and ground water contamination
[DE95-002471] p 1545 N95-21510
AN/APS-137 Forward Looking Airborne Radar (FLAR) evaluation, Fall 1992 experiment
[AD-A279526] p 1306 N95-21686
Impact degassing of water and noble gases from silicates p 1416 N95-21780
Selection of RIB targets using ion implantation
[DE95-000951] p 1538 N95-21938
Aluminium oxide targets after ballistic impact; fragmentation of the ceramic and the projectile
[PB95-133625] p 1388 N95-22097
LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134
Probability of detection for a GO CFAR radar processor using envelope detection approximation
[AD-A286211] p 1310 N95-22251
Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285775] p 1336 N95-22412
TASK COMPLEXITY
Human performance studies for control of multiple remote systems
[AD-A286623] p 1452 N95-20768
TASK PLANNING (ROBOTICS)
Tom Thumb algorithm for planning simple vehicle motions
[PB95-107553] p 1484 N95-22156
TASKS
The MSFC Program Control Development Program
p 1585 N95-20754
TAXONOMY
An empirical approach to logical clustering of software failure regions
[AD-A279863] p 1462 N95-20776
TEARING MODES (PLASMAS)
Coupled tearing modes in plasmas with differential rotation
[DE94-631422] p 1548 N95-19977
Fluctuations and transport in the reversed field pinch: Characterization and reduction
[DE95-000590] p 1549 N95-20113
Simulation of tearing mode stabilization by using ECH
[DE94-770700] p 1554 N95-20684
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345
TECHNETIUM
In vivo distribution of liposome encapsulated hemoglobin studied with imaging radiotracers
[AD-A279774] p 1438 N95-20806
TECHNOLOGIES
The Energy Science and Technology Database on a local library system: A case study at the Los Alamos National Research Library
[DE95-001009] p 1589 N95-20818
TECHNOLOGY ASSESSMENT
Natural gas cleanup: Evaluation of a molecular sieve carbon as a pressure swing adsorbent for the separation of methane/nitrogen mixtures
[DE94-012263] p 1234 N95-20135
Energy and Technology Review
[DE94-017686] p 1219 N95-20148
Beyond telecommuting: A new paradigm for the effect of telecommunications on travel
[DE95-001224] p 1289 N95-20214
Assessment of liquefaction and pyrolysis systems
[PB95-129797] p 1236 N95-20290
Brushless Doubly-Fed Machine system development program, phase 3
[DE94-013095] p 1315 N95-20380
Europe's space photovoltaics programme
p 1316 N95-20506
Status of diffused junction p+n InP solar cells for space applications p 1317 N95-20509
Reliability assessment of Multichip Module technologies via the Triservice/NASA RELTECH program
p 1210 N95-20643
High density monolithic packaging technology for digital/microwave avionics p 1211 N95-20646
Technical and economic evaluation of natural gas based synthesis gas production technologies
[PB95-130597] p 1242 N95-21426
An MCM concurrent engineering software tool market study
[AD-A279257] p 1468 N95-21489
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530
Power systems for future missions
[NASA-CR-195320] p 1222 N95-21531
An initial assessment of the properties of 2,5-dipicryl-1,3,4-oxadiazole: A secondary explosive with high thermal stability
[MRL-TR-93-16] p 1284 N95-21624
Ceramic technology for advanced heat engines
[DE95-000950] p 1278 N95-21937
Plasma processing for integrated circuits
[DE95-001419] p 1335 N95-22149
TECHNOLOGY TRANSFER
Geothermal direct-heat utilization assistance
[DE94-011546] p 1391 N95-20104
Environmental cleanup technology transfer initiatives
[AD-A285059] p 1403 N95-20487
HPCC technology awareness program: Improved economic competitiveness through technology awareness, transfer and application
[DE95-002134] p 1476 N95-21355
ANSTO: Program of research, 1993-1994
[DE94-631122] p 1605 N95-21828
Bridging worlds/charting new courses
[DE95-003808] p 1397 N95-22335
Technology transfer: Improving the use of cooperative R/D agreement at DOE's contractor-operated laboratories. Report to Congressional requesters
[GAO/RCED-94-91] p 1586 N95-22403
Space systems technology working group: Executive report
[AD-A285778] p 1217 N95-22413
TECHNOLOGY UTILIZATION
Geothermal direct-heat utilization assistance
[DE94-011546] p 1391 N95-20104
Performance specifications for technology development: Application for characterization of volatile organic compounds in the environment
[DE94-016627] p 1401 N95-20234
The First NREL Conference on Thermophotovoltaic Generation of Electricity: Proceedings
[DE94-011831] p 1391 N95-20332
An update on the Department of Energy's photovoltaic program p 1316 N95-20505
Status of flexible CIS research at ISET
p 1317 N95-20512
Development of a lightweight, light-trapped, thin GaAs solar cell for spacecraft applications
p 1318 N95-20513
Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514
Amorphous silicon thin films: The ultimate lightweight space solar cell p 1318 N95-20515
Calculation of near optimum design of InP/In(0.53)Ga(0.47)As monolithic tandem solar cells
p 1318 N95-20517
Processing and applications of iron aluminides
[DE94-017855] p 1253 N95-20673
Representing manufacturing features to support design and process changes
[DE94-018587] p 1467 N95-21389
Policies concerning military and civilian research and technology applications
[PB95-131355] p 1585 N95-21427
Independent review of Aviation Technology and Research Information Analysis System (ATRIAS) database
[AD-A284049] p 1203 N95-21518
Power systems for future missions. Appendices A-L
[NASA-CR-195320-APP-A-L] p 1395 N95-21530
Spinoff, 1994
[NASA-NP-214] p 1594 N95-21893
Advanced energy systems and technologies research programme
[DE95-717486] p 1397 N95-22337
TECTONICS
Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477
TEFLON (TRADEMARK)
Optical multilayers with an amorphous fluoropolymer
[DE94-017693] p 1541 N95-20218
TELECOMMUNICATION
Algebraic semantics of message sequence charts
[PB95-110581] p 1288 N95-19890
Beyond telecommuting: A new paradigm for the effect of telecommunications on travel
[DE95-001224] p 1289 N95-20214

Advanced Command and Control (C2) applications interfaces to the Advanced Communications Technology Satellite (ACTS)
[AD-A279676] p 1291 N95-20605
The demise of plastic encapsulated microcircuit myths p 1209 N95-20640
Passive monitoring for automated MMPP communication systems p 1293 N95-20927
Simulation of the impact of atmospheric turbulences on millimeter-wave communications systems p 1295 N95-20939
Experimental study of the helicopter-mobile radioelectrical channel and possible extension to the satellite-mobile channel p 1296 N95-20945
FIREDOC users manual, 3rd edition
[PB95-128674] p 1286 N95-21129
Application-oriented architecture for multimedia teleservices
[PB95-135513] p 1306 N95-21623
Modelling multimedia teleservices with OSI upper layers framework: Short paper
[PB95-132734] p 1308 N95-22080

TELECONFERENCING
Modelling multimedia teleservices with OSI upper layers framework: Short paper
[PB95-132734] p 1308 N95-22080

TELEMETRY
Digital filtering for data compression in telemetry systems
[DE94-016611] p 1219 N95-20567

TELESCOPES
Pushing the limits of spatial resolution with the Kuiper Airborne observatory p 1593 N95-21754

TELEVISION SYSTEMS
Application of computer-generated holograms to optical transformations
[AD-A286356] p 1368 N95-22256

TELLURIDES
Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712
Performance of cesium telluride photocathodes as an electron source for the Los Alamos FEL
[DE94-018302] p 1375 N95-21919

TELLURIUM
Scanning tunneling microscopy of semiconductor surfaces
[AD-A279982] p 1571 N95-20964
IR materials producibility
[AD-A280094] p 1328 N95-21017
Research on the power generation system with thermoelectric conversion elements
[DE95-714804] p 1397 N95-22309

TELLURIUM COMPOUNDS
Photocathodes for free electron lasers
[DE94-018305] p 1376 N95-22242
Fabrication and characterization of cesium telluride photocathodes: A promising electron source for the Los Alamos Advanced FEL
[DE94-018303] p 1377 N95-22348

TEMPEL 2 COMET
Application of MCM image construction to IRAS comet observations p 1594 N95-21772

TEMPERATE REGIONS
Effects of microphysics and radiation on mesoscale processes of a midlatitude squall line
[DE94-014732] p 1429 N95-20381
Semi-volatiles at Mercury: Sodium (Na) and potassium (K) p 1424 N95-21818

TEMPERATURE CONTROL
Direct aromatization of methane
[DE94-017131] p 1233 N95-19924
Preliminary control system design and analysis for the Space Station Furnace Facility thermal control system
[NASA-TM-108476] p 1365 N95-20560
Liquid flow-through cooling of electronic modules p 1211 N95-20647
Thermal fixture for testing an integrated circuit
[AD-D016483] p 1333 N95-21900
High average power diode pumped solid state lasers for CALIOPE
[DE94-019248] p 1376 N95-22121

TEMPERATURE DEPENDENCE
A test of the Arrhenius extrapolation assumption for a nitrile rubber
[DE94-017337] p 1263 N95-19926
Post-irradiation deformation characteristics of heavy-ion irradiated 304L SS
[DE94-017462] p 1251 N95-20088
Properties of molecular solids and fluids at high pressure and temperature
[DE94-017594] p 1565 N95-20243
Thermodynamic analysis of stable and metastable equilibrium diagrams of the Cu-Cr system
[PB95-127775] p 1255 N95-21111
In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236
Overview of the field and temperature dependence of J(c) in Ag/BSCCO tapes
[PB95-110318] p 1574 N95-21636
Corrosion resistance and behavior of construction materials exposed to dilute sulfuric acid at elevated temperatures under static conditions
[DE95-001723] p 1259 N95-21739
Non-H2Se, ultra-thin CuInSe2 devices
[DE94-011894] p 1395 N95-21844
Irradiation creep in structural materials at ITER operating conditions
[DE94-018946] p 1261 N95-22123
Temperature dependence of a magnetopolaron in a harmonic quantum dot in resonant magnetic fields
[DE94-629036] p 1502 N95-22177
Temperature dependence of magnetopolarons in a parabolic quantum dot in arbitrary magnetic fields
[DE94-629033] p 1528 N95-22218
Studies of the microwave resistivity of kappa-(BEDT-TTF)2Cu(N(CN)2)Cl
[DE95-002980] p 1262 N95-22291

TEMPERATURE DISTRIBUTION
Effects of non-unity Lewis numbers in diffusion flames p 1249 N95-21036
Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037

TEMPERATURE EFFECTS
Investigation of a thermal buoyancy effect on the drag of half models tested in the ARA Transonic Wind Tunnel
[ARA-MEMO-407] p 1199 N95-19946
Mechanical behavior of 97.2% W alloy in tension at high temperatures
[AD-A284797] p 1250 N95-20067
Generation of micro-domains in AT-cut quartz by thermal processing and the effect on resonator modes
[DE94-017344] p 1564 N95-20087
Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
[DE94-016879] p 1500 N95-20106
Mercury capture in bench-scale absorbers
[DE94-016910] p 1234 N95-20107
Application of an energy-based life prediction model to bithermal and thermomechanical fatigue
[NASA-TM-106684] p 1385 N95-20179
Nonlinear Faraday effect in CdS semiconductor in an ultrahigh magnetic field
[DE94-016804] p 1564 N95-20240
A new mini Ball Grid Array (mBGA) multichip module technology
[DE94-018897] p 1480 N95-20342
Effect of heat treatment temperature on creep-rupture properties of Fe3Al-based alloys
[DE94-017904] p 1253 N95-20375
The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers
[DE94-015742] p 1268 N95-20396
Review of solar cell temperature coefficients for space p 1323 N95-20541
Crystalline beams
[DE95-002656] p 1569 N95-20793
Effects of non-unity Lewis numbers in diffusion flames p 1249 N95-21036
Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037
Temperature effects on acoustic interactions between altitude test facilities and jet engine plumes
[NASA-CR-197638] p 1504 N95-21170
Effect of atmospheric pressure on measured aircraft noise levels
[PB95-130423] p 1207 N95-21425
Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films
[DE94-018964] p 1244 N95-21549
Instabilities in natural-convection flows in cavities
[PB95-107975] p 1354 N95-21578
Non-linear A/D converters for integrated silicon smart sensors
[PB94-208402] p 1330 N95-21590
Modeling the response of the California Current system to Global Greenhouse Warming
[DE94-018253] p 1408 N95-21708
A visual cell for measuring the solubility of prograde soluble salts in water at high temperatures and pressures
[DE95-002058] p 1245 N95-21732
Oxidation behavior of aluminum nanopowders
[DE95-002721] p 1260 N95-21926
Flux creep with logarithmic U(j) dependence
[DE94-629058] p 1577 N95-22180
Effect of annealing temperature on the texture of rolled tantalum and tantalum-10 wt % tungsten
[DE95-002702] p 1262 N95-22308

TEMPERATURE GRADIENTS
Transport phenomena in the micropores of plug-type phase separators
[NASA-TM-108479] p 1340 N95-20561
Instabilities in natural-convection flows in cavities
[PB95-107975] p 1354 N95-21578
Far-infrared mapping of dusty elliptical galaxies p 1593 N95-21763
Phase E in a water-saturated peridotite system at 9.3 GPa p 1420 N95-21799
Stability effects on the profiles of vertical velocity and its variance in katabatic flow
[DE95-001126] p 1426 N95-21836

TEMPERATURE INVERSIONS
Air pollution caused by fireworks during the turn of the year 1992-1993
[PB95-135265] p 1409 N95-21718

TEMPERATURE MEASUREMENT
An at-sea evaluation of an infrared/resistance temperature device for air/sea-surface temperature measurements
[AD-A279672] p 1365 N95-20604
Multiwire thermocouples: Frequency response
[NASA-TM-110510] p 1367 N95-21889
Acoustic Thermometry of Ocean Climate (ATOC): Selection of California source site
[AD-A279295] p 1436 N95-21987
Numerical investigation of one-dimensional heat-flux calculations
[AD-A286293] p 1582 N95-22054
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A286435] p 1436 N95-22209

TEMPERATURE PROBES
Dual active surface heat flux gage probe
[NASA-TM-106861] p 1366 N95-21391

TEMPERATURE PROFILES
Synthesizing the Gulf Stream thermal structure from XBT data
[AD-A279665] p 1433 N95-20458
Enhanced scrape-off layer plasma in D3-D double-null discharges
[DE94-017977] p 1554 N95-20571
Azimuthally averaged radial S(sub 100 microns)/S(sub 60 microns) dust color temperatures in spiral galaxies p 1593 N95-21760

TEMPORAL DISTRIBUTION
Source distribution of visual evoked neuromagnetic responses
[PB95-127643] p 1445 N95-21348

TEMPORAL LOGIC
Abstract interpretation of reactive systems: Abstractions preserving Universal CTL(*), Existential CTL(*) and CTL(*)
[PB95-110557] p 1472 N95-22305

TEMPORAL RESOLUTION
Temporal and spectral investigation of multi-Landau level quantum beats in GaAs
[DE94-018189] p 1569 N95-20678
Progress in ultrafast scanning probe microscopy
[DE94-018179] p 1373 N95-21261
Time resolved x-ray detection
[AD-A279348] p 1368 N95-22143

TENSILE CREEP
Creep behavior in SiC whisker-reinforced alumina composite
[DE95-001071] p 1231 N95-21776

TENSILE PROPERTIES
Microstructures and tensile properties of as-cast iron-aluminide alloys
[DE94-017868] p 1252 N95-20359
The processing and mechanical properties of high temperature/high performance composites. Stress redistribution and notch properties, book 2
[AD-A279737] p 1227 N95-20429
Impact behavior of FeAl alloy FA-350
[DE94-018128] p 1254 N95-20705
Plasma arc melting of a 80 weight percent tantalum -20 weight percent titanium alloy
[DE95-000846] p 1260 N95-22006
Incology alloy 908 data handbook
[DE95-001818] p 1260 N95-22013
Tensile and impact properties of iron-aluminum alloys
[DE94-017750] p 1263 N95-22346

TENSILE STRENGTH
Carbon fiber reinforced superconductor composites
[DE95-002504] p 1229 N95-20913
Fracture behavior of the Fe-8Al alloy FAP-Y
[DE95-000956] p 1258 N95-21676
The development of a super-alpha2 titanium aluminide alloy consolidated by rapid omnidirectional compaction
[AD-A279254] p 1260 N95-21986

Low temperature tensile and fracture mechanical strength in mode 1 and mode 2 of fiber reinforced plastics following various irradiation conditions [DE94-019269] p 1232 N95-22130

TENSILE STRESS

Approaches to the design of structural ceramics incorporating whiskers and particulate phases [DE94-018126] p 1271 N95-20704
The development of a super-alpha2 titanium aluminide alloy consolidated by rapid omnidirectional compaction [AD-A279254] p 1260 N95-21986

TENSILE TESTS

Mechanical behavior of 97.2% W alloy in tension at high temperatures [AD-A284797] p 1250 N95-20067
Development of superplasticity in 5083 aluminum with additions of Mn and Zr [DE94-017474] p 1251 N95-20090

TENSORS

Large eddy simulation of channel flow using a vorticity transport subgrid model p 1348 N95-21076
Solid-state NMR characterization of C- and N-labelled phthalimides: Model compounds for studying polyimides [AD-A286479] p 1578 N95-22286
Databases post-processing in Tensoral p 1363 N95-22465

TEREPHTHALATE

Determinations of phase transitions in nylon 6-12, nylon-6, polyvinyl chloride and polyethylene terephthalate by positron annihilation spectroscopy [DE94-629992] p 1239 N95-20736

TERMINAL BALLISTICS

Significance of impact velocity for the extent of damage in carbon/epoxy laminates [PB95-133484] p 1230 N95-21417
Aluminium oxide targets after ballistic impact; fragmentation of the ceramic and the projectile [PB95-133625] p 1388 N95-22097

TERMINOLOGY

Abbreviations and acronyms [NASA-TM-110506] p 1590 N95-21457
Glossary of frequency and timing terms and a pictorial representation of terms used in the behavior and analyses of frequency standards [AD-A286172] p 1310 N95-22247

TERNARY ALLOYS

Novel materials [AD-A279693] p 1227 N95-20427
Excitons in semiconducting superlattices, quantum wells, and ternary alloys [DE95-001867] p 1572 N95-21287
Tensile and impact properties of iron-aluminum alloys [DE94-017750] p 1263 N95-22346

TERNARY SYSTEMS

Magnetic x ray circular dichroism in Fe Co Pt multilayers [DE94-017522] p 1253 N95-20447
Metastable bcc phase formation in the Nb-Cr-Ti system [DE94-016212] p 1255 N95-21137
Computational modeling of diffusion-controlled transformations in ternary systems [DE95-001358] p 1256 N95-21298

TERRAIN

Evolution of ground line of sight data field collection techniques [AD-A285062] p 1204 N95-20497
Terrain and refractivity effects on non-optical paths p 1294 N95-20931
Combined effects of atmosphere and terrain on UHF/microwave paths p 1295 N95-20935
ICE BABY: Measurements of concentration fluctuations in a forest area in winter conditions [PB95-133468] p 1405 N95-21274
Review of GIS applications in hydrologic modeling [AD-A279076] p 1390 N95-21628
Stability effects on the profiles of vertical velocity and its variance in katabatic flow [DE95-001126] p 1426 N95-21836
Solving the inverse problem in terrain modeling [AD-A285860] p 1391 N95-22131

TERRESTRIAL PLANETS

Conference on Deep Earth and Planetary Volatiles [NASA-CR-196944] p 1415 N95-21777
Impact degassing of water and noble gases from silicates p 1416 N95-21780
Origin and loss of the volatiles of the terrestrial planets p 1417 N95-21785
Degassing history and evolution of volcanic activity of terrestrial planets based on radiogenic noble gas degassing models p 1424 N95-21816
Implications of noble gases in a recently recognized Martian meteorite (ALH84001) for the degassing history of Mars p 1424 N95-21819
Water abundance and accretion history of terrestrial planets p 1424 N95-21820

TEST CHAMBERS

16-foot transonic tunnel test section flowfield survey [NASA-TM-109157] p 1216 N95-20669
Space power facility readiness for Space Station power system testing [NASA-TM-106829] p 1218 N95-21384

TEST FACILITIES

Round-robin comparison of heat release apparatus [AD-A285831] p 1363 N95-20031
Design trade-off study for a large volume short pulse neutron assembly [DE94-019175] p 1509 N95-20206
Description and flow characterization of hypersonic facilities [AD-A284291] p 1200 N95-20248
Inverse Cerenkov laser acceleration experiment at ATF [DE94-017990] p 1370 N95-20572
Testing of the SAIC facets on the stretched-membrane dish [DE95-001831] p 1393 N95-20864
Recent National Solar Thermal Test Facility activities, in partnership with industry [DE95-001828] p 1394 N95-21353
Space power facility readiness for Space Station power system testing [NASA-TM-106829] p 1218 N95-21384
Portable static test facility for small, expendable, turbojet engines, phase 1 [AD-A286337] p 1216 N95-21719
Cathode Life Test Facility [AD-A286232] p 1334 N95-22023
The Large Area Pulsed Solar Simulator (LAPSS) [NASA-CR-197339] p 1397 N95-22336
Proceedings of the 4th Annual Major Range and TestFacility Base (MRTFB) Environmental Workshop [AD-A285779] p 1411 N95-22414

TEST PILOTS

T-45A High Angle of Attack Testing: US Naval Test Pilot School 46th Annual Reunion and Symposium [AD-A284000] p 1207 N95-20466

TEST STANDS

Real-time reconfiguration study [AD-A286060] p 1464 N95-20910

TEST VEHICLES

A new mini Ball Grid Array (mBGA) multichip module technology [DE94-018897] p 1480 N95-20342

TETHERED BALLOONS

CALIOPE and TAISIR airborne experiment platform [DE94-018328] p 1310 N95-22299

TETHERED SATELLITES

Tethered satellite: Forces and motion [NASA-TM-110518] p 1220 N95-21858

TETHERING

Towards tailored interphase formation utilizing surface-bound benzylsulfonium salts as cationic initiators [AD-A286461] p 1280 N95-22259

TETRAHYDROFURAN

The preparation of all para-polyphenyls with increased solubility and enhanced third order NLO activity [AD-A284301] p 1266 N95-20251

TEXTURES

Local texture and strongly linked conduction in spray-pyrolyzed TlBa2Ca2Cu3O(8+x) deposits [DE94-017887] p 1578 N95-22269
Characterization of a texture gradient in tantalum plate [DE95-002704] p 1262 N95-22289
Effect of annealing temperature on the texture of rolled tantalum and tantalum-10 wt % tungsten [DE95-002702] p 1262 N95-22308

THALLIUM

T1F ((1) sigma (+)): Some preliminary electronic structure calculations [PB95-130316] p 1518 N95-21223
Surface x-ray scattering and scanning tunneling microscopy studies at the Au(111) electrode [DE95-002409] p 1573 N95-21516

THALLIUM COMPOUNDS

Dependence of critical current density on microstructure and processing of high-T(c) superconductors [DE95-000685] p 1571 N95-21167
InTlSb for long-wavelength infrared photodetectors and arrays [AD-A280109] p 1331 N95-21660
Local texture and strongly linked conduction in spray-pyrolyzed TlBa2Ca2Cu3O(8+x) deposits [DE94-017887] p 1578 N95-22269

THALLIUM ISOTOPES

ANSTO: Mission statement, significant events and achievements [DE94-631123] p 1605 N95-21830

THEOREMS

General conservative extension theorem in process algebra [PB95-110656] p 1487 N95-19902
Balanced matrices [AD-A280021] p 1490 N95-20662
Adjunctions [PB95-134078] p 1494 N95-21868
Minimal square spectral factors [PB95-132726] p 1495 N95-22032
Local connectivity of some Julia sets containing a circle with an irrational rotation [PB95-109070] p 1496 N95-22353

THEORETICAL PHYSICS

Research in theoretical elementary particle physics at the University of Florida, task A [DE94-004373] p 1512 N95-20469
Theoretical particle physics [DE95-002447] p 1515 N95-20893
Heavy ion collisions [DE95-002712] p 1520 N95-21321
Theoretical atomic physics for fusion [DE94-019196] p 1524 N95-21605
Tethered satellite: Forces and motion [NASA-TM-110518] p 1220 N95-21858
The solar flux of thermal neutrinos and antineutrinos of all flavors [DE95-003204] p 1604 N95-22085
Transactions of the Eleventh Army Conference on Applied Mathematics and Computing [AD-A279884] p 1497 N95-22389

THERAPY

Radiofrequency hyperthermia systems: Experimental and clinical assessment of the feasibility of radiofrequency hyperthermia systems for loco-regional deep heating [PB94-206885] p 1444 N95-21016

THERMAL ANALYSIS

Fusion welding of advanced borated stainless steels [DE94-019037] p 1378 N95-20053
A new mini Ball Grid Array (mBGA) multichip module technology [DE94-018897] p 1480 N95-20342
Synthesizing the Gulf Stream thermal structure from XBT data [AD-A279665] p 1433 N95-20458
The formation of reaction bonded Si3N4 at low temperatures and in short times [DE95-001990] p 1275 N95-21289
Theory and modelling of quench in cable-in-conduit superconducting magnets [DE95-001819] p 1330 N95-21442
An initial assessment of the properties of 2,5-dipicryl-1,3,4-oxadiazole: A secondary explosive with high thermal stability [MRL-TR-93-16] p 1284 N95-21624
Lubricant evaluation and performance, 2 [AD-A279144] p 1278 N95-21969
Frame and edge seal technology: A state of the art survey [PB95-110334] p 1288 N95-22014
High temperature corrosion and crack growth of SiC/SiC at variable oxygen partial pressures [DE94-018715] p 1232 N95-22115
Thermal and deformation analyses of a novel cryogenically cooled monochromator for an Advanced Photon Source beamline [DE94-016914] p 1527 N95-22190

THERMAL BARRIERS (PLASMA CONTROL)

On conception of a compact neutron source and the possibility of its simulation on the Amba-M end trap [DE94-633373] p 1562 N95-22282

THERMAL BATTERIES

Development of a tester for evaluation of prototype thermal cells and batteries [DE95-000540] p 1325 N95-20628

THERMAL CONDUCTIVITY

The thermal conductivity of carbon coated silicon carbide fibers embedded in a silicon carbide matrix [DE94-017758] p 1225 N95-20023
Properties of whisker-reinforced ceramics [DE94-017759] p 1264 N95-20024
Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen [DE94-016879] p 1500 N95-20106
The thermal conductivity of carbon-fiber reinforced metal matrix composites [DE94-017767] p 1226 N95-20125
Computer program for calculation of complex chemical equilibrium compositions and applications. Part 1: Analysis [NASA-RP-1311] p 1235 N95-20180
Materials processing and manufacturing technologies for diamond substrates multichip modules [AD-A285060] p 1315 N95-20488
Review of recent D-T experiments from TFTR [DE95-002755] p 1557 N95-21239
The thermal conductivity of silicon nitride with molybdenum disilicide additions [DE94-017757] p 1247 N95-22260

Measurement of the thermal properties of electrically conducting fluids using coated transient hot wires
|DE94-017816| p 1357 N95-22264

THERMAL CYCLING TESTS
Thermo-mechanical fatigue of polymer matrix composites
|AD-A285931| p 1267 N95-20390
Carbon fiber reinforced superconductor composites
|DE95-002504| p 1229 N95-20913
Development of an advanced JP-8 fuel
|AD-A285583| p 1283 N95-21161
Survivability of soldered leadless chip carriers after temperature cycling
|DE95-001497| p 1329 N95-21301

THERMAL DECOMPOSITION
An atomically-resolved STM study of the thermal decomposition of disilane on Si(001)
|AD-A279818| p 1567 N95-20544
Atomically resolved structure and bonding of delta-doped boron layers on Si(001)
|AD-A279820| p 1513 N95-20586
Synthesis and characterization of (Zn(SEt)Et)10, formed via insertion of sulfur into Zn-C bonds: A new class of Wurtzite-like cluster framework
|AD-A279701| p 1569 N95-20714
The Carnol process for methanol production and utilization with reduced CO2 emissions
|DE94-016808| p 1283 N95-21211
Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
|DE95-002486| p 1283 N95-21513
Restricted mass transport effects on free radical reactions
|DE94-018136| p 1217 N95-21706

THERMAL DEGRADATION
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparisons and verification of methods
|DE95-000743| p 1264 N95-20078
Detection of environmental deterioration in fiber reinforced composites by FT-Raman spectroscopy, phase 1
|AD-A279763| p 1228 N95-20805

THERMAL DIFFUSIVITY
Laser-Induced Thermal Acoustics (LITA): Four-wave mixing measurement of sound speed, thermal diffusivity, and viscosity
|AD-A286524| p 1372 N95-21009
Heat loss by helicity injection in spheromaks
|DE95-003473| p 1562 N95-22221

THERMAL DISSOCIATION
An atomically-resolved STM study of the thermal decomposition of disilane on Si(001)
|AD-A279818| p 1567 N95-20544

THERMAL EMISSION
Shot-to-shot comparison of the first Li-beam driven Hohlraum experiments
|DE94-016558| p 1558 N95-21247
Far-infrared mapping of dusty elliptical galaxies
p 1593 N95-21763

THERMAL ENERGY
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
|DE94-016447| p 1551 N95-20315
Experimental investigation of molecular beam injection in HL-1 tokamak
|DE94-631456| p 1556 N95-21165
Economic feasibility analysis of distributed electric power generation based upon the natural gas-fired fuel cell
|DE94-012277| p 1396 N95-22033

THERMAL ENVIRONMENTS
MCMs for avionics: Technology selection and intermodule interconnection p 1210 N95-20641

THERMAL EXPANSION
Properties of whisker-reinforced ceramics
|DE94-017759| p 1264 N95-20024
Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
|DE94-016879| p 1500 N95-20106
The reliability of laser reflowed Sn-Ag solder joints
|AD-A279787| p 1315 N95-20443
High quality InP-on-Si for solar cell applications
p 1317 N95-20510
Lead-indium phosphate glasses for optical applications
|DE94-019333| p 1275 N95-21482
Thermal and deformation analyses of a novel cryogenically cooled monochromator for an Advanced Photon Source beamline
|DE94-016914| p 1527 N95-22190

THERMAL FATIGUE
Thermo-mechanical fatigue of polymer matrix composites
|AD-A285931| p 1267 N95-20390

THERMAL INSTABILITY
Instabilities in natural-convection flows in cavities
|PB95-107975| p 1354 N95-21578

THERMAL INSULATION
Proceedings of the 1993 Non-Fluorocarbon Insulation, Refrigeration and Air Conditioning Technology Workshop
|DE94-018333| p 1285 N95-20194

THERMAL MAPPING
InTISb for long-wavelength infrared photodetectors and arrays
|AD-A280109| p 1331 N95-21660
Thermal imaging systems
|AD-A279146| p 1307 N95-21970

THERMAL NEUTRONS
Non destructive characterization using pulsed fast-thermal neutrons
|DE95-002601| p 1511 N95-20422

THERMAL NOISE
Equilibrium and shot noise in mesoscopic systems
|DE95-000855| p 1576 N95-22008
Performance of a fast frequency-hopped noncoherent MFSK receiver over Rician fading channels with either partial-band interference or multi-tone interference
|AD-A286168| p 1310 N95-22246

THERMAL PROTECTION
Operating manual for hybrid thermosyphons at the Gakona Power Plant, Alaska
|AD-A279068| p 1287 N95-21626

THERMAL RADIATION
Radiation from advanced solid rocket motor plumes
|NASA-CR-196554| p 1221 N95-20124

THERMAL RESISTANCE
Thermal resistance of the cheek in cold air
|AD-A286257| p 1446 N95-22001

THERMAL SHOCK
USAF cellular mechanism of turnover of the stress induced protein HSP70
|AD-A285618| p 1441 N95-19898
Skeletal muscle ischemia and heat shock proteins
|AD-A285364| p 1442 N95-20549

THERMAL STABILITY
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparisons and verification of methods
|DE95-000743| p 1264 N95-20078
Thianthrene containing polyimides with monomer formation via nucleophilic aromatic substitution
|AD-A286313| p 1265 N95-20094
Development of an advanced JP-8 fuel
|AD-A285583| p 1283 N95-21161
Toughened Silcomp composites for gas turbine engine applications
|DE95-002851| p 1214 N95-21243
Joining dissimilar stainless steels for pressure vessel components
|PB95-133005| p 1380 N95-21446
An initial assessment of the properties of 2,5-dipicryl-1,3,4-oxadiazole: A secondary explosive with high thermal stability
|MRL-TR-93-16| p 1284 N95-21624
Lubricant evaluation and performance, 2
|AD-A279144| p 1278 N95-21969
High temperature polymer for second order nonlinear optics for photonic materials
|AD-A279309| p 1280 N95-22141

THERMAL STRESSES
Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
|DE94-016879| p 1500 N95-20106
Geometric moire method of strain analysis with displacement discontinuities
|DE95-001114| p 1386 N95-20833
Recent reflux receiver developments under the US DOE program
|DE95-001622| p 1393 N95-20861
Geometric characterization of electromigration voids (A statistical analysis of electromigration voids)
|AD-A286494| p 1328 N95-21169
Time-dependent deformation of titanium metal matrix composites
|NASA-CR-195030| p 1230 N95-21363
3-D TECATE/BREW: Thermal, stress, and birefringent ray-tracing codes for solid-state laser design
|DE95-000330| p 1376 N95-22301

THERMIONIC CONVERTERS
SPACE-R thermionic space nuclear power system: Design and technology demonstration
|DE95-000713| p 1221 N95-20076

THERMIONIC DIODES
Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
|DE94-018092| p 1560 N95-21668

THERMOCHEMISTRY
Cluster reactions: An approach to understanding the fundamentals of heterogeneous catalysis
|DE95-002947| p 1243 N95-21447
Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782

THERMOCLINES
Synthesizing the Gulf Stream thermal structure from XBT data
|AD-A279665| p 1433 N95-20458

THERMOCOUPLES
Multiwire thermocouples: Frequency response
|NASA-TM-110510| p 1367 N95-21889

THERMODYNAMIC CYCLES
Malone-brayton cycle engine/heat pump
|AD-D016573| p 1378 N95-20295

THERMODYNAMIC PROPERTIES
Computer program for calculation of complex chemical equilibrium compositions and applications. Part 1: Analysis
|NASA-RP-1311| p 1235 N95-20180
Properties of molecular solids and fluids at high pressure and temperature
|DE94-017594| p 1565 N95-20243
An atomically-resolved STM study of the thermal decomposition of disilane on Si(001)
|AD-A279818| p 1567 N95-20544
Molecular-based study of solutions in supercritical solvents
|DE94-019326| p 1580 N95-21420
The low temperature properties of (Dy(1-x)Er(x))Ni2 alloys
|DE95-001657| p 1260 N95-21923
Incology alloy 908 data handbook
|DE95-001818| p 1260 N95-22013
Materials support for the development of High Temperature Advanced Furnaces (HITAF): A comparison of selected mechanical properties for three SiC-based ceramics
|DE94-017752| p 1280 N95-22258
New thermodynamic description of the Cu-Zr system
|PB95-127189| p 1263 N95-22374

THERMODYNAMICS
Thermodynamic characterization of new palladium alloy tritides
|DE94-018430| p 1579 N95-20028
Von Neumann algebra automorphisms and time-thermodynamics relation in general covariant quantum theories
|PB95-111084| p 1580 N95-20324
Thermo-mechanical fatigue of polymer matrix composites
|AD-A285931| p 1267 N95-20390
Thermodynamic and NMR studies of solvent effect on enantiomeric recognition for a chiral organiz ammonium cation by chiral diketopyridino-18-Crown-6 type ligands at 25.0 C
|AD-A279893| p 1223 N95-20592
Chemical Structure and Dynamics program
|DE95-001117| p 1403 N95-20834
On the Taylor test. Part 3: A continuum mechanics code analysis of steady plastic wave propagation
|DE95-002252| p 1501 N95-20869
Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea
|AD-A280095| p 1433 N95-21018
Thermodynamic analysis of stable and metastable equilibrium diagrams of the Cu-Cr system
|PB95-127775| p 1255 N95-21111
Time-dependent deformation of titanium metal matrix composites
|NASA-CR-195030| p 1230 N95-21363
Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782
Natural gas combustion chemistry mechanisms research
|PB95-111670| p 1247 N95-22150
Turbine design and application
|NASA-SP-290| p 1214 N95-22341
Multi signal-domain modeling of solid-state transducers: A theoretical framework based on irreversible thermodynamics mixed finite elements and multigrid
|PB95-134995| p 1336 N95-22382
The enhancement of metallic silver monomer evaporation by the adhesion of polar molecules to silver nanocluster ions
|AD-A284936| p 1281 N95-22470

THERMOELASTICITY
Right inverse for the divergence operator in spaces of continuous piecewise polynomials
|PB95-127080| p 1496 N95-22369
Locking of the finite element method in thermoelasticity
|PB95-127098| p 1496 N95-22370

THERMOELECTRIC GENERATORS

Conceptual design of an RTG Facility Transportation System
[DE94-014443] p 1379 N95-20627

GPHS-RTGs in support of the Cassini Mission
[DE95-001492] p 1222 N95-20853

THERMOELECTRIC MATERIALS

Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892

THERMOELECTRIC POWER GENERATION

Research on the power generation system with thermoelectric conversion elements
[DE95-714804] p 1397 N95-22309

THERMOELECTRICITY

Multi signal-domain modeling of solid-state transducers: A theoretical framework based on irreversible thermodynamics mixed finite elements and multigrid
[PB95-134995] p 1336 N95-22382

THERMOGRAVIMETRY

Thermal decomposition reactions of HMX and RDX and their importance in predicting cookoff hazards
[DE95-002486] p 1283 N95-21513

High temperature corrosion and crack growth of SiC/SiC at variable oxygen partial pressures
[DE94-018715] p 1232 N95-22115

Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385

THERMONUCLEAR POWER GENERATION

The ITER in-vessel system
[DE94-018053] p 1560 N95-21665

THERMONUCLEAR REACTIONS

National Ignition Facility: Experimental plan
[DE94-016542] p 1550 N95-20189

Laser design basis for the National Ignition Facility
[DE94-016700] p 1534 N95-21209

Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702

Current status of fusion-relevant covariance data
[DE95-000865] p 1561 N95-22010

THERMOPHYSICAL PROPERTIES

Solidification modeling of a spiral casting to determine material fluidity
[DE94-018930] p 1285 N95-20050

Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-018414] p 1287 N95-21631

Thermophysical properties of HFC-143a and HFC-152a
[DE95-002199] p 1582 N95-22153

THERMOSETTING RESINS

Ceramics formed by pyrolysis of either linear or thermosetting carborane (siloxane or silane) acetylene based precursor polymers
[AD-D016563] p 1266 N95-20291

Conducting thermoset polymers
[AD-A286541] p 1273 N95-21014

THERMOSIPHONS

Operating manual for hybrid thermosyphons at the Gakona Power Plant, Alaska
[AD-A279068] p 1287 N95-21626

THICK FILMS

Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596

Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167

Aligned bismuth, strontium, calcium cuprate coatings on polycrystalline substrates
[AD-D016512] p 1278 N95-21907

THICK WALLS

Fabrication of ceramic composites: Forced CVI
[DE95-001076] p 1271 N95-20821

THICKNESS

The effect of fiber coating thickness on the interfacial properties of a continuous fiber ceramic matrix composite
[DE94-017886] p 1267 N95-20373

A model of an infinite length, axisymmetric, isotropic, forced thick shell
[AD-A285586] p 1386 N95-21212

Development of a portable ice-thickness measuring instrument
[AD-A279472] p 1433 N95-21291

Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289

THIN FILMS

Synthesis and studies of organometallic precursors for CVD of thin film electronic materials
[AD-A285834] p 1223 N95-20033

Sol-gel-derived silica films with tailored microstructures for applications requiring organic dyes
[DE94-018886] p 1264 N95-20047

Thianthrene containing polyimides with monomer formation via nucleophilic aromatic substitution
[AD-A286313] p 1265 N95-20094

Energetics, bonding mechanism and electronic structure of ceramic/ceramic and metal/ceramic interfaces
[DE95-000601] p 1265 N95-20115

Polycrystalline thin film cadmium telluride solar cells fabricated by electrodeposition
[DE94-011848] p 1391 N95-20118

Rate controlled synthesis of composition modulated, metal-oxide thin films
[DE94-016596] p 1267 N95-20317

Polycrystalline CuInSe2 and CdTe solar cells
[DE94-011875] p 1392 N95-20333

Enhanced ionic conduction at the film/substrate interface in LiI thin films grown on sapphire(0001)
[DE94-017884] p 1565 N95-20371

Mean field analysis of orientation selective grain growth driven by interface-energy anisotropy
[DE94-015797] p 1566 N95-20399

Superconducting thin film with fullerenes and method of making
[AD-D016580] p 1567 N95-20461

Novel thin-film CuInSe2 fabrication
[DE94-011874] p 1268 N95-20472

Status of flexible CIS research at ISET
p 1317 N95-20512

Advances in polycrystalline thin-film photovoltaics for space applications p 1318 N95-20514

Amorphous silicon thin films: The ultimate lightweight space solar cell p 1318 N95-20515

Rare earth garnet selective emitter
p 1322 N95-20536

Nucleation, growth, and strain relaxation of lattice-mismatched 3-5 semiconductor epitaxial layers
p 1324 N95-20543

Reliability assessment of Multichip Module technologies via the Triservice/NASA RELTECH program
p 1210 N95-20643

Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664

Ion scattering and deposition: The role of energetic particles in thin film growth
[AD-A285975] p 1514 N95-20667

Aerosol-assisted chemical vapor deposition of copper: A liquid delivery approach to metal thin films
[AD-A279702] p 1270 N95-20689

The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A279811] p 1569 N95-20807

Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881

Characterization and electrical properties of copper films grown via direct liquid coinjection of (hfac)Cu(TMVS) and TMVS
[DE95-002957] p 1272 N95-20889

Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892

Study on the reaction kinetics in pulsed RF discharges under RIE conditions
[PB95-107868] p 1300 N95-21029

Methodology for ESCA analysis of electromigration
[AD-A286229] p 1241 N95-21168

Processing and modeling issues for thin-film solar cell devices
[DE94-011895] p 1394 N95-21294

Copper metallization of stainless steels
[DE95-001496] p 1256 N95-21300

Photoemission and ferromagnetism
[DE95-002419] p 1520 N95-21362

Thin-film cadmium telluride photovoltaic cells
[DE94-011886] p 1395 N95-21508

Time-resolved diagnostics of excimer laser-generated ablation plasmas used for pulsed laser deposition
[DE94-018950] p 1559 N95-21547

Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films
[DE94-018964] p 1244 N95-21549

RF vacuum microelectronics based on thin film edge-emitter technology
[AD-A279539] p 1331 N95-21690

Non-H2Se, ultra-thin CuInSe2 devices
[DE94-011894] p 1395 N95-21844

Integration of thin film decoupling capacitors
[DE95-001609] p 1333 N95-21881

Characterization equipment for electrooptics and actuators
[AD-A286285] p 1546 N95-22043

Surfaces and thin films studied by picosecond ultrasonics
[DE95-001866] p 1506 N95-22071

International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254

Measurement of the thermal properties of electrically conducting fluids using coated transient hot wires
[DE94-017816] p 1357 N95-22264

THIN WALLS

X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015

THIOLS

Scanning tunneling microscopy studies of self-assembled monolayers of alkanethiols on gold
[AD-A279910] p 1253 N95-20577

THIOPHENES

Selenophene transition metal complexes
[DE95-001675] p 1260 N95-21841

THORIUM ISOTOPES

Thorium-232 in human tissues: Metabolic parameters and radiation doses
[DE94-019275] p 1441 N95-20074

THORIUM OXIDES

Thoriated-tungsten, split-ring, hollow-cathode electrode for discharge devices
[AD-D016508] p 1333 N95-21906

THREAT EVALUATION

Test and evaluation report for the Manual Domestic Passive Profiling System (MDPPS)
[AD-A286312] p 1202 N95-20093

THREE DIMENSIONAL BOUNDARY LAYER

Numerical study of realistic perturbations in three-dimensional boundary layers p 1351 N95-21091

THREE DIMENSIONAL FLOW

Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames
[AD-A279945] p 1238 N95-20581

Application of Direct and Large Eddy Simulation to Transition and Turbulence
[AGARD-CP-551] p 1346 N95-21061

Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063

The effect of initial conditions on the development of temporally evolving planar three dimensional incompressible wakes p 1350 N95-21085

Direct simulation of tridimensional wake of NACA 0012 profile p 1350 N95-21086

Spatial direct numerical simulation of boundary layer transition under strong adverse pressure gradient
p 1351 N95-21093

Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble
p 1352 N95-21095

DNS of turbulent flow in a driven cavity and their analysis using proper orthogonal decomposition
p 1352 N95-21097

Direct simulation and graphics post-processing of three-dimensional turbulent flows p 1352 N95-21098

The structure of turbulence and other motions beneath an air-water interface
[AD-A279838] p 1434 N95-21293

Convergence acceleration of the Proteus computer code with multigrid methods
[NASA-CR-197677] p 1467 N95-21450

Forced free-shear layer measurements
p 1362 N95-22460

THREE DIMENSIONAL MODELS

The influence of ply waviness with nonlinear shear on the stiffness and strength reduction of composite laminates
[AD-A285736] p 1224 N95-19899

Solutions of D(sup n)D(sup m)f=0
[PB95-110839] p 1487 N95-19916

Open Skies project computational fluid dynamic analysis
[AD-A285928] p 1200 N95-19991

A 3D stereo data visualization and representation
[AD-A284788] p 1449 N95-20064

View-based models of 3D object recognition and class-specific invariance
[AD-A279858] p 1459 N95-20157

Computer-Aided Structural Engineering (CASE) project. User's guide: Computer-Aided Structural Modeling (CASM). Version 5.00
[AD-A279913] p 1459 N95-20310

Implementation and performance of a three-dimensional numerical transport model
[PB95-135745] p 1402 N95-20440

The effect of regional-scale soil-moisture deficits on mesoscale atmospheric dynamics that influence fire severity
[DE95-002682] p 1413 N95-20455

Use of an integrated design tool for weld quality enhancement
[DE94-018135] p 1379 N95-20723
Simulation of pipe flow p 1349 N95-21078
Visualizing 3D velocity fields near contour surfaces
[DE95-000841] p 1353 N95-21182
Three-dimensional ground penetrating radar imaging using multi-frequency diffraction tomography
[DE94-016687] p 1301 N95-21205
VLUGR3: A vectorizable adaptive grid solver for PDEs in 3D. 1: Algorithmic aspects and applications
[PB95-135729] p 1467 N95-21435
Three-dimensional effects for radio frequency antenna modeling
[DE94-019125] p 1303 N95-21459
Magnetic properties of the three-dimensional Ising model with an interface amorphization
[DE94-628992] p 1278 N95-21885
Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183
3-D TECATE/BREW: Thermal, stress, and birefringent ray-tracing codes for solid-state laser design
[DE95-000330] p 1376 N95-22301
Image solution for poisson's equation in wedge geometry
[PB95-127171] p 1310 N95-22311

THRESHOLD VOLTAGE
SEU and SEL response of the Westinghouse 64K E-2PROM, analog devices AD7876 12-bit ADC, and the Intel 82527 Serial Communications Controller
[DE95-003349] p 1334 N95-22086

THRESHOLDS (PERCEPTION)
Determination of multiple sound sources
[AD-A286563] p 1504 N95-20823
Temporary threshold shifts produced by high intensity freefield impulse noise in humans wearing hearing protection
[AD-A286289] p 1454 N95-22045

THROTTLING
Cascade orificial resistive device
[AD-D016529] p 1504 N95-20724

THRUST BEARINGS
Bevel gear driver and method having torque limit selection
[NASA-CASE-MSC-22384-1] p 1378 N95-20151

THRUST REVERSAL
Why do airlines want and use thrust reversers? A compilation of airline industry responses to a survey regarding the use of thrust reversers on commercial transport airplanes
[NASA-TM-109158] p 1203 N95-20706

THRUST VECTOR CONTROL
Design of power electronics for TVC and EMA systems
[NASA-CR-196540] p 1312 N95-19909
Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle
[NASA-TM-4574] p 1199 N95-19913

THUNDERSTORMS
The initiation of lightning and the growth of electric fields in thunderstorms
[AD-A280033] p 1428 N95-20008

THYRATRONS
Applied physics research for innovation in pulsed power
[AD-A285392] p 1324 N95-20610

TIDES
Modeling open boundary conditions by using the optimization approach
[AD-A285548] p 1433 N95-21158

TILES
ALT-2 armor tile design for upgraded TEXTOR operation
[DE94-015749] p 1549 N95-20143
Acoustic and vibration attenuation composite material
[AD-D016585] p 1233 N95-22467

TIME
Von Neumann algebra automorphisms and time-thermodynamics relation in general covariant quantum theories
[PB95-111084] p 1580 N95-20324

TIME DEPENDENCE
A numerical investigation of energy transfer and subgrid-scale eddy viscosity in homogeneous, isotropic and shear turbulence
[AD-A280005] p 1339 N95-20058
A comparison of decision making behaviour in a static and a dynamic task environment as a function of time pressure
[AD-A285389] p 1449 N95-20609
Computing methods for the approximate solution of time dependent problems
[AD-A286007] p 1491 N95-20719
Electron-nuclear dynamics of molecular systems
[AD-A279649] p 1516 N95-21120
Time-dependent deformation of titanium metal matrix composites
[NASA-CR-195030] p 1230 N95-21363
Diffraction applications using the energy dispersive beamline, X6A, at NSLS
[DE94-019287] p 1572 N95-21408
Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames
[DE95-002481] p 1243 N95-21512
Seamless data-range change using punctured convolutional codes for time-varying signal-to-noise ratios p 1304 N95-21534
On the origins and modeling of frictional behavior in interfacially-complex sliding contacts
[DE94-019129] p 1381 N95-21601
Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials
[AD-A286418] p 1357 N95-22206
An analytical electron distribution function for inelastic collisions in a uniform gas with time varying electric field
[DE95-003476] p 1528 N95-22222
An analytical, inelastic, space and time dependent electron distribution for electrically excited gases
[DE95-003478] p 1528 N95-22223

TIME FUNCTIONS
Semi-global stabilization of linear discrete-time systems subject to input saturation via linear feedback: An ARE-based approach
[PB95-135463] p 1483 N95-21618

TIME MARCHING
Computation of transonic flow on composite overlapping grids in 2 D
[PB95-131348] p 1353 N95-21132

TIME MEASUREMENT
Time code interface
[AD-D016535] p 1501 N95-20731

TIME OF FLIGHT SPECTROMETERS
Ion temperature measurement of indirectly-driven implosions using a geometry-compensated neutron time-of-flight detector
[DE94-016967] p 1552 N95-20362
Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707
Time of flight spectroscopy with muonic hydrogen
[DE94-017056] p 1245 N95-21845

TIME OPTIMAL CONTROL
Optimal control of a two wheeled mobile robot
[AD-A286130] p 1485 N95-22233

TIME RESPONSE
Time domain spectral hole-burning storage
[AD-A279912] p 1587 N95-20309
Emitter location via Kalman filtering of signal time difference of arrival
[AD-A285972] p 1291 N95-20666
Time-resolved diagnostics of excimer laser-generated ablation plasmas used for pulsed laser deposition
[DE94-018950] p 1559 N95-21547
The determination of static and time varying dipole source. Sensor geometry during sea trials using differential global positioning system
[MRL-TN-631] p 1205 N95-21642

TIME SERIES ANALYSIS
Higher order crossings
[AD-A279597] p 1504 N95-20300
Application of neural networks to seismic signal discrimination research findings
[AD-A285848] p 1415 N95-21308
CTD calibration and processing methods used at Woods Hole Oceanographic Institution
[AD-A279507] p 1435 N95-21681
Long Time Series Measurements in the Coastal Ocean: A workshop
[AD-A279509] p 1435 N95-21682
Signal processing in the linear statistical model
[AD-A286255] p 1308 N95-22041
Time and the order of abstract events in distributed computations
[PB95-110482] p 1496 N95-22349

TIME SHARING
Environment for Test and Analysis of Distributed Software (ETADS)
[AD-A285776] p 1463 N95-20877
Radio-frequency techniques at the ISIS pulsed muon source
[PB95-129854] p 1529 N95-22303

TIME SIGNALS
The GPS Burst Detector W-Sensor
[DE94-017406] p 1204 N95-20269
Passive monitoring for automated MMPP communication systems p 1293 N95-20927

TIN
The reliability of laser reflowed Sn-Ag solder joints
[AD-A279787] p 1315 N95-20443
Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707

TIN COMPOUNDS
A catalytic method for the conversion of silanes to stannanes
[AD-A286214] p 1247 N95-22020

TISSUES (BIOLOGY)
Hierarchical structures in biology as a guide for new materials technology
[AD-A286317] p 1265 N95-20176
Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species
[AD-A285055] p 1442 N95-20485
Investigation of laser-induced retinal damage: Wavelength and pulsewidth dependent mechanisms
[AD-A286066] p 1443 N95-20848
Cell membrane potentials induced during exposure to EMP fields
[DE94-018952] p 1439 N95-21548
Study of pulsed laser effects on living tissues
[PB95-131330] p 1447 N95-22361

TITAN
Studies of the gas tori of Titan and Triton
[NASA-CR-197377] p 1601 N95-20797

TITAN LAUNCH VEHICLES
Computer model predictions of the local effects of large, solid-fuel rocket motors on stratospheric ozone
[AD-A285632] p 1404 N95-21150

TITANIUM
Tribology and surface mechanical properties of excimer laser nitrided titanium
[DE95-002751] p 1255 N95-21238
Time-dependent deformation of titanium metal matrix composites
[NASA-CR-195030] p 1230 N95-21363
Spectroscopic assessment of the reliability of metal/metal oxide interfaces
[AD-A286131] p 1261 N95-22035
Strength testing of Ti-vapor-coated silicon nitride braze joints
[DE94-017858] p 1280 N95-22266

TITANIUM ALLOYS
Mixed-sputter deposition of Ni-Ti-Cu shape memory films
[DE94-017296] p 1250 N95-19900
Third Intermetallic Matrix Composites Symposium, volume 350
[NASA-TM-110059] p 1225 N95-20001
Plasma arc melting of titanium-tantalum alloys
[DE94-016291] p 1252 N95-20331
Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365
Electrochemical impedance pattern recognition for detection of hidden chemical corrosion on aircraft components
[AD-A284998] p 1253 N95-20481
Electrochemical impedance pattern recognition for detection of hidden chemical corrosion on aircraft components
[AD-A285998] p 1239 N95-20716
Metastable bcc phase formation in the Nb-Cr-Ti system
[DE94-016212] p 1255 N95-21137
Tribology and surface mechanical properties of excimer laser nitrided titanium
[DE95-002751] p 1255 N95-21238
Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398
The development of a super-alpha2 titanium aluminide alloy consolidated by rapid omnidirectional compaction
[AD-A279254] p 1260 N95-21986
Plasma arc melting of a 80 weight percent tantalum -20 weight percent titanium alloy
[DE95-000846] p 1260 N95-22006
Bulk and defect properties of ordered intermetallics
[DE94-017706] p 1262 N95-22344

TITANIUM COMPOUNDS
The processing and mechanical properties of high temperature/high performance composites. Stress redistribution and notch properties, book 2
[AD-A279737] p 1227 N95-20429
Self-starting femtosecond pulse generation from a Ti:sapphire laser synchronously pumped by a pointing-stabilized mode-locked Nd:YAG laser
[DE94-019319] p 1374 N95-21480
Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712
Preparation and x-ray structure of Cp2Ti(PH2SiH2)(PMe3)
[AD-A286197] p 1246 N95-21879

TITANIUM NITRIDES
Method of making copper-titanium nitride alloy
[AD-D016582] p 1252 N95-20201
TITANIUM OXIDES
Photoinduced charge transfer between fullerenes and TiO2 semiconductor colloids
[DE95-001447] p 1570 N95-20838
Reactive nanophase oxide additions to melt-processed high-T(sub c) superconductors
[DE95-001470] p 1570 N95-20841
Polyurethane self-priming topcoats
[AD-D016204] p 1274 N95-21154
Polyurethane self-priming topcoats
[AD-D016205] p 1274 N95-21155
Integration of thin film decoupling capacitors
[DE95-001609] p 1333 N95-21881
Lower active metals loading for hydrotreating catalysts
[DE94-018907] p 1261 N95-22119
Gas-phase photocatalytic oxidation: Cost comparison with other air pollution control technologies
[DE95-000241] p 1410 N95-22278
TOKAMAK DEVICES
Toward a design for the ITER plasma shape and stability control system
[DE94-017516] p 1548 N95-20037
Recent DIII-D results
[DE94-017519] p 1549 N95-20038
ALT-2 armor tile design for upgraded TEXTOR operation
[DE94-015749] p 1549 N95-20143
Fluctuations in high Beta(sub p) plasmas in D3-D
[DE94-017510] p 1550 N95-20146
The control system position to the electric probe in the Tokamak Novillo
[DE94-629938] p 1550 N95-20204
Experimental measurements of ICRF and edge plasma interactions on Tore Supra
[DE94-019154] p 1551 N95-20205
A method for measuring the inductive electric field profile and noninductive current profiles on D3-D
[DE94-016683] p 1551 N95-20279
Recent results from Fast Wave Current Drive experiments on DIII-D
[DE94-016718] p 1551 N95-20285
Hybrid model in general geometry
[DE95-002614] p 1553 N95-20437
Plasma shape experiments for an optimized tokamak
[DE94-017508] p 1553 N95-20445
Enhanced scrape-off layer plasma in D3-D double-null discharges
[DE94-017977] p 1554 N95-20571
Current diffusive ballooning mode in second stability region of tokamaks
[DE94-770690] p 1554 N95-20683
Ideal Magnetohydrodynamic stabilities in JT-60 and D3-D tokamak plasmas
[DE94-770684] p 1555 N95-20987
Ion heat pulse after sawtooth crash in the JFT-2M tokamak
[DE94-770685] p 1555 N95-20988
Observation of non diffusive term of toroidal momentum transport in the JFT-2M tokamak
[DE94-770686] p 1555 N95-20989
Investigations of VH-mode in D3-D and JET
[DE94-015859] p 1556 N95-21142
Experimental measurements and modeling of impurity transport in the divertor and boundary plasma of D3-D
[DE94-016519] p 1556 N95-21159
The parametric dependence of the spatial structure of the radial electric field at the plasma edge in the D3-D tokamak
[DE94-016520] p 1556 N95-21163
Review of recent D-T experiments from TFTR
[DE95-002755] p 1557 N95-21239
Fusion power production in TFTR
[DE95-002756] p 1557 N95-21240
Heating and transport in TFTR D-T plasmas
[DE95-002812] p 1558 N95-21242
MHD pressure drop in ducts with imperfectly insulating coatings
[DE95-002852] p 1558 N95-21244
Assessment of database for interaction of tritium with ITER plasma facing materials
[DE95-002038] p 1558 N95-21290
Theory of the L-H transition
[DE95-001389] p 1558 N95-21299
MTX final report
[DE95-002960] p 1559 N95-21451
B4C-SiC reaction-sintered coatings on graphite plasma facing components
[DE94-019105] p 1230 N95-21553
The ITER in-vessel system
[DE94-018053] p 1560 N95-21665
ITER EDA Newsletter. Volume 3, no. 2
[DE94-628980] p 1561 N95-21852
Current status of fusion-relevant covariance data
[DE95-000865] p 1561 N95-22010
The superconducting magnet system for the Tokamak Physics Experiment
[DE94-018329] p 1562 N95-22300
TOLERANCES (MECHANICS)
Toughened Silcomp composites for gas turbine engine applications
[DE95-002851] p 1214 N95-21243
TOLERANCES (PHYSIOLOGY)
Temporary threshold shifts produced by high intensity freefield impulse noise in humans wearing hearing protection
[AD-A286289] p 1454 N95-22045
TOLUENE
Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596
Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2)
[AD-A279792] p 1224 N95-20660
Aerosol-assisted chemical vapor deposition of copper: A liquid delivery approach to metal thin films
[AD-A279702] p 1270 N95-20689
Synthesis and characterization of (Zn(SEt)Et)10, formed via insertion of sulfur into Zn-C bonds: A new class of Wurtzite-like cluster framework
[AD-A279701] p 1569 N95-20714
Excess energy and structural dependence of the rate of energy redistribution during the photodissociation of iodotoluenes
[AD-A279997] p 1241 N95-21124
Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385
TOMOGRAPHY
Three-dimensional ground penetrating radar imaging using multi-frequency diffraction tomography
[DE94-016687] p 1301 N95-21205
Equivalent source current formulation in impedance tomography
[PB95-127627] p 1329 N95-21326
Computer programs for analysis of geophysical data
[DE95-002472] p 1415 N95-21511
Radiopharmaceuticals for diagnosis
[DE95-002200] p 1445 N95-21595
Volatiles in the Earth: All shallow and all recycled
p 1416 N95-21779
Seismic evidence for volatiles at large depth in the Earth p 1422 N95-21808
Real time system for practical acoustic monitoring of global ocean temperature
[AD-A286435] p 1436 N95-22209
TOOLS
Bevel gear driver and method having torque limit selection
[NASA-CASE-MSC-22384-1] p 1378 N95-20151
TOPOGRAPHY
Second European Symposium on X-Ray Topography and High Resolution Diffraction: Programme and abstracts
[AD-A286328] p 1564 N95-20210
The effect of fiber coating thickness on the interfacial properties of a continuous fiber ceramic matrix composite
[DE94-017886] p 1267 N95-20373
Topography of neutron scattering from diblock copolymer film
[DE95-001457] p 1229 N95-20840
The dynamic role of ridges in a beta-plane channel. Towards understanding the dynamics of large scale circulation in the Southern Ocean
[AD-A279390] p 1435 N95-21943
Solving the inverse problem in terrain modeling
[AD-A285860] p 1391 N95-22131
TOPOLOGY
Abstract reduction and topology
[PB95-110615] p 1488 N95-20054
Invariant measures of interval maps
[PB95-107835] p 1389 N95-20207
MPI workshop
[DE94-017883] p 1475 N95-20366
Duality beyond sober spaces: Topological spaces and observation frames
[PB95-134565] p 1494 N95-21962
Large-scale fields and flows in the magnetosphere-ionosphere system
[PB95-134664] p 1427 N95-22368
TOROIDAL DISCHARGE
Observation of non diffusive term of toroidal momentum transport in the JFT-2M tokamak
[DE94-770686] p 1555 N95-20989
TOROIDAL PLASMAS
Investigation of spherical tearing mode
[NASA-CR-197284] p 1558 N95-21345
Joule heating of the ITER TF cold structure: Effects of vertical control coil currents and ELMS
[DE95-001817] p 1560 N95-21724
TORQUE
Bevel gear driver and method having torque limit selection
[NASA-CASE-MSC-22384-1] p 1378 N95-20151
Displaceable spur gear torque controlled driver and method
[NASA-CASE-MSC-22381-1] p 1378 N95-20409
Computer graphics tools for visualizing gravity gradient torques on a rigid spacecraft
[AD-A285971] p 1461 N95-20665
Nonlinear dynamics of the planar pitch attitude motion for a gravity-gradient satellite
[AD-A286407] p 1220 N95-22204
TORSION
Inelastic bending and torsion of steel I-beams
[PB94-208378] p 1384 N95-19975
Inelastic torsion of steel I-beams
[PB94-208360] p 1384 N95-20101
TORUSES
N=1 Superconformal minimal model correlation functions on the torus
[PB95-134615] p 1500 N95-21964
TOTAL QUALITY MANAGEMENT
Total quality management program planning
[DE94-016862] p 1586 N95-21645
TOUCHDOWN
F-15 resource tape
[NASA-TM-110502] p 1206 N95-19994
TOUGHNESS
Fracture toughness properties of welded stainless steels for tritium service
[DE95-000755] p 1251 N95-20079
Micromechanical approach to transformation toughening in ceramics
[PB95-135422] p 1273 N95-20976
Nitrogen alloyed martensitic steels
[PB95-127791] p 1255 N95-21128
Microstructural design for tough ceramics
[AD-A285634] p 1273 N95-21152
TOWERS
An evaluation of 915-MHz radar wind profiler/RASS by tower and sodar measurements
[DE94-018913] p 1364 N95-20320
An evaluation of Automatic Terminal Information Service (ATIS) flight deck display presentation options
[AD-A280100] p 1204 N95-21020
TOXIC HAZARDS
Production of S2F10, S2OF10 and S2O2F10 by spark discharges in SF6*
[DE95-001421] p 1243 N95-21500
Environmental Hazards Assessment Program
[DE94-019075] p 1406 N95-21565
Assessment of the atmospheric hazards and risks of new chemicals: Procedures to estimate hazard potentials
[PB95-107488] p 1410 N95-22186
Current concepts on airborne particles and health
[DE95-002260] p 1447 N95-22287
TOXICITY
Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species
[AD-A285055] p 1442 N95-20485
Selection of substances to be considered in the environmental balance/environmental outlook in relation to the dissemination theme
[PB95-132197] p 1407 N95-21635
Derivation of preliminary maximum permissible concentrations of volatile compounds in air
[PB95-107447] p 1410 N95-22125
The mechanisms and effects off the plant-activations of chemicals in the environment
[AD-A279388] p 1356 N95-22145
Launch safety, toxicity, and environmental effects of the high performance oxidizer ClF(5)
[AD-A286095] p 1284 N95-22227
Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381
TOXICOLOGY
Current concepts on airborne particles and health
[DE95-002260] p 1447 N95-22287
TRACE CONTAMINANTS
Degradation of aromatic hydrocarbons in an aquifer during a field experiment demonstrating the feasibility of remediation by natural attenuation
[AD-A283809] p 1282 N95-19922
TRACE ELEMENTS
Ultraviolet emission from rocket motor plumes
[DSTO-TR-0002] p 1222 N95-21661

Rare gases systematics and mantle structure
p 1416 N95-21778
Hydrogen storage in Earth's mantle and core
p 1423 N95-21813
The isotope geochemistry of abyssal peridotites and related rocks
[AD-A279435] p 1435 N95-21918

TRAFFIC
Utilizing artificial neural networks in network flow analysis: An annotated bibiliography
[DE95-002453] p 1482 N95-21522

TRAILING EDGE FLAPS
Lift enhancement device
[AD-D016522] p 1201 N95-21864

TRAINING ANALYSIS
Using the backward transfer paradigm to validate the AH-64 Simulator Training Research Advanced Testbed for Aviation
[AD-A285758] p 1215 N95-19931

TRAINING DEVICES
Development and evaluation of ALEC Micro-Wand 3e (tradename) training
[AD-A285863] p 1471 N95-22133

TRAINING EVALUATION
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 28: The technical communication practices of aerospace engineering and science students: Results of the phase 4 cross-national surveys
[NASA-TM-109123] p 1587 N95-20162
Measuring presence in virtual environments
[AD-A286183] p 1460 N95-20326

TRAINING SIMULATORS
Measuring presence in virtual environments
[AD-A286183] p 1460 N95-20326

TRAJECTORIES
Comparison of meteorological data with fitted values extracted from projectile trajectory
[AD-A285921] p 1428 N95-19989
Tracking a dynamic set of feature points
[AD-A285124] p 1313 N95-20257

TRAJECTORY CONTROL
Layered path planning for an autonomous mobile robot
[AD-A286138] p 1485 N95-22244

TRAJECTORY MEASUREMENT
Thousand golden ten orbits
[PB95-135109] p 1592 N95-22334

TRAJECTORY OPTIMIZATION
Multiple burn fuel-optimal orbit transfers: Numerical trajectory computation and neighboring optimal feedback guidance
[NASA-CR-197317] p 1222 N95-21616

TRAJECTORY PLANNING
Adaptive path planning for flexible manufacturing
[DE94-016561] p 1459 N95-20284
Tom Thumb algorithm for planning simple vehicle motions
[PB95-107553] p 1484 N95-22156
Layered path planning for an autonomous mobile robot
[AD-A286138] p 1485 N95-22244

TRANSDUCERS
Compositive piezoelectrics utilizing a negative Poisson ratio polymer
[AD-D016579] p 1268 N95-20460
Apparatus and method for determining the mass density of a filament
[NASA-CASE-LAR-14879-1-CU] p 1383 N95-20616
Domain processes in ferroelectric ceramics
[AD-A279567] p 1276 N95-21697
Multi signal-domain modeling of solid-state transducers: A theoretical framework based on irreversible thermodynamics mixed finite elements and multigrid
[PB95-134995] p 1336 N95-22382

TRANSFER FUNCTIONS
Multigrid with matrix-dependent transfer operators for convection-diffusion problems
[PB95-110821] p 1487 N95-19915
Optimal distributed control system for a linear distributed parameter system
[AD-D016583] p 1480 N95-20202
Multilayer piecewise linear networks
[AD-A285382] p 1480 N95-20606
Construction of non-critical string field theory by transfer matrix formalism in dynamical triangulation
[DE94-770607] p 1516 N95-20986

TRANSFER OF TRAINING
Using the backward transfer paradigm to validate the AH-64 Simulator Training Research Advanced Testbed for Aviation
[AD-A285758] p 1215 N95-19931
DOD science and engineering apprenticeship program for high school students
[AD-A280371] p 1583 N95-22100

TRANSFER ORBITS
Multiple burn fuel-optimal orbit transfers: Numerical trajectory computation and neighboring optimal feedback guidance
[NASA-CR-197317] p 1222 N95-21616

TRANSFORMATIONS (MATHEMATICS)
Regularity of BPa-systems is decidable
[PB95-135489] p 1468 N95-21619
Uniform upper bounds in the Froehlich polaron theory
[DE94-628998] p 1525 N95-21860
A Davis-Putnam program and its application to finite-order model search: Quasigroup existence problems
[DE95-003014] p 1471 N95-22077
Almost kappa-wise independent random permutation of the cube
[PB95-108098] p 1495 N95-22147
Transformation of multichannel magnetocardiographic signals to standard grid form
[PB95-127114] p 1447 N95-22371

TRANSFORMERS
Recent reflux receiver developments under the US DOE program
[DE95-001622] p 1393 N95-20861

TRANSFUSION
Evaluation of dried storage of platelets for transfusion: Physiologic integrity and hemostatic functionality
[AD-A286078] p 1443 N95-20850

TRANSIENT HEATING
Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183

TRANSISTOR CIRCUITS
Complementary GaAs junction-gated heterostructure field effect transistor fabrication for integrated circuits
[DE95-001522] p 1327 N95-20882

TRANSISTOR LOGIC
Radiation tests on service electronics for future multi TeV detectors
[DE94-632822] p 1335 N95-22184

TRANSISTORS
Characteristics of oxynitrides grown in N2O
[DE94-015798] p 1566 N95-20400
Prototype rule-based reliability analysis for VLSI circuit design
[AD-A280065] p 1327 N95-20967
RF vacuum microelectronics based on thin film edge-emitter technology
[AD-A279539] p 1331 N95-21690

TRANSITION FLOW
Application of Direct and Large Eddy Simulation to Transition and Turbulence
[AGARD-CP-551] p 1346 N95-21061
Comparison of DNS and LES of transitional and turbulent compressible flow: Flat plate and mixing layer
p 1347 N95-21066
Simulation of large scale transitional flows
p 1348 N95-21075
Simulations of bypass transition for spatially evolving disturbances p 1349 N95-21079
Direct numerical determination of the minimum bypass Reynolds number in boundary layers
p 1349 N95-21080
Direct numerical simulations of leading-edge receptivity for freestream sound p 1351 N95-21090
Acoustic receptivity due to weak surface inhomogeneities in adverse pressure gradient boundary layers
[NASA-TM-4577] p 1353 N95-21258
Studies in nonlinear problems of energy
[DE95-001387] p 1356 N95-22148

TRANSITION METALS
Consequences of oscillatory potentials and angular forces in transition metals and their aluminides
[DE94-019127] p 1258 N95-21600
Selenophene transition metal complexes
[DE95-001675] p 1260 N95-21841
Catalytic reactions of synthesis gas. Part 3. Determination of reaction kinetics
[PB95-127759] p 1248 N95-22329
Introduction to the structures determination methods using X-ray diffraction in monocrystals: Application to some lanthanides and transition metals complexes with organic ligands
[DE94-629002] p 1579 N95-22380

TRANSITION PROBABILITIES
Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 1: Transition properties in HCl
[AD-A285988] p 1239 N95-20613

TRANSITION TEMPERATURE
Fracture behavior of the Fe-8Al alloy FAP-Y
[DE95-000956] p 1258 N95-21676
The doping effect on spin-Peierls instability
[DE94-629046] p 1577 N95-22178

TRANSLATING
A tabular interface for automated verification of event-based dialogs
[AD-A286065] p 1463 N95-20847

TRANSLATIONAL MOTION
In-situ capability of ion beam modification and characterization of materials at Los Alamos National Laboratory
[DE95-002738] p 1534 N95-21236

TRANSLUCENCE
Recognition of subsurface defects in machined ceramics by application of neural networks to laser scatter patterns
[DE94-018373] p 1264 N95-20018

TRANSMISSION
Propagation measurements on a troposcatter link in the Canadian High Arctic p 1295 N95-20940
Compilation of 1993 annual reports of the Navy ELF Communications System Ecological Monitoring Program
[AD-A279575] p 1408 N95-21699

TRANSMISSION EFFICIENCY
Methods for evaluating the effects of conduits at the surface of the sea p 1294 N95-20932
Performance of Ga(0.47)In(0.53)As cells over a range of proton energies
[NASA-TM-106819] p 1334 N95-22112

TRANSMISSION LINES
A wideband EMP test system
[DE94-015283] p 1290 N95-20474
A technique for increasing the bandwidth of high performance electrical backplanes p 1212 N95-20651
Dynamic response of pressure measuring systems
[ARL-TR-32] p 1365 N95-20759

TRANSMISSION RATE (COMMUNICATIONS)
Electromagnetic compatibility effects of advanced packaging configurations p 1213 N95-20658

TRANSMISSIONS (MACHINE ELEMENTS)
Bevel gear driver and method having torque limit selection
[NASA-CASE-MSC-22384-1] p 1378 N95-20151
Displaceable spur gear torque controlled driver and method
[NASA-CASE-MSC-22381-1] p 1378 N95-20409

TRANSMITTANCE
Qualification test results for blue-red reflecting solar covers p 1320 N95-20525

TRANSMITTER RECEIVERS
Facsimile transmission standards
[AD-A279911] p 1290 N95-20308
High performance backplane components for modular avionics p 1212 N95-20653

TRANSMITTERS
Technologies for highly parallel optoelectronic integrated circuits
[DE95-001607] p 1327 N95-20883
Development of a fast sampling system for estimation of impulse responses of mobile radio channels
p 1296 N95-20943

TRANSMUTATION
High precision trace neutron transmutation doping of detector-grade high resistance zone-refined silicon mono-crystal
[DE94-631463] p 1563 N95-19978
Recent results in analysis and simulation of beam halo
[DE94-018313] p 1539 N95-22298

TRANSONIC FLOW
Computation of transonic flow on composite overlapping grids in 2 D
[PB95-131348] p 1353 N95-21132

TRANSONIC WIND TUNNELS
Investigation of a thermal buoyancy effect on the drag of half models tested in the ARA Transonic Wind Tunnel
[ARA-MEMO-407] p 1199 N95-19946
16-foot transonic tunnel test section flowfield survey
[NASA-TM-109157] p 1216 N95-20669
Testing in the ARA Transonic Wind Tunnel
[ARA-MEMO-395] p 1216 N95-20799

TRANSPARENCE
Control of continuous phase PH using visible light to activate PH-dependent fibers and gels in a controlled and reversible manner
[AD-D016532] p 1543 N95-20728
Scalable programming environment
[AD-A286390] p 1472 N95-22201

TRANSPONDERS
Noncoherent transponder standards
[AD-A279512] p 1306 N95-21684

TRANSPORT AIRCRAFT
Why do airlines want and use thrust reversers? A compilation of airline industry responses to a survey regarding the use of thrust reversers on commercial transport airplanes
[NASA-TM-109158] p 1203 N95-20706

TRANSPORT PROPERTIES

Transport phenomena in the micropores of plug-type phase separators [NASA-TM-108479] p 1340 N95-20561

Effect of external stress on the transport of fluids in thermoplastic resin systems [AD-A279993] p 1270 N95-20596

Simulation of tearing mode stabilization by using ECH [DE94-770700] p 1554 N95-20684

Ion heat pulse after sawtooth crash in the JFT-2M tokamak [DE94-770685] p 1555 N95-20988

Observation of non diffusive term of toroidal momentum transport in the JFT-2M tokamak [DE94-770686] p 1555 N95-20989

Explicit methods for stiff ODEs from atmospheric Chemistry [PB95-135794] p 1404 N95-21034

Experimental measurements and modeling of impurity transport in the divertor and boundary plasma of D3-D [DE94-016519] p 1556 N95-21159

Heating and transport in TFTR D-T plasmas [DE95-002812] p 1558 N95-21242

Evaluation of pumping and fueling requirements for the ITER EDA [DE94-018117] p 1560 N95-21702

Plasma-induced-damage of GaAs during etching of refractory metal contacts [DE95-001525] p 1259 N95-21838

Anisotropic transport properties of BSCCO single crystals and Ag-clad tapes in high magnetic fields [DE95-000938] p 1575 N95-21936

Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials [AD-A286418] p 1357 N95-22206

TRANSPORT THEORY

MCNP (trademark) ENDF/B-VI iron benchmark calculations [DE94-016165] p 1508 N95-20160

The Nonlinear Characteristic scheme in X-Y geometries [DE94-016192] p 1488 N95-20167

A S2-like acceleration method for the Nonlinear Characteristic transport scheme [DE94-016285] p 1509 N95-20235

Solid-state dynamics and quantum transport in novel semiconductor nanostructures [AD-A285946] p 1315 N95-20394

Extended theory of main ion and impurity rotation and bootstrap current in a shear layer [DE94-015857] p 1555 N95-21141

Theory of the L-H transition [DE95-001389] p 1558 N95-21299

Stellarator transport optimization with self-consistent electric fields [DE94-019151] p 1559 N95-21581

Fast algorithms for transport models [DE95-001702] p 1470 N95-21992

TRANSPORTATION

Beyond telecommuting: A new paradigm for the effect of telecommunications on travel [DE95-001224] p 1289 N95-20214

Approaches to the design of structural ceramics incorporating whiskers and particulate phases [DE94-018126] p 1271 N95-20704

Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron p 1418 N95-21790

TRANSVERSE LOADS

The processing and mechanical properties of high temperature/high performance composites. Fatigue and creep, book 3 [AD-A279738] p 1227 N95-20430

TRAPPED PARTICLES

Numerical analysis of energetic particle stabilization of ballooning modes in finite-aspect-ratio tokamaks [DE94-631397] p 1556 N95-21164

Gate oxide shorts in nMOS transistors: Electrical properties and lifetime prediction method [DE94-018904] p 1330 N95-21545

TRAPPING

Development of a lightweight, light-trapped, thin GaAs solar cell for spacecraft applications p 1318 N95-20513

Effects of plasma hydrogenation on trapping properties of dislocations in heteroepitaxial InP/GaAs p 1323 N95-20542

Laser trapping of Na-21 atoms [DE95-002354] p 1513 N95-20629

Tunneling of self-trapped states and formation of a band [DE94-629001] p 1582 N95-22378

TRAVELING WAVE TUBES

Design and packaging aspects of microwave bandwidth lithium niobate modulators [DE94-016602] p 1313 N95-20119

Materials processing using a variable frequency microwave furnace [DE95-001420] p 1271 N95-20761

TRAVELING WAVES

One-dimensional reactive Euler equations [PB95-135430] p 1244 N95-21573

TREES (MATHEMATICS)

Distribution-independent hierarchical N-body methods [DE95-001686] p 1493 N95-21439

Abstract interpretation of reactive systems: Abstractions preserving Universal CTL(*), Existential CTL(*) and CTL(*) [PB95-110557] p 1472 N95-22305

TREMORS

Computer programs for analysis of geophysical data [DE95-002472] p 1415 N95-21511

TRENDS

Global change integrating factors: Tropical tropopause trends [DE95-001121] p 1404 N95-20835

TRIANGULATION

Construction of non-critical string field theory by transfer matrix formalism in dynamical triangulation [DE94-770607] p 1516 N95-20986

Support to the development of high-level graphics software [PB95-131686] p 1466 N95-21349

Right inverse for the divergence operator in spaces of continuous piecewise polynomials [PB95-127080] p 1496 N95-22369

TRIBOLOGY

Tribology and surface mechanical properties of excimer laser nitrided titanium [DE95-002751] p 1255 N95-21238

Friction and wear properties of as-deposited and carbon ion-implanted diamond films [NASA-TM-106759] p 1274 N95-21252

On the origins and modeling of frictional behavior in interfacially-complex sliding contacts [DE94-019129] p 1381 N95-21601

Surface technology programme [PB95-132866] p 1262 N95-22174

Characterization and performance of DLC films synthesized by plasma and ion beam techniques [DE94-018287] p 1281 N95-22428

TRIGGER CIRCUITS

GAJET experiment at the LHC: The GAJET collaboration [PB95-129813] p 1512 N95-20454

Triggers for a high sensitivity charm experiment [DE95-002251] p 1515 N95-20868

New shower maximum trigger for electrons and photons at CDF [DE95-000563] p 1522 N95-21499

Investigations into alternate spark gap switching techniques [AD-A286225] p 1308 N95-22021

TRIMERS

The synthesis and characterization of small molecule and photo-cross-linkable high polymeric phosphazenes bearing cinnamate groups [AD-A279782] p 1268 N95-20442

The organic chemistry of conducting polymers [DE94-018216] p 1270 N95-20680

TRIMETHYL COMPOUNDS

Characterization and electrical properties of copper films grown via direct liquid coinjection of (hfac)Cu(TMVS) and TMVS [DE95-002957] p 1272 N95-20889

TRITIUM

Thermodynamic characterization of new palladium alloy tritides [DE94-018430] p 1579 N95-20028

Fracture toughness properties of welded stainless steels for tritium service [DE95-000755] p 1251 N95-20079

A new alpha particle diagnostic using knock-on ion tails [DE94-015856] p 1553 N95-20402

High efficiency GaP power conversion for Betavoltaic applications p 1323 N95-20540

Target Area design basis and system performance for the National Ignition Facility [DE94-016697] p 1557 N95-21207

Review of recent D-T experiments from TFTR [DE95-002755] p 1557 N95-21239

Assessment of database for interaction of tritium with ITER plasma facing materials [DE95-002038] p 1558 N95-21290

Properties of aged metal tritides [DE95-001787] p 1243 N95-21440

Time of flight spectroscopy with muonic hydrogen [DE94-017056] p 1245 N95-21845

Welding tritium exposed stainless steel [DE95-003208] p 1382 N95-22356

TRITON

Studies of the gas tori of Titan and Triton [NASA-CR-197377] p 1601 N95-20797

TROPICAL METEOROLOGY

Rainfall rates and the vertical distribution of diabatic heating components over tropical oceans [NASA-CR-197603] p 1428 N95-19948

Program control on the Tropical Rainfall Measuring Mission p 1584 N95-20750

A study of westerly wind bursts preceding the 1991-1992 El Nino [AD-A286570] p 1429 N95-20826

TROPICAL REGIONS

Monsoons: AMIP simulations of the 1987 and 1988 drought and flood regimes [DE94-014789] p 1428 N95-20140

Test Operations Procedure (TOP) 1-2-616 tropic exposure testing [AD-A286376] p 1235 N95-20230

The vertical distribution of heating in the tropical atmosphere [AD-A285934] p 1429 N95-20391

Program control on the Tropical Rainfall Measuring Mission p 1584 N95-20750

Global change integrating factors: Tropical tropopause trends [DE95-001121] p 1404 N95-20835

TROPICAL STORMS

A study of westerly wind bursts preceding the 1991-1992 El Nino [AD-A286570] p 1429 N95-20826

TROPOPAUSE

Global change integrating factors: Tropical tropopause trends [DE95-001121] p 1404 N95-20835

TROPOSPHERE

A comparative survey of current and proposed tropospheric refraction-delay models for DSN radio metric data calibration [NASA-CR-197338] p 1412 N95-20002

Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission [DE94-019016] p 1402 N95-20353

Radiative forcing for changes in tropospheric O3 [DE94-019017] p 1413 N95-20354

Radiative forcing calculations for CH3Cl [DE94-019018] p 1402 N95-20355

Modelling and simulation of HF/VHF MMPPs p 1293 N95-20925

Terrain and refractivity effects on non-optical paths p 1294 N95-20931

Modeling tropospheric ducting effects on satellite-to-ground paths p 1295 N95-20936

The Lorentz reciprocity theorem as a consistency test for propagation models p 1295 N95-20937

TROPOSPHERIC SCATTERING

Study of the fast and slow variations of the power received at VHF links by tropospheric diffusion p 1293 N95-20929

Propagation measurements on a troposcatter link in the Canadian High Arctic p 1295 N95-20940

Comparative study of C- and K-band propagation mechanisms beyond the horizon p 1297 N95-20946

TRUCKS

Reducing exhaust gas emissions from Citydiesel busses [DE95-700245] p 1380 N95-21295

TRUSSES

Static stability of a three-dimensional space truss p 1220 N95-20533

TUMORS

Radiofrequency hyperthermia systems: Experimental and clinical assessment of the feasibility of radiofrequency hyperthermia systems for loco-regional deep heating [PB94-206885] p 1444 N95-21016

Radiopharmaceuticals for diagnosis [DE95-002200] p 1445 N95-21595

TUNABLE LASERS

Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications [DE95-000862] p 1373 N95-21312

Tunable CW blue, green, orange and red upconversion fiber lasers at room temperature [DE95-000851] p 1375 N95-22007

TUNGSTEN

Ductile-brittle transition behavior of tungsten under shock loading [DE94-009913] p 1251 N95-20122

Electronic structure and relative stability of icosahedral superatoms in Al-transition-metal alloys [DE94-628996] p 1260 N95-21855

Thoriated-tungsten, split-ring, hollow-cathode electrode for discharge devices
[AD-D016508] p 1333 N95-21906
Spectroscopic assessment of the reliability of metal/metal oxide interfaces
[AD-A286131] p 1261 N95-22035

TUNGSTEN ALLOYS
Mechanical behavior of 97.2% W alloy in tension at high temperatures
[AD-A284797] p 1250 N95-20067
Tungsten-uranium penetrator target interaction
[DE95-000847] p 1387 N95-21364
Effect of annealing temperature on the texture of rolled tantalum and tantalum-10 wt % tungsten
[DE95-002702] p 1262 N95-22308

TUNING
Linear and nonlinear spectroscopy with the tunable AC scanning tunneling microscope
[AD-A285751] p 1241 N95-21217
First results from the final focus test beam
[DE95-002897] p 1535 N95-21255
Recent progress of the compact AFEL at Los Alamos
[DE95-002728] p 1376 N95-22154
Proposed emittance upgrade for the SLC damping rings
[DE95-002887] p 1536 N95-22155

TUNNEL DIODES
Chemical beam epitaxy for high efficiency photovoltaic devices p 1316 N95-20508

TUNNELS
Propagation of high frequency waves in urban and road tunnel environments p 1294 N95-20933

TURBINE BLADES
Modeling the effect of shroud contact and friction dampers on the mistuned response of turbopumps
[NASA-CR-197285] p 1379 N95-20795
Advanced wind turbine design studies: Advanced conceptual study
[DE93-000031] p 1394 N95-20985

TURBINE ENGINES
Evaluation of PS 212 coatings under boundary lubrication conditions with an Ester-based oil to 300 C
[NASA-TM-106762] p 1223 N95-19901
Statistical analysis of Turbine Engine Diagnostic (TED) field test data
[AD-A286032] p 1379 N95-20998
Turbine design and application
[NASA-SP-290] p 1214 N95-22341

TURBINE PUMPS
SSME HPOTP post-test diagnostic system enhancement project
[NASA-CR-4643] p 1222 N95-21458

TURBINES
Scale-up and modeling of forced chemical vapor infiltration
[DE94-017769] p 1340 N95-20781
Turbine design and application
[NASA-SP-290] p 1214 N95-22341

TURBOGENERATORS
An overview: Component development for solar thermal systems
[DE95-001623] p 1393 N95-20862
Seawater test results of Open-Cycle Ocean Thermal Energy Conversion (OC-OTEC) components
[DE94-019254] p 1396 N95-21897

TURBOJET ENGINES
Portable static test facility for small, expendable, turbojet engines, phase 1
[AD-A286337] p 1216 N95-21719

TURBOMACHINE BLADES
Investigation of shear layer transition using various turbulence models p 1352 N95-21096

TURBULENCE
Experimental study of vane heat transfer and aerodynamics at elevated levels of turbulence
[NASA-CR-4633] p 1337 N95-19912
Evaluation of Reynolds stress turbulence closures in compressible homogeneous shear flow
[NASA-CR-194892] p 1338 N95-20009
Structure and dynamics of turbulent wall layers
[AD-A285360] p 1340 N95-20547
Application of wavelet-filtering techniques to intermittent turbulent and wall pressure events. Part 1: Exploratory results
[AD-A286077] p 1341 N95-20849
Studying Turbulence Using Numerical Simulation Databases. 5: Proceedings of the 1994 Summer Program
[NASA-CR-197362] p 1341 N95-21035
Direct numerical simulations of turbulent non-premixed methane-air flames modeled with reduced kinetics
p 1249 N95-21038
Triple flame structure and diffusion flame stabilization
p 1249 N95-21039
The coupling between flame surface dynamics and species mass conservation in premixed turbulent combustion p 1249 N95-21041
Simulation of a turbulent flame in a channel
p 1249 N95-21044
Instability of streamwise vortices in plane channel flows p 1344 N95-21049
Effects of turbulence compressibility and unsteadiness in compression corner flow p 1344 N95-21052
Modeling near wall effects in second moment closures by elliptic relaxation p 1345 N95-21054
Large-eddy simulation of separated flow in a ribbed duct p 1347 N95-21070
A cheap DNS tool for turbulence models testing
p 1348 N95-21072
Simulation of large scale transitional flows
p 1348 N95-21075
Simulations of bypass transition for spatially evolving disturbances p 1349 N95-21079
The effect of initial conditions on the development of temporally evolving planar three dimensional incompressible wakes p 1350 N95-21085
Direct numerical simulation of transition to turbulence from a high-symmetry initial condition
p 1351 N95-21089
Direct numerical simulations of leading-edge receptivity for freestream sound p 1351 N95-21090
Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106
The structure of turbulence and other motions beneath an air-water interface
[AD-A279838] p 1434 N95-21293
Theory of the L-H transition
[DE95-001389] p 1558 N95-21299
Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames
[DE95-002481] p 1243 N95-21512
Breakdown of the law of large numbers in Josephson junction series arrays
[DE94-629075] p 1576 N95-21996
Order and turbulence in RF-driven Josephson junction series arrays
[DE94-629076] p 1576 N95-21997
Elastic micro-fabricated surface layer for reducing turbulence and drag on an object while it moves through a fluid medium
[AD-D016516] p 1356 N95-22060
Derivation of a wavenumber filter design for the measurement of turbulent wall pressure fluctuations
[AD-A286421] p 1357 N95-22208
Heat loss by helicity injection in spheromaks
[DE95-003473] p 1562 N95-22221
Fully developed turbulent flows
[AD-A286496] p 1358 N95-22294
Annual research briefs, 1994
[NASA-CR-197352] p 1358 N95-22437
Conditional statistics in a turbulent premixed flame derived from direct numerical simulation
p 1249 N95-22438
Notes on rotating turbulence p 1359 N95-22444
A dynamic localization model with stochastic backscatter p 1359 N95-22445
Experimental investigations of on-demand vortex generators p 1361 N95-22451

TURBULENCE EFFECTS
Turbulence descriptors for scaling fatigue loading spectra of wind turbine structural components
[DE94-011833] p 1384 N95-20109
Effects of turbulence compressibility and unsteadiness in compression corner flow p 1344 N95-21052
Single point modeling of rotating turbulent flows
p 1346 N95-21060
Simulation of rotor blade element turbulence
[NASA-TM-108862] p 1207 N95-21186
A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659
Threshold detection in the presence of atmospheric turbulence
[AD-A286175] p 1427 N95-22249

TURBULENCE MODELS
Open Skies project computational fluid dynamic analysis
[AD-A285928] p 1200 N95-19991
Mapping closures for turbulent combustion
[AD-A279995] p 1238 N95-20597
Studying Turbulence Using Numerical Simulation Databases. 5: Proceedings of the 1994 Summer Program
[NASA-CR-197362] p 1341 N95-21035
Turbulent transport in premixed flames
p 1249 N95-21040
The coupling between flame surface dynamics and species mass conservation in premixed turbulent combustion p 1249 N95-21041
Pdf modeling for premixed turbulent combustion based on the properties of iso-concentration surfaces
p 1249 N95-21042
A Lagrangian dynamic subgrid-scale model turbulence
p 1344 N95-21051
Modeling the two-point correlation of the vector stream function p 1345 N95-21055
Homogeneous turbulence subjected to mean flow with elliptic streamlines p 1345 N95-21056
The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers
p 1347 N95-21065
Comparison of DNS and LES of transitional and turbulent compressible flow: Flat plate and mixing layer
p 1347 N95-21066
Direct numerical simulation of turbulent flow in a sudden pipe expansion p 1347 N95-21067
A cheap DNS tool for turbulence models testing
p 1348 N95-21072
Direct simulation of turbulent flow in a square duct: Reynolds-stress budgets p 1348 N95-21073
Modelling anisotropy and backscatter effects in the subgrid scale stress tensor p 1349 N95-21077
Simulation of pipe flow p 1349 N95-21078
Direct numerical determination of the minimum bypass Reynolds number in boundary layers
p 1349 N95-21080
A flamelet model for turbulent unpremixed combustion
p 1249 N95-21081
Direct numerical simulation for premixed turbulent combustion modelling p 1249 N95-21082
Entrainment in a shear-free turbulent mixing layer
p 1350 N95-21083
Direct simulation of a self-similar plane wake
p 1350 N95-21084
Investigation of shear layer transition using various turbulence models p 1352 N95-21096
Application of Roe's flux-difference splitting for kappa-epsilon turbulence model
[PB95-127718] p 1352 N95-21106
Simulation of rotor blade element turbulence
[NASA-TM-108862] p 1207 N95-21186
Annual research briefs, 1994
[NASA-CR-197352] p 1358 N95-22437
Turbulence modeling for separated flow
p 1359 N95-22443
Large-eddy simulation of flow through a plane, asymmetric diffuser p 1360 N95-22449
Large-eddy simulation of a boundary layer with concave streamwise curvature p 1360 N95-22450
Numerical study of boundary layer interaction with shocks: Method and code validation
p 1362 N95-22461
Databases post-processing in Tensoral
p 1363 N95-22465

TURBULENT BOUNDARY LAYER
Application of wavelet-filtering techniques to intermittent turbulent and wall pressure events. Part 1: Exploratory results
[AD-A286077] p 1341 N95-20849
Numerical investigation of supersonic turbulent boundary layers with high wall temperature
p 1344 N95-21050
Developments and applications of dynamic models for large eddy simulation of complex flows
p 1346 N95-21062
Direct numerical determination of the minimum bypass Reynolds number in boundary layers
p 1349 N95-21080
Direct simulation of a self-similar plane wake
p 1350 N95-21084
Large-eddy simulation of a boundary layer with concave streamwise curvature p 1360 N95-22450
Experimental investigations of on-demand vortex generators p 1361 N95-22451
Drag reduction strategies p 1361 N95-22453
Small-scale behavior in distorted turbulent boundary layers at low Reynolds number p 1362 N95-22456
Transverse vorticity measurements in the NASA Ames 80 x 120 wind tunnel boundary layer
p 1362 N95-22457

TURBULENT COMBUSTION
Mapping closures for turbulent combustion
[AD-A279995] p 1238 N95-20597
Direct numerical simulations of turbulent non-premixed methane-air flames modeled with reduced kinetics
p 1249 N95-21038
Turbulent transport in premixed flames
p 1249 N95-21040
The coupling between flame surface dynamics and species mass conservation in premixed turbulent combustion p 1249 N95-21041

Pdf modeling for premixed turbulent combustion based on the properties of iso-concentration surfaces p 1249 N95-21042
Simulation of a turbulent flame in a channel p 1249 N95-21044
A flamelet model for turbulent unpremixed combustion p 1249 N95-21081
Direct numerical simulation for premixed turbulent combustion modelling p 1249 N95-21082
Studies in nonlinear problems of energy [DE95-001387] p 1356 N95-22148
Annual research briefs, 1994 [NASA-CR-197352] p 1358 N95-22437
Conditional statistics in a turbulent premixed flame derived from direct numerical simulation p 1249 N95-22438
Fundamental mechanisms in premixed flame propagation via vortex-flame interactions: Numerical simulations p 1249 N95-22440
Triple flames and flame stabilization p 1249 N95-22441

TURBULENT DIFFUSION
Metallic ions and atoms in the upper atmosphere [AD-A285229] p 1414 N95-20498
The decay of axisymmetric homogeneous turbulence p 1343 N95-21047

TURBULENT FLOW
Turbulence descriptors for scaling fatigue loading spectra of wind turbine structural components [DE94-011833] p 1384 N95-20109
Data report: Stress measurements in the bottom boundary layer with BASS tripods STRESS 2 1990-1991 [AD-A279875] p 1433 N95-20433
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames [AD-A279945] p 1238 N95-20581
Mapping closures for turbulent combustion [AD-A279995] p 1238 N95-20597
Software for flow distribution in electronic rack structures [AD-A285994] p 1325 N95-20715
Application of wavelet-filtering techniques to intermittent turbulent and wall pressure events. Part 1: Exploratory results [AD-A286077] p 1341 N95-20849
A computer code (SKINTEMP) for predicting transient missile and aircraft heat transfer characteristics [AD-A286044] p 1341 N95-21001
Studying Turbulence Using Numerical Simulation Databases. 5: Proceedings of the 1994 Summer Program [NASA-CR-197362] p 1341 N95-21035
Turbulent transport in premixed flames p 1249 N95-21040
The coupling between flame surface dynamics and species mass conservation in premixed turbulent combustion p 1249 N95-21041
Passive turbulent flamelet propagation p 1249 N95-21043
Pressure and higher-order spectra for homogeneous isotropic turbulence p 1343 N95-21045
A Lagrangian dynamic subgrid-scale model turbulence p 1344 N95-21051
Role of pressure diffusion in non-homogeneous shear flows p 1345 N95-21053
Modeling the two-point correlation of the vector stream function p 1345 N95-21055
Single point modeling of rotating turbulent flows p 1346 N95-21060
Application of Direct and Large Eddy Simulation to Transition and Turbulence [AGARD-CP-551] p 1346 N95-21061
Developments and applications of dynamic models for large eddy simulation of complex flows p 1346 N95-21062
Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063
Large-eddy simulation of rotating channel flows using a localized dynamic model p 1346 N95-21064
Comparison of DNS and LES of transitional and turbulent compressible flow: Flat plate and mixing layer p 1347 N95-21066
Direct numerical simulation of turbulent flow in a sudden pipe expansion p 1347 N95-21067
Large eddy simulation of turbulent flow over a cavity p 1347 N95-21069
Large-eddy simulation of separated flow in a ribbed duct p 1347 N95-21070
A cheap DNS tool for turbulence models testing p 1348 N95-21072
Direct simulation of turbulent flow in a square duct: Reynolds-stress budgets p 1348 N95-21073
Simulation of pipe flow p 1349 N95-21078
Direct numerical determination of the minimum bypass Reynolds number in boundary layers p 1349 N95-21080
Entrainment in a shear-free turbulent mixing layer p 1350 N95-21083
Direct simulation of a self-similar plane wake p 1350 N95-21084
DNS of turbulent flow in a driven cavity and their analysis using proper orthogonal decomposition p 1352 N95-21097
Direct simulation and graphics post-processing of three-dimensional turbulent flows p 1352 N95-21098
Summaries of BFRL fire research in-house projects and grants, 1994 [PB95-130845] p 1286 N95-21130
Fourth International Symposium on Stratified Flows, volume 1 [AD-A286450] p 1354 N95-21583
Derivation of a wavenumber filter design for the measurement of turbulent wall pressure fluctuations [AD-A286421] p 1357 N95-22208
Fully developed turbulent flows [AD-A286496] p 1358 N95-22294
Annual research briefs, 1994 [NASA-CR-197352] p 1358 N95-22437
Turbulence modeling for separated flow p 1359 N95-22443
Notes on rotating turbulence p 1359 N95-22444
Large-eddy simulation of a plane wake p 1360 N95-22446
Large-eddy simulation of flow through a plane, asymmetric diffuser p 1360 N95-22449
Large-eddy simulation of a boundary layer with concave streamwise curvature p 1360 N95-22450
Drag reduction strategies p 1361 N95-22453
Experimental and numerical study of the intermittency exponent mu p 1362 N95-22458
On the dynamics of small-scale vorticity in isotropic turbulence p 1362 N95-22459
Numerical study of boundary layer interaction with shocks: Method and code validation p 1362 N95-22461
A method for obtaining a statistically stationary turbulent free shear flow p 1363 N95-22463

TURBULENT JETS
Application of Direct and Large Eddy Simulation to Transition and Turbulence [AGARD-CP-551] p 1346 N95-21061
Temporal evolution of turbulence/chemistry interactions in lifted, turbulent-jet flames [DE95-002481] p 1243 N95-21512
Direct numerical simulation of incompressible axisymmetric flows p 1363 N95-22464

TURBULENT MIXING
Entrainment in a shear-free turbulent mixing layer p 1350 N95-21083
Fourth International Symposium on Stratified Flows, volume 4 [AD-A286453] p 1358 N95-22424
Drag reduction strategies p 1361 N95-22453

TURBULENT WAKES
Triple flame structure and diffusion flame stabilization p 1249 N95-21039
Application of Direct and Large Eddy Simulation to Transition and Turbulence [AGARD-CP-551] p 1346 N95-21061
Direct simulation of a self-similar plane wake p 1350 N95-21084
The velocity and vorticity fields of the turbulent near wake of a circular cylinder [NASA-TM-110513] p 1355 N95-21954
Large-eddy simulation of a plane wake p 1360 N95-22446
Direct numerical simulation of incompressible axisymmetric flows p 1363 N95-22464

TWINNING
Post-irradiation deformation characteristics of heavy-ion irradiated 304L SS [DE94-017462] p 1251 N95-20088

TWO DIMENSIONAL BOUNDARY LAYER
On subcritical instability of the attachment line boundary layer p 1351 N95-21092

TWO DIMENSIONAL FLOW
Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle [NASA-TM-4574] p 1199 N95-19913
Multigrid with matrix-dependent transfer operators for convection-diffusion problems [PB95-110821] p 1487 N95-19915
Nonlinear spectroscopy of multicomponent droplets and two- and three-dimensional measurements in flames [AD-A279945] p 1238 N95-20581
HIVEL2D: A two-dimensional flow model for high-velocity channels [AD-A286556] p 1341 N95-20843
Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble p 1352 N95-21095
Investigation of shear layer transition using various turbulence models p 1352 N95-21096
DNS of turbulent flow in a driven cavity and their analysis using proper orthogonal decomposition p 1352 N95-21097
Two-dimensional imaging of OH in a lean burning high pressure combustor [NASA-TM-106854] p 1214 N95-21383
Convergence acceleration of the Proteus computer code with multigrid methods [NASA-CR-197677] p 1467 N95-21450
Large amplitude localized structures in a relativistic electron-positron ion plasma [DE94-628965] p 1561 N95-21851
Shock wave interactions in hypervelocity flow [AD-A286507] p 1357 N95-22212
1/f noise in two-dimensional fluids [DE95-002617] p 1358 N95-22307
Direct numerical simulations of on-demand vortex generators: Mathematical formulation p 1361 N95-22452

TWO DIMENSIONAL MODELS
Solutions of D(sup n)D(sup m)f=0 [PB95-110839] p 1487 N95-19916
Analyses of some benchmark cases in fracture mechanics using boundary element method [PB95-110888] p 1384 N95-19930
Open Skies project computational fluid dynamic analysis [AD-A285928] p 1200 N95-19991
The Nonlinear Characteristic scheme in X-Y geometries [DE94-016192] p 1488 N95-20167
Investigating the resolution of resistivity arrays using inverse theory [DE94-017760] p 1412 N95-20287
Theoretical particle physics [DE95-002447] p 1515 N95-20893
Three-dimensional effects for radio frequency antenna modeling [DE94-019125] p 1303 N95-21459
An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection [DE94-019310] p 1367 N95-21478
Object recognition by alignment using invariant projections of planar surfaces [AD-A279841] p 1468 N95-21495
A new FHNC scheme for Gutzwiller correlated wave functions [DE94-629037] p 1581 N95-21993

TYROSINE
Behavioral effects of tyrosine during sustained wakefulness [AD-A279789] p 1441 N95-20307

U

ULTRAHIGH FREQUENCIES
Inverse Cerenkov laser acceleration experiment at ATF [DE94-017990] p 1370 N95-20572
Large bistatic angle clutter depolarization study p 1296 N95-20941
Mitigation of effects of multiple path nulls at super-high frequencies through diversity and networking p 1297 N95-20948
Variability of total electron content in the high-altitude ionosphere following solar maximum [AD-A285849] p 1425 N95-21833

ULTRAHIGH VACUUM
A low temperature, ultrahigh vacuum, microwave-frequency-compatible scanning tunneling microscope [AD-A279869] p 1365 N95-20413

ULTRASHORT PULSED LASERS
Fiber laser amplifiers and oscillators [AD-A285835] p 1368 N95-20035
Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG [AD-A285857] p 1369 N95-20378

ULTRASONIC RADIATION
An in-line ultrasonic viscometer [DE95-002982] p 1366 N95-21453

ULTRASONICS
Method and apparatus for non-invasive evaluation of diaphragmatic function [NASA-CASE-LAR-13888-1] p 1441 N95-20408
Surfaces and thin films studied by picosecond ultrasonics [DE95-001866] p 1506 N95-22071
Applications of sonochemistry [AD-A286388] p 1506 N95-22360

ULTRAVIOLET ABSORPTION
Photoinduced charge transfer between fullerenes and TiO2 semiconductor colloids
[DE95-001447] p 1570 N95-20838

ULTRAVIOLET ASTRONOMY
Coronagraphic observations and analyses of the ultraviolet solar corona
[NASA-CR-197370] p 1602 N95-20558

ULTRAVIOLET EMISSION
Ultraviolet emission from rocket motor plumes
[DSTO-TR-0002] p 1222 N95-21661

ULTRAVIOLET LASERS
A URI program for Ultraviolet/extreme ultraviolet research
[AD-A279159] p 1370 N95-20600
Ultraviolet laser emission properties of Ce(3+)-doped LiSrAlF6
[DE94-016364] p 1372 N95-21135
Research studies on short wavelength lasers by selective Auger processes
[AD-A285620] p 1372 N95-21144
Visible fluorescence of weathered lead
[DE95-002454] p 1244 N95-21523

ULTRAVIOLET PHOTOGRAPHY
Imaging design of the wide field x-ray monitor onboard the HETE satellite
[DE95-002750] p 1221 N95-22436

ULTRAVIOLET RADIATION
Free electron laser program
[AD-A285906] p 1368 N95-19987
UV testing of INTELSAT-7, 7A, and 8 solar cells
p 1320 N95-20526
A URI program for Ultraviolet/extreme ultraviolet research
[AD-A279159] p 1370 N95-20600
Magnetron power supply at high stability and its application in plasma excitation for the production of ultraviolet radiation
[DE94-629656] p 1326 N95-20733
Disinfection of purified waste water with ultra violet light on a technical scale
[PB95-131926] p 1405 N95-21330
Optical radiation: Health based exposure limits for electromagnetic radiation in the wavelength range from 100 nanometer to 1 millimeter
[PB95-132767] p 1447 N95-22083

ULTRAVIOLET SPECTRA
Electron propagator theory and application
[AD-A279761] p 1507 N95-20097
The synthesis and characterization of small molecule and photo-cross-linkable high polymeric phosphazenes bearing cinnamate groups
[AD-A279782] p 1268 N95-20442
Ultraviolet emission from rocket motor plumes
[DSTO-TR-0002] p 1222 N95-21661
Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

ULTRAVIOLET SPECTROMETERS
Atmospheres of the Moon and Mercury
p 1419 N95-21794
Absolute, Extreme-ultraviolet Solar Spectral Irradiance Monitor (AESSIM)
[AD-A279345] p 1603 N95-21929

ULTRAVIOLET SPECTROSCOPY
Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596
Cryogenic pellet laser plasma source targets
[DE95-002488] p 1376 N95-22169

UNDERWATER ACOUSTICS
The Combustive Sound Source
[ARL-TR-94-9] p 1503 N95-19911
Oceanographic analysis of the acoustic mid-ocean dynamics experiment
[AD-A285907] p 1432 N95-19988
Analysis of low frequency ocean noise. 1: From a long-term experiment across the US East Coast. 2: From the Wake Island Hydrophone Array during northwest Pacific typhoons
[AD-A284975] p 1432 N95-20040
Signal-to-noise gain from adaptive matched-field beamforming of multidimensional acoustic arrays
[AD-A285671] p 1503 N95-20084
Characterization and simulation of an acoustic source moving through an oceanic waveguide
[AD-A285688] p 1503 N95-20272
Ambient noise and surface wave dissipation in the ocean
[AD-A279650] p 1432 N95-20303
Multiple scatter theory of ocean sediments
[AD-A286033] p 1433 N95-20999
Transducers with improved signal transfer field of the invention
[AD-D016228] p 1328 N95-21118
Underwater Acoustic Generator Phase 2: Sea trial, March 1992
[MRL-TN-640] p 1434 N95-21657
Acoustic Thermometry of Ocean Climate (ATOC): Selection of California source site
[AD-A279295] p 1436 N95-21987
Rapid determination of geoacoustic properties of the sea floor by simulated annealing
[AD-A286297] p 1436 N95-22028
Seismic anisothropy and large-scale porosity inthe ocean floor
[AD-A286580] p 1436 N95-22187

UNDERWATER STRUCTURES
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 4: Silicon carbide particulate reinforced alumina ceramic
[AD-A286299] p 1279 N95-22047

UNDERWATER VEHICLES
Structural performance of cylindrical pressure housings of different ceramic compositions under external pressure loading. Part 1: Isostatically pressed alumina ceramic
[AD-A279669] p 1270 N95-20603

UNIMOLECULAR STRUCTURES
Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621

UNIQUENESS
Uniqueness of strongly regular graphs having minimal p-rank
[PB95-111043] p 1488 N95-19942
A convergence analysis of an h-version finite element method with high order elements for two dimensional elasto-plasticity problems
[AD-A279975] p 1491 N95-20920

UNITED STATES
Census US civil aircraft calendar year 1993
[AD-A286309] p 1199 N95-20091

UNIVERSE
Connection with dynamics: General introduction
[NASA-CR-197617] p 1579 N95-19947
Predictions from quantum cosmology
[PB95-111126] p 1599 N95-20173

UNIX (OPERATING SYSTEM)
Personal computer and workstation operating systems tutorial
[AD-A280132] p 1451 N95-20041

UNSTEADY AERODYNAMICS
The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758
Prediction of rotor-blade deformations due to unsteady airloads
[AD-A286593] p 1207 N95-20860
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 4, part 1: Buffet cross spectral densities
[AD-A285593] p 1215 N95-21214
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 1: Wind tunnel test summary
[AD-A279126] p 1202 N95-21877
Direct numerical simulations of on-demand vortex generators: Mathematical formulation
p 1361 N95-22452

UNSTEADY FLOW
Simulation of rotor blade element turbulence
[NASA-TM-108862] p 1207 N95-21186
Transient behaviour and stability points of the Poiseuille flow of a KBKZ-fluid
[PB95-132064] p 1353 N95-21268
The structure of turbulence and other motions beneath an air-water interface
[AD-A279838] p 1434 N95-21293
Multiwire thermocouples: Frequency response
[NASA-TM-110510] p 1367 N95-21889
Computations of unsteady viscous compressible flows using adaptive mesh refinement in curvilinear body-fitted grid systems
[NASA-TM-106704] p 1356 N95-21959
Direct numerical simulations of on-demand vortex generators: Mathematical formulation
p 1361 N95-22452
Acoustics of laminar boundary layers breakdown
p 1361 N95-22455

UPPER ATMOSPHERE
Completion of spectral rotating shadowband radiometers and analysis of ARM spectral short-wave data
[DE95-000602] p 1412 N95-20116
Metallic ions and atoms in the upper atmosphere
[AD-A285229] p 1414 N95-20498
Rare gases systematics and mantle structure
p 1416 N95-21778
Mars atmospheric loss and isotopic fractionation by pick-up-ion sputtering and photochemical escape
p 1420 N95-21796

UPWIND SCHEMES (MATHEMATICS)
Hybrid Upwind Splitting (HUS) by a field-by-field decomposition
[NASA-TM-106843] p 1355 N95-21957

URANIUM
Application of diode lasers to the isotopically selective determination of uranium in oxides by optogalvanic spectroscopy
[DE94-018045] p 1370 N95-20698
Active neutron multiplicity analysis and Monte Carlo calculations
[DE94-016178] p 1516 N95-21114

URANIUM ALLOYS
Tungsten-uranium penetrator target interaction
[DE95-000847] p 1387 N95-21364

URANIUM COMPOUNDS
A mechanistic model for radiation-induced crystallization and amorphization in U3Si
[DE94-015028] p 1566 N95-20419

URANIUM OXIDES
Application of diode lasers to the isotopically selective determination of uranium in oxides by optogalvanic spectroscopy
[DE94-018045] p 1370 N95-20698
Active neutron multiplicity analysis and Monte Carlo calculations
[DE94-016178] p 1516 N95-21114

URANIUM 235
Application of diode lasers to the isotopically selective determination of uranium in oxides by optogalvanic spectroscopy
[DE94-018045] p 1370 N95-20698

USER MANUALS (COMPUTER PROGRAMS)
PRSPLOT6 manual
[PB95-110862] p 1456 N95-19928
Noise model of the MSX SPIRIT 3 interferometer
[AD-A285837] p 1364 N95-20036
NOMADS graphical user interface version 2.0 user's manual
[AD-A286314] p 1458 N95-20095
Computer-Aided Structural Engineering (CASE) project. User's guide: Computer-Aided Structural Modeling (CASM). Version 5.00
[AD-A279913] p 1459 N95-20310
BACKSCAT lidar simulation version 4.0: Technical documentation and users guide
[AD-A285851] p 1290 N95-20376
Anaerobic digestion analysis model: User's manual
[DE94-011858] p 1437 N95-20471
Computer graphics tools for visualizing gravity gradient torques on a rigid spacecraft
[AD-A285971] p 1461 N95-20665
A software process framework for the Software Engineering Institute's (SEI) capability maturity model
[AD-A286595] p 1462 N95-20765
Xwake 1.0 user's manual
[DE95-002528] p 1463 N95-20901
FIREDOC users manual, 3rd edition
[PB95-128674] p 1286 N95-21129
PRSCAL manual
[PB95-130480] p 1465 N95-21231
PRISMA operating program manual
[PB95-130498] p 1466 N95-21232
EXPERT system expert: Users manual
[PB95-131579] p 1482 N95-21430
Unified very low stratus cloud/subcloud microphysics model: User's guide
[AD-A286454] p 1430 N95-21586
Modeling of rolling element bearing mechanics. Computer program user's manual
[NASA-CR-196557] p 1381 N95-21692
DBASE 4 basics
[DE94-018323] p 1469 N95-21713
A user's guide to LUGSAN 1.1: A computer program to calculate and archive lug and sway brace loads for aircraft-carried stores
[DE95-001919] p 1207 N95-21730
QMRPACK user's guide
[DE95-001770] p 1469 N95-21744
MARI mini-manual
[PB95-134649] p 1526 N95-21965
NODDS/WOSM interface user's manual
[AD-A279095] p 1471 N95-22068
SCOPE 1.5: A Source-Code Optimization PackagEfor REDUCE 3.5: User's manual
[PB95-107579] p 1472 N95-22159
Defense Data Repository System (DDRS). End user manual
[AD-A286484] p 1592 N95-22293
ActorStudio reference manual. A user's guide to the ActorStudio user interface editor, version 1.0
[PB95-127023] p 1472 N95-22310

USER REQUIREMENTS
Determining information management needs for enhanced international safeguards
[DE94-015787] p 1588 N95-20789
Accuracy problems in the generation of discrete time stochastic processes
[PB95-131397] p 1386 N95-21133
User interface software tools
[AD-A286056] p 1466 N95-21325
Underwater Acoustic Generator Phase 2: Sea trial, March 1992
[MRL-TN-640] p 1434 N95-21657
Noncoherent transponder standards
[AD-A279512] p 1306 N95-21684
State of the art in CFD pre- and postprocessing
[PB95-110391] p 1356 N95-22017
Economic feasibility analysis of distributed electric power generation based upon the natural gas-fired fuel cell
[DE94-012277] p 1396 N95-22033
Adaptive fault-resistant systems
[AD-A286406] p 1484 N95-22203
UTILIZATION
Processing and applications of iron aluminides
[DE94-017855] p 1253 N95-20673

V

VACUUM
RF vacuum microelectronics based on thin film edge-emitter technology
[AD-A279539] p 1331 N95-21690
Thermal fixture for testing an integrated circuit
[AD-D016483] p 1333 N95-21900
VACUUM CHAMBERS
Derivation of coupling impedance from the wake potential of a finite bunch
[DE95-002529] p 1532 N95-20421
Space power facility readiness for Space Station power system testing
[NASA-TM-106829] p 1218 N95-21384
VACUUM PUMPS
Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702
VACUUM SYSTEMS
Space power facility readiness for Space Station power system testing
[NASA-TM-106829] p 1218 N95-21384
The ITER in-vessel system
[DE94-018053] p 1560 N95-21665
Evaluation of pumping and fueling requirements for the ITER EDA
[DE94-018117] p 1560 N95-21702
VALUE ENGINEERING
The impact of partnering on construction contracts
[AD-A286588] p 1585 N95-20855
VAN DER WAALS FORCES
Combustion-related studies using weakly bonded complexes
[DE95-002801] p 1238 N95-20576
An augmented Young-Laplace model of an evaporating meniscus in a micro-channel with high heat flux
[NASA-CR-197622] p 1340 N95-20796
VANADIUM
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126
VANADIUM ALLOYS
Tribology and surface mechanical properties of excimer laser nitrided titanium
[DE95-002751] p 1255 N95-21238
VANADIUM COMPOUNDS
The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126
VANES
Experimental study of vane heat transfer and aerodynamics at elevated levels of turbulence
[NASA-CR-4633] p 1337 N95-19912
VAPOR DEPOSITION
Optimization of InAsSb/InGaAs strained-layer superlattice growth by metal-organic chemical vapor deposition for use in infrared emitters
[DE94-016557] p 1563 N95-19954
Synthesis and studies of organometallic precursors for CVD of thin film electronic materials
[AD-A285834] p 1223 N95-20033
Enhancement of corrosion resistance and mechanical properties of light-weight metals through the use of graded nonequilibrium microstructures
[AD-A286320] p 1251 N95-20178
Amorphous silicon thin films: The ultimate lightweight space solar cell p 1318 N95-20515
Aerosol-assisted chemical vapor deposition of copper: A liquid delivery approach to metal thin films
[AD-A279702] p 1270 N95-20689
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A279811] p 1569 N95-20807
Novel reagents for chemical vapor deposition of intermetallic alloys
[AD-A286562] p 1271 N95-20815
Characterization and electrical properties of copper films grown via direct liquid coinjection of (hfac)Cu(TMVS) and TMVS
[DE95-002957] p 1272 N95-20889
Friction and wear properties of as-deposited and carbon ion-implanted diamond films
[NASA-TM-106759] p 1274 N95-21252
Analysis of cost: Combustion flame CVD diamond deposition
[AD-A279153] p 1278 N95-21973
Siloxanes with strong hydrogen bond donating functionalities
[AD-D016499] p 1279 N95-22057
Growing and releasing diamonds
[AD-D016489] p 1577 N95-22103
Advanced diagnostics for plasma chemistry
[DE94-018936] p 1561 N95-22116
Technical cost modeling applied to CVD diamond deposition
[AD-A286119] p 1578 N95-22231
VAPOR PHASE EPITAXY
Chemical beam epitaxy for high efficiency photovoltaic devices p 1316 N95-20508
High quality InP-on-Si for solar cell applications
p 1317 N95-20510
Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432
VAPOR PHASES
Gas-phase generation of zinc sulfide particles using a single-source precursor
[AD-A279700] p 1239 N95-20712
Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881
Non-local density functional calculations of gas phase heats of formation
[AD-A286213] p 1246 N95-22000
Governing equations for multiphase heat and mass transfer in hygroscopic porous media with applications to clothing materials
[AD-A286418] p 1357 N95-22206
Gas-phase photocatalytic oxidation: Cost comparison with other air pollution control technologies
[DE95-000241] p 1410 N95-22278
VAPOR PRESSURE
Transportation of volatile elements in thermally evolving planetesimals: An important role of metallic iron
p 1418 N95-21790
VAPORIZERS
Vapor generator wand
[NASA-CASE-LAR-15058-1] p 1215 N95-20080
VAPORIZING
Alkali element depletion by core formation and vaporization on the early Earth p 1421 N95-21804
VAPORS
Continuum transient and frozen startup behavior of conventional and gas-loaded heat pipes
[AD-A284297] p 1339 N95-20250
VARIABILITY
An experimental determination of meteor daily arrival rate variation
[AD-A279484] p 1600 N95-21679
Variability of total electron content in the high-altitude ionosphere following solar maximum
[AD-A285849] p 1425 N95-21833
Remote-sensing based technique to account for sub-grid scale variability of land surface properties
[NASA-TM-110501] p 1390 N95-22110
VARIATIONAL PRINCIPLES
Electron-nuclear dynamics of molecular systems
[AD-A279649] p 1516 N95-21120
Second order approximation for optical polaron in the strong coupling case
[DE94-628997] p 1525 N95-21856
Variational Monte Carlo study of He-4 in two dimensions
[DE94-629078] p 1576 N95-21998
VARIATIONS
Light-scattering fluctuations and noise in nonlinear optical processing
[AD-A279748] p 1544 N95-20803
Seamless data-range change using punctured convolutional codes for time-varying signal-to-noise ratios p 1304 N95-21534
VECTOR ANALYSIS
Visualizing 3D velocity fields near contour surfaces
[DE95-000841] p 1353 N95-21182
VECTOR MESONS
Nuclear A dependence of exclusive vector meson production in muon scattering
[DE95-002248] p 1511 N95-20418
Production of J/(psi) in 800 GeV/c p-Si interactions
[DE94-017982] p 1513 N95-20496
Anomalous vector-boson couplings in Majorana neutrino models
[PB95-127460] p 1518 N95-21220
Dilepton production from p-p to Ca-Ca at the Bevalac
[DE95-002341] p 1520 N95-21357
VECTOR PROCESSING (COMPUTERS)
VLUGr3: A vectorizable adaptive grid solver for PDEs in 3D. 2: Code description
[PB95-135737] p 1465 N95-21033
VECTOR SPACES
Linear invariance of Lindeloef numbers
[PB95-134540] p 1494 N95-21956
VECTORS (MATHEMATICS)
Hamiltonian structure of the reversible nonsemisimple 1:1 resonance
[PB95-127528] p 1495 N95-22151
Time and the order of abstract events in distributed computations
[PB95-110482] p 1496 N95-22349
VEGETATION
The effect of regional-scale soil-moisture deficits on mesoscale atmospheric dynamics that influence fire severity
[DE95-002682] p 1413 N95-20455
VEHICLES
Effect of propane-air on NGVs and vehicle fueling stations
[PB94-210085] p 1282 N95-20253
VELOCITY DISTRIBUTION
Velocity analysis for transversely isotropic media
[DE95-000643] p 1411 N95-19981
Passive turbulent flamelet propagation
p 1249 N95-21043
On the transition towards slow manifold in shallow-water and 3D Euler equations in a rotating frame
p 1345 N95-21057
The effect of initial conditions on the development of temporally evolving planar three dimensional incompressible wakes p 1350 N95-21085
Direct simulation of tridimensional wake of NACA 0012 profile p 1350 N95-21086
Rib vortices in round jets: Direct and large eddy simulation p 1351 N95-21088
Direct numerical simulation of transition to turbulence from a high-symmetry initial condition
p 1351 N95-21089
Visualizing 3D velocity fields near contour surfaces
[DE95-000841] p 1353 N95-21182
Resolving velocity profiles with the multi-scale profiler
[AD-A286446] p 1434 N95-21461
A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659
The velocity and vorticity fields of the turbulent near wake of a circular cylinder
[NASA-TM-110513] p 1355 N95-21954
Atomic velocity distributions in a hydrogen beam effusing out of an HF discharge dissociator
[AD-A279253] p 1307 N95-21985
1/f noise in two-dimensional fluids
[DE95-002617] p 1358 N95-22307
Resolution requirements for velocity gradients in turbulence p 1363 N95-22462
VELOCITY MEASUREMENT
A three-dimensional orthogonal laser velocimeter for the NASA Ames 7- by 10-foot wind tunnel
[NASA-TM-108864] p 1366 N95-21323
MHD-flow in slotted channels with conducting walls
[DE94-018370] p 1559 N95-21388
Resolving velocity profiles with the multi-scale profiler
[AD-A286446] p 1434 N95-21461
A preliminary study of the airwake model used in an existing SH-60B/FFG-7 helicopter/ship simulation program
[DSTO-TR-0015] p 1201 N95-21659
VENTILATION
Fire smoke ventilation through shafts: Experiments
[PB95-132247] p 1288 N95-21978
VENUS (PLANET)
Dynamics of volatile delivery from outer to inner solar system p 1420 N95-21798
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801

VENUS ATMOSPHERE
Modeling of collision induced absorption spectra of CO2-CO2 pairs for planetary atmosphere of Venus
[NASA-CR-197373] p 1601 N95-22338
VERBAL COMMUNICATION
A database for analyzing sequential behavioral data and their associated cognitive models
[AD-A280061] p 1448 N95-19887
VERMICULITE
Laboratory evaluation of a reactive baffle approach to NOx control
[AD-A283802] p 1400 N95-19921
VERTEBRATES
How the brain works
[AD-A279138] p 1450 N95-21968
VERTICAL AIR CURRENTS
Simulation of rotor blade element turbulence
[NASA-TM-108862] p 1207 N95-21186
Stability effects on the profiles of vertical velocity and its variance in katabatic flow
[DE95-001126] p 1426 N95-21836
VERTICAL DISTRIBUTION
Rainfall rates and the vertical distribution of diabatic heating components over tropical oceans
[NASA-CR-197603] p 1428 N95-19948
The vertical distribution of heating in the tropical atmosphere
[AD-A285934] p 1429 N95-20391
VERTICAL TAKEOFF AIRCRAFT
The personal aircraft: Status and issues
[NASA-TM-109174] p 1200 N95-20688
VERY HIGH FREQUENCIES
The relative importance of meteor burst and other distance polar cap propagation modes in the low VHF band p 1293 N95-20928
Study of the fast and slow variations of the power received at VHF links by tropospheric diffusion
p 1293 N95-20929
VERY LARGE SCALE INTEGRATION
Prototype rule-based reliability analysis for VLSI circuit design
[AD-A280065] p 1327 N95-20967
An automatic placement tool for rapid prototyping of printed circuit boards
[AD-A286029] p 1328 N95-20997
VERY LONG BASE INTERFEROMETRY
Low noise 22 GHz receiver for the radioastron satellite. Part 1: Requirements, design and reliability analysis
[PB95-104410] p 1300 N95-20972
Low noise 22 GHz receiver for the radioastron satellite, part 2: Space qualification tests
[PB95-127197] p 1598 N95-22376
VHSIC (CIRCUITS)
VHDL modeling of PRC-70 radio ASICs for reverse engineering
[AD-A285740] p 1457 N95-19929
VIBRATION
Variations observed in the AC generator signal period of a Sea King helicopter
[AD-A284280] p 1206 N95-19963
Apparatus and method for determining the mass density of a filament
[NASA-CASE-LAR-14879-1-CU] p 1383 N95-20616
Vibration analysis of the AN/SPS-67(V)3 surface search radar
[AD-A286050] p 1302 N95-21324
Determination of the complex elastic moduli of materials using a free-free bar technique
[AD-A279861] p 1281 N95-22387
VIBRATION MEASUREMENT
An evaluation of the Gear Averaging Signal Processor (GASP)
[DSTO-TR-0067] p 1470 N95-21950
VIBRATION TESTS
An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478
VIBRATIONAL SPECTRA
Theoretical prediction of vibrational circular dichroism spectra of R-glyceraldehyde, R-erythrose, and R-threose. Part 2: Development of a procedure to scale the force constant matrix expressed in terms of internal coordinates
[AD-A284305] p 1437 N95-20252
Vibrational overtone spectroscopy of pyridine and related compounds
[AD-A280105] p 1224 N95-21911
VIBRATIONAL STATES
Plasma chemistry of vibrationally nonequilibrium molecules
[AD-A279630] p 1553 N95-20411
Publications/patents/presentations/honors/student eport. Investigation of the role of vibrational excitation in unimolecular reactions
[AD-A280044] p 1513 N95-20621
Changes in the behavior of magnetic materials undergoing processing in electrical rotating machines
[PB95-104493] p 1325 N95-20702
Electron attachment to excited molecules
[DE94-019124] p 1522 N95-21519
VIDEO COMMUNICATION
Subsampling methods for image sequence coding
[PB95-107991] p 1305 N95-21579
VIDEO DATA
Determining the usability of Digital Video Interactive (DVI) technology in computer-based instruction
[AD-A284717] p 1457 N95-20060
A scalable video rate camera interface
[AD-A286144] p 1474 N95-20325
Airborne Multisensor Pod System (AMPS) data access concept
[DE95-002586] p 1389 N95-20903
Subsampling methods for image sequence coding
[PB95-107991] p 1305 N95-21579
VIDEO EQUIPMENT
Color control in a multichannel simulator display: The display for advanced research and training
[AD-A279717] p 1216 N95-20992
Cold regions instrumentation considerations
[AD-A279492] p 1367 N95-21680
Evaluation of the Haworth-Newman avionics Display Readability Scale
[AD-A286127] p 1214 N95-22232
VIDEO SIGNALS
A scalable video rate camera interface
[AD-A286144] p 1474 N95-20325
Passive range measurement system
[AD-D016222] p 1544 N95-21100
Image and video coding using a wavelet decomposition
[PB95-135067] p 1311 N95-22358
VIDEO TAPES
Rate monotonic analysis for real-time systems: Instructors guide
[AD-A286083] p 1463 N95-20810
VINYL POLYMERS
The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers
[DE94-015742] p 1268 N95-20396
VINYLIDENE
The role of high pressure in the study and applications of the ferroelectric polymer polyvinylidene fluoride and its copolymers
[DE94-015742] p 1268 N95-20396
VIRTUAL MEMORY SYSTEMS
Design of a parallel object oriented programming language
[AD-A284924] p 1457 N95-20000
VIRTUAL REALITY
Measuring presence in virtual environments
[AD-A286183] p 1460 N95-20326
Virtual reality in precision engineering research
[AD-A286528] p 1465 N95-21012
VISCOELASTICITY
The numerical integration and 3-D finite element formulation of a viscoelastic model of glass
[DE95-002588] p 1271 N95-20788
Transient behaviour and stability points of the Poiseuille flow of a KBKZ-fluid
[PB95-132064] p 1353 N95-21268
VISCOMETERS
In situ viscometer instrument acceptance test report
[DE94-018507] p 1364 N95-20224
An in-line ultrasonic viscometer
[DE95-002982] p 1366 N95-21453
VISCOSITY
Conservative smoothing versus artificial viscosity
[DE95-001108] p 1341 N95-20831
Laser-Induced Thermal Acoustics (LITA): Four-wave mixing measurement of sound speed, thermal diffusivity, and viscosity
[AD-A286524] p 1372 N95-21009
An in-line ultrasonic viscometer
[DE95-002982] p 1366 N95-21453
Quartz resonator fluid monitors for vehicle applications
[DE94-018910] p 1367 N95-21546
Extrudate swell and extrudate distortion of HDPE as a result of different deformation mechanisms during extrusion through capillary dies
[PB95-110227] p 1288 N95-21651
Modeling the effect of water on mantle rheology
p 1417 N95-21783
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801
VISCOUS FLOW
Laser anemometry and viscous computation of the flow through an annular turbine cascade
[AD-A280070] p 1341 N95-20968
Experiments on the flow field physics of confluent boundary layers for high-lift systems
[NASA-CR-197318] p 1201 N95-21343
Volatiles, rheology, and mantle convection: Comparing Earth, Venus, and Mars p 1420 N95-21801
Computations of unsteady viscous compressible flows using adaptive mesh refinement in curvilinear body-fitted grid systems
[NASA-TM-106704] p 1356 N95-21959
VISCOUS FLUIDS
Solutions of D(sup n)D(sup m)f=0
[PB95-110839] p 1487 N95-19916
Direct numerical simulations of on-demand vortex generators: Mathematical formulation
p 1361 N95-22452
VISIBILITY
Air pollution caused by fireworks during the turn of the year 1992-1993
[PB95-135265] p 1409 N95-21718
VISIBLE SPECTRUM
Control of continuous phase PH using visible light to activate PH-dependent fibers and gels in a controlled and reversible manner
[AD-D016532] p 1543 N95-20728
Chemical lasers emitting in the visible spectrum: Metastable oxygen reactions and YOSHIDA laser
[PB95-104485] p 1372 N95-20983
Study of pulsed laser effects on living tissues
[PB95-131330] p 1447 N95-22361
VISION
Viewer-centered object recognition in monkeys
[AD-A279876] p 1437 N95-20185
VISUAL ACUITY
The spatiotemporal characteristics of visual motion priming
[AD-A284782] p 1449 N95-20062
Factors that determine visual acuity through night vision goggles for emmetropes
[AD-A279339] p 1450 N95-21927
VISUAL AIDS
Effects of bifocal and progressive-addition corrective lenses on aviator target-detection performance
[AD-A279698] p 1442 N95-20710
FIREDOC users manual, 3rd edition
[PB95-128674] p 1286 N95-21129
VISUAL FIELDS
Source distribution of visual evoked neuromagnetic responses
[PB95-127643] p 1445 N95-21348
Factors affecting the perception of luning in monocular regions of partial binocular overlap displays
[AD-A286287] p 1547 N95-22044
Occupant reach and mobility apparatus
[AD-D016253] p 1454 N95-22099
Visual perception of elevation
[AD-A284938] p 1451 N95-22472
VISUAL OBSERVATION
Reentry vehicle on-site inspection technology study
[AD-A285960] p 1220 N95-21634
Fire smoke ventilation through shafts: Experiments
[PB95-132247] p 1288 N95-21978
VISUAL PERCEPTION
Intermediate levels of visual processing
[AD-A284922] p 1448 N95-19998
The spatiotemporal characteristics of visual motion priming
[AD-A284782] p 1449 N95-20062
A 3D stereo data visualization and representation
[AD-A284788] p 1449 N95-20064
Viewer-centered object recognition in monkeys
[AD-A279876] p 1437 N95-20185
Space constancy on video display terminals
[AD-A280015] p 1449 N95-20314
Perception and control of locomotion
[AD-A285605] p 1450 N95-21192
Effect of lags on human performance with head-coupled simulators
[AD-A279577] p 1453 N95-21700
Factors that determine visual acuity through night vision goggles for emmetropes
[AD-A279339] p 1450 N95-21927
Factors affecting the perception of luning in monocular regions of partial binocular overlap displays
[AD-A286287] p 1547 N95-22044
Visual perception of elevation
[AD-A284938] p 1451 N95-22472
Magnetic source imaging of visually evoked and oscillatory electrical activity of the human brain
[PB95-127205] p 1448 N95-22476
VISUAL SIGNALS
Space constancy on video display terminals
[AD-A280015] p 1449 N95-20314

VITERBI DECODERS

Error probabilities of FFH/BFSK with noise normalization and soft decision viterbi decoding in a fading channel with partial-band jamming [AD-A280041] p 1498 N95-20620

VITON RUBBER (TRADEMARK)

The permeation of bis(2-fluoro-2,2-dinitroethyl) formal (FEFO), ethyl 4,4-dinitropentanoate (EDNP), ethyl 4-nitropentanoate (ENP), and 1,2,4-trichlorobenzene (TCB) through barrier membranes [DE95-002492] p 1283 N95-21514

VITRIFICATION

Removal of CO2 in closed loop off-gas treatment systems [DE94-019259] p 1407 N95-21617

VOICE COMMUNICATION

Usable, real-time, interactive spoken language systems [AD-A286349] p 1310 N95-22253

VOIDS

Scanning tunneling microscopy studies of self-assembled monolayers of alkanethiols on gold [AD-A279910] p 1253 N95-20577

Geometric characterization of electromigration voids (A statistical analysis of electromigration voids) [AD-A286494] p 1328 N95-21169

Reciprocal space mapping of epitaxial materials using position-sensitive x-ray detection [DE95-001620] p 1575 N95-21991

VOLATILITY

Performance specifications for technology development: Application for characterization of volatile organic compounds in the environment [DE94-016627] p 1401 N95-20234

Interspecies extrapolations of halocarbon respiratory and tissue kinetics: Applications to predicting toxicity in different species [AD-A285055] p 1442 N95-20485

Mantle devolatilization and rheology in the framework of planetary evolution p 1418 N95-21788

VOLCANOES

Computer programs for analysis of geophysical data [DE95-002472] p 1415 N95-21511

Degassing history and evolution of volcanic activity of terrestrial planets based on radiogenic noble gas degassing models p 1424 N95-21816

VOLCANOLOGY

Recycling of volatiles at subduction zones: Noble gas evidence from the Tabar-Lihir-Tanga-Feni arc of papua New Guinea p 1418 N95-21787

VOLT-AMPERE CHARACTERISTICS

Order and turbulence in RF-driven Josephson junction series arrays [DE94-629076] p 1576 N95-21997

Estimation of lightning stroke peak current as a function of peak electric field and the normalized amplitude of signal strength: Corrections and improvements [DE94-016900] p 1335 N95-22189

VOLTAGE REGULATORS

Radiation tests on service electronics for future multi TeV detectors [DE94-632822] p 1335 N95-22184

VON KARMAN EQUATION

Finite dimensional approximation of a class of constrained nonlinear optimal control problems [NASA-CR-194891] p 1479 N95-20010

VORTEX BREAKDOWN

Effect of juncture fillets on double-delta wings undergoing sideslip at high angles of attack [AD-A286165] p 1207 N95-22039

VORTEX FILAMENTS

Vortex atoms and vortons [PB95-134599] p 1356 N95-21963

VORTEX GENERATORS

Annual research briefs, 1994 [NASA-CR-197352] p 1358 N95-22437

Experimental investigations of on-demand vortex generators p 1361 N95-22451

Direct numerical simulations of on-demand vortex generators: Mathematical formulation p 1361 N95-22452

VORTEX RINGS

Vortex ring instability and its sound p 1344 N95-21048

VORTEX SHEDDING

Research on bluff body vortex wakes [AD-A286319] p 1200 N95-20177

VORTEX SHEETS

Nonlinear interaction between a pair of oblique modes in a supersonic mixing layer: Long-wave limit [NASA-CR-197380] p 1357 N95-22173

VORTICES

Heat transfer, fouling, and combustion of supercritical fuels [AD-A279906] p 1281 N95-19884

Oceanographic analysis of the acoustic mid-ocean dynamics experiment [AD-A285907] p 1432 N95-19988

Research on bluff body vortex wakes [AD-A286319] p 1200 N95-20177

Synthesizing the Gulf Stream thermal structure from XBT data [AD-A279665] p 1433 N95-20458

Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037

Triple flame structure and diffusion flame stabilization p 1249 N95-21039

Instability of streamwise vortices in plane channel flows p 1344 N95-21049

On the asymptotic similarity of rotating homogeneous turbulence p 1345 N95-21058

Anisotropic structure of homogeneous turbulence subjected to uniform rotation p 1346 N95-21059

Application of Direct and Large Eddy Simulation to Transition and Turbulence [AGARD-CP-551] p 1346 N95-21061

Developments and applications of dynamic models for large eddy simulation of complex flows p 1346 N95-21062

Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063

Large-eddy simulation of rotating channel flows using a localized dynamic model p 1346 N95-21064

The asymptotic state of rotating homogeneous turbulence at high Reynolds numbers p 1347 N95-21065

Comparison of DNS and LES of transitional and turbulent compressible flow: Flat plate and mixing layer p 1347 N95-21066

Simulation of separated flows p 1347 N95-21068

Large eddy simulation of turbulent flow over a cavity p 1347 N95-21069

Large-eddy simulation of separated flow in a ribbed duct p 1347 N95-21070

Analysis of subgrid models using direct and large-eddy simulations of isotropic turbulence p 1348 N95-21071

Rib vortices in round jets: Direct and large eddy simulation p 1351 N95-21088

Direct numerical simulation of transition to turbulence from a high-symmetry initial condition p 1351 N95-21089

Direct numerical simulations of leading-edge receptivity for freestream sound p 1351 N95-21090

Computational studies of laminar to turbulence transition [AD-A285622] p 1353 N95-21146

1994 Nonneutral Plasma Workshop [AD-A285656] p 1559 N95-21404

Vortex dynamics in a ring-like irradiated Bi2Sr2CaCu2O8 crystal [DE95-001682] p 1573 N95-21569

Fourth International Symposium on Stratified Flows, volume 1 [AD-A286450] p 1354 N95-21583

Vortex atoms and vortons [PB95-134599] p 1356 N95-21963

Critical dynamics and plastic flow in disordered Josephson junction arrays [DE94-629074] p 1576 N95-21995

Effect of juncture fillets on double-delta wings undergoing sideslip at high angles of attack [AD-A286165] p 1207 N95-22039

Fast parallel tree codes for gravitational and fluid dynamical N-body problems [AD-A286480] p 1358 N95-22290

Lewis number and Damkohler number effects in vortex-flame interactions p 1249 N95-22439

Fundamental mechanisms in premixed flame propagation via vortex-flame interactions: Numerical simulations p 1249 N95-22440

Notes on rotating turbulence p 1359 N95-22444

A dynamic localization model with stochastic backscatter p 1359 N95-22445

Large-eddy simulation of a plane wake p 1360 N95-22446

Local dynamic subgrid-scale models in channel flow p 1360 N95-22447

Unstructured-grid large-eddy simulation of flow over an airfoil p 1202 N95-22448

Large-eddy simulation of flow through a plane, asymmetric diffuser p 1360 N95-22449

Large-eddy simulation of a boundary layer with concave streamwise curvature p 1360 N95-22450

On the dynamics of small-scale vorticity in isotropic turbulence p 1362 N95-22459

VORTICITY

Effect of chemical heat release in a temporally evolving mixing layer p 1249 N95-21037

Pressure and higher-order spectra for homogeneous isotropic turbulence p 1343 N95-21045

Vortex ring instability and its sound p 1344 N95-21048

Anisotropic structure of homogeneous turbulence subjected to uniform rotation p 1346 N95-21059

Large eddy simulation of channel flow using a vorticity transport subgrid model p 1348 N95-21076

Direct numerical simulation of transition to turbulence from a high-symmetry initial condition p 1351 N95-21089

Direct numerical simulations of leading-edge receptivity for freestream sound p 1351 N95-21090

The dynamic role of ridges in a beta-plane channel. Towards understanding the dynamics of large scale circulation in the Southern Ocean [AD-A279390] p 1435 N95-21943

The velocity and vorticity fields of the turbulent near wake of a circular cylinder [NASA-TM-110513] p 1355 N95-21954

Vortex atoms and vortons [PB95-134599] p 1356 N95-21963

Transverse vorticity measurements in the NASA Ames 80 x 120 wind tunnel boundary layer p 1362 N95-22457

On the dynamics of small-scale vorticity in isotropic turbulence p 1362 N95-22459

Forced free-shear layer measurements p 1362 N95-22460

VULNERABILITY

An abstract model of rogue code insertion into radio frequency wireless networks. The effects of computer viruses on the Program Management Office [AD-A285759] p 1288 N95-19932

W

WAFERS

P/N InP solar cells on Ge wafers p 1317 N95-20511

Assuring Known Good Die (KGD) for reliable, cost effective MCMs p 1210 N95-20644

Epitaxial liftoff technology onto processed silicon foundry wafers [AD-A285621] p 1571 N95-21145

WAKES

Experimental study of vane heat transfer and aerodynamics at elevated levels of turbulence [NASA-CR-4633] p 1337 N95-19912

Advanced detector development, laboratory simulations, diagnostic development, and data analysis on wake physics [AD-A284798] p 1364 N95-20069

Derivation of coupling impedance from the wake potential of a finite bunch [DE95-002529] p 1532 N95-20421

Six-dimensional modeling of coherent bunch instabilities and related feedback systems in storage rings with power-series maps for the lattice [DE94-017965] p 1532 N95-20494

Xwake 1.0 user's manual [DE95-002528] p 1463 N95-20901

Wake measurements in a strong adverse pressure gradient [NASA-CR-197272] p 1201 N95-21031

The effect of initial conditions on the development of temporally evolving planar three dimensional incompressible wakes p 1350 N95-21085

Direct simulation of tridimensional wake of NACA 0012 profile p 1350 N95-21086

Direct numerical simulations of on-demand vortex generators: Mathematical formulation p 1361 N95-22452

Forced free-shear layer measurements p 1362 N95-22460

WALKING MACHINES

Force based motion control of a walking machine [PB95-129672] p 1451 N95-20276

WALL FLOW

Simulation of a turbulent flame in a channel p 1249 N95-21044

Modeling near wall effects in second moment closures by elliptic relaxation p 1345 N95-21054

Subgrid scale models in finite difference simulations of complex wall bounded flows p 1346 N95-21063

Direct numerical simulation of turbulent flow in a sudden pipe expansion p 1347 N95-21067

Large eddy simulation of turbulent flow over a cavity p 1347 N95-21069

Drag reduction strategies p 1361 N95-22453

WALL PRESSURE

Influence of primary boundary conditions on the buckling of shallow cylindrical shells [PB94-208352] p 1364 N95-20003

Application of wavelet-filtering techniques to intermittent turbulent and wall pressure events. Part 1: Exploratory results
[AD-A286077] p 1341 N95-20849

Derivation of a wavenumber filter design for the measurement of turbulent wall pressure fluctuations
[AD-A286421] p 1357 N95-22208

WALL TEMPERATURE

Numerical investigation of supersonic turbulent boundary layers with high wall temperature
p 1344 N95-21050

WALLS

Wall stabilization effects in D3-D high beta discharges
[DE94-017509] p 1554 N95-20446

Structure and dynamics of turbulent wall layers
[AD-A285360] p 1340 N95-20547

WARFARE

Bomber force 2000: Operational concepts for long-range combat aircraft
[AD-A279378] p 1206 N95-20181

WARNING SYSTEMS

The mechanisms and effects off the plant-activations of chemicals in the environment
[AD-A279388] p 1356 N95-22145

Information security for unmanned systems
[AD-A286511] p 1485 N95-22214

WASTE DISPOSAL

Possible global environmental impacts of solid waste practices
[DE95-000830] p 1406 N95-21487

WASTE ENERGY UTILIZATION

Proceedings of the 1994 DOE/NREL Hydrogen Program Review
[DE94-011835] p 1234 N95-20117

Anaerobic Treatment of Municipal Solid Waste and Sludge for Energy Production and Recycling of Nutrients
[DE95-700217] p 1315 N95-20369

WASTE HEAT

Flow and heat transfer simulation in a flash smelting furnace
[PB95-108197] p 1354 N95-21649

WASTE TREATMENT

Anaerobic Treatment of Municipal Solid Waste and Sludge for Energy Production and Recycling of Nutrients
[DE95-700217] p 1315 N95-20369

Environmental cleanup technology transfer initiatives
[AD-A285059] p 1403 N95-20487

Evaluation of an immobilized cell bioreactor for degradation of meta- and para-nitrobenzoate
[AD-A279719] p 1516 N95-20993

Possible global environmental impacts of solid waste practices
[DE95-000830] p 1406 N95-21487

Removal of CO2 in closed loop off-gas treatment systems
[DE94-019259] p 1407 N95-21617

Environmental Compliance Assessment System (ECAS): Japan settlement
[AD-A279328] p 1410 N95-22142

Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330

WASTE WATER

Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456

Evaluation of an immobilized cell bioreactor for degradation of meta- and para-nitrobenzoate
[AD-A279719] p 1516 N95-20993

Disinfection of purified waste water with ultra violet light on a technical scale
[PB95-131926] p 1405 N95-21330

Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330

WASTES

Environmental cleanup: Too many high priority sites impede DOD's program. Report to the Chairman, Committee on Governmental Affairs, US Senate
[AD-A279511] p 1407 N95-21683

WATER

A review of water mist technology for fire suppression
[AD-A285738] p 1202 N95-20071

FTIR spectroscopy for the determination of water in corrosive gases
[DE94-014658] p 1235 N95-20139

Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353

Radiative forcing for changes in tropospheric O3
[DE94-019017] p 1413 N95-20354

Water-soluble polyphosphazenes and their hydrogels
[AD-A279695] p 1269 N95-20580

Effect of external stress on the transport of fluids in thermoplastic resin systems
[AD-A279993] p 1270 N95-20596

Training simulant for Halon 1211 portable extinguishers
[AD-A285403] p 1286 N95-20611

Annual Conference on Fire Research: Book of abstracts
[PB95-104964] p 1286 N95-20717

New methods for large scale local and global optimization
[AD-A285635] p 1517 N95-21126

Potential-of-mean-force description of ionic interactions and structural hydration in biomolecular systems
[DE95-000859] p 1438 N95-21366

A visual cell for measuring the solubility of prograde soluble salts in water at high temperatures and pressures
[DE95-002058] p 1245 N95-21732

Conference on Deep Earth and Planetary Volatiles
[NASA-CR-196944] p 1415 N95-21777

Impact degassing of water and noble gases from silicates p 1416 N95-21780

D/H ratios and H2O contents of mantle-derived amphibole megacrysts from Dish Hill, California
p 1416 N95-21781

Thermochemistry of dense hydrous magnesium silicates p 1416 N95-21782

Modeling the effect of water on mantle rheology
p 1417 N95-21783

Phase E in a water-saturated peridotite system at 9.3 GPa p 1420 N95-21799

Volatiles in the deep Earth: An experimental study using the laser-heated diamond cell p 1421 N95-21803

Subduction of hydrated basalt of the oceanic crust: Implications for recycling of water into the upper mantle and continental growth p 1423 N95-21814

Water abundance and accretion history of terrestrial planets p 1424 N95-21820

Storage and recycling of water and carbon dioxide in the earth p 1425 N95-21822

Studies of the n-alkane/water interface by total internal reflection second harmonic generation
[AD-A279473] p 1245 N95-21827

Protective organic coatings on steel: Accelerated corrosion test method for paint/coatings exposed to water with low conductivity. Nordtest project no. 1010-92. Degradation of organic coatings in fresh water
[PB95-134185] p 1277 N95-21873

Solubilities of nitrogen and helium in water and blood at 37 C and pressures of up to 11 ATA
[AD-A286269] p 1446 N95-22003

Numerical study of contaminant effects on combustion of hydrogen, ethane, and methane in air
[NASA-TM-106844] p 1284 N95-22114

Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381

Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

WATER FLOW

Resolving velocity profiles with the multi-scale profiler
[AD-A286446] p 1434 N95-21461

Seawater test results of Open-Cycle Ocean Thermal Energy Conversion (OC-OTEC) components
[DE94-019254] p 1396 N95-21897

WATER POLLUTION

Implementation and performance of a three-dimensional numerical transport model
[PB95-135745] p 1402 N95-20440

Monitoring bioremediation of Volatile Organic Compounds (VOCs) using Fourier Transform Infrared (FT-IR) spectrometry
[AD-A279631] p 1403 N95-20456

Ohmsett test of NOFI Vee-Sweep and NOFI 600S Oilboom
[AD-A279525] p 1408 N95-21685

Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330

Derivation of maximum permissible concentrations for several volatile compounds for water and soil
[PB95-107454] p 1411 N95-22381

WATER SPLITTING

The Combustive Sound Source
[ARL-TR-94-9] p 1503 N95-19911

WATER TREATMENT

Use of the carbo-flo process to purify process water contaminated by agricultural pesticides
[PB95-127825] p 1410 N95-22330

WATER TUNNEL TESTS

Effect of juncture fillets on double-delta wings undergoing sideslip at high angles of attack
[AD-A286165] p 1207 N95-22039

WATER VAPOR

Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353

Microstructures and tensile properties of as-cast iron-aluminide alloys
[DE94-017868] p 1252 N95-20359

Daytime Raman lidar profiling of atmospheric water vapor
[DE94-015747] p 1413 N95-20397

Lidar technologies for airborne and space-based applications
[DE95-002954] p 1302 N95-21448

Atmospheres of the Moon and Mercury
p 1419 N95-21794

High resolution properties of the equatorial Pacific marine atmospheric boundary layer from lidar and radiosonde observations
[DE95-001028] p 1426 N95-21875

WATER WAVES

The Surface Wave Dynamics Experiment (SWADE): A retrospective look at the wave modeling activities
[AD-A285612] p 1431 N95-19895

Measurements of radar backscatter from the ocean surface at 94 GHz as a function of wind speed, direction and the modulation by the ocean waves during the SAXON-FPN experiment p 1299 N95-20960

Fourth International Symposium on Stratified Flows, volume 3
[AD-A286452] p 1354 N95-21584

X-band microwave backscattering from ocean waves
[DE94-016719] p 1309 N95-22241

WATERSHEDS

Review of GIS applications in hydrologic modeling
[AD-A279076] p 1390 N95-21628

WAVE DIFFRACTION

Diffraction computation by means of the method of equivalent currents
[AD-A285347] p 1291 N95-20692

Eigenmode method for electromagnetic synthesis of diffractive elements with three-dimensional profiles
[PB95-127726] p 1301 N95-21107

WAVE DISPERSION

PRSPLOT6 manual
[PB95-110862] p 1456 N95-19928

A Monte Carlo study of the minus sign problem in the t-J model using an Intel iPSC/860 hypercube
[DE95-001072] p 1570 N95-20819

WAVE EQUATIONS

Squeezing and flow of energy for non linear wave equations
[PB95-111100] p 1489 N95-20172

A theoretical study on the performance of the FDTD code on a massively parallel computer
[AD-A285346] p 1475 N95-20499

A model of an infinite length, axisymmetric, isotropic, forced thick shell
[AD-A285586] p 1386 N95-21212

A mixed time integration method for large scale acoustic fluid-structure interaction
[DE94-018327] p 1354 N95-21387

WAVE FRONTS

Analog processing of optical wavefront using integrated guided-wave optics
[AD-A279596] p 1543 N95-20601

WAVE FUNCTIONS

The (e,2e) calculations with the final-state boundary condition
[DE94-631342] p 1509 N95-20198

A Monte Carlo study of the minus sign problem in the t-J model using an Intel iPSC/860 hypercube
[DE95-001072] p 1570 N95-20819

Correlated wavefunction Monte Carlo studies of excitations in the quantum Hall liquids
[DE95-002337] p 1501 N95-20874

A new FHNC scheme for Gutzwiller correlated wave functions
[DE94-629037] p 1581 N95-21993

Variational Monte Carlo study of He-4 in two dimensions
[DE94-629078] p 1576 N95-21998

Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084

Theory of spin dynamics in the classical two-dimensional heisenberg magnet
[PB95-133559] p 1502 N95-22138

WAVE GENERATION

On the influence of electromagnetic wave and relativistic electron beam on a plasma
[DE94-628962] p 1561 N95-21848

WAVE INTERACTION

A theoretical study on the performance of the FDTD code on a massively parallel computer
[AD-A285346] p 1475 N95-20499

Direct numerical simulation of 2-D and 3-D instability waves in a laminar separation bubble
p 1352 N95-21095
Computational studies of laminar to turbulence transition
[AD-A285622] p 1353 N95-21146

WAVE PROPAGATION
P-wave signatures and parameterization of transversely isotropic media: An overview
[DE95-000644] p 1411 N95-19982
Ambient noise and surface wave dissipation in the ocean
[AD-A279650] p 1432 N95-20303
Pasotron(TM) technology
[AD-A279994] p 1314 N95-20311
On the Taylor test. Part 3: A continuum mechanics code analysis of steady plastic wave propagation
[DE95-002252] p 1501 N95-20869
Multiple Mechanism Propagation Paths (MMPPs): Their Characterisation and Influence on System Design
[AGARD-CP-543] p 1292 N95-20921
Propagation of high frequency waves in urban and road tunnel environments p 1294 N95-20933
The effects of multihop HF propagation on the performance of OTH backscatter radars
p 1298 N95-20953
Analytic models for beam propagation and far-field patterns in slab and bow-tie x ray lasers
[DE94-016607] p 1372 N95-21173
Passive millimetre wave imaging: A review
[AD-A279275] p 1303 N95-21491
On the theory of strong electromagnetic waves propagation in an electron-positron-ion plasma
[DE94-628964] p 1561 N95-21850
Large amplitude localized structures in a relativistic electron-positron ion plasma
[DE94-628965] p 1561 N95-21851
Source contributions at far-regional distances
[AD-A279405] p 1426 N95-21932

WAVE REFLECTION
Experimental and theoretical evaluation of elastic waves in curved layered media
[AD-A286578] p 1504 N95-20918
Electromagnetic wave reflection from irregular plasma layers p 1298 N95-20952
Low frequency sound radiation from finite stiffened plates
[AD-A279395] p 1505 N95-21930

WAVE SCATTERING
Electromagnetic wave reflection from irregular plasma layers p 1298 N95-20952
A method using focal plane analysis to determine the performance of reflector antennas p 1304 N95-21538

WAVEFORMS
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545
On commonalities in signal design for non-Gaussian channels
[AD-A285385] p 1498 N95-20608
Performance of a fast frequency-hopped noncoherent MFSK receiver over Rician fading channels with either partial-band interference or multi-tone interference
[AD-A286168] p 1310 N95-22246

WAVEGUIDE ANTENNAS
The efficiency calibration of the DSS-24 34-meter beam-waveguide antenna p 1305 N95-21542
Analysis of a disk-on-rod surface wave element inside a corrugated horn using the mode-matching technique
p 1305 N95-21543

WAVEGUIDE WINDOWS
Improved broadband waveguide pressure window
[AD-D016487] p 1306 N95-21834

WAVEGUIDES
International collaboration program on innovative chemical processing of superior electronic and optical materials
[AD-A285122] p 1226 N95-20105
Characterization and simulation of an acoustic source moving through an oceanic waveguide
[AD-A285688] p 1503 N95-20272
Frequency response measurements of integrated-optic electrodes
[DE94-016690] p 1542 N95-20403
White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489
Resonant tunneling quantum well integrated optical waveguide modulator/switch
[AD-A285142] p 1542 N95-20501
Polymer based all-optic reconfigurable interconnects
[AD-A279976] p 1272 N95-20962
Small antennas for communication over sea ice
[AD-D016206] p 1301 N95-21156
Broadband pressure barrier for circular waveguide
[AD-D016503] p 1306 N95-21672

WAVELENGTH DIVISION MULTIPLEXING
A simple analytical model for asynchronous dense WDM/OOK systems
[AD-A283725] p 1289 N95-19973

WAVELENGTHS
Fiber grating-based detection system for wavelength encoded fiber sensors
[AD-D016208] p 1545 N95-21825
Influence of wavelength on transient short-circuit current in polycrystalline silicon solar cells
[DE94-629082] p 1397 N95-22183

WAVELET ANALYSIS
Wavelet-based acoustic recognition of aircraft
[DE94-017701] p 1503 N95-20019
An application of wavelet transform for decomposition of millimeter-wave spectroscopic signals
[DE94-018366] p 1402 N95-20247
Applications of wavelets to radar, imaging and related problems
[AD-A279909] p 1290 N95-20545
Optical pattern recognition
[AD-A285384] p 1480 N95-20607
Wavelet transformations for helicopter identification via acoustic signatures
[AD-A279980] p 1504 N95-20963
Wavelet analysis applied to the IRAS cirrus
p 1593 N95-21769
On the wavelet optimized finite difference method
[NASA-CR-191601] p 1495 N95-22157
Image and video coding using a wavelet decomposition
[PB95-135067] p 1311 N95-22358

WEAK ENERGY INTERACTIONS
Search for right-handed currents in the decay chain of K(+) yields muon(+)nu(sub muon), muon(+) yields e(+)nu(sub e)nu(bar)(sub muon)
[DE94-770606] p 1514 N95-20756

WEAPON SYSTEMS
An analysis of cost overruns on defense acquisition contracts p 1584 N95-20749
Design of a controller for a flexible pointing system using H(infinity) synthesis
[AD-A286572] p 1481 N95-20828
Demonstration of multifunctional DNBM corrosion inhibitors in protective coatings for Naval air/weapon systems
[AD-A285869] p 1279 N95-22136

WEAR
Numerical controlled polishing program, continued forced wear and part correction experiments
[DE94-018084] p 1285 N95-20288
Abrasive wear by diesel engine coal-fuel and related particles
[PB95-104915] p 1379 N95-20984
Friction and wear properties of as-deposited and carbon ion-implanted diamond films
[NASA-TM-106759] p 1274 N95-21252

WEAR INHIBITORS
Evaluation of PS 212 coatings under boundary lubrication conditions with an Ester-based oil to 300 C
[NASA-TM-106763] p 1223 N95-19901

WEAR RESISTANCE
Wear resistant composite structure of vitreous carbon containing convoluted fibers
[DE95-002254] p 1228 N95-20787
Abrasive wear by diesel engine coal-fuel and related particles
[PB95-104915] p 1379 N95-20984
Friction and wear properties of as-deposited and carbon ion-implanted diamond films
[NASA-TM-106759] p 1274 N95-21252

WEAR TESTS
Numerical controlled polishing program, continued forced wear and part correction experiments
[DE94-018084] p 1285 N95-20288
Abrasive wear by diesel engine coal-fuel and related particles
[PB95-104915] p 1379 N95-20984
Lubricant evaluation and performance, 2
[AD-A279144] p 1278 N95-21969

WEATHER
Mariners Weather Log, volume 38, number 3, summer 1994
[PB94-209541] p 1428 N95-20099
Test and Evaluation Master Plan (TEMP) for the Weather Message Switching Center Replacement (WMSCR)
[AD-A286590] p 1429 N95-20857
Global ionospheric weather
[AD-A285520] p 1430 N95-21177
Air pollution caused by fireworks during the turn of the year 1992-1993
[PB95-135265] p 1409 N95-21718
Radar studies of aviation hazards
[AD-A285845] p 1203 N95-21831
Climatological data for clouds over the globe from surface observations, 1982-1991: The total cloud edition
[DE95-002537] p 1431 N95-22288

WEATHER FORECASTING
Program control on the Tropical Rainfall Measuring Mission p 1584 N95-20750
Real-data tests of a single-Doppler radar assimilation system
[AD-A286638] p 1292 N95-20904
Monthly mean sea ice data from the Polar Ice Prediction System, the Regional Polar Ice Prediction System-Barents Sea and the Regional Polar Ice Prediction System-Greenland Sea
[AD-A280095] p 1433 N95-21018
Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE95-002257] p 1406 N95-21379

WEATHER STATIONS
Climatological data for clouds over the globe from surface observations, 1982-1991: The total cloud edition
[DE95-002537] p 1431 N95-22288

WEATHERING
Test Operations Procedure (TOP) 1-2-616 tropic exposure testing
[AD-A286376] p 1235 N95-20230

WEDGES
Image solution for poisson's equation in wedge geometry
[PB95-127171] p 1310 N95-22311

WEIBULL DENSITY FUNCTIONS
Effects of cyclic stress distribution models on fatigue life predictions
[DE95-001619] p 1388 N95-22070

WELD STRENGTH
Use of an integrated design tool for weld quality enhancement
[DE94-018135] p 1379 N95-20723

WELDABILITY
Joining dissimilar stainless steels for pressure vessel components
[PB95-133005] p 1380 N95-21446
Weldability of iron aluminides
[DE94-019114] p 1257 N95-21555

WELDED JOINTS
The origin of acicular ferrite in gas metal arc and submerged arc welds
[AD-A286129] p 1377 N95-19984
Fusion welding of advanced borated stainless steels
[DE94-019037] p 1378 N95-20053
Use of an integrated design tool for weld quality enhancement
[DE94-018135] p 1379 N95-20723
Analysis of welds on helium-containing restraint test plates
[DE95-001809] p 1257 N95-21303
Atom probe field ion microscopy of type 308 CRE stainless steel welds
[DE94-019162] p 1261 N95-22127
Modeling of fundamental phenomena in welds
[DE94-017859] p 1381 N95-22268

WELDED STRUCTURES
Weld pool phenomena
[DE94-018965] p 1381 N95-21550

WELDING
High performance computing for materials process modeling
[DE94-017860] p 1460 N95-20358
Use of an integrated design tool for weld quality enhancement
[DE94-018135] p 1379 N95-20723
Analysis of welds on helium-containing restraint test plates
[DE95-001809] p 1257 N95-21303
Weld pool phenomena
[DE94-018965] p 1381 N95-21550
Modeling of fundamental phenomena in welds
[DE94-017859] p 1381 N95-22268
Welding tritium exposed stainless steel
[DE95-003208] p 1382 N95-22356

WELLS
Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0
[DE94-019214] p 1458 N95-20073

WETTABILITY
Processing and mechanical properties of laminar Al2O3-Ni3Al composites
[DE94-019332] p 1230 N95-21481

WHISKER COMPOSITES
Properties of whisker-reinforced ceramics
[DE94-017759] p 1264 N95-20024
Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664

Creep behavior in SiC whisker-reinforced alumina composite
[DE95-001071] p 1231 N95-21776

WHITE DWARF STARS
Properties of strange-matter stars
[DE95-002329] p 1599 N95-20873

WHITE NOISE
On commonalities in signal design for non-Gaussian channels
[AD-A285385] p 1498 N95-20608

WICKS
Module cooling system
[AD-D016584] p 1315 N95-20436

WIENER HOPF EQUATIONS
Quadratic optimal control of a delay equation II: The unstable case
[PB95-127064] p 1486 N95-22366
Quadratic optimal control of a delay equation I: The stable case
[PB95-127072] p 1486 N95-22367

WIGGLER MAGNETS
Compact free electron lasers for medical applications
[AD-A285739] p 1369 N95-20072
Coaxial hybrid wiggler
[AD-D016501] p 1331 N95-21671
Recent progress of the compact AFEL at Los Alamos
[DE95-002728] p 1376 N95-22154

WIGNER COEFFICIENT
Symmetry, Wigner functions and particle reactions
[DE94-629887] p 1514 N95-20735

WIND (METEOROLOGY)
An evaluation of 915-MHz radar wind profiler/RASS by tower and sodar measurements
[DE94-018913] p 1364 N95-20320
Analysis of mesospheric winds and waves
[AD-A279956] p 1414 N95-20591
A study of westerly wind bursts preceding the 1991-1992 El Nino
[AD-A286570] p 1429 N95-20826

WIND DIRECTION
AN/APS-137 Forward Looking Airborne Radar (FLAR) evaluation, Fall 1992 experiment
[AD-A279526] p 1306 N95-21686

WIND EFFECTS
A numerical study of wind forcing effects on the California Current System
[AD-A286205] p 1435 N95-21880

WIND MEASUREMENT
Deriving earth science products from SSM/I
[NASA-CR-197299] p 1389 N95-20156
Real-data tests of a single-Doppler radar assimilation system
[AD-A286638] p 1292 N95-20904
Project Whitefeather
[DE94-016575] p 1415 N95-21184
Two-micron Laser Atmospheric Wind Sounder (LAWS) pointing/tracking study
[NASA-CR-195012] p 1220 N95-21190
A proposed wind measurement and analysis approach for evaluating a prospective wind plant site
[DE94-019187] p 1395 N95-21611

WIND PROFILES
Comparison of meteorological data with fitted values extracted from projectile trajectory
[AD-A285921] p 1428 N95-19989
Analysis of mesospheric winds and waves
[AD-A279956] p 1414 N95-20591

WIND SHEAR
The dynamic role of ridges in a beta-plane channel. Towards understanding the dynamics of large scale circulation in the Southern Ocean
[AD-A279390] p 1435 N95-21943

WIND TUNNEL APPARATUS
The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758
Testing in the ARA Transonic Wind Tunnel
[ARA-MEMO-395] p 1216 N95-20799

WIND TUNNEL CALIBRATION
The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758

WIND TUNNEL MODELS
The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758
Testing in the ARA Transonic Wind Tunnel
[ARA-MEMO-395] p 1216 N95-20799
Numerical investigation of one-dimensional heat-flux calculations
[AD-A286293] p 1582 N95-22054

WIND TUNNEL TESTS
Static investigation of two fluidic thrust-vectoring concepts on a two-dimensional convergent-divergent nozzle
[NASA-TM-4574] p 1199 N95-19913
Investigation of a thermal buoyancy effect on the drag of half models tested in the ARA Transonic Wind Tunnel
[ARA-MEMO-407] p 1199 N95-19946
Flow coefficient behavior for boundary layer bleed holes and slots
[NASA-TM-106846] p 1338 N95-19953
Internal aerodynamics of a generic three-dimensional scramjet inlet at Mach 10
[NASA-TP-3476] p 1340 N95-20619
16-foot transonic tunnel test section flowfield survey
[NASA-TM-109157] p 1216 N95-20669
The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758
Application of pressure sensitive paint in hypersonic flows
[NASA-TM-106824] p 1201 N95-20794
Testing in the ARA Transonic Wind Tunnel
[ARA-MEMO-395] p 1216 N95-20799
Wake measurements in a strong adverse pressure gradient
[NASA-CR-197272] p 1201 N95-21031
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 4, part 1: Buffet cross spectral densities
[AD-A285593] p 1215 N95-21214
Experiments on the flow field physics of confluent boundary layers for high-lift systems
[NASA-CR-197318] p 1201 N95-21343
Pressure measurements on an F/A-18 twin vertical tail in buffeting flow. Volume 1: Wind tunnel test summary
[AD-A279126] p 1202 N95-21877
The velocity and vorticity fields of the turbulent near wake of a circular cylinder
[NASA-TM-110513] p 1355 N95-21954
Effects of yaw and pitch motion on model attitude measurements
[NASA-TM-4641] p 1368 N95-22109
Large-eddy simulation of flow through a plane, asymmetric diffuser p 1360 N95-22449
Experimental investigations of on-demand vortex generators p 1361 N95-22451
Small-scale behavior in distorted turbulent boundary layers at low Reynolds number p 1362 N95-22456
Transverse vorticity measurements in the NASA Ames 80 x 120 wind tunnel boundary layer
p 1362 N95-22457
Experimental and numerical study of the intermittency exponent mu p 1362 N95-22458
Forced free-shear layer measurements
p 1362 N95-22460

WIND TUNNEL WALLS
Investigation of a thermal buoyancy effect on the drag of half models tested in the ARA Transonic Wind Tunnel
[ARA-MEMO-407] p 1199 N95-19946

WIND TUNNELS
Application of wavelet-filtering techniques to intermittent turbulent and wall pressure events. Part 1: Exploratory results
[AD-A286077] p 1341 N95-20849
A three-dimensional orthogonal laser velocimeter for the NASA Ames 7- by 10-foot wind tunnel
[NASA-TM-108864] p 1366 N95-21323

WIND TURBINES
Turbulence descriptors for scaling fatigue loading spectra of wind turbine structural components
[DE94-011833] p 1384 N95-20109
Error analysis in wind turbine field testing
[DE94-011864] p 1391 N95-20260
Advanced wind turbine design studies: Advanced conceptual study
[DE93-000031] p 1394 N95-20985
Effects of cyclic stress distribution models on fatigue life predictions
[DE95-001619] p 1388 N95-22070
Wind Energy Program overview, fiscal year 1993
[DE94-000285] p 1398 N95-22468

WIND VARIATIONS
SAR-related stress variability in the Marine Atmospheric Boundary Layer (MABL)
[AD-A286462] p 1431 N95-22393

WIND VELOCITY
Measurements of radar backscatter from the ocean surface at 94 GHz as a function of wind speed, direction and the modulation by the ocean waves during the SAXON-FPN experiment p 1299 N95-20960
AN/APS-137 Forward Looking Airborne Radar (FLAR) evaluation, Fall 1992 experiment
[AD-A279526] p 1306 N95-21686
Stability effects on the profiles of vertical velocity and its variance in katabatic flow
[DE95-001126] p 1426 N95-21836

WIND VELOCITY MEASUREMENT
Analysis of mesospheric winds and waves
[AD-A279956] p 1414 N95-20591

WINDOWS (APERTURES)
Frame and edge seal technology: A state of the art survey
[PB95-110334] p 1288 N95-22014

WINDOWS (COMPUTER PROGRAMS)
Personal computer and workstation operating systems tutorial
[AD-A280132] p 1451 N95-20041
Computer-Aided Structural Engineering (CASE) project. User's guide: Computer-Aided Structural Modeling (CASM). Version 5.00
[AD-A279913] p 1459 N95-20310
Xwake 1.0 user's manual
[DE95-002528] p 1463 N95-20901
The application of a statistical analysis software package to explosive testing
[MRL-TR-93-42] p 1284 N95-21658

WINDOWS (INTERVALS)
Verification of a timestamp-based sliding-window protocol
[PB95-132759] p 1455 N95-22082

WINDPOWER UTILIZATION
Advanced wind turbine design studies: Advanced conceptual study
[DE93-000031] p 1394 N95-20985
A proposed wind measurement and analysis approach for evaluating a prospective wind plant site
[DE94-019187] p 1395 N95-21611
Bridging worlds/charting new courses
[DE95-003808] p 1397 N95-22335
Advanced energy systems and technologies research programme
[DE95-717486] p 1397 N95-22337
Wind Energy Program overview, fiscal year 1993
[DE94-000285] p 1398 N95-22468

WINDPOWERED GENERATORS
Turbulence descriptors for scaling fatigue loading spectra of wind turbine structural components
[DE94-011833] p 1384 N95-20109
Brushless Doubly-Fed Machine system development program, phase 3
[DE94-013095] p 1315 N95-20380

WING LOADING
Derived gust spectra for the Macchi MB326H
[ARL-TN-3] p 1202 N95-21892

WING PROFILES
Direct simulation of tridimensional wake of NACA 0012 profile p 1350 N95-21086

WINTER
ICE BABY: Measurements of concentration fluctuations in a forest area in winter conditions
[PB95-133468] p 1405 N95-21274

WIRE
Processing and characterization of Ni-Al-Fe-B shape-memory alloy wires produced by rapid solidification
[DE94-017702] p 1250 N95-20020
Proceedings of the International Wire and Cable Symposium
[AD-A279242] p 1403 N95-20465
Reliability assessment of Multichip Module technologies via the Triservice/NASA RELTECH program
p 1210 N95-20643
Aging tests of ethylene contaminated argon/ethane
[DE95-002526] p 1282 N95-20899
Small antennas for communication over sea ice
[AD-D016206] p 1301 N95-21156
Evaluation of Pd-Cr wires for strain gage application
[NASA-TM-106857] p 1366 N95-21259
Passive surface deployed variable inductance wire antenna statement of government interest
[AD-D016210] p 1307 N95-21910
Measurement of the thermal properties of electrically conducting fluids using coated transient hot wires
[DE94-017816] p 1357 N95-22264
Development of practical high temperature superconducting wire for electric power applications
[DE94-017894] p 1336 N95-22271

WIRELESS COMMUNICATION
An abstract model of rogue code insertion into radio frequency wireless networks. The effects of computer viruses on the Program Management Office
[AD-A285759] p 1288 N95-19932

WORKING FLUIDS
Malone-brayton cycle engine/heat pump
[AD-D016573] p 1378 N95-20295

WORKLOADS (PSYCHOPHYSIOLOGY)
Navigation system in combat vehicle
[PB95-131629] p 1452 N95-21467
The advanced technology crew station: Development and validation of a workload assessment technique for cockpit function allocation
[AD-A279544] p 1453 N95-21691

WORKSTATIONS
A practical guide to using MCNP with PVM
[DE94-016162] p 1474 N95-20158

An evaluation of Automatic Terminal Information Service (ATIS) flight deck display presentation options
[AD-A280100] p 1204 N95-21020

WOVEN COMPOSITES

Zirconia precipitates and zirconia: GeO2 interphase in mullite matrix-SiC woven fabrics composites prepared through a sol-gel route
[PB95-133427] p 1275 N95-21272

WRIST

Quantitative evaluation of wrist posture and typing performance: A comparative study of 4 computer keyboards
[DE95-002392] p 1452 N95-21358

X

X RAY ABSORPTION

Magnetic x ray circular dichroism in Fe Co Pt multilayers
[DE94-017522] p 1253 N95-20447

Two-center, two electron excitations identified in NEXAFS for solid Ne
[AD-A285373] p 1568 N95-20553

Enhancements in the Livermore spectrum analysis package PIXEF
[DE95-002487] p 1272 N95-20895

Interference of fluorescence x rays and coherent excitation of core levels
[DE94-016809] p 1527 N95-22188

Acid-site characterization of water-oxidized alumina films by near-edge x-ray absorption and soft x-ray photoemission
[DE95-003355] p 1247 N95-22234

X RAY ANALYSIS

Second European Symposium on X-Ray Topography and High Resolution Diffraction: Programme and abstracts
[AD-A286328] p 1564 N95-20210

X-ray studies of microstructures in semiconductor and superconducting materials
[DE95-001802] p 1572 N95-21279

Reciprocal space mapping of epitaxial materials using position-sensitive x-ray detection
[DE95-001620] p 1575 N95-21991

X RAY APPARATUS

X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798

Laboratory characterization of Woelter x ray optics
[DE94-016969] p 1562 N95-22191

X RAY ASTRONOMY

Solar-geophysical data number 601, September 1994. Part 1: (Prompt reports). Data for August, July 1994, and late data
[PB95-136727] p 1603 N95-20919

Physics of systems containing neutron stars
[NASA-CR-197304] p 1600 N95-21615

X RAY BINARIES

Physics of systems containing neutron stars
[NASA-CR-197304] p 1600 N95-21615

X RAY DETECTORS

Reciprocal space mapping of epitaxial materials using position-sensitive x-ray detection
[DE95-001620] p 1575 N95-21991

Time resolved x-ray detection
[AD-A279348] p 1368 N95-22143

X RAY DIFFRACTION

The ANL X6B beamline at NSLS: A versatile facility
[DE94-018379] p 1540 N95-19968

Second European Symposium on X-Ray Topography and High Resolution Diffraction: Programme and abstracts
[AD-A286328] p 1564 N95-20210

Ferrocyanide safety project Dynamic X-Ray Diffraction studies of sodium nickel ferrocyanide reactions with equimolar nitrate/nitrite salts
[DE94-017396] p 1236 N95-20268

Bacterial luciferase: Determination of the structure by x-ray diffraction
[AD-A279699] p 1437 N95-20711

Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407

Diffraction applications using the energy dispersive beamline, X6A, at NSLS
[DE94-019287] p 1572 N95-21408

Strain fields in crystalline materials: Methods of analysis based on x-ray diffraction-line broadening
[PB95-108064] p 1574 N95-21670

Structure and stability of hydrous minerals at high pressure p 1417 N95-21786

Hydrogen and related materials at high density: Physics, chemistry and planetary implications
p 1418 N95-21791

Time resolved x-ray detection
[AD-A279348] p 1368 N95-22143

High temperature superconducting microwave device
[AD-A286351] p 1336 N95-22254

Residual stress analysis in swage autofrettaged thick-walled cylinders by position-sensitive x-ray diffraction techniques
[AD-A286383] p 1388 N95-22320

Introduction to the structures determination methods using X-ray diffraction in monocrystals: Application to some lanthanides and transition metals complexes with organic ligands
[DE94-629002] p 1579 N95-22380

Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385

Photoreflectance and x ray diffraction study of semiconductor heterostructures and quantum wells
[PB95-127049] p 1582 N95-22432

X RAY FLUORESCENCE

Observation of strong emission from NeIX and NeX transitions in a laser-driven plasma
[DE95-002265] p 1555 N95-20813

Interference of fluorescence x rays and coherent excitation of core levels
[DE94-016809] p 1527 N95-22188

X RAY IMAGERY

X-ray imaging of uniform large scale-length plasmas created from gas-filled targets on Nova
[DE94-018339] p 1531 N95-20015

X RAY LASERS

A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
[DE94-016447] p 1551 N95-20315

Enhanced output of soft x-ray lasers using double slab targets
[DE94-016689] p 1369 N95-20335

Research studies on short wavelength lasers by selective Auger processes
[AD-A285620] p 1372 N95-21144

Analytic models for beam propagation and far-field patterns in slab and bow-tie x ray lasers
[DE94-016607] p 1372 N95-21173

EBIT x ray spectroscopy studies for applications to photo-pumped x ray lasers
[DE94-016701] p 1373 N95-21210

Collisional redistribution effects on x ray laser saturation behavior
[DE94-017308] p 1374 N95-21663

Molecular design concept for multi-kilovolt x-ray amplification
[DE95-001763] p 1374 N95-21743

X RAY OPTICS

The ANL X6B beamline at NSLS: A versatile facility
[DE94-018379] p 1540 N95-19968

Second European Symposium on X-Ray Topography and High Resolution Diffraction: Programme and abstracts
[AD-A286328] p 1564 N95-20210

High precision Woelter optic calibration facility
[DE94-016973] p 1542 N95-20364

Thermal and deformation analyses of a novel cryogenically cooled monochromator for an Advanced Photon Source beamline
[DE94-016914] p 1527 N95-22190

Laboratory characterization of Woelter x ray optics
[DE94-016969] p 1562 N95-22191

X RAY SCATTERING

Surface x-ray scattering and scanning tunneling microscopy studies at the Au(111) electrode
[DE95-002409] p 1573 N95-21516

X RAY SOURCES

Soft X-Ray Innovative Source Development Program
[AD-A286380] p 1551 N95-20232

High precision Woelter optic calibration facility
[DE94-016973] p 1542 N95-20364

X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798

Physics of systems containing neutron stars
[NASA-CR-197304] p 1600 N95-21615

Submicrosecond, synchronizable x-ray source
[AD-D016497] p 1546 N95-21905

X RAY SPECTRA

X-ray spectroscopy of xenon
[DE95-002132] p 1240 N95-20865

Enhancements in the Livermore spectrum analysis package PIXEF
[DE95-002487] p 1272 N95-20895

X RAY SPECTROSCOPY

Correlations between surface structure and catalytic activity/selectivity
[DE94-019023] p 1234 N95-20052

Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
[DE94-016879] p 1500 N95-20106

Characterization of nova plasmas using an x-ray spectrometer with temporal and spatial resolution
[DE94-016970] p 1553 N95-20363

Oxide formation on NbAl3 and TiAl due to ion implantation of O-18
[DE94-017874] p 1252 N95-20365

X-ray spectroscopy of xenon
[DE95-002132] p 1240 N95-20865

EBIT x ray spectroscopy studies for applications to photo-pumped x ray lasers
[DE94-016701] p 1373 N95-21210

X RAYS

An intensity interferometer for soft x-rays
[DE94-016370] p 1541 N95-20103

Target area acquisition and control system survivability for the National Ignition Facility
[DE94-016549] p 1550 N95-20190

Low electron beam energy CIVA analysis of passivated ICs
[DE94-017421] p 1314 N95-20286

Magnetic x ray circular dichroism in Fe Co Pt multilayers
[DE94-017522] p 1253 N95-20447

Spin-specific photoelectron diffraction using magnetic x ray circular dichroism
[DE94-017527] p 1567 N95-20448

A structural determination using magnetic x ray circular dichroism in spin-polarized photoelectron diffraction
[DE94-017528] p 1567 N95-20449

Approach to compact terawatt CO2 laser system for particle acceleration
[DE95-002170] p 1371 N95-20866

Magnetic x-ray circular dichroism in spin-polarized photoelectron diffraction
[DE95-002394] p 1520 N95-21360

Test and Evaluation Plan (TEP) for Improvised Explosive Device Screening Systems (IEDSS)
[AD-A286382] p 1203 N95-22319

Synthesis and characterization of single-source molecular precursors to binary metal sulphides: Bis(diethyldithiocarbamato) M(2)trialkylphosphine (M = Zn and Cd) adducts
[AD-A279746] p 1248 N95-22385

Imaging design of the wide field x-ray monitor onboard the HETE satellite
[DE95-002750] p 1221 N95-22436

XENON

The effect of reusing laser gas on the fission-fragment pumped 1.73 micron atomic xenon laser output
[DE94-018512] p 1369 N95-20225

Liquid xenon as a potential laser host medium
[AD-A285365] p 1370 N95-20550

Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 1: Transition properties in HCl
[AD-A285988] p 1239 N95-20613

X-ray spectroscopy of xenon
[DE95-002132] p 1240 N95-20865

Research studies on short wavelength lasers by selective Auger processes
[AD-A285620] p 1372 N95-21144

Studies of selenium and xenon in inductively coupled plasma mass spectrometry
[DE95-001676] p 1245 N95-21734

Is xenon eldest? p 1425 N95-21823

Cryogenic pellet laser plasma source targets
[DE95-002488] p 1376 N95-22169

Quantum chemical study of rare gas/halide interactions as a model for high energy density material. 2: The interaction of hydrogen chloride with the rare gas xenon
[AD-A286385] p 1248 N95-22321

XENON ISOTOPES

Comets, impacts, and atmospheres
p 1422 N95-21810

He, Xe and Ne isotopes in a steady-state mass transport model and implications about terrestrial volatiles
p 1425 N95-21821

Y

YAG LASERS

Scaling of solid state lasers for satellite power beaming applications
[DE94-016366] p 1368 N95-19986

Modelocking and waveguide amplifiers using Cr:Forsterite and Cr:YAG
[AD-A285857] p 1369 N95-20378

YAW

Effects of yaw and pitch motion on model attitude measurements
[NASA-TM-4641] p 1368 N95-22109

YBCO SUPERCONDUCTORS

High performance YBCO films
[AD-A286567] p 1326 N95-20824

Carbon fiber reinforced superconductor composites
[DE95-002504] p 1229 N95-20913
Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167
Study of improved critical currents and mechanical properties in the Y-Ba-Cu-O superconductor with silver or Y2BaCuO3 or 211 dispersions
[AD-A285609] p 1502 N95-21194
High performance YBCO films
[AD-A279560] p 1276 N95-21695
International Symposium on Advanced Laser Technoiogies
[AD-A279849] p 1376 N95-22164
AC magnetic response of YBa2CuO7 with Y2BaCuO5 inclusions and of single-crystal YBa2Cu3O7: A comparative study
[PB94-207917] p 1577 N95-22166
Low rotational drag in high-temperature superconducting bearings
[DE95-002983] p 1382 N95-22292

YIELD STRENGTH
Plastic deformation of ordered intermetallic alloys: Fundamental aspects
[DE95-001070] p 1256 N95-21265
Fracture behavior of the Fe-8Al alloy FAP-Y
[DE95-000956] p 1258 N95-21676
The development of a super-alpha2 titanium aluminide alloy consolidated by rapid omnidirectional compaction
[AD-A279254] p 1260 N95-21986

YLF LASERS
High power spectral and spatial beam control using self-phase modulation and a multisegment monochromator
[DE94-016604] p 1531 N95-20120

YTTRIA-STABILIZED ZIRCONIA
Forming of superplastic ceramics
[DE94-017306] p 1276 N95-21662

YTTRIUM
Tensile and impact properties of iron-aluminum alloys
[DE94-017750] p 1263 N95-22346

YTTRIUM OXIDES
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361
Light output and radiation damage in a YAlO3:Ce crystal
[DE94-016815] p 1545 N95-21643
High temperature superconducting films and multilayers for electronics
[AD-A279545] p 1331 N95-21693
High performance YBCO films
[AD-A279560] p 1276 N95-21695

YTTRIUM-ALUMINUM GARNET
Rare earth garnet selective emitter
p 1322 N95-20536
Pulsed laser illumination of photovoltaic cells
p 1323 N95-20538

YUKAWA POTENTIAL
Constraints on SUSy-GUT unification from b yields s-gamma decay
[PB95-130373] p 1580 N95-21229

Z

ZENITH
A comparative survey of current and proposed tropospheric refraction-delay models for DSN radio metric data calibration
[NASA-CR-197338] p 1412 N95-20002
Threshold detection in the presence of atmospheric turbulence
[AD-A286175] p 1427 N95-22249

ZETA PINCH
Soft X-Ray Innovative Source Development Program
[AD-A286380] p 1551 N95-20232
PRS scoping study 1: Scaling law estimates for K-shell radiation yields on JUPITER-class generators
[AD-A279716] p 1533 N95-20672

ZINC
Structure of dibis(diethyldithiocarbamato) zinc (2) Mu-bis(diethylphosphino)ethane toluene(2)
[AD-A279792] p 1224 N95-20660
Polyurethane self-priming topcoats
[AD-D016204] p 1274 N95-21154
Polyurethane self-priming topcoats
[AD-D016205] p 1274 N95-21155

ZINC OXIDES
Nickel hydroxide electrodes in reduced-alkalinity electrolytes
[DE95-002333] p 1326 N95-20814

ZINC SELENIDES
Photoluminescence under pressure and annealing of nitrogen-doped ZnSe
[DE95-002355] p 1568 N95-20630

ZINC SULFIDES
Optical multilayers with an amorphous fluoropolymer
[DE94-017693] p 1541 N95-20218
Gas-phase generation of zinc sulfide particles using a single-source precursor
[AD-A279700] p 1239 N95-20712
Synthesis and characterization of (Zn(SEt)Et)10, formed via insertion of sulfur into Zn-C bonds: A new class of Wurtzite-like cluster framework
[AD-A279701] p 1569 N95-20714

ZINC TELLURIDES
Polycrystalline thin film cadmium telluride solar cells fabricated by electrodeposition
[DE94-011848] p 1391 N95-20118

ZINC-OXYGEN BATTERIES
Demonstration of zinc/air fuel battery to enhance the range and mission of fleet electric vehicles: Preliminary results in the refueling of a multicell module
[DE95-004206] p 1337 N95-22421

ZIRCONIUM
Development of superplasticity in 5083 aluminum with additions of Mn and Zr
[DE94-017474] p 1251 N95-20090
Amorphization of sapphire during ion beam mixing
[DE94-018713] p 1510 N95-20337

ZIRCONIUM ALLOYS
Corrosion resistance and behavior of construction materials exposed to dilute sulfuric acid at elevated temperatures under static conditions
[DE95-001723] p 1259 N95-21739

ZIRCONIUM COMPOUNDS
New thermodynamic description of the Cu-Zr system
[PB95-127189] p 1263 N95-22374

ZIRCONIUM NITRIDES
Method of making copper-titanium nitride alloy
[AD-D016582] p 1252 N95-20201

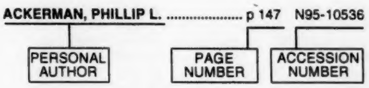
ZIRCONIUM OXIDES
Selective methane oxidation over promoted oxide catalysts
[DE94-012270] p 1235 N95-20188
Microwave sintering of ZrO2-12 mol% CeO2
[DE94-018709] p 1265 N95-20226
Zirconia precipitates and zirconia: GeO2 interphase in mullite matrix-SiC woven fabrics composites prepared through a sol-gel route
[PB95-133427] p 1275 N95-21272
Solid oxide fuel cells in the United States
[DE95-002405] p 1395 N95-21361
Directional solidification of the alumina-zirconia ceramic eutectic system
[DE95-001677] p 1277 N95-21735
Integration of thin film decoupling capacitors
[DE95-001609] p 1333 N95-21881

ZONE MELTING
Volatiles in the Earth: All shallow and all recycled
p 1416 N95-21779

PERSONAL AUTHOR INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 33 NUMBER 6

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

AARONS, JULES p 1298 N95-20951
p 1427 N95-22423
AARTS, A. C. T. p 1353 N95-21268
ABADIE, B. p 1447 N95-22361

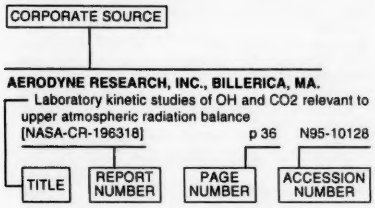
CORPORATE SOURCE INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 33 NUMBER 6

Typical Corporate Source Index Listing



CORPORATE SOURCE
AERODYNE RESEARCH, INC., BILLERICA, MA.
Laboratory kinetic studies of OH and CO2 relevant to upper atmospheric radiation balance
[NASA-CR-196318] p 36 N95-10128
TITLE
REPORT NUMBER
PAGE NUMBER
ACCESSION NUMBER

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ACADEMY OF SCIENCES (USSR), MOSCOW (USSR).

Proceedings of the Zel'Dovich Memorial International Conference on Combustion, Detonation, Shock Waves, volume 2
[AD-A286626] p 1239 N95-20769

The primary carbon and the formation of carbon species in terrestrial magmas p 1420 N95-21797

The ratios of carbon and non-radiogenic helium and argon isotopes in the mantle and crustal rocks
p 1421 N95-21805

International Symposium on Advanced Laser Technologies
[AD-A279849] p 1376 N95-22164

Theses of the Proceedings of the 23d International Meeting on the Physics of Charged Particle Interaction with Crystals
[DE94-631501] p 1529 N95-22281

ACADEMY OF SCIENCES (USSR), NOVOSIBIRSK (USSR).

On conception of a compact neutron source and the possibility of its simulation on the Amba-M end trap
[DE94-633373] p 1562 N95-22282

Gas-dynamic trap diagnostic complex for study on plasma heating and power atomic beam injection
[DE94-633377] p 1529 N95-22283

ADAPTIVE SOLUTIONS, INC., BEAVERTON, OR.

High performance hardware and software for pattern recognition and image processing
[AD-A279776] p 1457 N95-19961

ADVANCED FUEL RESEARCH, INC., EAST HARTFORD, CT.

Detection of environmental deterioration in fiber reinforced composites by FT-Raman spectroscopy, phase 1
[AD-A279763] p 1228 N95-20805

HTS Josephson technology on silicon with application to high speed digital microelectronics
[AD-A285964] p 1328 N95-21178

ADVANCED RESEARCH PROJECTS AGENCY, ARLINGTON, VA.

The Novaya Zemlya Event of 31 December 1992 and Seismic Identification Issues: 15th Annual Seismic Research Symposium
[AD-A279847] p 1414 N95-20760

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).

Advanced Packaging Concepts for Digital Avionics
[AGARD-CP-562] p 1208 N95-20631

Multiple Mechanism Propagation Paths (MMPPs): Their Characterisation and Influence on System Design
[AGARD-CP-543] p 1292 N95-20921

Application of Direct and Large Eddy Simulation to Transition and Turbulence
[AGARD-CP-551] p 1346 N95-21061

AEROJET-GENERAL CORP., SACRAMENTO, CA.

Modeling of rolling element bearing mechanics. Computer program user's manual
[NASA-CR-196557] p 1381 N95-21692

Modeling of rolling element bearing mechanics. Theoretical manual
[NASA-CR-196556] p 1381 N95-21705

AEROJET TECHNICAL SYSTEMS CO., SACRAMENTO, CA.

SSME HPOTP post-test diagnostic system enhancement project
[NASA-CR-4643] p 1222 N95-21458

AERONAUTICAL RESEARCH INST. OF SWEDEN, BROMMA.

Simulations of bypass transition for spatially evolving disturbances p 1349 N95-21079

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).

Dynamic response of pressure measuring systems
[ARL-TR-32] p 1365 N95-20759

Derived gust spectra for the Macchi MB326H
[ARL-TN-3] p 1202 N95-21892

An IBM based ARINC interface
[ARL-TR-21] p 1471 N95-22104

AERONAUTICAL SYSTEMS DIV., WRIGHT-PATTERSON AFB, OH.

Open Skies project computational fluid dynamic analysis
[AD-A285928] p 1200 N95-19991

AEROSPACE CORP., EL SEGUNDO, CA.

Computer model predictions of the local effects of large, solid-fuel rocket motors on stratospheric ozone
[AD-A285632] p 1404 N95-21150

Transient photoluminescence measurements on GaAs and AlGaAs double heterostructures
[AD-A279408] p 1575 N95-21916

Atomic velocity distributions in a hydrogen beam effusing out of an RF discharge dissociator
[AD-A279253] p 1307 N95-21985

LADAR detection statistics in the presence of pointing errors
[AD-A285865] p 1309 N95-22134

Launch safety, toxicity, and environmental effects of the high performance oxidizer ClF(5)
[AD-A286095] p 1284 N95-22227

Threshold detection in the presence of atmospheric turbulence
[AD-A286175] p 1427 N95-22249

Absorption of water and lubricating oils into porous nylon
[NASA-CR-197344] p 1280 N95-22383

AIN SHAMS UNIV., CAIRO (EGYPT).

Indian Academy of Sciences. Volume 105, number 6, December 1993. Proceedings of the 2nd International Conference on Solar Energy Storage Applied Photochemistry
[AD-A286481] p 1605 N95-22394

AIR-CONDITIONING AND REFRIGERATION TECHNOLOGY INST., INC., ARLINGTON, VA.

Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparisons and verification of methods
[DE95-000743] p 1264 N95-20078

Materials compatibility and lubricants research on CFC-refrigerant substitutes
[DE94-018414] p 1287 N95-21631

Thermophysical properties of HFC-143a and HFC-152a
[DE95-002199] p 1582 N95-22153

AIR FORCE ENGINEERING AND SERVICES CENTER, TYNDALL AFB, FL.

Spectroscopic studies of hazardous fuel interactions with soils
[AD-A279099] p 1407 N95-21596

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.

The effects of three-dimensional graphs on decision making
[AD-A285034] p 1583 N95-20051

A 3D stereo data visualization and representation
[AD-A284788] p 1449 N95-20064

Certain physical properties of lanthanum digermanide
[AD-A286592] p 1229 N95-20859

Electro-optic effect in the PESO acousto-optic modulator
[AD-A286355] p 1548 N95-22255

Application of computer-generated holograms to optical transformations
[AD-A286356] p 1368 N95-22256

AIR FORCE MATERIALS LAB., WRIGHT-PATTERSON AFB, OH.

The spatiotemporal characteristics of visual motion priming
[AD-A284782] p 1449 N95-20062

AIR FORCE MATERIEL COMMAND, BROOKS AFB, TX.

Calculation methods for criteria air pollutant emission inventories
[AD-A284675] p 1400 N95-19964

Intelligent tutoring systems: Past, present, and future
[AD-A280011] p 1448 N95-19970

AIR FORCE OFFICE OF SCIENTIFIC RESEARCH, BOLLING AFB, WASHINGTON, DC.

Iterated-subspace minimization methods for nonlinear optimization
[PB95-108171] p 1495 N95-22317

AIR FORCE SYSTEMS COMMAND, TYNDALL AFB, FL.

Evaluation of an immobilized cell bioreactor for degradation of meta- and para-nitrobenzoate
[AD-A279719] p 1516 N95-20993

AIR FORCE SYSTEMS COMMAND, WRIGHT-PATTERSON AFB, OH.

Photovoltaic electric power applied to Unmanned Aerial Vehicles (UAV) p 1321 N95-20530

AIR PRODUCTS AND CHEMICALS, INC., ALLENTOWN, PA.

Development of active-transport membrane devices
[DE94-015947] p 1246 N95-21921

AIRCRAFT RESEARCH ASSOCIATION LTD., BEDFORD (ENGLAND).

Investigation of a thermal buoyancy effect on the drag of half models tested in the ARA Transonic Wind Tunnel
[ARA-MEMO-407] p 1199 N95-19946

The dynamic approach to rotor blade research: ARA's oscillatory test facility
[ARA-MEMO-405] p 1200 N95-20758

Testing in the ARA Transonic Wind Tunnel
[ARA-MEMO-395] p 1216 N95-20799

AKRON UNIV., AKRON, OH.

SEEK: A FORTRAN optimization program using a feasible directions gradient search
[NASA-CR-4641] p 1380 N95-21359

ALABAMA UNIV., HUNTSVILLE, AL.

Surface characterization and contamination analysis
[NASA-CR-197374] p 1238 N95-20557

X-ray microscope for solidification studies
[NASA-CR-197375] p 1543 N95-20798

ALENIA, TURIN (ITALY).

Electromagnetic compatibility effects of advanced packaging configurations p 1213 N95-20658

ALLIED-SIGNAL AEROSPACE CO., KANSAS CITY, MO.

Copper metallization of stainless steels
[DE95-001496] p 1256 N95-21300

Survivability of soldered leadless chip carriers after temperature cycling
[DE95-001497] p 1329 N95-21301

Representing manufacturing features to support design and process changes
[DE94-018587] p 1467 N95-21389

Plastic encapsulated parts
[DE95-001876] p 1332 N95-21729

ALTAMIRA INSTRUMENTS, INC., PITTSBURGH, PA.

Direct aromatization of methane
[DE94-017131] p 1233 N95-19924

AMERICAN ASSOCIATION FOR CANCER RESEARCH, PHILADELPHIA, PA.

Cellular responses to environmental DNA damage
[DE94-015606] p 1441 N95-22397

AMERICAN CERAMIC SOCIETY, WESTERVILLE, OH.

Ferroic materials: Design, preparation and characteristics. Ceramic transactions, volume 43
[AD-A285937] p 1270 N95-20664

AMERICAN INST. OF PHYSICS, NEW YORK, NY.

Journal of Applied Physics, volume 76, number 10, part 2. Proceedings of the 6th Joint Magnetism and Magnetic Materials-INTERMAG Conference
[AD-A286364] p 1500 N95-20229

AMES LAB., IA.

Truly distribution-independent algorithms for the N-body problem
[DE94-014238] p 1458 N95-20136

Theoretical study of the noble metals on semiconductor surfaces and Ti-base shape memory alloys
[DE95-001654] p 1257 N95-21398

Dynamic NMR studies of restricted arene rotation in the chromiu tricarbonyl thiophene and selenophene complexes
[DE95-001656] p 1257 N95-21399

Distribution-independent hierarchical N-body methods
[DE95-001686] p 1493 N95-21439

A new universal solution for the electrofinishing of metallic materials
[DE95-001681] p 1258 N95-21568

Quantum dynamical phenomena of independent electrons in semiconductor superlattices subject to a uniform electric field
[DE95-001655] p 1574 N95-21723

The role of microcracking on the crack growth resistance of brittle solids and composites
[DE95-001678] p 1231 N95-21736

Methods and opportunities in the recycling of rare Earth based materials
[DE95-001680] p 1259 N95-21737

The low temperature properties of (Dy(1-x)Er(x))Ni2 alloys
[DE95-001657] p 1260 N95-21923

The role of grain boundary sliding on creep deformation characteristics of discontinuous reinforced composites
[DE95-001671] p 1231 N95-21924

AMSTERDAM UNIV. (NETHERLANDS).

HIRAS images of fossil dust shells around AGB stars
p 1593 N95-21768

ANALYTICAL SERVICES AND MATERIALS, INC., HAMPTON, VA.

Time-dependent deformation of titanium metal matrix composites
[NASA-CR-195030] p 1230 N95-21363

ANALYTICON CORP., RANCHO PALOS VERDES, CA.

Enhanced vehicle and event typing software, phase 1
[AD-A284862] p 1458 N95-20070

ANKARA UNIV. (TURKEY).

Direct numerical simulation of transition to turbulence from a high-symmetry initial condition
p 1351 N95-21089

APPLIED DATA RESEARCH, INC., NEW YORK, NY.

Aerosol-assisted chemical vapor deposition of copper: A liquid delivery approach to metal thin films
[AD-A279702] p 1270 N95-20689

APPLIED SCIENCE AND TECHNOLOGY, INC., WOBURN, MA.

Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285060] p 1315 N95-20488

Materials processing and manufacturing technologies for diamond substrates multichip modules
[AD-A285775] p 1336 N95-22412

APPLIED SOLAR ENERGY CORP., CITY OF INDUSTRY, CA.

Development of concentrator solar cells
[DE95-002316] p 1394 N95-20871

ARABIAN-AMERICAN OIL CO. (SAUDI ARABIA).

Planning and scheduling for success
p 1584 N95-20747

ARC PROFESSIONAL SERVICE GROUP, INC., ROME, NY.

Cathode Life Test Facility
[AD-A286232] p 1334 N95-22023

ARGONNE NATIONAL LAB., IDAHO FALLS, ID.

Visual displays and Neuro-Linguistic Programming
[DE95-001454] p 1466 N95-21311

ARGONNE NATIONAL LAB., IL.

Liquid-metal pin-fin pressure drop by correlation in cross flow
[DE94-017086] p 1338 N95-19923

The ANL X6B beamline at NSLS: A versatile facility
[DE94-018379] p 1540 N95-19968

A photophysical control mechanism for zeaxanthin-associated radiationless energy dissipation in photosynthesis
[DE94-018383] p 1437 N95-19969

Modeling the dynamics of charged-particle beams using a Fokker-Planck approach
[DE95-001458] p 1531 N95-19983

Migrating the Facility Profile Information Management System into the World Wide Web
[DE94-018367] p 1586 N95-20016

Positron annihilation studies of organic superconductivity
[DE94-018371] p 1564 N95-20017

Recognition of subsurface defects in machined ceramics by application of neural networks to laser scatter patterns
[DE94-018373] p 1264 N95-20018

New strong interactions above the electroweak scale
[DE94-018385] p 1506 N95-20025

Elastic anisotropy in hot-pressed Si3N4 composites: Role of in situ (beta)-Si3N4 grains and added (beta)-Si3N4 whiskers
[DE94-018387] p 1226 N95-20027

Solidification modeling of a spiral casting to determine material fluidity
[DE94-018930] p 1285 N95-20050

Thorium-232 in human tissues: Metabolic parameters and radiation doses
[DE94-019275] p 1441 N95-20074

An intensity interferometer for soft x-rays
[DE94-016370] p 1541 N95-20103

Design and thermal stress analysis of high power x-ray monochromators cooled with liquid nitrogen
[DE94-016879] p 1500 N95-20106

Mercury capture in bench-scale absorbers
[DE94-016910] p 1234 N95-20107

A control volume method on an icosahedral grid for numerical integration of the shallow-water equations on the sphere
[DE94-016345] p 1489 N95-20170

A Hyperspectral Image Data Exploration Workbench for environmental science applications
[DE94-016373] p 1412 N95-20171

Performance specifications for technology development: Application for characterization of volatile organic compounds in the environment
[DE94-016627] p 1401 N95-20234

Power-law resistivity, magnetic relaxation and ac susceptibility
[DE94-016893] p 1501 N95-20241

An application of wavelet transform for decomposition of millimeter-wave spectroscopic signals
[DE94-018366] p 1402 N95-20247

The paradigm of Pseudodual Chiral Models
[DE94-016386] p 1579 N95-20271

A tau-charm-factory at Argonne
[DE94-016913] p 1510 N95-20360

Kernel mucking in top
[DE94-017077] p 1460 N95-20385

A mechanistic model for radiation-induced crystallization and amorphization in U3Si
[DE94-015028] p 1566 N95-20419

Energy impacts of controlling carbon dioxide emissions from an integrated gasification/combined-cycle system
[DE94-016878] p 1403 N95-20478

New ET-based organic superconductors with the organometallic anion Cu(CF3)4(-)
[DE94-016904] p 1567 N95-20479

Multiply manifolded molten carbonate fuel cells
[DE94-017074] p 1392 N95-20480

Sputtering of tin and gallium-tin clusters
[DE94-018389] p 1254 N95-20707

Global change integrating factors: Tropical tropopause trends
[DE95-001121] p 1404 N95-20835

An improved and facile method for the synthesis of 1,1-bis(4-hydroxyphenyl) 2-phenylethylene and its derivatives
[DE95-001125] p 1240 N95-20836

A fuel cell overview
[DE95-001455] p 1393 N95-20839

Topography of neutron scattering from diblock copolymer film
[DE95-001457] p 1229 N95-20840

Reactive nanophase oxide additions to melt-processed high-T(sub c) superconductors
[DE95-001470] p 1570 N95-20841

Unbinned maximum likelihood fit for the CP conserving couplings for W + photon production at CDF
[DE95-001471] p 1514 N95-20852

Atmosphere influence on in situ ion beam analysis of thin film growth
[DE95-001507] p 1570 N95-20881

Statistical properties of geologic fractals
[DE94-019272] p 1414 N95-20908

Role of internal stresses in fracture behavior of engineering composites
[DE95-001106] p 1229 N95-20912

MHD pressure drop in ducts with imperfectly insulating coatings
[DE95-002852] p 1558 N95-21244

Interlayer magnetic coupling in epitaxial Fe/Cr(211) and (100) superlattices
[DE95-002906] p 1571 N95-21256

A divide-and-conquer method for tridiagonalizing symmetric matrices with repeated eigenvalues
[DE95-002918] p 1476 N95-21257

Effects of battery technologies, driving patterns, and climate comfort control on the performance of electric vehicles
[DE95-001102] p 1329 N95-21296

A framework for symmetric band reduction and tridiagonalization
[DE95-002919] p 1476 N95-21341

Proposal for a tutorial on Minimal Length Encoding (MLE) in molecular biology
[DE94-015076] p 1438 N95-21376

MHD-flow in slotted channels with conducting walls
[DE94-018370] p 1559 N95-21388

Recent photoabsorption measurements in the rare gases and alkalis in the 3 to 15 keV photon energy region
[DE94-019278] p 1521 N95-21406

Application of new synchrotron powder diffraction techniques to anomalous scattering from glasses
[DE94-019285] p 1536 N95-21407

Diffraction applications using the energy dispersive beamline, X6A, at NSLS
[DE94-019287] p 1572 N95-21408

An in-line ultrasonic viscometer
[DE95-002982] p 1366 N95-21453

On the Aharonov-Bohm effect with neutrons
[DE95-002985] p 1521 N95-21454

Structure of ionic interfaces from an absolutely convergent solution of the Madelung problem
[DE94-019268] p 1573 N95-21474

The atmospheric neutrino anomaly in Soudan 2
[DE94-019288] p 1604 N95-21475

Anatomy of the Midcontinent Rift beneath Lake Superior
[DE94-019298] p 1415 N95-21477

The diphoton production rate in (bar p)p collisions at the square root of s = 1800 GeV
[DE95-000559] p 1522 N95-21497

Ion charge-state production and photoionization near the K edge in argon and potassium
[DE95-001443] p 1522 N95-21502

Beam instability studies at the APS
[DE95-001448] p 1537 N95-21503

Removal of CO2 in closed loop off-gas treatment systems
[DE94-019259] p 1407 N95-21617

EAGLES 1.1: A microcomputer software package for analyzing fuel efficiency of electric and gasoline vehicles
[DE95-001119] p 1469 N95-21829

Stability effects on the profiles of vertical velocity and its variance in katabatic flow
[DE95-001126] p 1426 N95-21836

Seawater test results of Open-Cycle Ocean Thermal Energy Conversion (OC-OTEC) components
[DE94-019254] p 1396 N95-21897

Discovering related DNA sequences via mutual information
[DE95-001101] p 1440 N95-22067

Electrostatic basis for molecular recognition in photosynthesis
[DE95-002979] p 1440 N95-22075

A Davis-Putnam program and its application to finite-order model search: Quasigroup existence problems
[DE95-003014] p 1471 N95-22077

Taking AIM: The management of scientific and technical information at Argonne National Laboratory
[DE94-019279] p 1591 N95-22092

Low temperature tensile and fracture mechanical strength in mode 1 and mode 2 of fiber reinforced plastics following various irradiation conditions
[DE94-019269] p 1232 N95-22130

Estimation of lightning stroke peak current as a function of peak electric field and the normalized amplitude of signal strength: Corrections and improvements
[DE94-016900] p 1335 N95-22189

Thermal and deformation analyses of a novel cryogenically cooled monochromator for an Advanced Photon Source beamline
[DE94-016914] p 1527 N95-22190

Studies of the microwave resistivity of kappa-(BEDT-TTF)2Cu(N(CN)2)Cl

CALIFORNIA POLYTECHNIC STATE UNIV., SAN LUIS OBISPO, CA.

A real-time algorithm for integrating differential satellite and inertial navigation information during helicopter approach
[NASA-CR-197409] p 1205 N95-21891

CALIFORNIA UNIV., BERKELEY, CA.

Josephson acoustic radiation in superfluid helium
[AD-A279809] p 1503 N95-20098

Instantaneous frequency dynamics of coherent emission from magnetoexcitons in gallium arsenide
[DE94-018182] p 1569 N95-20677

Temporal and spectral investigation of multi-Landau level quantum beats in GaAs
[DE94-018189] p 1569 N95-20678

Phase dynamics of non-equilibrium distributions of free electron-hole pairs in GaAs quantum wells
[DE94-018190] p 1569 N95-20679

Computer based analysis and synthesis of retinal function
[AD-A286084] p 1443 N95-20811

Volatiles in the deep Earth: An experimental study using the laser-heated diamond cell p 1421 N95-21803

PIC simulation of surface waves
[AD-A285358] p 1563 N95-22422

Spatio-temporal masking in human vision and its application to image coding
[AD-A284949] p 1451 N95-22473

CALIFORNIA UNIV., BERKELEY. LAWRENCE BERKELEY LAB, CA.

Exploratory Technology Research Program for electrochemical energy storage
[DE95-002651] p 1392 N95-20439

Six-dimensional modeling of coherent bunch instabilities and related feedback systems in storage rings with power-series maps for the lattice
[DE94-017965] p 1532 N95-20494

Modeling of beam dynamics and comparison with measurements for the Advanced Light Source (ALS)
[DE94-017970] p 1532 N95-20495

Three-dimensional laser cooling
[DE94-017963] p 1370 N95-20569

Strange particle and antiproton production in S + nucleus collisions at 200 GeV/nucleon
[DE95-002348] p 1513 N95-20575

Laser trapping of Na-21 atoms
[DE95-002354] p 1513 N95-20629

Photoluminescence under pressure and annealing of nitrogen-doped ZnSe
[DE95-002355] p 1568 N95-20630

Ultrafast magnetoexciton dynamics in GaAs
[DE94-018175] p 1514 N95-20732

Nickel hydroxide electrodes in reduced-alkalinity electrolytes
[DE95-002333] p 1326 N95-20814

Study of small carbon and semiconductor clusters using negative ion threshold photodetachment spectroscopy
[DE95-002327] p 1515 N95-20872

Correlated wavefunction Monte Carlo studies of excitations in the quantum Hall liquids
[DE95-002337] p 1501 N95-20874

Induction linacs for heavy ion fusion
[DE95-002357] p 1534 N95-20891

Exploratory Technology Research Program for electrochemical energy storage
[DE95-002652] p 1394 N95-20915

Methods of measuring adhesion for thermally grown oxide scales
[DE94-018177] p 1256 N95-21260

Progress in ultrafast scanning probe microscopy
[DE94-018179] p 1373 N95-21261

Sources of amplitude-dependent tune shift in the PEP-2 design and their compensation with octupoles
[DE94-018198] p 1519 N95-21262

Nonlinear optical studies of polymer interfaces
[DE94-018199] p 1274 N95-21263

Plasma model for charging damage
[DE95-000788] p 1558 N95-21310

Dilepton production from p-p to Ca-Ca at the Bevalac
[DE95-002341] p 1520 N95-21357

Similarities and differences in strangeness production at BNL and CERN
[DE95-002343] p 1521 N95-21380

Time-resolved study of sideband generation and transition to chaos on an infrared FEL
[DE95-002336] p 1374 N95-21528

Resonant generation of nonequilibrium phonons in GaAs/AlAs quantum wells via intersubband scattering
[DE95-002338] p 1581 N95-21604

Detection efficiency and dark pulse rate of Rockwell (SSPM) single photon counters
[DE94-016872] p 1524 N95-21646

Hydrogenation of nitriles on a well-characterized nickel surface: From surface science studies to liquid phase catalytic activity measurements
[DE94-018184] p 1259 N95-21707

Bridging the pressure gap: In situ atomic-level investigations of model platinum catalyst surfaces under reaction conditions by scanning tunneling microscopy
[DE95-002346] p 1246 N95-21990

Carrier dynamics in InGaAs: Quantum wells versus bulk
[DE94-018205] p 1577 N95-22168

Interpretation of HRTEM images by image simulation: An introduction to theory and practice
[DE95-003422] p 1591 N95-22235

Reflective masks for extreme ultraviolet lithography
[DE95-003427] p 1336 N95-22236

Theory of the excitonic lineshape in low-dimensional structures with rough interfaces
[DE95-003434] p 1582 N95-22237

Users guide to NCEMSS, version 2.0
[DE95-003443] p 1548 N95-22238

CALIFORNIA UNIV., IRVINE, CA.

Time resolved x-ray detection
[AD-A279348] p 1368 N95-22143

CALIFORNIA UNIV., LOS ANGELES, CA.

International collaboration program on innovative chemical processing of superior electronic and optical materials

24th Annual Anomalous Absorption Conference
[DE94-016457] p 1551 N95-20283
A comparison of kinetic and multifluid simulations of laser-produced colliding plasmas
[DE94-016447] p 1551 N95-20315
Overview on superplasticity research on small-grained materials
[DE94-016550] p 1266 N95-20316

Rate controlled synthesis of composition modulated, metal-oxide thin films
[DE94-016596] p 1267 N95-20317

Numerical modeling of a small recirculating induction accelerator for heavy-ion fusion
[DE94-018549] p 1552 N95-20318

Plasma arc melting of titanium-tantalum alloys
[DE94-016291] p 1252 N95-20331

Enhanced output of soft x-ray lasers using double slab targets
[DE94-016689] p 1369 N95-20335

Choice of computer software for analysis of spectra from the Multi-Spectral Logging System
[DE94-019013] p 1460 N95-20351

Refractive index change in dissociating shocked benzene
[DE94-019015] p 1541 N95-20352

Indirect global warming effects of ozone and stratospheric water vapor induced by surface methane emission
[DE94-019016] p 1402 N95-20353

Radiative forcing for changes in tropospheric O3
[DE94-019017] p 1413 N95-20354

Radiative forcing calculations for CH3Cl
[DE94-019018] p 1402 N95-20355

The development and evaluation of water-mist fire extinguishing systems
[DE94-019019] p 1286 N95-20356

Ion temperature measurement of indirectly-driven implosions using a geometry-compensated neutron time-of-flight detector
[DE94-016967] p 1552 N95-20362

Characterization of nova plasmas using an x-ray spectrometer with temporal and spatial resolution
[DE94-016970] p 1553 N95-20363

High precision Woelter optic calibration facility
[DE94-016973] p 1542 N95-20364

Effects of microphysics and radiation on mesoscale processes of a midlatitude squall line
[DE94-014732] p 1429 N95-20381

Fabrication and testing of a silicon immersion grating for infrared spectroscopy
[DE94-017173] p 1237 N95-20386

System design document U-AVLIS control system architecture
[DE94-017297] p 1460 N95-20387

Frequency response measurements of integrated-optic electrodes
[DE94-016690] p 1542 N95-20403

Model-based inversion for a shallow ocean application
[DE94-016968] p 1433 N95-20420

Program WALKMAN: A code designed to perform electron single collision elastic scattering Monte Carlo calculations
[DE94-017501] p 1511 N95-20444

Magnetic x ray circular dichroism in Fe Co Pt multilayers
[DE94-017522] p 1253 N95-20447

Spin-specific photoelectron diffraction using magnetic x ray circular dichroism
[DE94-017527] p 1567 N95-20448

A structural determination using magnetic x ray circular dichroism in spin-polarized photoelectron diffraction
[DE94-017528] p 1567 N95-20449

Optical properties of silicon clusters deposited on the basal plane of graphite
[DE94-017529] p 1542 N95-20450

White-light spectral analysis of lithium niobate waveguides
[DE94-016692] p 1542 N95-20489

Development, fabrication, and metrology of the electro-optical breadboard model for the reflection grating array of the XMM grating spectrometer
[DE94-016605] p 1543 N95-20612

Hydrodynamic instabilities in inertial fusion
[DE94-018079] p 1554 N95-20675

Meso-scale cooling effects of high albedo surfaces: Analysis of meteorological data from White Sands National Monument and White Sands Missile Range
[DE94-018535] p 1429 N95-20782

Computational model of drilling with high radiance pulsed lasers
[DE94-018548] p 1371 N95-20783

Radiation-driven targets for heavy-ion fusion
[DE95-002264] p 1533 N95-20784

Observation of strong emission from NeIX and NeX transitions in a laser-driven plasma
[DE95-002265] p 1555 N95-20813

The Materials Corrosion and Environmental Effects Laboratory (MCEL)
[DE94-018268] p 1254 N95-20816

Performance of the NIF prototype beamlet
[DE94-018500] p 1371 N95-20817

LLNL/Lion Precision LVDT amplifier
[DE95-001504] p 1327 N95-20854

Sputter deposition of multilayer thermoelectric films: An approach to the fabrication of two-dimensional quantum wells
[DE95-002396] p 1272 N95-20892

Fractal nature and scaling of normal faults, Rio Grande rift, NM: Implications for growth and strain
[DE94-018261] p 1414 N95-20990

Ultraviolet laser emission properties of Ce(3+)-doped LiSrAlF6
[DE94-016364] p 1372 N95-21135

Plasma Electrode Pockels Cells for the Beamlet and NIF lasers
[DE94-016541] p 1557 N95-21166

Analytic models for beam propagation and far-field patterns in slab and bow-tie x ray lasers
[DE94-016607] p 1372 N95-21173

Advanced concepts for gamma ray isotopic analysis and instrumentation
[DE94-016610] p 1517 N95-21174

Beryllium based multilayers for normal incidence extreme ultraviolet reflectivity
[DE94-015560] p 1274 N95-21175

Visualizing 3D velocity fields near contour surfaces
[DE95-000841] p 1353 N95-21182

Three-dimensional ground penetrating radar imaging using multi-frequency diffraction tomography
[DE94-016687] p 1301 N95-21205

Use of the National Ignition Facility for the development of inertial fusion energy
[DE94-016696] p 1557 N95-21206

Target Area design basis and system performance for the National Ignition Facility
[DE94-016697] p 1557 N95-21207

Neutronics and shielding analysis of the National Ignition Facility
[DE94-016698] p 1534 N95-21208

Laser design basis for the National Ignition Facility
[DE94-016700] p 1534 N95-21209

EBIT x ray spectroscopy studies for applications to photo-pumped x ray lasers
[DE94-016701] p 1373 N95-21210

Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-000862] p 1373 N95-21312

Quantitative evaluation of wrist posture and typing performance: A comparative study of 4 computer keyboards
[DE95-002392] p 1452 N95-21358

Magnetic x-ray circular dichroism in spin-polarized photoelectron diffraction
[DE95-002394] p 1520 N95-21360

A mixed time integration method for large scale acoustic fluid-structure interaction
[DE94-018327] p 1354 N95-21387

An image cancellation approach to depth-from-focus
[DE94-019312] p 1544 N95-21392

Solid state frequency conversion technology for remote sensing
[DE94-019102] p 1389 N95-21433

MTX final report
[DE95-002960] p 1559 N95-21451

An Echelle Grating Spectrometer (EGS) for mid-IR remote chemical detection
[DE94-019310] p 1367 N95-21478

Relativistic binary neutron star coalescence
[DE94-019311] p 1600 N95-21479

Fiber-optic sensors for rapid, inexpensive characterization of soil and ground water contamination
[DE95-002471] p 1545 N95-21510

Overview of remote sensing laser development and semiconductor laser technology
[DE94-019103] p 1389 N95-21552

Preconditioning via asymptotically-defined domain decomposition
[DE94-019046] p 1493 N95-21564

Ergonomic evaluation of the Apple Adjustable Keyboard
[DE95-002393] p 1453 N95-21637

Forming of superplastic ceramics
[DE94-017306] p 1276 N95-21662

Collisional redistribution effects on x ray laser saturation behavior
[DE94-017308] p 1374 N95-21663

Full potential multiple scattering theory
[DE95-003197] p 1576 N95-22084

High average power diode pumped solid state lasers for CALIOPE
[DE94-019248] p 1376 N95-22121

The influence of chemistry and microstructure on the fracture toughness of V-V3Si in-situ composites
[DE94-018997] p 1232 N95-22126

Laboratory characterization of Woelter x ray optics
[DE94-016969] p 1562 N95-22191

Heat loss by helicity injection in spheromaks
[DE95-003473] p 1562 N95-22221

An analytical electron distribution function for inelastic collisions in a uniform gas with time varying electric field
[DE95-003476] p 1528 N95-22222

An analytical, inelastic, space and time dependent electron distribution for electrically excited gases
[DE95-003478] p 1528 N95-22223

X-band microwave backscattering from ocean waves
[DE94-016719] p 1309 N95-22241

CALIOPE and TAISIR airborne experiment platform
[DE94-018328] p 1310 N95-22299

The superconducting magnet system for the Tokamak Physics Experiment
[DE94-018329] p 1562 N95-22300

3-D TECATE/BREW: Thermal, stress, and birefringent ray-tracing codes for solid-state laser design
[DE95-000330] p 1376 N95-22301

Coherence properties of high order harmonic radiation
[DE94-016974] p 1377 N95-22312

A multisite interaction expansion of the total energy in metals
[DE94-017175] p 1262 N95-22313

Defect geometries and laser-induced damage in multilayer coatings
[DE94-017695] p 1377 N95-22343

Fracture behavior of laminated discontinuously reinforced aluminum material
[DE94-017307] p 1263 N95-22408

Demonstration of zinc/air fuel battery to enhance the range and mission of fleet electric vehicles: Preliminary results in the refueling of a multicell module
[DE95-004206] p 1337 N95-22421

Saddle-node dynamics for edge detection
[DE94-017415] p 1473 N95-22426

Unique microchannel plate process doubles MCPI resolution
[DE94-017507] p 1337 N95-22427

Target alignment in the National Ignition Facility
[DE94-015559] p 1540 N95-22469

LEEDS UNIV. (ENGLAND).

Impact of propagation mechanisms on global navigation satellite system performance p 1298 N95-20950

Superresolution direction finding algorithms for the characterisation of multi-moded HF signals

Low density gas and foam targets for ICF long scale length plasma experiments: Fabrication and characterization
[DE95-000935] p 1558 N95-21368

Coronal Mass Ejections in the solar wind at high solar latitudes: An overview
[DE95-000844] p 1603 N95-21377

Strain measurement by diffraction at LANSCE
[DE94-018264] p 1387 N95-21386

Utilizing artificial neural networks in network flow analysis: An annotated bibiliography
[DE95-002453] p 1482 N95-21522

Visible fluorescence of weathered lead
[DE95-002454] p 1244 N95-21523

Implementation of electronic chain-of-custody, analysis requests, and data verification at Los Alamos National Laboratory
[DE94-018076] p 1407 N95-21666

An 8-meter-long coupled cavity RFQ linac
[DE94-018077] p 1331 N95-21667

Intense proton beam source for ITER neutral-beam spectroscopy diagnostics
[DE94-018092] p 1560 N95-21668

Adaptive capture of expert behavior
[DE94-018285] p 1483 N95-21710

Angle resolved photoemission on K(0.3)Mo3, TiTe2 and Ti(1+x)S2
[DE94-018300] p 1574 N95-21712

Design and development SAWAFE peak detector chip
[DE95-001745] p 1332 N95-21742

Directed light fabrication
[DE94-018293] p 1375 N95-21837

High resolution properties of the equatorial Pacific marine atmospheric boundary layer from lidar and radiosonde observations
[DE95-001028] p 1426 N95-21875

Performance of cesium telluride photocathodes as an electron source for the Los Alamos FEL
[DE94-018302] p 1375 N95-21919

Status of CFDLIB performance tests on the T3D
[DE95-002708] p 1478 N95-21925

Oxidation behavior of aluminum nanopowders
[DE95-002721] p 1260 N95-21926

Two-band model description of electroabsorption and third-harmonic generation in 1-D MX linear chains
[DE95-000932] p 1526 N95-21934

Observations of cold magnetospheric ions at geosynchronous orbit during times of high activity
[DE95-000936] p 1600 N95-21935

Anisotropic transport properties of BSCCO single crystals and Ag-clad tapes in high magnetic fields
[DE95-000938] p 1575 N95-21936

Plasma arc melting of a 80 weight percent tantalum -20 weight percent titanium alloy
[DE95-000846] p 1260 N95-22006

Tunable CW blue, green, orange and red upconversion fiber lasers at room temperature
[DE95-000851] p 1375 N95-22007

Equilibrium and shot noise in mesoscopic systems
[DE95-000855] p 1576 N95-22008

Recent developments in low cost stable structures for space
[DE95-000857] p 1231 N95-22009

Current status of fusion-relevant covariance data
[DE95-000865] p 1561 N95-22010

A 500 MW annular beam relativistic klystron
[DE95-000867] p 1334 N95-22011

The application of electrodialysis to extend the lifetime of commercial electroplating baths
[DE95-000868] p 1246 N95-22012

Experience at the Los Alamos Meson Physics Facility with the use of alloy Inconel 718 as an enclosure for a beam degrader and as a proton beam entry window
[DE94-018289] p 1538 N95-22050

There might be two kinds of dibaryon
[DE94-014417] p 1526 N95-22058

Life Sciences Division and Center for Human Genome Studies
[DE94-017796] p 1440 N95-22065

Single particle measurements and two particle interferometry results from CERN experiment NA44
[DE95-003041] p 1527 N95-22078

Distribution of light element isotopes in Bencubbin and Weatherford meteorites: An indicator of heterogeneity in the primitive solar nebula
[DE94-019167] p 1600 N95-22128

Recent progress of the compact AFEL at Los Alamos
[DE95-002728] p 1376 N95-22154

Radiation characterization report for the GPS Receiver microcontroller chip
[DE94-019169] p 1335 N95-22165

Photocathodes for free electron lasers
[DE94-018305] p 1376 N95-22242

High performance computing for beam physics applications
[DE94-018312] p 1539 N95-22243

Helium production by 10 MeV neutrons in iron, nickel and copper
[DE94-014798] p 1529 N95-22280

Characterization of a texture gradient in tantalum plate
[DE95-002704] p 1262 N95-22289

Flow cytometry: A powerful technology for measuring biomarkers
[DE94-018284] p 1440 N95-22296

Modeling of nonlinear optic and ESR response of CDW MX materials
[DE94-018301] p 1578 N95-22297

Recent results in analysis and simulation of beam halo
[DE94-018313] p 1539 N95-22298

Effect of annealing temperature on the texture of rolled tantalum and tantalum-10 wt % tungsten

Scale-up and modeling of forced chemical vapor infiltration
[DE94-017769] p 1340 N95-20781

Effect of a solid insulator on the spark yield of S2F10 in SF6(*)
[DE95-001422] p 1326 N95-20791

A Monte Carlo study of the minus sign problem in the t-J model using an Intel iPSC/860 hypercube
[DE95-001072] p 1570 N95-20819

Hg-199 and Cu-(63,65) NMR studies of mercury based high-Tc superconductors
[DE95-001073] p 1570 N95-20820

Fabrication of ceramic composites: Forced CVI
[DE95-001076] p 1271 N95-20821

Magnetic excitations in modulated PrNi2Si2
[DE95-001077] p 1254 N95-20822

Automatic generation of fuzzy rules for the sensor-based navigation of a mobile robot
[DE95-001428] p 1481 N95-20837

ALCHEMI of Fe-doped B2-ordered NiAl alloys with different doping levels
[DE94-017748] p 1255 N95-20907

An advanced ECR ion source with a large uniformly distributed ECR plasma volume for multiply charged ion beam generation
[DE95-001078] p 1515 N95-20911

Dependence of critical current density on microstructure and processing of high-T(c) superconductors
[DE95-000685] p 1571 N95-21167

Plastic deformation of ordered intermetallic alloys: Fundamental aspects
[DE95-001070] p 1256 N95-21265

Error analysis of the quadratic nodal expansion method in slab geometry
[DE95-001352] p 1492 N95-21285

Neutron diffraction study of the magnetic ordering of BaCuO(2+x)
[DE95-001357] p 1572 N95-21297

Computational modeling of diffusion-controlled transformations in ternary systems
[DE95-001358] p 1256 N95-21298

Unknown-terrains navigation of a mobile robot using an array of sonars
[DE94-017902] p 1482 N95-21385

Molecular-based study of solutions in supercritical solvents
[DE94-019326] p 1580 N95-21420

Three-dimensional effects for radio frequency antenna modeling
[DE94-019125] p 1303 N95-21459

The ORNL Neutron-Capture Cross Section Facility
[DE94-019146] p 1537 N95-21460

Operator's manual for the multistation offgas analysis system
| DE95-002060 | p 1243 N95-21472

Processing and mechanical properties of laminar Al2O3-Ni3Al composites
| DE94-019332 | p 1230 N95-21481

Lead-indium phosphate glasses for optical applications
| DE94-019333 | p 1275 N95-21482

Effects of neutron irradiation on the London penetration depth for polycrystalline Bi(1.8)Pb(0.3)Sr2Ca2Cu3O10 superconductor
| DE94-019335 | p 1573 N95-21483

Production of S2F10, S2OF10 and S2O2F10 by spark discharges in SF6*
| DE95-001421 | p 1243 N95-21500

Comparison of properties of sintered and sintered reaction-bonded silicon nitride fabricated by microwave and conventional heating
| DE95-001426 | p 1275 N95-21501

Electron attachment to excited molecules
| DE94-019124 | p 1522 N95-21519

Time-resolved diagnostics of excimer laser-generated ablation plasmas used for pulsed laser deposition
| DE94-018950 | p 1559 N95-21547

Cell membrane potentials induced during exposure to EMP fields
| DE94-018952 | p 1439 N95-21548

Raman spectra of MOCVD-grown ferroelectric PbTiO3 thin films
| DE94-018964 | p 1244 N95-21549

Weld pool phenomena
| DE94-018965 | p 1381 N95-21550

Monolithic circuits for lead-glass calorimetry
| DE94-019112 | p 1330 N95-21554

Weldability of iron aluminides
| DE94-019114 | p 1257 N95-21555

PVM 3 beyond network computing
| DE94-019115 | p 1477 N95-21556

New concepts for refrigerant leak detection and mixture measurement
| DE94-018967 | p 1287 N95-21559

Stellarator transport optimization with self-consistent electric fields
| DE94-019151 | p 1559 N95-21581

Consequences of oscillatory potentials and angular forces in transition metals and their aluminides
| DE94-019127 | p 1258 N95-21600

On the origins and modeling of frictional behavior in interfacially-complex sliding contacts
| DE94-019129 | p 1381 N95-21601

DONIO: Distributed object network I/O library
| DE94-019163 | p 1477 N95-21602

The molecular mechanics program DUPLEX: Computing structures of carcinogen modified DNA by surveying the potential energy surface
| DE94-019153 | p 1439 N95-21606

PVM a platform for portable distributed computing
| DE94-019156 | p 1455 N95-21607

The message passing version of the parallel Community Climate Model
| DE94-019158 | p 1407 N95-21608

Total quality management program planning
| DE94-016862 | p 1586 N95-21645

Auger spectrometry of atoms and molecules
| DE94-018052 | p 1524 N95-21664

The ITER in-vessel system
| DE94-018053 | p 1560 N95-21665

Fracture behavior of the Fe-8Al alloy FAP-Y
| DE95-000956 | p 1258 N95-21676

Evaluation of pumping and fueling requirements for the ITER EDA
| DE94-018117 | p 1560 N95-21702

Charge density of fractional charged quasiparticles in the composite fermion picture
| DE94-018122 | p 1524 N95-21703

Investigation of direct photon production in 200 A GeV S + Au reactions
| DE94-018129 | p 1525 N95-21704

Restricted mass transport effects on free radical reactions
| DE94-018136 | p 1217 N95-21706

A new Krylov-subspace method for symmetric indefinite linear systems
| DE95-001826 | p 1355 N95-21726

A visual cell for measuring the solubility of prograde soluble salts in water at high temperatures and pressures
| DE95-002058 | p 1245 N95-21732

Learning algorithms for feedforward networks based on finite samples
| DE95-001739 | p 1483 N95-21741

QMRPACK user's guide
| DE95-001770 | p 1469 N95-21744

Creep behavior in SiC whisker-reinforced alumina composite
| DE95-001071 | p 1231 N95-21776

Angular and charge state distributions of highly charged ions scattered during low energy surface-channeling interactions with Au(110)
| DE95-001348 | p 1525 N95-21857

Tailoring suspension flow for the gelcasting of oxide and nonoxide ceramics
| DE95-001351 | p 1277 N95-21861

Information Management Architecture for an Integrated Computing Environment for the Environmental Restoration Program. Volume 1: Introduction
| DE95-001384 | p 1590 N95-21862

Cost-effective ceramics program in the United States
| DE95-001425 | p 1278 N95-21909

A syncopated leap-frog algorithm for orbit consistent plasma simulation of materials processing reactors
| DE95-000954 | p 1561 N95-21922

Ceramic technology for advanced heat engines
| DE95-000950 | p 1278 N95-21937

Selection of RIB targets using ion implantation
| DE95-000951 | p 1538 N95-21938

The status of molecules
| DE95-000952 | p 1526 N95-21939

Classical-quantum correspondence for ionization in fast ion-atom collisions
| DE95-000953 | p 1526 N95-21940

Catalyzed reduction of nitrate in aqueous solutions
| DE94-017660 | p 1247 N95-22049

Information Management Architecture for an Integrated Computing Environment for the Environmental Restoration Program. Volume 2: Interim business systems guidance
| DE95-001385 | p 1591 N95-22061

Abbreviations, acronyms, and initialisms frequently used by Martin Marietta Energy Systems, Inc.
| DE95-001069 | p 1591 N95-22107

New techniques in neutron scattering
| DE94-018944 | p 1538 N95-22117

Irradiation creep in structural materials at ITER operating conditions
| DE94-018946 | p 1261 N95-22123

Atom probe field ion microscopy of type 308 CRE stainless steel welds
| DE94-019162 | p 1261 N95-22127

Guidelines for the creation and management of geographic data bases within a GIS environment, version 1.0. Volume 2. Appendices
| DE94-019215 | p 1591 N95-22129

Plasma processing for integrated circuits
| DE95-001419 | p 1335 N95-22149

Materials support for the development of High Temperature Advanced Furnaces (HITAF): A comparison of selected mechanical properties for three SiC-based ceramics
| DE94-017752 | p 1280 N95-22258

The thermal conductivity of silicon nitride with molybdenum disilicide additions

CONTRACT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 33 NUMBER 6

Typical Contract Number Index Listing

AF- AFOSR-0090-93 .... p 173 N95-10812

CONTRACT NUMBER | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

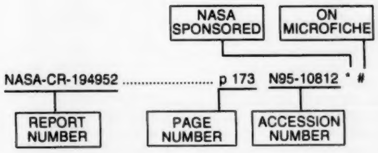
REPORT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 33 NUMBER 6

Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION OFFICE PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Office provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *NASA Open Volumes on Aerospace (NOVA). NOVA* is issued on the 15th of each month and is available from the NASA Center for AeroSpace Information, at the address below.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Office (JT)
International STI Office
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *NOVA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

> **16 SPACE TRANSPORTATION**
>
> Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance.* For space suits see *54 Man/System Technology and Life Support.*

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from NASA CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 76344 Eggenstein-Leopoldshafen, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *NOVA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI). 1995 *STAR* subscription prices are $100.00/domestic and $125.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $70.00/domestic and foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

IMPORTANT NOTICE

For users not registered at the NASA CASI, prepayment is required. Additionally, a shipping and handling fee of $1.00 per document for delivery within the United States and $9.00 per document for delivery outside the United States is charged.

For users registered at the NASA CASI, document orders may be invoiced at the end of the month, charged against a deposit account, or paid by check or credit card. NASA CASI accepts American Express, Diners' Club, MasterCard, and VISA credit cards. There are no shipping and handling charges. To register at the NASA CASI, please request a registration form through the NASA Access Help Desk at the address or numbers below.

SCAN Goes Electronic!

If you have NASA Mail or if you can access the Internet, you can get biweekly issues of *SCAN* delivered to your desk—top absolutely free!

Electronic SCAN takes advantage of computer technology to alert you to the latest aerospace-related, worldwide scientific and technical information that has been published.

No more waiting while the paper copy is printed and mailed to you. You can review *Electronic SCAN* the same day it is released! And you get all 191—or any combination of—subject areas of announcements with abstracts to browse at your leisure. When you locate a publication of interest, you can print the announcement or electronically add it to your publication order list.

Electronic SCAN
Timely
Flexible
Complete
Free!

Start your free access to *Electronic SCAN* today. Over 1,000 announcements of new reports, books, conference proceedings, journal articles . . . and more—delivered to your computer every two weeks.

For instant access via Internet:
ftp.sti.nasa.gov
gopher.sti.nasa.gov
listserv@sti.nasa.gov

For additional information:
